## NOTICE OF REGULAR ANNUAL STOCKHOLDERS' MEETING

### TO OUR STOCKHOLDERS:

**NOTICE IS HEREBY GIVEN** that the Regular Meeting of the Stockholders of PetroEnergy Resources Corporation (the "Company"), will be held **on July 27, 2023 at 4:00 p.m.**, to be called, conducted and presided virtually or via online/remote communications by the presiding officer at the Company's principal office address, 7<sup>th</sup> Floor, JMT Building, ADB Avenue, Ortigas Center, Pasig City, with the following agenda:

1. Certification of Service of Notice;
2. Determination of Quorum/Call to Order;
3. Approval of Minutes of the last Regular Stockholders' Meeting held on July 28, 2022;
4. Approval of Management Report and the 2022 Audited Financial Statements contained in the 2022 Annual Report;
5. Confirmation and Ratification of all acts, contracts and investments made and entered into by Management and/or the Board of Directors during the period July 28, 2022 to July 27, 2023;
6. Election of Members of the Board of Directors for 2023-2024:
  - a. Approval of the retention and reelection of Mr. Eliseo B. Santiago and Mr. Cesar A. Buenaventura as Independent Directors.
7. Appointment of External Auditors;
8. Other matters; and
9. Adjournment.

Stockholders as of Record Date **June 15, 2023** will be entitled to notice of, and to vote at, the Annual Meeting.

Pursuant to the alternative modes of notice as provided for in the Securities and Exchange Commission's NOTICE dated March 13, 2023, this notice to Stockholders shall be published in the business section of two (2) newspapers of general circulation, in print and online format, for two (2) consecutive days not later than 21 days before the scheduled meeting. The Information Statement, Management Report, SEC Form 17-A, Minutes of the Annual Stockholders Meeting for the year 2022 and other pertinent meeting documents shall be made available in the Company's website ([www.petroenergy.com.ph](http://www.petroenergy.com.ph)) and via PSE Edge.

The Regular Annual Stockholders' Meeting shall be held virtually or via online/remote communication. The stockholders shall be allowed to cast their votes by proxy, or by remote communication, or *in absentia* pursuant to Section 49 of the Revised Corporation Code of the Philippines and SEC Memorandum Circular No. 6-2020.

To participate in the Annual Meeting, stockholders must register from **9:00 a.m. of July 15, 2023** until **5:00 p.m. of July 24, 2023** through the following link: [http://petroenergy.com.ph/investor\\_relations](http://petroenergy.com.ph/investor_relations) and follow the steps provided therein. The procedures for participation via remote communication and in absentia may be found in the said link and in **Annex "A"** of the Information Statement.

Stockholders who wish to appoint proxies may submit proxy forms until **5:00 p.m. of July 24, 2023** to the Office of the Corporate Secretary at 7<sup>th</sup> Floor, JMT Building, ADB Ave., Ortigas Center, Pasig City or by email to [corpaffairs@petroenergy.com.ph](mailto:corpaffairs@petroenergy.com.ph). Validation of proxies will be held on **July 24, 2023**. **A sample proxy form (attached as Annex "B") will be enclosed in the Information Statement for your convenience.**

  
**ATTY. SAMUEL V. TORRES**  
Corporate Secretary

**RATIONALE AND BRIEF DISCUSSION OF THE AGENDA  
2023 ANNUAL STOCKHOLDERS' MEETING  
(THE "ANNUAL STOCKHOLDERS' MEETING")**

**1. Call to Order**

The Chairman of the Board of Directors (or the Chairman of the Meeting, as the case maybe) (the "Chairman") will call the meeting to order.

**2. Determination of Quorum/Report on Attendance**

The Corporate Secretary (or the Secretary of the Meeting, as the case may be) (the "Secretary") will certify that the written Notice for the meeting was duly sent to stockholders of record, including the date of publication and the newspaper where the notice was published. He will also certify that a quorum exists, and the Stockholders representing at least a majority (or 2/3 in certain cases required by the Revised Corporation Code) of the outstanding capital stock, present in person or by proxy, constitute a quorum for the transaction of business.

Pursuant to Sections 23 and 57 of the Revised Corporation Code and SEC Memorandum Circular No. 6, Series of 2020, stockholders may participate and vote through remote communication or in absentia. Stockholders may register by submitting the requirements via email at [corpaffairs@petroenergy.com.ph](mailto:corpaffairs@petroenergy.com.ph) and vote in absentia on the matters for resolution at the meeting. Stockholders who will vote in absentia, as well as those who will participate by remote communication, shall be deemed present for purposes of quorum.

Please refer to **Annex "A"** Procedures and Requirements for Voting and Participation in the 2023 Regular Annual Stockholders' Meeting for complete information on remote participation or voting in absentia, as well as on how to join the livestream for the 2023 ASM.

**3. Approval of the Minutes of the last Stockholders' Meeting held on July 28, 2022**

The Minutes of the Meeting held on July 28, 2022 , showing the agenda items discussed and the resolutions passed thereat, as well as the Meeting's record of attendance, are posted and can be viewed at the PetroEnergy Resources Corporation website: [www.petroenergy.com.ph](http://www.petroenergy.com.ph).

**4. Approval of Management Report and the 2022 Audited Financial Statements**

The Report summarizes the milestones and key achievements of PetroEnergy Resources Corporation ("PERC" or the "Company") and provides a clear picture of how PERC achieved its goals and strategic objectives for the year 2022. The highlights of PERC's audited financial statements are explained in the President and Chief Executive Officer's Report and in the Definitive Information Statement. Copies of the 2022 Audited Financial Statements, which were previously approved by the Board of Directors, were also submitted to the Securities and Exchange Commission (SEC) and the Bureau of Internal Revenue.

**5. Confirmation and Ratification of all acts, contracts and investments made and entered into by Management and the Board of Directors during the period July 28, 2022 to July 27, 2023.**

The actions for approval are those taken by the Board and/or its Committees and/or the Management since the Annual Stockholders' Meeting on July 28, 2022 until July 27, 2023, including the approval of the internal procedures for participation in meetings and voting through remote communication or in absentia. Agreements, projects, investments, treasury-related matters and other matters covered by disclosures to the SEC and the Philippine Stock Exchange will likewise be presented for approval. The acts of the officers were those taken to implement the resolutions of the Board and/or its Committees or made in the general conduct of business.

**6. Election of Seven (7) members of the Board of Directors (including Independent Directors) for 2023-2024**

At its meeting held on June 16, 2023, the Corporate Governance Committee, as the standing committee of the Board of Directors constituted for the purpose of reviewing and evaluating the qualifications of persons nominated to become members of the Board of Directors (including the Independent Directors), and pursuant to the provisions of the Code of Corporate Governance for Publicly-Listed Companies, as the same are adopted in the Company's 2017 Manual on Corporate Governance, reviewed the candidates for directorship to ensure that they

have all the qualifications and none of the disqualifications for nomination and election as members of the Board of Directors.

The seven (7) nominees will be submitted for election to the Board of Directors by the stockholders at the Annual Stockholders' Meeting. The profiles of the nominees are provided in the Definitive Information Statement for the Annual Stockholders' Meeting.

Each shareholder is entitled to one (1) vote per share multiplied by the number of Board seats to be filled, *i.e.* seven (7), and may cumulate his/her votes by giving as many votes as he/she wants to any candidate, provided that the total votes cast shall not exceed the total votes to which he/she is entitled. In the event the votes cast by a stockholder exceeds that to which he/she entitled to vote, the Corporate Secretary, in his discretion, shall deduct such votes cast by the stockholder in favor of any nominee as may be necessary under the circumstances.

In the event that there would only be seven (7) nominees to fill seven (7) seats in the Board, the Chairman shall direct the Corporate Secretary to cast all votes in favor of those nominated, except the votes of stockholders who object to the said casting of votes, which objection is supported by majority of the stockholders present or represented in the meeting.

Retention and reelection of Mr. Eliseo B. Santiago and Mr. Cesar A. Buenaventura as Independent Directors. Under the Company's Manual on Corporate Governance and as warranted by the SEC Memorandum Circular No. 19, Series of 2016, the Independent Directors may be retained and reelected upon meritorious justification/s and Stockholders' approval.

#### **7. Appointment of the Company's External Auditors**

The Company's Audit Committee assessed and evaluated the performance for the previous year of the Company's external auditors, SYCIP GORRES VELAYO & CO. (SGV). Based on the Audit Committee's endorsement, the Board of Directors will recommend the reappointment of SGV, a SEC-accredited auditing firm and among one of the top in the country, as the Company's external auditors for 2023.

A resolution for the appointment of the Company's external auditors for 2023 shall be presented to the stockholders for approval.

#### **8. Other Matters**

The Chairman will inquire whether there are other relevant matters and concerns to be discussed.

#### **9. Adjournment**

Upon determination that there are no other relevant matters to be discussed, the meeting will be adjourned on motion duly made and seconded.

**PETROENERGY RESOURCES CORPORATION  
INFORMATION STATEMENT**

**A. GENERAL INFORMATION**

**1. Date, Time and Place of Meeting of Security Holders**

The Regular Annual Stockholders' Meeting of PetroEnergy Resources Corporation ("PERC" or the "Company") will be held on Thursday, **July 27, 2023 at 4:00 p.m.**, to be called, conducted and presided virtually or via online/remote communication by the presiding officer at the Company's principal office address at 7<sup>th</sup> Floor, JMT Building, ADB Avenue, Ortigas Center, Pasig City. [http://petroenergy.com.ph/investor\\_relations](http://petroenergy.com.ph/investor_relations).

**Mailing Address** – 7<sup>th</sup> Floor, JMT Building, ADB Avenue, Ortigas Center, Pasig City 1605

The approximate date on which this Information Statement is first to be sent or given to security holders is on **July , 2023**.

**WE ARE NOT ASKING YOU FOR A PROXY AND YOU ARE  
REQUESTED NOT TO SEND US A PROXY.**

**2. Dissenter's Right of Appraisal**

There are no corporate matters or actions that will entitle dissenting stockholders to exercise their right of appraisal as provided under Title X, Section 80 of the Revised Corporation Code of the Philippines.

Although the following actions are not among the matters to be taken up during the **2023** Regular Annual Stockholders' Meeting, the stockholders are herein apprised of their appraisal rights pursuant to Title X of the Philippine Corporation Code. A stockholder shall have the right to dissent and demand payment of fair value of the share in case he voted against the following proposed corporate actions:

- a. any amendment to the articles of incorporation has the effect of changing or restricting the rights of any stockholders or class of shares, or of authorizing preferences in any respect superior to those outstanding shares of any class, or extending or shortening the term of corporate existence;
- b. sale, lease, exchange, transfer, mortgage, pledge or other disposition of all or substantially all of the corporate property and assets;
- c. merger or consolidation; and
- d. investment of corporate funds for any purpose other than the primary purpose of the Company.

As provided under Section 81 of the Revised Corporation Code, a dissenting stockholder who votes against a proposed corporate action may exercise the Right of Appraisal by making a written demand to the Company for the payment of the fair value of his/her shares held within thirty (30) days from the date on which the vote was taken: Provided, That failure to make the demand within such period shall be deemed a waiver of his/her Right of Appraisal. If the proposed corporate action is implemented, the Company shall pay the dissenting stockholder, upon surrender of the certificate or certificates of stock representing the his/her shares, the fair value thereof as of the day before the vote was taken, excluding any appreciation or depreciation in anticipation of such corporate action. If, within sixty (60) days from the approval of the corporate action by the stockholders, the dissenting/withdrawing stockholder and the Company cannot agree on the fair value of the shares, it shall be determined and appraised by three (3) disinterested persons, one of whom shall be named by the stockholder, another by the Company, and the third by the two (2) thus chosen. The findings of the majority of the appraisers shall be final, and their award shall be paid by the Company within thirty (30) days after such award is made: Provided, no payment shall be made to any dissenting stockholder unless the Company has unrestricted retained earnings in its books to cover such payment. Upon payment by the Company of the agreed or awarded price, such stockholder shall forthwith transfer the shares to the corporation.

**3. Interest of Certain Persons in Matters to be Acted Upon**

The incumbent directors or officers of the Company, since the beginning of the last fiscal year, do not have substantial interest, direct or indirect, by security holdings or otherwise, in any matter to be acted upon. None of the incumbent directors informed the Company in writing that he/she intends to oppose any action to be taken during the annual meeting of the stockholders.

## **B. CONTROL AND COMPENSATION INFORMATION**

### **4. Voting Securities and Principal Holders Thereof:**

- a) Number of Common Shares Outstanding as of May 31, 2023: **568,711,842**  
 Number of Vote each share is Entitled: **One (1) vote per share**

Of the total outstanding common capital stock as of May 31, 2023, **567,544,353** shares (or **99.79%**) are owned by Filipino citizens, while 1,167,489 shares (or **0.21%**) are owned by Foreigners.

- b) All stockholders as of **June 15, 2023** are entitled to notice and to vote at the Regular Annual Stockholders' Meeting.
- c) Manner of Voting

Section 7 of Article III of the By-Laws of the Company provides that the stockholders may vote at all meetings the number of shares registered in their respective names either in person or by proxy executed in writing. Section 6 of the same Article provides that no proxy shall be recognized unless presented to the Secretary for inspection and registration at least three (3) calendar days before the date of said meeting (for the 2023 Regular Annual Stockholders' Meeting, the proxy should be presented to the Corporate Secretary not later than 5:00 p.m. on July 24, 2023). The By-Laws of the Corporation does not require notarization of proxies.

In the same vein, Section 23 of the Revised Corporation Code of the Philippines and Section 7, Article III of the Corporation's By-Laws provide that each stockholder may vote in any of the following manner:

- 1) he/she may vote such number of shares for as many persons as there are Directors to be elected;
  - 2) he/she may cumulate said shares and give one candidate as many votes as the number of Directors to be elected multiplied by his/her shares;
  - 3) he/she may distribute them, on the same principle, among as many candidates as he/she may see fit. In any of these instances, the total number of votes cast by the stockholders should not exceed the number of shares owned by him/her as shown in the books of the Corporation multiplied by the total number of Directors to be elected.
- d) Security ownership of certain record and beneficial owners and management.

- 1) Security ownership of certain record and beneficial owners of more than 5% of Registrant securities as of May 31, 2023:

Title of Class	Name, Address of record Owner and relationships With the Issuer	Name of Beneficial Owner and relationship with the record owner	Citizenship	No. of Shares Held	%
Common	PCD Nominee Corp. G/F MSE Bldg., 6767 Ayala Ave., Makati City	PCD Nominee* (Various stockholders-beneficially owned by the participants of the PCD)	Filipino and Non-Filipino	528,001,270	92.84%
Common	Others	(Various stockholders-no holders of 5%)	Filipino	40,710,572	7.16%
<b>TOTAL</b>				<b>568,711,842</b>	<b>100.00%</b>

- \*Under PCD account, the following companies owned more than 5%:
- a. RCBC Securities, Inc. – 294,016,107 or 51.70% of the Company's outstanding capital stock. The current nominee of RCBC Securities, Inc. is Mr. Jose Luis F. Gomez. (Under RCBC Securities, Inc. with 5% of the Registrant securities). The breakdown of the shareholdings are as follows:
    - a. GPL Holdings, Inc. – 55,218,121 shares or 9.71%
    - b. House of Investments, Inc. – 143,662,864 shares or 25.26%
    - c. RCBC Capital, Inc. – 60,978,808 shares or 10.72%
    - d. Various Stockholders – 34,156,314 shares or 6.01%
  - b. RCBC Trust and Investments Division – 64,739,717 shares or 11.38% of the Company's outstanding capital stock. RCBC Trust and Investments are trust accounts between RCBC and Beneficial Owners. The corporate acts of RCBC are carried out by its management through the guidance of its Board of Directors. Ms. Helen Y. Dee is the current Chairman of the Company.
  - c. Malayan Insurance Company, Inc. – 30,103,023 shares or 5.29% of the Company's outstanding capital stock. Mr. Paolo Y. Abaya is the President and Chief Executive Officer of the Company.

