MGI Awards Exploratory Drilling Contract to ThermaPrime

Yuchengco-led Maibarara Geothermal, Inc. (MGI) awarded to ThermaPrime Drilling Corporation (TDC) the contract for its 2026–2027 exploratory drilling campaign. The program will explore geothermal resources in the undrilled sectors of MGI's geothermal service contract, located across the provincial boundaries of Batangas and Laguna, that may be developed for a new geothermal generation facility.

A signing ceremony led by MGI President F. G. Delfin, Jr. and TDC President and Chief Operating Officer (COO) Anthony M. Mabasa was held on July 27, 2026 in Pasig City. MGI is a joint venture of Yuchengco-led PetroGreen Energy Corporation (65%), ACEN Corporation (25%) and PNOC-Renewables Corporation (10%). TDC is a wholly-owned subsidiary of First Balfour, Inc., a member of the Lopez Group of Companies.

From left to right: MGI EVP & COO Maria Victoria M. Olivar, MGI President Francisco G. Delfin Jr, ThermaPrime President & COO Anthony M. Mabasa, and ThermaPrime Head of Business Development Ronaldo B. Tablante

MGI EVP & COO Maria Victoria M. Olivar declared "The country needs more geothermal power for its baseload generation, weather-indifferent availability, and its clean and renewable nature. But building new geothermal plants requires large upfront costs, long lead times, and various technical risks. We are thus pleased to tap ThermaPrime with its highly-skilled and experienced workforce and well-maintained rig and equipment in our drilling campaign where some of the initial and most complicated risks in geothermal energy development are often encountered."

Under the contract, TDC will provide its Drilling Rig 7 to execute the exploration program of three firm and one contingent wells with planned depths of 2,100 to 3,000 meters in accordance with international safety and operational standards. Rig mobilization is scheduled for September 2026, with drilling to commence in October and the campaign targeted for completion by May 2027.

TDC President & COO Antonio Mabasa said "We are deeply grateful to MGI for this opportunity to fulfill their well drilling requirements and look forward to working with their team. We are delighted to be part of this important project not only because it is crucial to MGI's expansion goals but our collaborative efforts are consistent with our own Group's core purpose, that is – forging collaborative pathways for a decarbonized and regenerative future.

About Maibarara Geothermal, Inc.

Maibarara Geothermal, Inc. (MGI) is a subsidiary of PetroGreen Energy Corporation (PGEC), the renewable energy arm of PetroEnergy Resources Corporation (PERC), a publicly listed company in the Philippines. MGI is the developer and operator of the 32 MW Maibarara Geothermal Power Project. For more information, visit www.petroenergy.com.ph.