2) Security Ownership of Management (as of May 31, 2023):

The following are the number of shares owned and of record by the Directors, the Chief Executive Officer and each of the key officers of the Company and the percentage of shareholdings of each:

Title of Class	Name of Beneficial Owner Name and Position	Amount and Nature of Beneficial Ownership	Citizenship	Percent of Class
Common	Helen Y. Dee Chairman	Direct 10,662 Indirect 5,006,574	Filipino	0.88%
Common	Milagros V. Reyes President/Director	Indirect 125,695	Filipino	0.02%
Common	Maria Mercedes M. M. Corrales Independent Director	Direct 1	Filipino	-
Common	Cesar A. Buenaventura Independent Director	Direct 1,300 Indirect 366,844	Filipino	0.04%
Common	Lorenzo V. Tan Director	Direct 1	Filipino	-
Common	Yvonne S. Yuchengco Director/Treasurer	Indirect 435,956	Filipino	0.08%
Common	Eliseo B. Santiago Independent Director	Direct 1	Filipino	-
Common	Francisco G. Delfin, Jr. Vice President	Direct 55,000 Indirect 27,500	Filipino	0.02%
-	Samuel V. Torres Corporate Secretary	-	Filipino	-
-	Louie Mark R. Limcolioc Asst. Corporate Secretary Compliance Officer	-	Filipino	-
-	Maria Cecilia L. Diaz de Rivera Chief Financial Officer	-	Filipino	-
-	Maria Victoria M. Olivar AVP for Operations	-	Filipino	-
-	Vanessa G. Peralta AVP – Corporate Communication	-	Filipino	-
<b>Total</b>		<b>6,029,534</b>		<b>1.06%</b>

As of May 31, 2023, the Company's directors and executive officers owned an aggregate of 6,029,534 shares equivalent to 1.06%.

3) Voting Trust Holders of 5% or more

The Company is not aware of any voting trust or similar arrangement among persons holding more than 5% of a class of shares.

e) Changes in Control

There has been no change in the control of the Company since the beginning of last fiscal year. The Company has no existing voting trust or change in control agreements.

**5. Directors and Executive Officers:**

The members of the Board of Directors are elected at the general meeting of stockholders and shall hold office for a term of one (1) year or until their successors shall have been duly elected and qualified.

The Board Committee Members and other Officers of the Company, unless removed by the Board of Directors, shall serve as such until their successors are elected or appointed.

**a. Directors and Executive Officers**

The following are the names, ages, positions and periods of service of Directors and Executive Officers:

NED - Non-Executive Director

\* Cumulative Term of Nine (9) Years for Independent Directors elected prior to 2012 is reckoned from 2012.

The following are the Chairperson and Members of the Corporate Governance Committee for 2022-2023.

Chairperson	–	Ms. Maria Mercedes M. Corrales (Independent Director)
Members	–	Mr. Cesar A. Buenaventura (Lead Independent Director) Mr. Eliseo B. Santiago (Independent Director)

Below are the incumbent directors, except for Mr. Carlos G. Dominguez III, who has been nominated to the Board of Directors of the Company for the ensuing year 2023-2024. The nominees have been approved for election by the Corporate Governance Committee at its meeting on June 16, 2023.

- |    |                             |   |                           |
|----|-----------------------------|---|---------------------------|
| 1. | Ms. Helen Y. Dee            | – | Regular Director          |
| 2. | Ms. Milagros V. Reyes       | – | Regular Director          |
| 3. | Ms. Yvonne S. Yuchengco     | – | Regular Director          |
| 4. | Mr. Lorenzo V. Tan          | – | Regular Director          |
| 5. | Mr. Cesar A. Buenaventura   | – | Lead Independent Director |
| 6. | Mr. Carlos G. Dominguez III | – | Independent Director      |
| 7. | Mr. Eliseo B. Santiago      | – | Independent Director      |

**Nomination and Election of Independent Director:**

All independent directors were nominated by Atty. Dan Dyonne Eminiano Q. Gonzales, who has no relations with the Nominees. (Please see attached **Annex “C”** for the Certification of Independent Directors).

Mr. Dominguez, 77, Filipino, is a product of the Ateneo De Manila University (“Ateneo”) with a degree in Bachelor of Arts, Economics. He pursued his Master of Arts, Business Management from the same university and Post-Graduate Studies under the Stanford Executive Program.

Mr. Dominguez was appointed to several posts in the Government, foremost of which are: as Secretary of the Department of Finance and Chairman of the Land Bank of the Philippines from 2016 to 2022; as Secretary of the Department of Agriculture from 1987 to 1989; and as Secretary of the Department of Environment and Natural Resources from 1986 to 1987.

He was a recipient of the Order of Lakandula Rank of Bayani (Grand Cross) from the President of the Philippines and the Order of the Rising Sun Grand Cordon (1st Class) from the Emperor of Japan.

Mr. Dominguez likewise served in the private sector, as follows: President, Lafayette (Philippines) Inc.; Independent Director, RCBC Capital Corporation; Director, Manila Electric Corporation; President, Phil. Associated Smelting and Refining Corporation; Director, Northern Mindanao Power Corporation; Chairman, RCBC Capital Corporation; Director, United Paragon Mining; Chairman and President, Philippine Airlines;

President, Phil. Tobacco Flue Curing Redrying Corporation; President, Baesa Redevelopment Corporation; President, Retail Specialist, Inc.; President, BPI Agricultural Development Bank, Vice President, Bank of the Philippines Islands (BPI); Executive Vice President, Davao Fruits Corporation; Executive Vice President, AMS Farming Corporation; Finance Manager, Rubicon, Inc.; and Management Trainee, First National City Bank.

#### **Justification for the retention and reelection of Mr. Eliseo B. Santiago as Independent Director**

**MR. ELISEO B. SANTIAGO's** term as Independent Director is sought to be extended in 2023. Below are the noteworthy justifications that would merit his retention and reelection as Independent Director:

Mr. Santiago has demonstrated expertise in the oil and power industry and extensive knowledge of the Company. His multi-discipline experience across global, regional and local markets contributed to the Company's success in his tenure as Independent Director. During his career, he held responsibility for large businesses within the Shell Group, Citadel Pacific Ltd. and Clark Development Corporation. He successfully led business transformations through innovative strategies, strong focus on operational excellence and by developing people and teams.

Undoubtedly, the Company greatly benefits from Mr. Santiago's guidance as a well-respected member of the business community and through his expertise in the oil and power industry. It would be in the Company's best interest for Mr. Santiago to continue providing the same guidance and wisdom as the Company's Independent Director.

#### **Justification for the retention and reelection of Mr. Cesar A. Buenaventura as Independent Director**

Mr. Cesar A. Buenaventura's term as Independent Director is sought to be extended in 2023. Below are the noteworthy justifications that would merit his retention and reelection as Independent Director:

Mr. Buenaventura graduated from the University of the Philippines with a degree in BS Civil Engineering. As a Fullbright scholar, he received his Master's Degree in Civil Engineering from Lehigh University in Bethlehem, Pennsylvania. He started his profession in the construction business with David M. Consunji. Thereafter, in 1956, Mr. Buenaventura went on to commence a long-standing career at Pilipinas Shell, serving as the first Filipino Chairman & CEO of the Shell Group of Companies in the Philippines, from 1977 to 1990. He remains as a Director of said company to date. Among the many appointments and positions that Mr. Buenaventura has held and continues to hold, one of the most notable would be as a Member of the Monetary Board of the Central Bank of the Philippines, representing the private sector from 1981 to 1987. He was also a Founding Member of the Board of Trustees of the Makati Business Club, a Member of the Board of Regents of the University of the Philippines from 1987 to 1994 and of the Board of Trustees of the Asian Institute of Management from 1994 to 1997. Mr. Buenaventura has also been honored with numerous awards and accolades, including being made an Honorary Officer of the Order of the British Empire (OBE) by HM Queen Elizabeth II.

#### **Assessment by the Corporate Governance Committee on the Qualifications of the Nominees for Directorship**

The Corporate Governance Committee passed upon their qualifications and found no disqualifications, as provided for in the By-Laws, the 2017 Manual on Corporate Governance, the Board Charter, and in accordance with SRC Rule 38.

The Company has adopted SRC Rule 38, and compliance therewith has been made. Only nominees whose names appear on the Final List of Candidates shall be eligible for election as Independent Director. No further nominations shall be entertained or allowed on the floor during the actual annual stockholders' meeting.

The nominees for independent directors were advised of SEC Memorandum Circular No 5, Series of 2017 on the required submission of Certificate of Qualification of Independent Directors (the "Certificate of Qualification") that should include, among others, disclosure of any pending criminal or administrative investigation or proceedings, positions held in Government-Owned and Controlled Corporations and the required written permission or consent from the head of Department/Agency for those in government service. As disclosed by the nominees in their respective Certificate of Qualification, each nominee possesses all of the qualifications and none of the disqualifications.

The Independent Directors were likewise advised of the Company's 2017 Manual on Corporate Governance and the Securities and Exchange Commission (SEC) Memorandum Circular No. 19, Series of 2016 on the term limits for Independent Directors, both of which state that independent directors shall serve a maximum cumulative term

of nine (9) years reckoned from 2012. Such term limit, however, may be extended upon meritorious justification/s and stockholders' approval.

### **Business Experiences during the Past five (5) Years and Educational Background.**

**b. Legal Proceedings**

The Company is not aware of any legal case, presently or during the last five (5) years, involving the present members of the Board of Directors or Executive Officers or their property before any court of law or administrative body in the Philippines or elsewhere. Moreover, the Company has no information that the above named persons have been convicted by final judgment of any offense punishable under the laws of the Philippines or of any other country.

**c. Significant Employees**

The Corporation has no employee who is not an executive officer that is expected to make a significant contribution to the business. The Corporation values its human resources. It strives to develop and maintain a safe, healthy, challenging, rewarding, participative, and fair working environment for all employees, and intends to utilize their full talents and expertise through effective selection, mentoring and development. The Company likewise seeks to offer career opportunities to qualified employees, regardless of gender, belief, ethnic or regional origin, and physical condition. It expects each employee act as a team player and do his or her share in achieving the Corporation's set goals.

**d. Family Relationships**

Ms. Helen Y. Dee and Ms. Yvonne S. Yuchengco are siblings.

**e. Certain Relationships and Related Transactions**

Parties are considered to be related if one party has the ability, directly or indirectly, to control the other party or exercise significant influence over the other party in making financial and operating decisions. A related party relationship also exists between and/or among entities, which are under common control with the reporting enterprises and its key management personnel, directors, or its shareholders. In considering each related party relationship, attention is directed to the substance of the relationship, and not merely the legal form. Related parties may be individuals or corporate entities.

As a good corporate practice, the Company discloses its related party transactions, if any, in its Audited Financial Statements (AFS). In this regard, please refer to the 2020 Consolidated AFS, Note 25, for the significant transactions with related parties.

**f. Disagreement with the Company**

No Director has resigned from the Board of Directors since the date of the last meeting of shareholders due to disagreement with the Company on any matter relating to its operations, policies and practices.

		2023 est	17,667,883	7,022,321	12,357,101	37,047,304

The Company's fiscal year ends in the month of December of every year. Estimated compensation of all Directors and officer for the year 2023 is P37.047 million.

There are no other arrangements pursuant to which any director of the Company was compensated, or is to be compensated, directly or indirectly.

The Board of Directors receives a per diem of P5,000.00, per meeting attended. No warrants or options were granted to the Directors and Officers from 2001 to 2023.

Aside from those mentioned above, there are no other arrangements pursuant to which any director of the Company was compensated, or is to be compensated, directly or indirectly, other than those stated in the above table during the Company's last completed fiscal year and the ensuing year for any service provided as an executive officer or member of the Board of Directors.

There is no director, executive officer, nominee for director, beneficial holder and family member involved in any business transaction of the Company.

## 7. External Auditors

### a. Appointment of External Auditors

The Company's external auditor is SyCip Gorres Velayo & Co. (SGV & Co.), with office address at SGV Building, 6760 Ayala Avenue, Makati City, Philippines. SGV & Co. has been reappointed during the Company's recent Annual Stockholders' Meeting on July 28, 2022. The representatives of SGV & Co. have always been present at the Annual Stockholders' Meeting held during prior years and shall likewise be present during for this year's Stockholders' Meeting to respond to appropriate questions or make statements with reference to matters for which their services were engaged.

The Company is in compliance with SRC Rule 68 paragraph 3 (b)(1V) requiring the rotation of external auditors or engagement partners who have been engaged by the Company for a period of five consecutive years and the mandatory two-year cooling-off period for the re-engagement of the same signing partner or individual auditor. The engagement partner who conducted the audit for 2022, Ms. Ana Lea C. Bergado, has not been involved as engagement partner for more than five (5) years.

### b. Audit and Other Related Fees

#### *Audit and Other Related Fees*

The Audit Committee approved SGV & Co.'s fees based on the services rendered and the amount paid from the previous year's audit fees.

**c. Changes and Disagreements with Accountants on Accounting and Financial Disclosure.**

The Company has not changed SGV & Co. as its auditor and has not had any disagreements on any matter relating to accounting principles or practices, financial statement disclosures, or auditing scope or procedure during the last three years or any subsequent interim periods.

**8. Compensation Plans**

No action is to be taken with respect to any plan pursuant to which cash or non-cash compensation may be paid or distributed.

**C. ISSUANCE AND EXCHANGE OF SECURITIES**

**9. Authorization or Issuance of Securities Other than for Exchange**

There is no matter or corporate action to be taken up in the meeting with respect to issuance of securities.

**10. Modification or Exchange of Securities**

No modification of Outstanding Securities

**11. Financial and Other Information**

The Company's financial statements for the year ended December 31, 2022 and Management's Discussion and Analysis or Plan of Operations are contained in the Management Report portion of this Information Statement.

**12. Mergers, Consolidation, Acquisition and Similar Matters**

Not Applicable

**13. Acquisition or Disposition of Property**

On April 24, 2023, PERC signed a Share Purchase Agreement with EEIPC to acquire, upon fulfillment of all conditions therein, the latter's common shares in PGEC, PSC and PWEI.

**14. Restatement of Accounts**

None

## **D. OTHER MATTERS**

### **15. Actions with Respect to Reports**

During the scheduled Regular Annual Stockholders' Meeting, the following shall be submitted to the stockholders for their approval:

- a) The Minutes of the Annual Stockholders' Meeting held on July 28, 2022;
- b) Approval of Management Report and the 2022 Audited Financial Statements contained in the 2022 Annual Report.
- c) Confirmation and Ratification of all acts, contracts and investments made and entered into by Management and/or Board of Directors during the period of July 28, 2022 to July 27, 2023.

- 1) Constitution of various Committees and Appointment of Chairman and Members: (Organizational Meeting held on July 28, 2022), such as:

Audit Committee

- |          |   |   |
|----------|---|---|
| Chairman | - | Cesar A. Buenaventura (Lead Independent Director) |
| Members  | - | Maria Mercedes M. Corrales (Independent Director) |
|          | - | Helen Y. Dee (Non-Executive Director)             |

Corporate Governance Committee

- |          |   |   |
|----------|---|---|
| Chairman | - | Maria Mercedes M. Corrales (Independent Director) |
| Members  | - | Cesar A. Buenaventura (Lead Independent Director) |
|          | - | Eliseo B. Santiago (Independent Director)         |

Board Risk Oversight Committee

- |          |   |   |
|----------|---|---|
| Chairman | - | Eliseo B. Santiago (Independent Director)         |
| Members  | - | Cesar A. Buenaventura (Lead Independent Director) |
|          | - | Lorenzo V. Tan (Non-Executive Director)           |

- 2) Board Approvals

- i) Regular BOD July 28, 2022
  - a. Dividend Declaration – PhP0.05 per share
  - b. Retention and re-election of Mr. Eliseo B. Santiago and Mr. Cesar A. Buenaventura as Independent Directors

  - a. Approval of the 2022 Audited Financial Statements
- vii) Special Regular BOD May 15, 2023
  - a. Approval of the 2023 First Quarter Financial Statements (SEC Form 17-Q)

**16. Matters Not Required to be Submitted**

- a) Proof of the required notice of the meeting.
- b) Proof of the presence of a quorum.

**17. Amendments of Charter, By-Laws and Other Documents**

None

**18. Other Proposed Action**

None

**19. Voting Procedures**

Section 23 of the Revised Corporation Code of the Philippines and Section 7 of Article III of the By-Laws of the Corporation provides that:

“At all elections of Directors, each stockholder may vote the shares registered in his name in person or by proxy for as many persons as there are Directors, or he may cumulate said shares and give one candidate as many vote as the number of Directors to be elected multiplied by the number of his shares shall equal, or he may distribute them on the same principle among as many candidates as he shall see fit, provided, however, that the whole number of votes cast by him shall not exceed the number of shares owned by him as shown on the Company’s stock transfer books multiplied by the whole number of Directors to be elected.”

With respect to amendments to various provisions of Articles of Incorporation, the approval of the stockholders owning two-thirds (2/3) of the outstanding capital stock is required. Other items that need action of the stockholders require simple majority.

The voting procedure for election and approval of corporate actions in which Stockholders’ approval will be required shall be by “*viva voce*”, unless voting by ballot is decided upon during the meeting.

The methods by which votes will be counted, except in cases where voting by ballots is applicable, voting and counting shall be by “*viva voce*”. If by ballot, counting shall be supervised by external auditors and transfer agent.

However, considering that the Company will dispense with the physical attendance of its stockholders, the Board of Directors has adopted an internal procedure for the voting and participation in the 2023 Annual Stockholders’ Meeting, which covers both electronic voting *in absentia* and proxy voting. For the detailed steps and guidelines, please see attached **Annex “A” – Procedures and Requirements for Voting and Participation in the 2023 Annual Stockholders’ Meeting.**

After reasonable inquiry and to the best of my knowledge and belief, I certify that the information set forth in this report is true, complete and correct. This report is signed in the City of Pasig on June 19, 2023.

**PETROENERGY RESOURCES CORPORATION**

By:

**ATTY. SAMUEL V. TORRES**

Corporate Secretary

**Undertaking to Provide Annual Report**

**UPON THE WRITTEN REQUEST OF A STOCKHOLDER, THE COMPANY UNDERTAKES TO FURNISH SAID STOCKHOLDER WITH A COPY OF THE ANNUAL REPORT ON SEC FORM 17-A, FREE OF CHARGE. ANY WRITTEN REQUEST FOR A COPY OF SEC FORM 17-A SHOULD BE ADDRESSED TO THE FOLLOWING:**

Office of the Corporate Secretary

# **MANAGEMENT REPORT TO STOCKHOLDERS**

## **PART I - BUSINESS AND GENERAL INFORMATION**

**INCORPORATED HEREIN ARE THE AUDITED CONSOLIDATED FINANCIAL STATEMENTS OF PETROENERGY RESOURCES CORPORATION FOR THE YEAR ENDED DECEMBER 31, 2022 WITH THE CORRESPONDING STATEMENT OF MANAGEMENT RESPONSIBILITY and 2023 FIRST QUARTERLY REPORT.**

### **CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE**

For the last five (5) years, there have been no disagreements with the independent accountant on any matter of accounting principles or practices, financial statement disclosures or auditing scope or procedure. During the two most recent fiscal years, the independent accountant has not resigned, was dismissed or otherwise ceased performing services for the Company. (Please see discussion on page 17 of the Information Statement Item 7 – Independent Public Accountant, Audit and Audit-Related Fees.

#### **Item 1 - Business Development**

PetroEnergy Resources Corporation (“PERC” or “PetroEnergy” or the Parent Company) is a publicly-listed domestic corporation. Its registered office and principal place of business is 7/F, JMT Building, ADB Avenue, Ortigas Center, Pasig City.

PERC was organized on September 29, 1994 as Petrotech Consultants, Inc. to provide specialized technical services to its then parent company, Petrofields Corporation, and to companies exploring for oil in the Philippines.

In 1997, PERC simultaneously adopted its present name and changed its primary purpose to oil exploration and development and mining activities. Subsequently in 1999, PERC assumed Petrofields’ oil exploration contracts in the Philippines and the Production Sharing Contract covering the Etame discovery block in Gabon, West Africa.

On August 11, 2004, PERC’s shares of stock were listed at the PSE by way of introduction.

In 2009, following the enactment of Republic Act No. 9513, otherwise known as the “Renewable Energy Act of 2008” (RE Law), PERC amended its articles of incorporation to include among its purposes the business of generating power from renewable sources such as, but not limited to, biomass, hydro, solar, wind, geothermal, ocean and such other renewable sources of power.

On March 31, 2010, PERC incorporated PetroGreen Energy Corporation (PetroGreen or PGEC), its 67.5%-owned subsidiary (90%-owned in 2021) to act as its renewable energy arm and holding company. PGEC ventured into renewable energy development and power generation through its subsidiaries and affiliate: (a) Maibarara Geothermal, Inc. (MGI, 65%-owned) - owner and developer of the 20 MW Maibarara Geothermal Power Project (MGPP-1) in Santo Tomas, Batangas and its expansion, the 12 MW MGPP-2; (b) PetroSolar Corporation (PetroSolar, 56%-owned) - owner and developer of the 50MW<sub>DC</sub> Tarlac Solar Power Project (TSPP-1) in Tarlac City and its 20 MW<sub>DC</sub> expansion, TSPP-2; (c) PetroWind Energy, Inc. (“PetroWind”, 40%-owned) – owner and developer of the 36 MW Nabas Wind Power Project (NWPP-1) in Nabas and Malay, Aklan. d) Buhawind Energy Northern Luzon Corporation, Buhawind Energy Northern Mindoro Corporation and Buhawind Energy East Panay Corporation (40% owned) - owner and developer of the proposed ~2000 MW Northern Luzon, ~1000 MW Northern Mindoro and ~1000 MW East Panay Offshore Wind Power Projects, respectively.

MGI and PetroSolar are effectively indirect subsidiaries of PetroEnergy through PetroGreen. PetroGreen owns majority of the voting power of MGI and PetroSolar. PetroEnergy, PetroGreen, MGI and PetroSolar are collectively referred to as the “Group” and were incorporated in the Philippines.

PERC entered into a Share Purchase Agreement with EEI Power Corporation for the purchase of the latter’s entire shareholdings in PWEI, PSC and PGEC. Upon completion of all the documentary requirements for the transfer of the subject shares, PERC will become 20% equity interest owner in PWEI, 44% equity interest owner in PSC and 75% equity interest owner in PGEC.

#### **Business of Issuer**

##### **Description of Business**

The Group’s four (2) main energy businesses are: (1) upstream oil exploration and (2) development, and power generation from renewable energy resources such as, (a) geothermal, (b) solar, and (c) wind, through the Group’s affiliate, PetroWind.

## **(1) Upstream Oil Exploration and Development**

Oil and gas are buried several thousands of meters underneath the earth. The explorationist, therefore, neither sees nor touches his target. This lack of physical access, however, is compensated by applying various geological, geophysical, and geochemical exploration tools.

In the actual drilling of hydrocarbon, computer-guided drilling rigs dig rock layers several kilometers below the surface. In offshore exploration and production, robot submarines are used to emplace and control subsea equipment and materials. These intensive application of modern technology requires large amounts of capital. Oil exploration companies worldwide had adopted the prudent strategy of pooling together in a consortium to pursue exploration in order to distribute risk and minimize financial exposures.

The common financial arrangement between host countries and the exploration companies is the sharing in costs and revenues from the sale of the hydrocarbon products. The host country partakes in the costs by allowing the explorationists to recover an agreed percentage of the historical costs before the net proceeds are divided between the government and the consortium.

### **Oil Exploration and Development Projects**

The principal properties of the Company consist of various oil areas located in the Philippines and in Gabon. Petroleum production is on-going in the Etame (Gabon) concession, while the other petroleum concessions in the Philippines are still in the advances exploration stages or pre-development stages. The following are a brief description and update on these projects.

### **Foreign Operations**

#### **Gabon, West Africa**

The Group holds approximately 2.53% participating interest in the Exploration and Production Sharing Contract covering the Etame block in Gabon, West Africa (the “Etame Marin Permit”). The other parties in the consortium are Addax Petroleum Etame, Inc. (33.90%) and VAALCO Gabon (Etame), Inc. (63.58%) (the “Gabon Consortium”), are leaders in their respective areas of operation. VAALCO is the Consortium’s operator, and is in charge of conducting the exploration and production activities in the Gabon contract area.

The EPSC is a contract with the Gabonese Government that gives the holder of the said EPSC exclusive rights and obligations to perform exploration, exploitation, and production activities and in the case of the consortium, within the Etame Marin Permit area.

In August 2021, the Consortium entered into a Bareboat Charter Agreement and Operating Agreement with World Carrier Offshore Services Corporation (World Carrier) to provide and operate a Floating Storage and Offloading (FSO) unit at the Etame Marin field for up to eight (8) years with additional option periods available upon the expiration of the current 20-year Floating Production, Storage and Offloading (FPSO) contract with BW Offshore in September 2022.

In December 2021, the consortium commenced a four-well drilling program in the Etame, Avouma and North Tchibala fields using the Borr Norve jack-up drilling rig, aimed to sustain field production to above 20,000 BOPD.

Etame-8H sidetrack was completed in February 2022. Avouma-3H sidetrack was completed in April 2022, South Tchibala-1HB sidetrack in July 2022, and North Tchibala-2H sidetrack in November 2022. Workovers were also conducted on Ebouri-2H, North Tchibala-1H and Southeast Etame-4H wells within 2022. This resulted in an increase in overall crude production of ~18,000-20,000 BOPD by the end of 2022.

Given the extended EPSC period, the Consortium is currently firming up the most feasible Integrated Field Development Plan (IFDP) to extract the remaining recoverable oil volumes until at least 2028 up to 2038 (final extension). This IFDP may include: 1) production from sour oil reserves, 2) outfield drilling opportunities, and 3) facility maintenance strategies.

#### **Update on Production**

Production was routed to the Petroleo Nautipa, the spread-moored (FPSO) vessel from the Etame, Avouma-Southeast Etame-North Tchibala and Ebouri platforms, and from the wells tied to the subsea Etame manifold. The produced oils were processed and exported from the FPSO, which had a storage capacity of one million barrels of oil (MMBO).

Throughout 2022, facility reconfiguration works were being completed in parallel for the hook-up and commissioning of the new FSO vessel Teli, which replaced the Petroleo Nautipa FPSO vessel in mid-October 2022. The FSO vessel is now operational and receiving crude from all Etame Marin platform wells. The two (2) old subsea wells – Etame-6H and Etame-7H – which were originally connected directly to the old Petroleo Nautipa FPSO, have been hooked-up to the FSO last December 30, 2022. Final punchlist items are currently being completed.

Crude production comes from four (4) oil fields (Etame, Avouma, Ebouri and North Tchibala).

In 2022, total crude production reached 5.94 MMBO. The Consortium managed 11 liftings, resulting in net crude export of 5.133 MMBO, with crude oil market prices ranging from US\$ 76 – US\$ 133 per barrel.

In 2021, total crude production reached 5.42 MMBO. The Consortium managed 11 liftings, resulting in net crude export of 5.867 MMBO, with crude oil market prices ranging from US\$ 50 – US\$85 per barrel.

In 2020, total crude production reached 6.57 MMBO. The Consortium managed 11 liftings, resulting in a net crude export of 6.02 MMBO, with crude oil market prices ranging from US\$ 17 – US\$66 per barrel.

Since the Gabon oilfield has been put on-line in 2002, a total of 130 MMBO have been extracted to date over the last 20 years.

### **Philippine Operations**

#### **SC 6-A - Octon-Malajon Block**

This is one of the first exploration areas in offshore Palawan. It includes about 165,000 hectares of relatively shallow water areas where a string of wells has found non-commercial oil accumulations in varied reservoir horizons. DOE granted in June 2009 the final 15-year extension of the SC-6A service contract.

In 2019, consortium operator Philodrill completed seismic interpretation and mapping works for the northern portion of the Octon-Malajon block, using recent and old SC 6A seismic data and subsurface data from the adjacent Galoc

In 2020, Philodrill engaged Dubai-based consultants LMKR to conduct Quantitative Interpretation (QI) works to determine possible drilling opportunities in the northern portion of the block (Malajon field); the results of which were provided to the consortium in January 2021.

In March 31, 2021, Philodrill gave notice to the DOE that the Joint Venture has elected not to enter the 12<sup>th</sup> year of the final 15-year term of SC 61 and consequently surrender the Service Contract. The limited term remaining in the SC 6-A until its expiry in February 2024 exacerbated by the Covid-19 situation, greatly hampered the timely execution of the programs that the Joint Venture envisage undertaking to pursue appraisal programs and potential development opportunities in the area.

The DOE formally approved the relinquishment of SC 6-A on September 05, 2022.

Following the above, as of December 31, 2021, the Group has written –off the P159.298 million deferred cost.

PERC held a 16.667% participating interest in SC 6-A

#### **SC 14-C2 - West Linapacan, Northwest Palawan**

West Linapacan was discovered in the early 1990s. It produced oil from 1992 to 1996, peaking at 18,000 BOPD, before it was shut-in due to early water incursion.

The SC 14C2 Consortium, led by operator Philodrill Corp., negotiated with a potential farmee for the drilling of potential drilling targets, in exchange for a majority share and Operatorship of SC 14C2. This farm-in is subject to the approval of the Department of Energy (DOE).

While the consortium awaited the farmee’s completion of the farm-in documentation, Philodrill continued to do in-house G&G work over at the West Linapacan area at the interim. For compliance, a “Transition Work Program and Budget, covering November 2020 to March 2021 was submitted to the DOE in November 2020 and was approved.

Throughout the second half of 2021 and 2022, the SC 14-C2 consortium proceeded with a third-party technical evaluation of the West Linapacan B field, to assess potential production opportunities. SC 14-C2 is due to expire in December 2025.

Due to the limited term remaining, the Group assessed the recoverability of the investment included in “Wells, platforms and other facilities” account under “Property, plant and equipment” and recorded Impairment loss amounted to ₱144.40 million in 2021 (nil in 2020 and 2019).

As of December 31, 2021 and 2020, the investment amounts to ₱61.92 million and ₱206.32 million, respectively.

PERC holds a 4.137% participating interest in SC 14C2.

### **SC 75 – Offshore Northwest Palawan**

Service Contract 75 (SC 75) was signed on December 27, 2013 with partners PXP Energy Corporation (50%) and PNOC-Exploration Corporation (35%). The block covers the West Philippine Sea with an area of 616,000 hectares.

On October 14, 2020, the Department of Energy (DOE) issued a formal notice to the SC 75 consortium, lifting the Force Majeure imposed since September 2015. Through this letter, the consortium was notified to resume its Work Program commitments under SC 75, including the committed ~1,000 sq.km 3D seismic survey over the identified leads in SC 75.

On January 06, 2022, the SC 75 consortium officially engaged Shearwater Geoservices Ltd. for the ~1,100 sq.km 3D seismic survey over SC 75 using the M/V Geo Coral seismic vessel. However, the programmed 3D seismic acquisition campaign was suspended on April 06, 2022 after Operator PXP Energy Corporation received a written directive from the DOE to put all exploration activities on hold until the Security, Justice and Peace Coordinating Cluster (SJPPC) issues the necessary clearance to proceed. On April 11, 2022, PXP declared a Force Majeure event over the suspended seismic survey.

The SC 75 consortium is awaiting further instructions from the DOE, while all contracted vessels and personnel for the seismic survey have since demobilized from the SC 75 area.

As of December 31, 2022 and 2021, the corresponding percentages of the Group’s participation in the various Petroleum SC areas are as follows:

Gabonese Oil Concessions	2.525%
SC 14C2 - West Linapacan	4.137%
SC 75 - NW Palawan	15.000%

The oil revenues are derived from Gabon Operations. All contractual obligations with the Gabonese Government are complied with. The Philippine contracts are in exploration stage and some contracts are being farmed out to reduce risk inherent to the business.

## **(2) Development, and power generation from Renewable Energy Resources**

### ***(a) Geothermal Energy***

#### **Maibarara Geothermal Power Project**

*Geothermal Renewable Energy Service Contract (GRESK) No. 2010-02-012*

Following the DOE’s Philippine Energy Contracting Round for Geothermal in 2009, PetroEnergy signed the Service Contract for the Maibarara Geothermal Power Project (MGPP) on February 1, 2010. PetroEnergy then conducted pre-development activities from 2010 to 2011. In order to carry out the development and operations of the MGPP, PetroEnergy (through its subsidiary, PetroGreen) then created Maibarara Geothermal, Inc. (MGI) along with Trans-Asia Oil and Energy Development Corporation (“Trans-Asia”), subsequently renamed as PHINMA Energy Corporation or “PHINMA”, and now known as ACEN Corporation or (“ACEN”) and PNOC Renewable Corporation (PNOC RC), with 65%, 25%, and 10% equity ownerships, respectively.

In June 2019, ACEN, the energy platform of Ayala Corporation, completed the acquisition of PHINMA, including PHINMA’s 25% share in MGI.

#### **20 MW Maibarara-1 Geothermal Power Plant (MGPP-1)**

The DOE confirmed the commerciality of the 20-MW MGPP-1 in 2011, allowing MGI to proceed with the MGPP’s development stage, involving 1) the drilling of two (2) wells to complete the steam production and reinjection well capacities, and 2) the construction of the steamfield and power plant facilities. The MGPP-1’s 115kV Transmission Line system was successfully connected to the existing Manila Electric Company (MERALCO) line in September 2013. Upon completion of the reliability and performance testing, the MGPP-1 went on commercial operations on February 8, 2014. All electricity generated are sold to offtaker, ACEN, following the aforementioned acquisition of PHINMA by ACEN.

On February 08-27, 2021, the Maibarara-1 facility had a scheduled minor maintenance shutdown. Various maintenance activities for the unit's mechanical and electrical, and instrumentation facilities, as well as for the switchyard and transmission lines, were carried-out by MGI technical staff and private contractors.

MGPP-1 underwent its second major preventive maintenance shutdowns (PMS) in February 2022; the first having been conducted in 2016.

On the steamfield side, the two (2) production wells dedicated to MGPP-1 operations—Mai-6D and MB-12D—continued to behave consistently with dynamic but sustainable production.

MGPP-1 exported 134.48 GWh and 157.60 GWh of electricity in 2022 and 2021, respectively.

#### 12 MW Maibarara-2 Geothermal Power Plant (MGPP-2)

With the stable performance of the reservoir, MGI decided to pursue an expansion of the MGPP. There was at least 5 MW of excess steam supply from the MGPP-1 wells, and with the ~6 MW capacity of the new well, an expansion of 12 MW was decided and approved in 2015 (MGPP-2).

Major power plant components from Fuji Electric Co. Ltd. ("Fuji", the same supplier as the MGPP-1) were delivered and installed on site from March to April 2017. MGPP-2 was first synchronized to the grid on March 9, 2018, with the full 12 MW attained on March 18, 2018. Reliability tests were then conducted from March 18 to 27, 2018, during which the power plant was on full 12 MW operation.

The Energy Regulatory Commission (ERC) formally notified MGI of the approval of MGPP-2's Certificate of Compliance (COC) application on April 26, 2018. Subsequently, the MGPP-2 was accepted into the Wholesale Electricity Spot Market (WESM) on April 30, 2018 - pegging the MGPP-2's start of Commercial Operations on the same date. This operationally started the application of MGPP-2's Electricity Supply Agreement (ESA) with PHINMA, now ACEN, wherein all of MGPP-2's generated electricity are sold to ACEN.

Workover operations were conducted on production well MB-15D in June 2022. After which, new production well MB-18D was drilled in September 2022 and hooked-up in November 2022. To date, the field's total gross output is now being sustained at ~33 MW.

MGPP-2 exported 70.23 GWh and 93.80 GWh of electricity in 2022 and 2021, respectively.

Both the MGPP-1 and the MGPP-2 are registered with the Board of Investments and are enjoying the incentives under the Renewable Energy Act of 2008.

#### ***(b) Solar***

##### Tarlac Solar Power Project (TSPP)

*Solar Energy Service Contract (SESC) No. 2015-03-115*

The SESC for the TSPP was awarded by the DOE on March 19, 2015. On June 17, 2015, PGEC and affiliate EEI Power Corporation ("EEIPC", 100% subsidiary of EEI Corporation), incorporated PetroSolar to undertake the development of the TSPP.

##### 50 MWDC Tarlac Solar Power Project-1 (TSPP-1)

On June 22, 2015, PetroGreen and solar farm lot owner, Luisita Industrial Park Corporation (LIPCO), executed a Lease Agreement for the 55-hectare solar farm development. This was assigned to PetroSolar on September 15, 2015. As the LIPCO property is within the Central Technopark, which is under the jurisdiction of the Philippine Economic Zone Authority (PEZA), PetroSolar was able to register as an Ecozone Utilities Enterprise on July 28, 2015, entitling it to the incentives available to PEZA locators.

After only four (4) months of ground works, the TSPP-1 was completed by mid-January 2016 and was able to export power to the grid on January 27, 2016. The DOE eventually gave its Certificate of Endorsement (COE) - Feed-in-Tariff (FiT) for TSPP-1, with an official Commercial Operations Date on February 10, 2016. Subsequently, on April 6, 2016, PSC executed its Renewable Energy Payment Agreement (REPA) with the National Transmission Corporation (TransCo), assuring the TSPP-1's revenues from the FiT payment of ₱8.69/kWh from 2016 to 2036.

The total energy exported to the grid was 70.33 GWh and 73.47 GWh in 2022 and 2021, respectively.

#### 20 MWDC Tarlac Solar Power Project (TSPP-2)

On September 17, 2018, the BOI formally awarded to PetroSolar the latter's Certificate of Registration for the 20 MW<sub>DC</sub> TSPP-2. This approval entitles the TSPP-2 to enjoy duty-free importations, and a seven-year Income Tax Holiday (ITH), among others.

After the site construction works for the TSPP-2 were completed in March 2019 and its registration with the WESM was secured from the Independent Electricity Market Operator of the Philippines Inc. (IEMOP) on April 21, 2019, the TSPP-2 started exporting power to the grid on April 22, 2019 as part of its testing and commissioning activities. The Energy Regulatory Commission (ERC) conducted its technical inspections for the TSPP-2 on May 31, 2019, as part of PetroSolar's Certificate of Compliance (COC) for TSPP-2.

On February 27, 2020 and March 18, 2020, the DOE formally issued to PSC the Certificate of Confirmation of Commerciality (COCOC) and the Certificate of Endorsement (COE) for TSPP-2, respectively. The COE is a prerequisite to the issuance of the Certificate of Compliance (COC) by the ERC. The COC will determine the official Commercial Operations Date (COD) for TSPP-2.

The ERC issued a Provisional Approval to Operate (PAO) to TSPP-2 on December 16, 2021, subject to PSC's compliance to 1) public offering requirement and 2) terms under PSC's Point-to-Point application, which was approved by the ERC in a Decision promulgated on April 8, 2022. However, PSC filed its Motion for Reconsideration on April 25, 2022 seeking the ERC's approval to allow PSC to implement its proposed interim connection scheme while the route for the soon-to-be constructed Concepcion-Sta. Ignacia is finalized by the National Grid Corporation of the Philippines (NGCP). The said PAO is valid until December 15, 2022, and sets TSPP-2's WESM COD to January 25, 2022.

TSPP-2 exported 29.46 GWh and 30.48 GWh in 2022 and 2021, respectively.

#### Puerto Princesa Solar Power Project (PPSPP)

*Solar Energy Service Contract (SESC) No. 2017-01-360*

The Service Contract for the Puerto Princesa Solar Power Project (PPSPP) was signed by DOE Secretary Alfonso Cusi on February 27, 2017. The PPSPP aims to put up a 10-20 MW off-grid solar hybrid power facility in Puerto Princesa City, Palawan to meet the increasing electricity demand and address the fluctuating electricity situation in the city through solar power.

PetroGreen has secured all local government endorsements needed for eventual facility development. In January 2020, PGEC was among seven (7) pre-qualified bidders for the 20-MW Palawan Main Grid Competitive Selection Process (CSP) of the Palawan Electric Cooperative (PALECO). On March 12, 2020, PALECO issued a bulletin which states that the submission and opening of bids was postponed until further notice.

On January 18, 2021, PALECO issued a bulletin resuming the Palawan Main Grid 20-MW CSP after a 10-month postponement, with minor revisions to the bid terms as approved by the DOE and the National Electrification Administration (NEA). However, PGEC decided to withdraw from said bidding process, owing to PALECO's final Terms of Reference (TOR), which severely limit the economic feasibility of PGEC's planned investment.

On September 7, 2022, PGEC has sent a letter to DOE for the intention to Relinquish the Service Contract and settled the remaining financial obligations under the SESC. As of December 31, 2022 the DOE has not yet given their official approval of the relinquishment of the said SESC.

#### Enrique T. Yuchengco Bldg. Rooftop Solar Power Project (ETY) – Binondo, City of Manila

On April 29, 2021, PGEC completed its first commercial and industrial (C&I) rooftop solar project for the Enrique T. Yuchengco Bldg. in Binondo, Manila.

The building owner E.T. Yuchengco Inc. (ETY) and project owner PGEC signed a 15-year Rent-to-Own Agreement for a 140.8-kWp solar rooftop facility last January 14, 2021. The rental period commenced upon the project's completion in April 2021. After said 15-year cooperation period, PGEC will turn-over the said rooftop solar facility to ETY free of charge.

The ETY rooftop solar facility exported 0.140 GWh and 0.096 GWh of electricity in 2022 and 2021, respectively.

Bugallon Solar Power Project (BSPP)  
*Solar Energy Operating Contract (SEOC) No. 2022-04-622*

On May 05, 2022, PGEC was awarded a Solar Energy Operating Contract (SEOC) by the DOE for its Bugallon Solar Power Project (BSPP) in Brgy. Salomague Sur, Bugallon, Pangasinan.

For the year, PGEC has completed the Distribution Impact Study (DIS) for the BSPP, which has been approved by the Central Pangasinan Electric Cooperative (CENPELCO), and subsequently endorsed to the National Electrification Administration (NEA) for their approval.

PGEC also secured the Certificate of Non-Overlap (CNO) from the National Commission on Indigenous Peoples (NCIP) for the project, confirming that the project site is outside any ancestral domain and free from any tribal claims.

In parallel, the issuance of the Municipal Resolution endorsing the land reclassification for the BSPP site is still being undertaken by an external legal counsel. Once this is secured, PGEC will lodge its application for the project endorsement by the Pangasinan Sangguniang Panlalawigan (SP) and the Zoning Clearance.

Dagohoy Solar Power Project (DSPP)  
*Solar Energy Operating Contract (SEOC) No. 2022-06-629*

On June 28, 2022, PGEC was awarded a Solar Energy Operating Contract (SEOC) by the DOE for its Dagohoy Solar Power Project (DSPP) in Brgy. San Vicente, Dagohoy, Bohol.

To date, PGEC has secured favorable endorsements for the land reclassification of the DSPP site from the Dagohoy Sangguniang Bayan (SB) last October 2022 and by the Bohol SP last December 2022. Said resolutions are needed to secure the requisite Locational Clearance and Building Permit applications for the DSPP.

NGCP has approved PGEC's application to conduct the SIS for the DSPP via NGCP's Online Transmission Connection Application (OTCA) portal, with the DSPP's SIS proper tentatively scheduled for mid-2023.

While awaiting the SIS conduct, PGEC awarded to Media Construction and Development Corporation (MCDC) the contract for the initial site development works (site grading, access road and drainage construction, perimeter fence and gate). MCDC is targeting completion of site development works by August 2023.

*(c) Wind*

Nabas Wind Power Project (NWPP)  
*Wind Energy Service Contract (WESC) No. 2009-09-002*

The service contract for the Nabas Wind Power Project (NWPP) covers 2,000 hectares of public and private lands in rolling terrain located near the northwestern tip of Panay Island. It lies about 6 km southeast of Caticlan, and electricity-deficient Panay and Boracay islands are natural markets of future power from NWPP.

It was decided that the NWPP will be constructed in two phases: Phase 1 for the existing 36 MW NWPP-1, consisting of 18 Wind Turbine Generators (WTG); while Phase 2 will be a 14 MW development that will have seven (7) WTGs (NWPP-2).

On May 26, 2013, the DOE issued the Confirmation of Commerciality for the 36 MW NWPP-1, making it the third WESC to be declared commercially feasible. Construction of NWPP-1 started in December 2013 and was completed in the first half of 2015.

On June 16, 2015, the DOE released the COE for FIT Eligibility (COE-FIT), endorsing the official start of commercial operation to be June 10, 2015. On August 17, 2015, the ERC approved PWEI's COC for NWPP-1. This confirms the commercial operations date of the wind farm to be June 10, 2015.

The annual total energy exported to the grid were 80.80 GWh, 91.35 GWh and 80.45 GWh in 2022, 2021, and 2020, respectively.

On May 13, 2020, the DOE formally awarded to PetroWind the Certificate of Confirmation of Commerciality (COCOC) for the planned 14-MW Nabas-2 Wind Power Project (NWPP-2). This signifies that NWPP-2 has been approved for construction as being commercially feasible.

In February 17, 2021, the DENR-EMB Region 6 issued the amended Environmental Compliance Certificate (ECC) to PetroWind for NWPP-2, while the Forest Land Use Agreement (FLAG) has been signed by the DENR Central Office in January 04, 2022.

On June 24, 2022, PWEI's NWPP-2 was formally announced as the winning bidder for the 20-MW Visayas wind allocation of the DOE's Green Energy Auction Program (GEAP), for a 20-year offtake term. On September 28, 2022, the DOE issued to PWEI its Certificate of Award for the GEAP wind allocation.

PWEI awarded to VESTAS the WTG Supply, Supervision, and Services Agreements on December 13, 2022 and VESTAS is set to deliver the six (6) NWPP-2 WTGs by the last week of July, 2023. On the other hand, PWEI also awarded and issued the Notice to Proceed (NTP) to EEI Corporation the contract for the Main Balance of Plant (BoP) for the Civil, Electrical (Substation and Switching Station, and Electrical Feeder Lines), including WTG Electro-Mechanical Works installation. Further, the Special Agreement for Protected Areas (SAPA) was officially signed by DENR in early-January 2023. It is the tenurial instrument that gives authority to PWEI to develop NWPP-2 in the approved area for at least 25 years.

*San Vicente Wind Hybrid Power Project (SVWHPP)*  
*Wind Energy Service Contract (WESC) No. 2017-09-118*

On November 11, 2019, the DOE officially awarded to PetroGreen the San Vicente, Palawan WESC. The WESC, effective October 9, 2019, vests PetroGreen with the rights and responsibilities to harness wind energy and develop and operate the corresponding renewable energy facility in the area. The proposed project is situated in the municipality of San Vicente, Palawan, approximately 130 km north of Puerto Princesa.

Activities for the meteorological mast installation program for the San Vicente Wind Hybrid Power Project (SVWHPP) have been put on-hold due to COVID-19-related travel restrictions. Nonetheless, PGEC has secured on May 07, 2020 a Certificate of Non-Coverage (CNC) from the Department of Environment and Natural Resources (DENR) for the mast installation. PGEC also secured a Special Land Use Permit (SLUP) from the DENR on March 09, 2021 for the mast installation in San Vicente.

In December 2020, PGEC's contractor was mobilized to San Vicente, Palawan to carry out the installation works for the 60-meter meteorological mast to be used for the wind measurement campaign of the SVWHPP. The said mast was commissioned and turned-over to PGEC in July, 2021. Since July 2021 up to present, PGEC is continuing with the wind measurement campaign for the SVWHPP to assess the long-term wind resource to support a potential wind-hybrid power project in San Vicente.

*(e) Offshore Wind*

*Northern Mindoro Offshore Wind Power Project*

*Northern Luzon Offshore Wind Power Project*

*East Panay Offshore Wind Power Project*

In 2021, PGEC secured three (3) new Wind Energy Service Contracts (WESC) from the DOE covering three (3) offshore wind blocks, namely 1) Northern Luzon Offshore Wind Power Project (located offshore Ilocos Norte), 2) Northern Mindoro Offshore Wind Power Project (located offshore Occidental Mindoro), and 3) Easy Panay Offshore Wind Power Project (located offshore Iloilo). These projects will be developed by PGEC alongside Danish energy firm Copenhagen Energy A/S (CE) through new Special Purpose Vehicles named BuhaWind Energy Northern Luzon Corporation, Buhawind Energy Northern Mindoro Corporation and Buhawind Energy East Panay Corporation, respectively.

On December 28, 2021, the DOE issued to PGEC its formal endorsements for NGCP's conduct of the System Impact Studies (SIS) for the three (3) offshore wind blocks. The early issuance will help both DOE and NGCP to plan their grid improvements to accommodate large-scale capacities from these offshore wind projects. PGEC also secured DOE Endorsement to Local Government Units / National Government Agencies for the Northern Luzon project in January 2022.

Throughout 2022, PGEC and CE proceeded with several feasibility studies for the three (3) offshore wind blocks, namely 1) desktop wind and met-ocean resource studies, 2) power market study, and 3) desktop site characterization studies in preparation for detailed geophysical and geotechnical studies.

Specifically for the Northern Luzon block, PGEC and CE commenced with additional pre-development studies, namely 1) initial environmental pre-scoping study, 2) SIS application with NGCP, and 3) initial discussions with contractors for on-site wind measurement campaign.

## **Products**

The group's main products are revenues from the electricity sales from renewable energy and crude oil production.

Electricity sales contribute 66.48% of the total revenues as of December 31, 2022. These are currently generated from MGPP-1, MGPP-2, TSPP-1 and TSPP-2.

Oil revenues are derived from PERC's share of producing offshore oil fields in Gabon, West Africa, which contributes 28.46% of the total revenues as of December 31, 2022.

## **Distribution Method**

### ***Electricity Sales***

For Maibarara Geothermal Power Plant (MGPP) Unit 1 (20 MW) and MGPP Unit 2 (12 MW) which started commercial operations on February 8, 2014 and April 30, 2018, respectively, all the energy exported is sold to ACEN Corporation (formerly PHINMA Energy Corporation), a retail electricity supplier (RES), through an electricity supply agreement (ESA).

For the 50 MWdc Tarlac Solar Power Project (TSPP) which started its commercial operations on February 10, 2016 and qualified for the Fee-in-Tariff (FIT) scheme, all energy is exported to the grid and is distributed to all end-users who are connected to the grid. The National Transmission Corp. (TransCo), as the FIT administrator, facilitates the payments to FIT-eligible plants, such as TSPP.

### ***Crude oil***

The Consortium entered into a crude sales agreement with Glencore Energy UK Ltd. where a single buyer is committed to buy based on a pricing scheme that is benchmarked on Dated Brent. Dated Brent represents the value of physical crude oil trading for prompt delivery in the open spot market. With this type of agreement, the Consortium will be assured of its crude oil being purchased at a fixed pricing scheme.

Physical transfer of the oil was effected at the offshore production site from the Floating Production Storage and Offloading Vessel (FPSO) to the buyer's oil tanker. The FPSO was replaced by the FSO in October 2022, carrying out similar functions as the FPSO.

## **Competition**

In the Company's RE business, there is a risk that bigger power producers, particularly those that operate coal power plants, may command lower prices and thus be preferred by potential offtakers over the electricity generation from power generating assets of the Company. To mitigate this risk, long-term contracts have been and will be secured for its RE power projects. MGI has secured a long-term Electricity Supply Agreement with PHINMA, now ACEN Corporation ensuring stable and predictable cash flows for the 20-year duration of the agreement. As for the TSPP-1 and NWPP-1, FIT rates of P8.69/kWh and P7.40/kWh, respectively, have been secured from the DOE, with the approval of the Energy Regulatory Commission (ERC).

For the local oil industry, industry, companies form a consortium to explore certain areas due to high cost of exploration. Competition arises when 2 or more parties bid for a single block offered by the government and have to come up with the best program for exploration. Oil companies with local presence in the Philippines include: The Philodril Corporation, ACEN Corporation formerly, PHINMA Energy, Forum Energy Philippines Corporation, PXP Energy Corporation, among others. The Company formed consortiums with these companies in some Philippine service contracts.

## **Sources and Availability of Raw Materials and Names of Principal Suppliers**

The Company is not into manufacturing and has no need for raw materials for its business.

## **Dependence on a single customer or few customers**

For the MGPP-1 and MGPP-2, Electricity Supply Agreements (ESAs) were signed with PHINMA, now ACEN Corporation for a period of 20 years, wherein it will buy all of the energy exported for a fixed agreed price, re-priced every 5 years. These

ESAs were later on amended in August 23, 2019 effecting, among others, the extension of the electricity supply period for both plants until June 25, 2039.

For the TSPP-1, consequent to the issuance of FIT COC in its favor, PSC entered into a REPA with the TransCo on April 6, 2016. Under the REPA, TransCo shall pay the FIT Rate for all metered generation of PSC-TSPP1 for a period of twenty (20) years from start of Commercial Operations.

On December 22, 2022, a Power Supply Agreement was signed between PetroSolar and SN Aboitiz Power-Magat, Inc. (SNAP-MI). Therein, PetroSolar agreed to supply and sell all power generated by TSPP2 to SNAP-MI, on an energy-based and “as available” basis, from December 26, 2022 until December 25, 2023.

For the oil liftings, these are sold to a single buyer, Glencore Energy UK Ltd.

#### **Transaction with and/or Dependence on Related Parties**

Please see “Item 12” for discussion on Related Party transactions.

#### **Summary of principal terms and expiration dates of all patents, trademarks, copy rights, licenses, franchises, concessions and royalty agreements**

Aside from the Petroleum Properties and Renewable Energy Service Contracts discussed, there are no other patents, trademarks, copyrights, licenses, franchises, concessions, and royalty agreements entered into by the Group as of December 31, 2022 and 2021.

#### **Need for Government approvals of Principal Products**

Oil industry in the Philippines is regulated by the policies and rules and regulations provided by government agencies like the Departments of Energy (DOE), Finance and Environment and Natural Resources. Moreover, generation and sale of electricity need prior approval from the Energy Regulatory Commission (ERC).

#### **Effect of existing or probable governmental regulations and Costs and Effects of Compliance with Environmental Laws**

For the Renewable Energy Projects, the Company conducted extensive studies to determine the environmental impact and possible mitigating actions to reduce, if not, eliminate potential threats to the environment connected with the power plant operations. In all the power plant sites, active coordination and consultation with local government units and other stakeholders are also being carefully observed.

For MGPP, the Environmental Compliance Certificate (ECC) was issued on August 10, 2010. For TSPP, the ECC issued by the DENR-EMB Region III on August 4, 2015 as amended June 13, 2018 prompting the commencement of ground works on the solar park site and project development. For PWEI, the ECC for the 50 MW NWPP-1 was released by the DENR Region 6 office in June 2012 as amended on 29 March 2021.

The ECCs, being a planning tool guides the respective sites through the Pollution Control Officers (PCOs) in complying with the related environmental rules and regulations. Each power plant religiously implements its respective Environmental Management System to further improve and go beyond compliance in support of the sustainable development goals of the country. Thus, compliance with governmental regulations is embedded in the operations of all the RE projects.

#### **Amount spent on research and development activities**

A. Renewable Energy Research and Development

As of December 31, 2021, the group has Deferred development costs amounting to ₱74.12 million representing costs incurred for the prospective solar and wind power projects.

B. Oil Exploration and development – bulk of the additions to the Wells and Platforms Account (Note 11 of the Consolidated AFS) pertains to PERC’s share in the drilling program.

#### **Total Number of Employees and Number of Full-Time Employees**

As of December 31, 2022, there were 155 regular of the Group. The Group may hire employees in the next twelve (12) months due to increased volume of business, specifically for its renewable energy business.

Below is the break-down of regular employees of PERC and its subsidiaries

PetroEnergy	16
PetroGreen	31
Maibarara	80

PetroSolar	9
PetroWind	19
Total Employees	155

## **Risk Factors**

### ***Risks Relating to Gabon and the Philippines***

#### *Political, Economic and Legal Risks in the Philippines*

The Philippines has, from time to time, experienced military unrest, mass demonstrations, and similar occurrences, which have led to political instability. The country has also experienced periods of slow growth, high inflation and significant depreciation of the Peso. The regional economic crisis which started in 1997 negatively affected the Philippine economy resulting in the depreciation of the Peso, higher interest rates, increased unemployment, greater volatility and lower value of the stock market, lower credit rating of the country and the reduction of the country's foreign currency reserves. There has also been growing concerns about the unrestrained judicial intervention in major infrastructure project of the government.

There is no assurance that the political environment in the Philippines will be stable and that current or future governments will adopt economic policies conducive to sustained economic growth.

Continuous and peaceful operations in the project areas are dependent on the Company's good relationships with the host local government units. Presently, the Company's renewable energy projects are located in three provinces: Batangas for its geothermal energy project; Tarlac, for its solar power project; and Aklan for the wind energy project. Currently, a new solar service contract has been secured in Puerto Princesa City. The local governments in these areas-- from the provincial, municipal and barangay levels, including the Palawan Council for Sustainable Development (PCSD) -- are supportive of these projects. Local government endorsements and resolutions have therefore not been a problem in these areas. The Company's oil projects, on the other hand are located in Palawan and Visayas. Since these are oil exploration projects, getting local government support have been challenging.

To ensure that host local government units give their support and to mitigate the risk of their withdrawal of support of the Company's projects, the Company invests in corporate social responsibility projects (CSR). These CSR projects are geared towards providing long term and sustainable development to the communities within the host local government units, particularly in the areas of health, education, and livelihood.

#### *Political, Economic and Legal Risks in Gabon*

Despite its internal problems, the State of Gabon is said to be politically stable by African standards. Gabon was led by President Omar Bongo, the continent's second longest-serving head of state, who has been in power since 1967 until his death in 2009. Through an election held soon after, his son, Ali-Ben Bongo Ondimba, succeeded him as President. Its political stability and ample natural resources have helped make Gabon a wealthy nation compared to the rest of Sub-Saharan Africa. It must be noted however that Gabon's wealth is not distributed equitably, and almost half of the population lives below the poverty line.

Gabon held a presidential election in August 2016, and the change in administration also introduced new fiscal terms that could likewise change and negatively impact the Company's business. A new Hydrocarbon Law, which took effect since 2014, introduces new fiscal terms for all upstream operators – which include increased government shares and royalties, decreased cost recovery, and the imposition of 35.0% income tax on profit oil – all of which would significantly work in favor of the Gabonese Government. The Consortium was, however, able to secure favorable concessions from the Gabonese Government, like the non-imposition of the 35% income tax on profit oil, which has now been permanently lifted for all upstream oil operators.

The oil industry is the key to Gabon's economy although the government is trying to distance itself from oil dependence and focus on non-oil businesses such as forestry products due to concerns over the life of the oil reserves.

The general political situation in and the state of economy of Gabon may thus influence the growth and profitability of the Company. Any future political or economic instability in Gabon may have a negative effect on the financial results of the Company.

Furthermore, the continuity of the Gabon Operations is dependent on the validity of the permits and licenses issued the Gabon Consortium. A stable regulatory environment that would allow unhampered operations in Gabon is crucial to the Company's continuous profitability.

### *Technical Risk*

The petroleum exploration industry is a high risk, capital intensive and highly speculative industry. Risks in upstream petroleum exploration include 1) prospectivity of the concession area in terms of actually finding oil in commercial quantity, 2) varying oil prices and project economics, 3) joint venture structuring and key personnel management, among others. Finding oil in commercial quantity is highly dependent on appropriate geologic conditions for oil to accumulate, and be able to be extracted by drilling. Once commercial oil is found, one has to make capital expenditures in terms of field appraisal (determining the extent of the reserves) for proper field development. The Company mitigates this high degree of technical risk through the use of advanced and sophisticated tools, engagement of experienced consultants, and constant intensive discussion and information-sharing with joint venture partners.

From late 2016 onwards, much of the discussions of the Consortium have been over the economic life of the Etame Marin complex. To date, the Consortium believes that it has already recovered 50.00% of the estimated ultimate recoverable reserves, which means that production from the Gamba sand reservoir may soon start to decline as a natural consequence. The planned future drillings in the area are mostly from the deeper Dentale sands. These sands are not as well characterized as the Gamba, thus, putting uncertainty in its production. Two (2) wells are currently producing from these sands.

Moreover, there is not much area to produce the Gamba from within the Etame Marin Permit as some acreage has been relinquished to the government in 2012. There is also the current issue on production of sour gas (hydrogen sulfide gas) within the Gamba sands in the northern Ebouri production sector. Souring usually happens when extraction of oil has already reached deeper in the reservoir.

Souring of wells is a concern which may extend further to the other production fields as extraction continues. Currently, all wells that turned sour are kept shut since the facilities are not designed to handle the corrosive oil. Production from these sour wells may be realized either through installation of processing platforms or re-installation of sour-resistant pipes at the surface facilities. Both options entail high costs.

These risks are key considerations for the Consortium's on-going studies and discussions for the Integrated Field Development Plan (IFDP) for the remainder of the field life. The IFDP aims to 1) augment long-term production by strategic drilling program/s to near-field areas and deeper targets, 2) address the risk of souring by evaluating options for crude sweetening, and 3) optimize the crude handling capacity for more profitable crude sales.

### *Operational Risk*

The production of crude oil may involve many risks such as breakdown of equipment, unexpected levels of output or efficiency, natural disasters, and the need to comply with further directions of the relevant government authority. Moreover, like most oil discovery areas, there are concerns over how long these reserves will last. Any of the foregoing circumstances could significantly reduce revenues or increase the cost of operating the contract area.

As the field matures, the existing wells age and become more prone to mechanical fatigue and failures. In case these wells fail, the Consortium conducts workover operations on these wells to repair these damages and restore lost crude production. These are budgeted and conducted at regular year intervals in anticipation of potential or unexpected failures for the existing wells.

The Consortium entered into a crude sales agreement with Glencore Energy UK Ltd. where a single buyer is committed to buy based on a pricing scheme that is benchmarked on Dated Brent. With this type of agreement, the Consortium will be assured of its crude oil being purchased at a fixed pricing scheme. Aside from this, the Consortium also plans to balance its operating expenses and to increase oil production to ensure that revenues do not drop drastically as a result of low oil prices.

The Consortium is currently examining the most optimal drilling program to ensure maximum recoverable oil, while ensuring positive returns for the consortium members. This includes an optimal drilling program in which the Consortium could further extract as much of the Gamba and Dentale reservoirs and address the sour oil from the affected wells while keeping capital expenditures and operating expenses at manageable levels to hope for positive returns. These are all heavily dependent on the global oil price trends.

An equally crucial aspect of the IFDP is the efficiency of the storage and offtake facilities for the produced crude oil from the Etame Marin field. The current FPSO contract with BW Offshore will expire in September 2022, with the current vessel, *Petroleo Nautipa* having been operating at the field since first oil in 2002. With an aging vessel only capable of handling ~700,000 bbls of crude and suffering various downtimes resulting to curtailed production, the Consortium is looking to replace the *Petroleo Nautipa* FPSO with a new vessel, which is capable of handling ~1.1 MMbbls of crude. This switch to a new vessel will help to ensure that the field is able to handle and export more crude, while also lessening fewer vessel-related downtimes and assuring unhampered production for the consortium's upcoming drilling campaigns.

### Risk of Venturing into Renewable Energy Projects

The following risks on the Group's ventures in geothermal, wind and solar energy developments may have significant effect in the Group's business, financial condition, and results of operations:

- Offtake risks or market risks;
- Breakdown or failure of power generation equipment, steam supply equipment, transmission lines, pipelines or other necessary equipment or processes, leading to unplanned outages and other operational issues;
- Flaws in the design of equipment or in the construction of an electric generation or steam supply plant;
- Problems with the quality and quantity of geothermal, wind, and solar resources;
- Material changes in law or in governmental permit requirements;
- Operator error;
- Performance below expected levels of output or efficiency;
- Labor disputes, work stoppages, and other industrial actions by employees affecting the projects directly;
- Pollution or environmental contamination affecting the operation of the plants;
- Planned and unplanned power outages due to maintenance, expansion and refurbishment;
- The inability to obtain required governmental permits and approvals including the FIT allocation;
- Opposition from local communities and special interest groups;
- Social unrest and terrorism;
- Engineering and environmental problems;
- Construction and operational delays, or unanticipated cost overruns;
- Force majeure and other catastrophic events such as fires, explosions, earthquakes, floods and acts of terrorism and war that could result in forced outages, personal injury, loss of life, severe damage or destruction of a plants and suspension of operations;
- Grid failure and
- Denial of Land Conversion Application with the Department of Agrarian Reform.

The group cannot assure that future occurrences of any of the events listed above or any other events of a similar or dissimilar nature would not significantly decrease or eliminate the expected revenues from any of its power or steam generating assets, or significantly increase the costs of operating any such assets.

The Group avoids or mitigates the operational risks through proper maintenance of machinery and equipment and by making sure that Operations and Maintenance (O&M) contracts with competent third-party service providers are always active and effective. The Group also ensures that the operating units would hire competent personnel. Design flaws are addressed by professional indemnity insurances that could cover losses from the same. Constant communication with regulators and maintenance of good relations with them help in planning ahead for any potential change in regulations or regulatory requirements. For the social aspects of the projects, the Group maintains a good Corporate Social Responsibility Program, with focus on health, education and livelihood programs, thus helping in achieving host community acceptance, and reduction of social unrest and terrorism. The Group also ensures that the operating units are adequately covered by sabotage and terrorism insurance policies.

### *Foreign Currency Risk*

A portion of the Company's revenues are denominated in U.S. Dollars. However, the obligation and expenses of the local areas which do not contribute revenues to the Company are denominated in U.S. Dollars. In addition, a substantial portion of the Company's future capital expenditures in Gabon are denominated in currencies other than the Peso. During the last decade, the Philippine economy has from time to time experienced instances of devaluation of the Peso and limited availability of foreign exchange. Recurrence of these conditions may adversely affect the financial condition and results of operations of the Company. The Company does not normally hedge its foreign currency exposures as it believes that it has sufficient revenues in U.S. Dollar and/or Philippine Peso, as the case may be, to answer for corresponding obligations.

### *Equity Partnership Risk*

The Company has been participating in various oil exploration and development activities in Gabon and the Philippines with other parties. The Company is currently engaged in a production sharing contract with an equity share of 2.525% covering the Etame discovery block in the Atlantic shelf along with its Gabon Consortium partners. Such equity partnership requires the sharing in costs and revenues from the sale of the Etame crude oil. This situation may involve special risks associated with the possibility that the equity partner (i) may have economic or business interests or goals that are inconsistent with those of the Company; (ii) take actions contrary to the interests of the Company; (iii) be unable or unwilling to fulfill its obligations under the production sharing contract or sales contract; or (iv) experience financial difficulties. These conflicts may adversely affect the Company's operations. To date, the Company has not experienced any significant problems with respect to its equity partners.

In the Philippines, the Company, through its subsidiary, PetroGreen, partnered with different foreign and local companies. For MGI, the Company (65.00% through PetroGreen) partnered with PHINMA (25.00%) (PHINMA was acquired by the AC Energy, Inc. and has been renamed to ACEN Corporation or “ACEN”) and PNOG RC (10.00%); in PWEI, the Company (40.00% through PetroGreen) partnered with EEIPC (20.00%) and CapAsia ASEAN Wind Holdings Cooperatief U.A. (40.00%) (CapAsia was later acquired by BCPG Public Company Ltd. And renamed to BCPC Wind Cooperatief U.A.); and for PSC, the Company(56.00%) partnered with EEIPC (44.00%).

In September 2022, PetroGreen, PetroEnergy and Kyuden Internation Corporation (Kyuden), a wholly-owned subsidiary of Japan’s Kyushu Electric Power Co., Inc., executed the Subscription Agreement and Shareholders’ Agreement. Pursuant to the said documents, PGEC issued 712,251,720 shares in two tranches in favor of Kyuden equivalent to 25% ownership interest in PetroGreen..

This situation may involve special risks associated with the possibility that the equity partner (i) may have economic or business interests or goals that are inconsistent with those of the Company; (ii) take actions contrary to the interests of the Company; (iii) be unable or unwilling to fulfill its obligations under its offtake contracts; or (iv) experience financial difficulties. These conflicts may adversely affect the Company’s operations. Further to these, the Company continues to evaluate joint venture or partnership opportunities.

Cooperation among the joint venture and consortium partners on business decisions is crucial to the sound operation and financial success of these joint venture companies. Although the Company believes it maintains good relationships with its partners, there is no assurance that these relationships will be sustained in the future or that problems will not develop. For example, the Company’s joint venture partners may be unable or unwilling to fulfill their obligations, take actions contrary to its policies or objectives, or may experience financial difficulties. If any of these events occur, the businesses of these joint ventures could be severely disrupted, which could have a material adverse effect on PERC’s business, financial condition and results of operations.

In order to avoid or mitigate these risks, PERC employs care and prudence in its partner selection. The backgrounds of would be partners are heavily scrutinized; attention is given in knowing the personalities behind the potential partners, their culture, and their industry reputation. The shareholders’ agreements or joint venture agreements contain penalty provisions in case a partner refuses or fails to fulfill its obligations. There are likewise exit mechanisms that could be utilized in case the relations among partners become sour.

#### Risks Relating to Change in Regulations

The Group is compliant with the laws, rules and regulations in the Philippines and Gabon that enable it to legally operate or participate in the energy projects it has invested in. In the same manner, the relevant permits, endorsements, clearances applicable to the respective energy projects which the Group has invested in have either been secured or are currently being processed. These permits are based on present rules, regulations and laws of the Philippines and Gabon. There is a risk that the Philippines and Gabon will change any rule, regulation and law that may affect the Group’s and its projects’ existing permits. To mitigate this risk, the Group constantly monitors the policy direction of both the governments of the Philippines and Gabon in order to anticipate any change in regulation that may affect the Group and its projects.

#### Risks relating to the Environment

The Group’s projects involve energy exploration, development and utilization, which entail putting up of infrastructure, erection and installation of equipment and facilities, extraction and utilization of natural resources –all of which may involve temporary disturbances to the environment. To minimize and mitigate the risks involved in these temporary disturbances, the Group ensures that environmental risks (such as erosion and siltation) have been considered during the planning stage of the construction activities and thus the necessary mitigating measures and plans have been incorporated in the projects’ environmental management plan. In the case of the NWPP, the PWEI installed slope protection measures to prevent erosion and degeneration of the land.

#### Risk from Natural Calamities

The Philippines is prone to natural calamities such as typhoons, floods, volcanic eruptions, earthquakes, mudslides, and droughts, and thus, the Company’s operations and those of its subsidiaries and affiliates may be disrupted by the occurrence of such natural calamities, and could thereby materially and adversely affect the Company’s and its subsidiaries’ and affiliate’s ability to generate revenues. There is no assurance that the insurance coverage maintained by the Company and its subsidiaries and affiliates would adequately compensate them for all damages and economic losses resulting from natural calamities including possible business interruptions. To mitigate this, insurance policies are regularly reviewed and updated

as are necessary in accordance with industry standards. Furthermore, the Company and its subsidiaries and affiliates formulated emergency preparedness plans in order to lessen the impact of natural calamities to their respective operations.

#### Risk from the COVID-19 and Similar Pandemic

Manpower for operations may be affected due to state-imposed self-quarantine, partial lockdown, and curfew. To address this, the Company has devised an alternative working arrangement of work-from-home and skeletal workforce scheme for its employees. Business support units were equipped with appropriate protocols and digital tools to be able to support the operations unit and ensure unhampered business operations. Due to travel restrictions, scheduled power plant maintenance by third-party foreign suppliers may also be affected. In preparation for this, the Company has communicated with its Operations and Maintenance (O&M) providers to strengthen its remote support and provide contingencies. PERC has also ensured that the insurance coverage maintained for the Company, its subsidiaries and affiliates, would adequately compensate for any business interruptions. In addition, there is also the risk relating to compliance with regulatory permits and submissions due to changes in work schedule both in public and private sectors. As a response, PERC regularly monitors the advisories from relevant Government agencies to ensure that requirements are submitted on time.

#### **Financial Risk Management Objectives and Policies**

The Group's principal financial instruments include cash and cash equivalents, financial assets at FVTPL, receivables, restricted cash, loans payable, accounts payable, accrued expenses and dividends payable. The main purpose of these financial instruments is to fund the Group's working capital requirements.

The Group manages and maintains its own portfolio of financial instruments in order to fund its own operations and capital expenditures. Inherent in using these financial instruments are the following risks on liquidity, market and credit.

Please refer to the 2022 Consolidated AFS, Note 27 for the discussion of main financial risks arising from the Group's financial instruments.

#### **Capital Management**

The primary objective of the Group's capital management is to ensure that it maintains a strong credit rating and healthy capital ratios in order to support its business and maximize shareholders' value.

The Group manages its capital structure and makes adjustments to it, in light of changes in economic conditions. To maintain or adjust the capital structure, the Group may increase its debt from creditors, adjust the dividend payment to shareholders or issue new shares.

Based on the Group's assessment, the capital management objectives were met in 2022 and 2021.

Please refer to the 2022 Consolidated AFS, Note 20 for the discussion the Group's Capital Management.

#### **Item 2 - Properties**

The principal properties of the Group consist of various oil areas located in the Philippines and in Gabon, and renewable energy service contracts. Please refer to the "*Business of the Issuer*" for the details of the Production Sharing Contract in Gabon and Service Contracts in the Philippines.

Also, PERC owns a 714-square meter office unit located at 7th Floor, JMT Building, ADB Avenue, Ortigas Center, Pasig City. The title of the Company over the property is clean and free from any lien and encumbrance.

On April 24, 2023, PERC entered into a Share Purchase Agreement with EEIPC for the purchase of the latter's entire shareholdings in PWEI, PGEC and PSC.

#### **Item 3 - Legal Proceedings**

MGI has outstanding input VAT claims for refund with the BIR, Court of Tax Appeals (CTA) and Supreme Court (SC). As of December 31, 2021 and 2021, the outstanding input VAT claims which are still pending with the CTA and SC amounted to ₱ 123.74 million and ₱126.96 million, respectively.

Aside from the discussions above, The Group is neither a party to, nor is involved in, any litigation that affects or will affect its interests. It has neither any knowledge of any litigation, present or contemplated, against the Company.

There are no other pending legal proceedings to which the Group is a party or which any of its property is subject to.

**Item 4 - Submission of Matters to a Vote of Security Holders**

There were no matters that were submitted to a vote of security holders during the fourth quarter of the fiscal year covered by this report.

## PART II - OPERATIONAL AND FINANCIAL INFORMATION

### Item 5 - Market for Registrant's Common Equity and Related Stockholder Matters

#### A) Market Price of and Dividends on Registrant's Common Equity and Related Stockholder Matters

##### 1. Market Information

Stock Market Price and Dividend on Registrant's Common Equity (last 2 years)

Particulars	1st Quarter		2nd Quarter		3rd Quarter		4th Quarter		1st Quarter
	2022	2021	2022	2021	2022	2021	2022	2021	2023
Par value	Php1.00	Php1.00	Php1.00	Php1.00	Php1.00	Php1.00	Php1.00	Php1.00	Php1.00
High	Php5.23	Php4.14	Php5.49	Php3.25	Php5.40	Php4.13	Php4.90	Php4.47	Php4.86
Low	Php3.90	Php3.50	Php4.53	Php3.64	Php4.40	Php3.91	Php4.35	Php3.90	Php4.13
Volume	4.954MM	7.476MM	6.823MM	3.575MM	2.834MM	4.453MM	.551MM	4.703MM	1.188MM

##### 2. Holders

As of May 31, 2023 the Company has 1,986 stockholders.

Hereunder is the list of the top 20 Stockholders (as of May 31, 2023):

STOCKHOLDERS	SHARES	PERCENTAGE
1. PCD Nominee Corporation (Filipino)	526,835,732	92.64%
2. House of Investment, Inc.	21,805,861	3.83%
3. Pan Malayan Management and Investment Corp.	5,377,079	0.95%
6. Hydee Management & Resource Corporation	1,880,779	0.33%
5. Baguyo, Dennis	1,698,888	0.30%
6. PCD Nominee Corp (NF)	1,165,538	0.20%
7. Yan, Lucio	355,468	0.06%
8. Ong Pac, Sally C.	327,030	0.06%
9. R. P. Land Development Corp.	309,078	0.05%
10. Tan, Juanita Uy	300,781	0.05%
11. David Go Securities Corporation	277,949	0.05%
12. Ley, Fely	266,600	0.05%
13. Chen Hua Bi	266,599	0.05%
14. Mendoza, Alberto &/or Jeanie C.	251,492	0.04%
15. Phil. Asia Equity Sec., Inc. U-055	159,959	0.03%
16. Orientrade Securities, Inc.	121,500	0.02%
17. Uy-tioco, George	106,640	0.02%
18. Roque Jr., Gonzalo	90,234	0.02%

### Minimum Public Ownership

The Company is compliant with the required Minimum Public Ownership of at least 10% of the total issued and outstanding capital stock, as mandated by Section 3, Article XVIII of the Continuing Listing Requirements of the Listing and Disclosure Rules. As of May 31, 2023, the Company's public float was 38.03%.

### 3. Dividends

In accordance with the Corporation Code of the Philippines, the Company intends to declare dividends (either in cash or stock or both) in the future. The shareholders of the Company are entitled to receive a proportionate share in cash dividends that may be declared by the Board of Directors out of surplus profits derived from the Company's operations. The same right exists with respect to a stock dividend, the declaration of which is subject to the approval of stockholders representing at least two-thirds (2/3) of the outstanding shares entitled to vote. The amount will depend on the Company's profits and its capital expenditure and investment requirements at the relevant time.

#### Dividend declaration in two (2) most recent years

Date of Declaration	Dividends per Share		Record Date	Payment Date
	Cash	Stock		
July 26, 2018	5%		August 24, 2018	September 20, 2018
July 29, 2022	5%		August 15, 2022	September 8 2022

### 4. Recent Sale of Unregistered Securities

There was no sale of unregistered securities for the past three years.

## B) Description of Registrant's Securities

### 1. Common Stock

The details of the Company's capital stock are as follows:

	No. of shares	Amount
Authorized - 700 million shares at P1.00 par value		
Issued and outstanding	568,711,842	P568,711,842

2. Debt Securities - Not Applicable

3. Stock Options - Not Applicable

4. Securities Subject to Redemption call – Not Applicable

5. Warrants – Not applicable

6. Market Information for Securities Other than Common Equity – Not Applicable

7. Other Securities – Not Applicable

## Item 6 - Management's Discussion and Analysis or Plan of Operation

### 1. Management's Discussion and Analysis (Amounts are in Philippine Peso (P))

#### a. Consolidated Financial Position (As of December 31, 2022 and 2021)

<b>TOTAL EQUITY</b>	<b>12,377,322,378</b>	<b>8,313,814,660</b>	48.88%	73.59%
<b>TOTAL LIABILITIES AND EQUITY</b>	<b>P16,819,812,099</b>	<b>P13,215,193,276</b>	27.28%	100.00%

**Total assets** amounted to P16.819 billion and P13.215 billion as of December 31, 2022 and December 31, 2021, respectively. Book value is at P11.89/share from P9.81/share.

**Cash and cash equivalents** consist of cash on hand, cash in banks and money market placements with original maturities of not more than three months. The 35.07% net increase from P1.242 billion as of December 31, 2021 to P1.677 billion as of December 31, 2022 is mainly due to the proceeds from issuance of shares to Kyuden International Corporation (KIC).

**Short term investments** with maturities of more than three months and **Restricted cash** accounts likewise increased as a result of the investments of KIC. Bulk of the restricted cash pertains to the deposit for future stock subscription still under the escrow account as of December 31, 2022.

The **Receivables** account mainly consists of receivables from electricity sales and lifting/sales of crude oil revenue. The 15.16% increase is mainly due to higher outstanding receivables from electricity sales at the end of the year.

**Financial assets at fair value through profit and loss (FVPL)** amounted to P7.540 million and P7.587 million as of December 31, 2022 and 2021, respectively. The market prices of the portfolio are maintained leaving only minimal change in the account.

**Crude oil inventory** increased due to revaluation at a higher price of barrels left unsold during the period.

**Contract Assets – current and non-current portion** pertains to PSC’s receivable from TransCo, pertaining to FIT arrears, which is currently recorded at net present value since this will be collected over five (5) years. PSC’s collection started this year 2022. The increase is mainly due to additional set-up of the FIT arrears adjustment for the TSPP1 for the period.

**Other current assets** consist of supplies inventory, prepaid expenses, and other current assets. The bulk of the net decrease of 10.25% is mainly due to the withdrawal of SRO funds under escrow account. On April 18, 2022, the remaining SRO funds were withdrawn from the escrow account for the purpose of loan principal and interest payment.

**Property, plant and equipment (PPE)** amounted to P8.197 billion and P7.985 billion as of December 31, 2022 and December 31, 2021, respectively. The 2.65% net increase is mainly due to the following:

- additional 4 new wells in the Gabon Etame Field;
- net impairment reversal of the oil assets (refer to Note 11 and 12 of the Consolidated AFS)

**Deferred oil exploration cost** increased by 169.31% due to Etame Reconfiguration Project related to the switch from old Floating Production Storage and Offloading (FPSO) vessel to new Floating Storage and Offloading (FSO) vessel .

**Investment in a joint venture** refers to the remaining 40.00% shareholdings in PWEI. Bulk of the 8.22% net increase from P1.735 billion to P1.877 billion pertains to the Group’s share in net income generated by PWEI during the period. The Group also made additional investment in three newly incorporated special purpose vehicles namely: BuhaWind Energy Northern Luzon Corporation, BuhaWind Energy Northern Mindoro Corporation and BuhaWind Energy East Panay Corporation. during the period amounting to P1.26 million.

**Right of use of asset and lease Liabilities** – these resulted from the first time adoption of the new PFRS 16 – leases in 2019. Please refer to Note 13 of the Consolidated AFS. The 5.68% decline pertains to the amortization of the account during the period.

**Deferred tax assets – net** occurs due to timing differences in recognizing temporary deductible expenses and temporary taxable revenues such as accrued profit share, accretion expenses, accrued retirement liability, provision for probable losses, unrealized gains or losses and change in crude oil inventory. As of December 31, 2022 and December 31, 2021, this amounted to P10.928 million and P12.460 million, respectively. The net decrease pertains to movements of the temporary deductible expenses and temporary taxable revenues during the period.

**The Investment properties-net** account remains the same as of December 31, 2022.

**Other non-current assets** amounted to P455.883 million and P368.875 million as of December 31, 2022 and December 31, 2021, respectively. The 23.59% net increase is mainly due to the additions to Deferred Development Cost related to the exploration, development, production and expansion of renewable energy projects

**Accounts payable and accrued expenses** increased by 47.04% mainly due to accruals of payables to contractors and suppliers.

**Current portion of loan payable increased by 14.41% and Loans payable – net of current portion** decreased by 21.76%, mainly because of reclassification of current portion and settlement of principal loans during the period.

**Lease liabilities – current and non-current** movement is mainly due to the reclassification of current portion for the period.

The decrease in the **Income tax payable** account mainly pertains to the start of TSPP2’s tax holiday starting January 2022. The project, which was under the regular tax rate of 25% in previous year is now subject to 5% gross income tax under the PEZA rules.

**Asset retirement obligation** amounted to P66.230 million and P92.810 million as of December 31, 2022 and 2021, respectively. The 28.64% decrease resulted from changes in estimates made during the period.

**Other non-current liabilities** pertains to the Group's accrued retirement liability account, net decrease of 34.31% is mainly due to the change in demographic assumptions.

**Equity attributable to equity holders of the Parent Company** amounted to P6.763 billion or P11.89 book value per share and P5.577 billion or P9.81 book value per share, as of December 31, 2022 and December 31, 2021, respectively. The increase is mainly due to continuous income generation from the Renewable Energy Operations and Oil operations.

**Non-controlling interest** (NCI) pertains to the following:

- 8.55% share of EEI-PC in PetroGreen as of December 31, 2022; 10% as of December 31, 2021
- 14.53% share of KIC in PetroGreen as of December 31, 2022; nil in 2021
- 25% share of Trans-Asia, the 10% share of PNOC-RC, and 23% of the 65% share of EEI-PC (indirect) in MGI;
- 44% share of EEI-PC (direct) and 23% of 56% share (indirect) in PSC;

Non-controlling interest increased by 44.82% from P3.963 billion to P2.583 billion due to net income from RE projects.

**Deposit for future stock subscription** as of December 31, 2022 pertains to the balance of the KIC's subscription amount after deducting the subject shares for the Initial Closing. This account will be converted into shares after the completion of the Second Final Closing on January 10, 2023.

**b. Consolidated Results of Operation (As of December 31, 2022, 2021 and 2020)**

	Years Ended December 31 (Audited)			% Change 2022 vs. 2021	% in Total Revenues 2022

<b>Basic/Diluted Earnings Per Share (EPS)</b>	<b>P0.965</b>	<b>P0.572</b>	<b>P0.562</b>		

The Group generated a **consolidated net income** and consolidated net income attributable to equity holders amounting to P863.077 million and P548.523 million; and P665.472 million and P325.435 million as of December 31, 2022 and 2021, respectively.

The net increase in the Financial Performance of the Group is mainly due to the recovery of crude oil prices, continuous operations of the RE projects; decreasing interest expenses (due to the semi-annual settlement of principal instalment due).

**Revenues:**

**Electricity sales** refer to the electricity power generated by MGPP and TSPP. This totalled P1.696 billion as compared to last year's P1.899 billion. The net decline is mainly due to MGPP's one-month preventive maintenance shutdown of the power plant in February, 2022.

**Oil revenues** increased because of the recovery of crude oil price from average of \$69.90/bbl in 2021 to \$106.27/bbl in 2022.

**Other revenues** pertain to passed on Meralco wheeling and ancillary charges. The increase from P61.982 million to P129.112 million is mainly due to increase in ACEN's IEMOP purchase settlement transactions.

**Costs and Expenses:**

**Costs of electricity sales** pertain to the direct costs of generating electricity power including operating and maintenance costs (O&M) of power plant and fluid collection and reinjection system (FCRS), depreciation, and other costs directly attributed to producing electricity; and cost of the passed-on wheeling and ancillary charges. The 13.91% increase mainly pertains to the following:

- PSC's termination of the contracted services for the O&M, and set-up its organic O&M team, which resulted to lower expense during the period; and
- cessation MGI's payment of ancillary charges, beginning 3<sup>rd</sup> quarter of 2022.

The 50.38% % increase in **oil production expenses** is mainly resulted from variable expenses increase along with the upward movement of the crude oil prices.

**Depletion** increased mainly due to the additional depletable assets as a result of drilling of new wells.

Any oil produced but not delivered is recognized as crude oil inventory valued at its current crude oil price (net realizable value). The movement in crude oil inventory is presented as **Change in crude oil inventory**.

**General and administrative expenses, Other Income (Charges) and Provision for (Benefit From) Income Tax:**

**General and administrative expenses (G&A)** increased by 22.35% mainly due to the the easement of the travel restrictions brought about by the Covid 19 pandemic.

Other income (charges) amounted to (P109.603) million and (P364.578) million as of December 31, 2022 and 2021, respectively. Below presents the itemized discussion of the changes in other income (charges) – net account.

- 18.59% net decrease in **share in net income of a joint venture** due to PWEI's lower wind speed for the period.
- **interest income** increased mainly due to the short term investment and interest from KIC subscription funds.
- **net foreign exchange gain** increased mainly because of the conversion of the USD accounts to higher peso values.
- market prices from the stocks traded at the PSE declined resulting to turnaround of the **net unrealized losses from the fair value changes on financial assets at FVPL**.
- change in **accretion expense** is mainly due to amendment in estimates.
- recognition of **net impairment reversal** amounting to P11.299 million, due to reversal of Gabon impairment arising from the recovery of crude oil price. The impairment reversal is however partially offset by the impairment of West Linapacan Assets.
- bulk of the **interest expense** pertains to the interest due from loans. The 11.28% decrease in the account is attributed to lower principal loans resulting from annual amortization of principal loans, and
- increase in **miscellaneous income** mainly due to higher time-writing charges during the period.

**Provision for (benefit from) income tax:**

Provision for income tax current pertains to PSC's tax payable - 5.00% provision for income tax under the PEZA incentives and for MGPP, 10% tax rate, after the income tax holiday (for the M1), which ended last February 8, 2021, as part of its BOI incentives under RE Law.

**Non-controlling interest (NCI)** as of December 31, 2022 and 2021 pertains to the following:

- 8.55% share of EEI-PC in PetroGreen as of December 31, 2022; 10% as of December 31, 2021
- 14.53% share of KIC in PetroGreen as of December 31, 2022; nil in 2021
- 25% share of Trans-Asia, the 10% share of PNOG-RC, and 23% of the 65% share of EEI-PC (indirect) in MGI;
- 44% share of EEI-PC (direct) and 23% of 56% share (indirect) in PSC;

**c. Consolidated Financial Position (As of December 31, 2021 and 2020)**

**Total assets** amounted to P13.215 billion and P13.405 billion as of December 31, 2021 and December 31, 2020, respectively. Book value is at P9.81/share from P9.23/share.

**Cash and cash equivalents** consist of cash on hand, cash in banks and money market placements with original maturities of not more than three months. The 2.02% net decrease from P1.267 billion as of December 31, 2020 to P1.242 billion as of December 31, 2021 is mainly due to instalment payment of loans, payments for working capital requirements net of collections from electricity sales and oil lifting proceeds.

The **Receivables** account mainly consists of receivables from electricity sales and lifting/sales of crude oil revenue. The 43.53% increase is mainly due to higher outstanding receivables from electricity sales and higher oil lifting at the end of the year.

**Financial assets at fair value through profit and loss (FVPL)** amounted to P7.587 million and P7.532 million as of December 31, 2021 and 2020, respectively. The market prices of the portfolio are maintained leaving only minimal change in the account.

**Crude oil inventory** declined due to lower barrels left unsold during the period.

**Contract Assets – current and non-current portion** pertains to PSC’s receivable from TransCo, pertaining to FIT arrears, which is currently recorded at net present value since this will be collected over five (5) years. Start of PSC’s collection is scheduled on year 2022. The increase is mainly due to additional set-up of the FIT arrears adjustment for the TSPP1 for the period.

**Other current assets** consist of restricted cash, supplies inventory, prepaid expenses, and other current assets. The bulk of the net increase of 8.51% is mainly due to additional prepayments and supplies inventory for the period.

**Property, plant and equipment (PPE)** amounted to P7.985 billion and P8.311 billion as of December 31, 2021 and December 31, 2020, respectively. The 3.92% net decrease is mainly due to the following:

- depreciation of the Renewable Energy Power Plants and other assets;
- depletion of the oil assets; and
- net impairment of the oil assets (refer to Note 10 of the Consolidated AFS)

**Deferred oil exploration cost** decreased by 44.99% resulting from the write off of the SC 6A (refer to Note 11 of the Consolidated AFS).

**Investment in a joint venture** refers to the remaining 40.00% shareholdings in PWEI. The 6.10% net increase from P1.635 billion to P1.735 billion pertains to the Group’s share in net income generated by PWEI during the period, net of dividend income.

**Right of use of asset and lease Liabilities** – these resulted from the first time adoption of the new PFRS 16 – leases in 2019. Please refer to Note 13 of the Consolidated AFS. The 5.17% decline pertains to the amortization of the account during the period.

**The Investment properties-net** account remains the same as of December 31, 2021.

**Deferred tax assets – net** occurs due to timing differences in recognizing temporary deductible expenses and temporary taxable revenues such as accrued profit share, accretion expenses, accrued retirement liability, provision for probable losses, unrealized gains or losses and change in crude oil inventory. As of December 31, 2021 and December 31, 2020, this amounted to P12.460 million and P5.652 million, respectively. The net increase pertains to movements of the temporary deductible expenses and temporary taxable revenues during the period.

**Other non-current assets** amounted to P368.875 million and P445.434 million as of December 31, 2021 and December 31, 2020, respectively. The 17.19% net decrease is mainly due to the PSC’s successful claim of VAT refund amounting to P71.48 million on May 2021.

**Accounts payable and accrued expenses** increased by 2.03% mainly due to accruals made during the year, specifically interest expenses.

**Current portion of loan payable and Loans payable – net of current portion** declined by 3.20% and 16.48%, respectively, mainly because of instalment settlement of principal loans during the period.

**Lease liabilities – current and non-current** movement is mainly due to the interest recognized during the period.

The increase in the **Income tax payable** account mainly pertains to the end of MGPP1’s tax holiday on February 2021, the project is now under 10% special tax rate in addition to TSPP1’s - 5.00% gross income tax under the PEZA rules; and TSPP2’s regular tax rate of 25%.

**Asset retirement obligation** amounted to P92.810 million and P109.160 million as of December 31, 2021 and 2020, respectively. The 14.98% decrease resulted from changes in estimates made during the period.

**Other non-current liabilities** pertains to the Group's accrued retirement liability account, net decrease of 29.38% is mainly due to the change in demographic assumptions.

**Equity attributable to equity holders of the Parent Company** amounted to P5.577 billion or P9.81 book value per share and P5.248 billion or P9.23 book value per share, as of December 31, 2021 and December 31, 2020, respectively. The increase is mainly due to continuous income generation from the Renewable Energy Operations and Oil operations.

**Non-controlling interest** (NCI) pertains to the following:

- 10% share of EEI-PC in PetroGreen;
- 25% share of Trans-Asia, the 10% share of PNOC-RC, and 10% of the 65% share of EEI-PC (indirect) in MGI;
- 44% share of EEI-PC (direct) and 10% of 56% share (indirect) in PSC;

Non-controlling interest increased by 5.94% from P2.583 billion to P2.737 billion due to net income from RE projects.

#### **d. Results of Operations (For the years ended December 31, 2021 and 2020)**

The Group generated a **consolidated net income** and consolidate net income attributable to equity holders amounting to P665.427 million and P325.435 million; and P646.191 million and P319.412 million as of December 31, 2021 and 2020, respectively.

The net increase in the Financial Performance of the Group is mainly due to the recovery of crude oil prices, continuous operations of the RE projects; decreasing interest expenses (due to the semi-annual settlement of principal instalment due). These increases is partially offset by the net impairment recognized from the oil assets.

#### **Revenues:**

**Electricity sales** refer to the electricity power generated by MGPP and TSPP. This totalled P1.9 billion as compared to last year's P1.924 billion. The net decline is mainly due to MGPP's lower generation resulting from scheduled preventive maintenance in 2021, the reduction was partially mitigated by the increase in TSPP's revenues due to higher rates.

**Oil revenues** increased because of the recovery of crude oil price from average of \$49.72/bbl in 2020 to \$69.90/bbl in 2021.

**Other revenues** pertain to passed on Meralco wheeling and ancillary charges. The decline from P116.378 million to P61.982 million is mainly due to the termination of the ancillary services on September 2021.

### Costs and Expenses:

**Costs of electricity sales** pertain to the direct costs of generating electricity power including operating and maintenance costs (O&M) of power plant and fluid collection and reinjection system (FCRS), depreciation, and other costs directly attributed to producing electricity; and cost of the passed-on wheeling and ancillary charges. The 9.59% decline mainly pertains to the following:

- PSC's termination of the contracted services for the O&M, and set-up its organic O&M team, which resulted to lower expense during the period; and
- cessation MGI's payment of ancillary charges, beginning 3<sup>rd</sup> quarter of 2021.

The 11.70% % increase in **oil production expenses** is mainly resulted from variable expenses increase along with the upward movement of the crude oil prices.

**Depletion** declined mainly due to lower production bbls. (from (gross) 6,566mmbbls to 5.421mmbbls).

The **Change in crude oil inventory** increased due to lower number of barrels left unsold during the period.

### General and administrative expenses, Other Income (Charges) and Provision for (Benefit From) Income Tax:

**General and administrative expenses (G&A)** declined by 14.46% mainly due to lower expenses resulting from the travel restrictions brought about by the COVID 19 pandemic.

Other income (charges) amounted to (P364.578) million and (P253.621) million as of December 31, 2021 and 2020, respectively. Below presents the itemized discussion of the changes in other income (charges) – net account.

- 10.01% net decrease in **share in net income of a joint venture** due to PWEI's one-time recording of the FIT arrears adjustment for the prior periods in 2020, where as in 2021, FIT arrears recognized is for the current period only.
- **interest income** declined mainly because of lower interest rates during the period.
- there was an upturn in the forex, from net unrealized loss last year to **net unrealized gain** this year mainly because of the conversion of the USD accounts to higher peso values.
- market prices from the stocks traded at the PSE regained resulting to turnaround of the **net unrealized losses from the fair value changes on financial assets at FVPL**, to net unrealized gains this year.
- change in **accretion expense** is mainly due to amendment in estimates.
- recognition of **net impairment reversal (loss)** amounting to P164.323 million, mainly coming from the write-off of the deferred costs of the SC 6A and partial impairment of the SC 14C2, due to relinquishment of the service contract and limited term of the service contract. These impairment however, were partially offset by the reversal of impairment loss of the Gabon assets due to the recovery of the crude oil prices.
- bulk of the **interest expense** pertains to the interest due from loans. The 13.81% decrease in the account is attributed to lower principal loans resulting from annual amortization of principal loans, and
- increase in **miscellaneous income** mainly due to higher time-writing charges during the period.

### **Provision for (benefit from) income tax:**

Provision for income tax current pertains to PSC's tax payable - 5.00% provision for income tax under the PEZA incentives and for MGPP, 10% tax rate, after the income tax holiday (for the M1), which ended last February 8, 2021, as part of its BOI incentives under RE Law.

**Non-controlling interest (NCI)** as of December 31, 2021 and 2020 pertains to the following:

- 10% share of EEI-PC in PetroGreen;
- 25% share of Trans-Asia, the 10% share of PNOC-RC, and 10% of the 65% share of EEI-PC (indirect) in Maibarara;
- 44% share of EEI-PC (direct) and 10% of 56% share (indirect) in to PetroSolar;

#### **e. Consolidated Financial Position (As of December 31, 2020 and 2019)**

**Total assets** amounted to P13.405 billion and P13.364 billion as of December 31, 2020 and December 31, 2019, respectively.

**Cash and cash equivalents** consist of cash on hand, cash in banks and money market placements with original maturities of not more than three months. The 18.81% net increase from P1.067 billion as of December 31, 2019 to P1.267 billion as of December 31, 2020 is mainly due to collection of electricity sales, net of working capital requirements during the period.

The **Receivables** account mainly consists of receivables from electricity sales and lifting/sales of crude oil revenue. The 17.82% decrease is mainly due to collections made during the period.

**Financial assets at fair value through profit and loss (FVPL)** amounted to P7.532 million and P8.240 million as of December 31, 2020 and 2019, respectively. The 8.60% net decrease is due to net downward movement of the market prices of the Company's investments in stocks traded in the Philippine Stock Exchange (PSE).

**Crude oil inventory** increased due to higher barrels left unsold during the period.

**Other current assets** consist of restricted cash, supplies inventory, prepaid expenses, and other current assets. The bulk of the net decline of 4.24% is mainly due to amortization of prepayments.

**Property, plant and equipment (PPE)** amounted to P8.311 billion and P8.537 billion as of December 31, 2020 and December 31, 2019, respectively. The 2.65% net decrease is mainly due to the continuous depreciation of the Renewable Energy Power Plants and depletion of the oil assets.

**Deferred oil exploration cost** increased by 9.11% resulting from the continuous development of the oil assets.

**Contract assets** pertains to PSC's receivable from TransCo, pertaining to FIT arrears, which is currently recorded at net present value since this will be collected over five (5) years. Start of PSC's collection is scheduled on year 2022.

**Investment in a joint venture** refers to the remaining 40.00% shareholdings in PWEI. The 4.57% net increase from P1.564 million to P1.635 billion pertains to the Group's share in net income generated by PWEI during the period, net of dividend income.

**Right of use of asset and lease Liabilities** – these resulted from the first time adoption of the new PFRS 16 – leases in 2019. Please refer to Note 13 of the 2020 Consolidated Financial Statements. The movements pertain to the amortization of the account during the period.

**The Investment properties-net** account remains the same as of December 31, 2020.

**Deferred tax assets – net** occurs due to timing differences in recognizing temporary deductible expenses and temporary taxable revenues such as accrued profit share, accretion expenses, accrued retirement liability, provision for probable losses, unrealized gains or losses and change in crude oil inventory. As of December 31, 2020 and December 31, 2019, this amounted to P5.652 million and P12.624 million, respectively. The 55.23% pertains to movements of the temporary deductible expenses and temporary taxable revenues during the period.

**Other non-current assets** amounted to P445.434 million and P506.399 million as of December 31, 2020 and December 31, 2019, respectively. The 12.04% net decrease is mainly due to recoupment of advances and amortization of accounts.

**Accounts payable and accrued expenses** increased by 6.94% mainly due to accruals made during the year.

**Current portion of loan payable and Loans payable – net of current portion** declined by 28.58% and 5.59%, respectively, mainly because of settlement of principal loans during the period.

**The bulk of the Income tax payable** pertains to PSC's outstanding tax payable - 5.00% provision for income tax under the PEZA rules. For MGPP, minimal income tax was computed because its principal business is under the Income tax Holiday, as part of its incentives under RE Law. The increase is mainly due to higher taxable income from PSC, due to the recording of the FIT arrears and full year operations of the TSPP2.

**Asset retirement obligation** amounted to P109.160 million and P90.621 million as of December 31, 2020 and as of December 31, 2019, respectively. The 20.46% increase in this account resulted from changes in estimates and contributions made during the period.

**Other non-current liabilities** net increase of 16.30% is mainly due to increase in the Group's retirement liability.

**Equity attributable to equity holders of the Parent Company** amounted to P5.248 billion or P9.23 book value per share and P4.927 billion or P8.66 book value per share, as of December 31, 2020 and December 31, 2019, respectively. The increase is mainly due to continuous income generation from the Renewable Energy Operations.

**Non-controlling interest** (NCI) pertains to the following:

- 10% share of EEI-PC in PetroGreen;
- 25% share of Trans-Asia, the 10% share of PNOG-RC, and 10% of the 65% share of EEI-PC (indirect) in MGI;
- 44% share of EEI-PC (direct) and 10% of 56% share (indirect) in PSC;

Non-controlling interest increased by 10.47% from P2.338 billion to P2.583 billion due to net income from RE projects.

#### **f. Results of Operations (For the years ended December 31, 2020 and 2019)**

The Group generated a **consolidated net income** amounting to P646.191 million and P533.933 million as of December 31, 2020 and 2019, respectively, representing a 21.02% increase.

The Group generated **consolidated net income attributable to equity holders of the Parent Company** amounting to P319.412 million or P0.562 earnings per share and P292.836 million or P0.515 earnings per share as December 31, 2020 and same period in 2019, respectively. The main drivers of the increase are the recording of the FIT arrears for PSC and PWEI, the full year operations of the TSPP - 2 and TSPP's higher generation due to extended summer months during the period.

#### **Revenues:**

**Electricity sales** refer to the electricity power generated by MGPP and TSPP. The 15.18% net increase is due to the full year operations of TSPP-2; higher generation of the TSPP due to the extended summer months and the effect of the one-time recording of the FIT adjustment.

**Oil revenues** declined, despite the higher volume of production mainly because of lower average crude oil price realized this year as compared last year. Average crude oil price in 2019 was \$64.94/bbl. while in 2020, \$49.72/bbl.

#### **Costs and Expenses:**

**Costs of electricity sales** pertain to the direct costs of generating electricity power including operating and maintenance costs (O&M) of power plant and fluid collection and reinjection system (FCRS), depreciation, and other costs directly attributed to producing electricity. The bulk of the 12.89% increase is mainly due to MGI's costs for MERALCO wheeling charges.

**Cost of oil production** decreased mainly due to lower expenses made during the period. The 47.26% increase in **depletion** is due to increase in production barrels.

The **Change in crude oil inventory** increased due to higher number of barrels left unsold during the period.

#### **General and administrative expenses, Other Income (Charges) and Provision for (Benefit From) Income Tax:**

**General and administrative expenses (G&A)** declined by 5.29% mainly due to lower expenses resulting from the travel restrictions brought about by the COVID 19 pandemic.

Other income (charges) amounted to (P253.621) million and P(272.411) million as of December 31, 2020 and 2019, respectively. Below presents the itemized discussion of the changes in other income (charges) – net account.

- Bulk of the interest expense pertains to the interest due from loans. The decrease in the account is attributed to lower principal loans resulting from annual amortization of principal loans.
- 14.06% net increase in **share in net income of a joint venture** due to PWEI's one-time recording of the FIT arrears adjustment.
- Interest income declined mainly because of lower interest rates during the period.
- Lower effect of forex movements from P7.232 million unrealized loss last year to P3.501 million unrealized loss this year.

- higher losses from the fair value changes on financial assets at FVPL due to slump of the market prices of investments in stocks traded at the PSE resulting from the COVID 19 pandemic;
- 8.36% decrease in accretion expense is mainly due to change in estimates; and
- 54.6% increase in miscellaneous income mainly due to higher time-writing charges during the period.

**Provision for (benefit from) income tax:**

Provision for income tax current - pertains to PSC's outstanding tax payable - 5.00% provision for income tax under the PEZA rules. For MGPP, no income tax was computed because it is under the Income tax Holiday, as part of its incentives under RE Law. The increase is relative to PSC's recording of the FIT arrears adjustment and full year operation of the TSPP2.

**Non-controlling interest (NCI)** as of December 31, 2020 and 2019 pertains to the following:

- 10% share of EEI-PC in PetroGreen;
- 25% share of Trans-Asia, the 10% share of PNOC-RC, and 10% of the 65% share of EEI-PC (indirect) in Maibarara;
- 44% share of EEI-PC (direct) and 10% of 56% share (indirect) in to PetroSolar;

**Key Performance Indicators** (please see attached "Schedule of Financial Soundness Indicators")

**2. Plan of Operations for the next 12 months**

Gabon, West Africa

Crude production will continue from the existing wells as the Gabon Consortium is currently firming up the most feasible Integrated Field Development Plan (IFDP) to extract the remaining recoverable oil volumes.

SC 14C2 - West Linapacan, Northwest Palawan

Operator Philodrill will conduct further G&G activities to validate the feasibility of extracting the remaining recoverable volumes in West Linapacan.

SC 75 - Offshore Northwest Palawan

Subject to government's safety and security clearance over the prospect area, the SC 75 Consortium will proceed with the conduct of a ~1,000 sq.km 3D seismic survey over the identified leads in SC 75.

Maibarara Geothermal Power Project

Power generation from both Maibarara -1 and Maibarara-2 will continue.

Nabas Wind Power Project

The plant will be in continuous operation from the 18 WTGs comprising the project's Phase 1, while construction of the 6 WTGs for Phase 2 will commence.

Tarlac Solar Power Project

TSPP-1 and TSPP-2 will continue to supply electricity to the grid.

Enrique T. Yuchengco Bldg. Rooftop Solar Power Project (ETY)

The ETY rooftop solar facility will continue to supply electricity to the ETY building.

Bugallon Solar Power Project

PGEC to await NEA approval of the DIS for the BSPP, prior to proceeding with final negotiations for the construction contracts.

Dagohoy Solar Power Project

Early site development works will continue for the DSPP site while PGEC awaits the SIS proper.

San Vicente Wind Hybrid Power Project

PGEC will continue with initial feasibility studies for SVWHPP, consisting of: 1) Two-year wind measurement campaign, 2) LGU and regulatory permitting works, and 3) technical and economic feasibility works for a potential wind-hybrid system in San Vicente.

### Offshore Wind Power Projects

PGEC and CE will continue with the pre-development Work Programs for the three (3) offshore wind blocks, namely 1) on-site wind measurement campaigns, 2) geophysical and geotechnical campaigns, 3) environmental permitting works, and 4) 3) SIS applications for Northern Mindoro and East Panay blocks.

### **Material Commitments**

Aside from the committed developments of the prospective projects, there are no other foreseen material commitments during the period.

### **Discussion of Indicators of the Company's Level of Performance**

#### **Productivity Program**

The development of the prospective renewable energy projects will increase the Group's capacity and power generation, while the prospective four-well drilling program in Gabon Etame, aimed to sustain field production to above 20,000 BOPD.

#### **Receivable Management**

The group's receivables are mainly due from sale of electricity to ACEN and Transco and crude oil in Etame Gabon, through the consortium operator. These are being recorded once sale is made. Payment is received every 30-45 days following each sale.

For electricity sales from TSPP and NWPP, the payment for the Actual FIT Revenue is sourced from the FIT-All Fund, specifically the Actual FIT Differential (FD) and the Actual Cost Recovery Revenue (ACRR). The FD is the difference between the Actual FIT Revenue and the ACRR and is collected from on-grid consumers as a uniform charge and applied to all billed kilowatt-hours. For FIT-Eligible RE Plants connected to the Wholesale Electricity Spot Market ("WESM"), the ACRR refers to the WESM proceeds remitted to the FIT-All Fund by the Independent Electricity Market Operator of the Philippines, Inc. ("IEMOP"), which took over the Philippine Electricity Market Corporation ("PEMC") as operator of the electricity spot market. PWEI and PSC regularly receive the both the ACRR and FD components on time, which is 45 days after billing date.

PWEI and PSC manage this risk through proper and meticulous allocation of funds, proper timing of expenditures, employment of cost-cutting measures, and sourcing short-term funding requirements from local banks and investment houses or from affiliated companies.

For the twenty (20) years since oil production inception, there was no event that the buyer failed to remit the proceeds of the sale. However, the group is willing to look for another buyer should there be some problem that may happen in the future.

#### **Liquidity Management**

Management of liquidity requires a flow and stock perspective. Constraint such as political environment, taxation, foreign exchange, interest rates and other environmental factors can impose significant restrictions on firms in management of their financial liquidity.

The Group considers the above factors and pays special attention to its cash flow management. The Company identifies all its cash requirements for a certain period and invests unrestricted funds to money market placements to maximize interest earnings.

The Group does not anticipate any cash flow or liquidity problems within the next twelve (12) months. The Group is not in default of any, note, loan, lease, or other indebtedness or financing arrangement requiring it to make payments.

#### **Inventory Management**

The only inventory is the crude oil produced in Gabon. The buyer lifts certain volume and pays the same in 30 days. The operator sees to it that crude oil inventory does not reach 800,000 barrels at any one time to avoid overflow and to generate revenues to cover production costs.

#### **Cost Reduction Efforts**

In order to reduce costs, the Group employs a total of one hundred thirty six (136) employees with multi-task assignments. The group also implements request for quotations to compare prices, quality of the products and services and negotiate the payment terms.

The Company's general and administrative expense is equivalent to 8.67% of the total revenue.

**Rate of Return of Each Stockholder**

The Company has no existing dividend policy. However, the Company intends to declare dividends in the future in accordance with the Corporation Code of the Philippines. Please see Part II, Item 5, 3. Dividends for the Dividend declared for two (2) most recent years.

**Item 7 - Financial Statements**

The 2022 Consolidated AFS of the Company are incorporated herein by reference. The schedules listed in the accompanying index to Supplementary Schedules are filed as part of this Form 17-A.

**Item 8 – Changes in and Disagreements with Accountants on Accounting and Financial Disclosures***Information on Independent Auditor*

The external auditor of the Corporation is the auditing firm SyCip Gorres Velayo & Co. (SGV). The same accounting firm has been endorsed by the Audit Committee to the Board. The Board, in turn, approved the endorsement and will nominate the reappointment of the said auditing firm for the stockholders' approval at the scheduled annual stockholders' meeting. The said auditing firm has accepted the Company's invitation to stand for re-election this year.

Audit services of SGV for the calendar year ended December 31, 2022 are the examination of the financial statements of the Company, review of income tax returns and other services related to filing of reports made with the Securities and Exchange Commission and Bureau of Internal Revenue.

Pursuant to SRC Rule 68 Paragraph 3 (b) (1V) (Re: Rotation of External Auditors), the Company has not engaged Ms. Ana Lea C. Bergado, partner of SGV & Co., for more than five (5) years. She was engaged by the Company for examination of the Company's 2021 financial statements.

The company is compliant with the Rotation requirement of its external auditor's certifying partner as required under SRC Rule 68 (3)(b) (1V). A two year cooling off period shall be observed in the re-engagement of same signing partner or individual auditor.

*Disagreements with Accountants on Accounting and Financial Disclosures*

As of December 31, 2022, there are no disagreements with the auditors on any matter of accounting principles or practices, financial statement disclosure, or auditing scope or procedures.

### **PART III – CORPORATE GOVERNANCE**

The Company's platform of corporate governance is anchored on its Manual on Corporate Governance (the "Manual"). The Manual has been updated to reflect the requirements stated in the Code of Corporate Governance for Publicly-Listed Companies (SEC Memorandum Circular No. 19, Series of 2016). The Manual institutionalizes the principles of good corporate governance in the entire organization. It also lays down the Company's compliance system and identifies the responsibilities of the Board and Management in relation to good corporate governance.

The Company believes that compliance with the principles of good corporate governance begins with the Board of Directors. It is the Board's duty and responsibility to foster the long-term success of the Company and secure its sustained competitiveness and profitability in a manner consistent with its corporate objectives and the long-term best interest of its shareholders and other stakeholders. With these in mind, the Company ensures that its Board of Directors is composed of individuals of proven competence, integrity, and probity. These individuals determine the Company's purposes, vision and mission, and strategies to carry out its objectives, ensure compliance with all relevant laws, regulations and codes of best business practices, adopt a system of internal checks and balances, and install a process of selection to ensure a mix of competent directors and officers.

The Board of Directors endeavors to substantially adhere to and comply with the principles and best practices contained in the Manual. The Company is adopting the Integrated Annual Corporate Governance Report, pursuant to the Code of Corporate Governance for Publicly-listed Companies (CG Code for PLCs), as an evaluation system for the company to measure or determine the level of compliance of the Board of Directors and top management with its Manual of Corporate Governance.

The Board of Directors including its officers likewise attended Corporate Governance seminars in compliance with the requirements of the Securities and Exchange Commission. In this regard, the Company's directors submitted their respective Certifications, as referred to in Annex "D", attesting their attendance and participation in required trainings and/or continuing education seminars for directors, to further support their qualification for directorship.

Further, the total corporate organization received copies of the Manual on Corporate Governance (Manual) duly approved by the Board of Directors.

The members of the Board, substantial shareholders, and officers are obligated to disclose all material facts related to RPTs, as well as their direct and indirect financial interest in any transaction or matter that may affect or is affecting the Company. Such disclosure shall be made at the Board and/or Audit Committee Meeting where the RPT will be presented for review and approval and before the completion or execution of the RPT. There were no transactions with Directors, Officers or any principal stockholders (owning at least 10% of the outstanding shares of the Company) that are not in the ordinary course of business of the Company. No related party transactions were entered into by any Director in 2020 that required review by the Audit Committee (acting as RPT Committee) and further approval by the Board in accordance with the RPT Policy of the Company. There have been no complaints, disputes or problems regarding related party transactions of the Company. The Company observes an arm's length policy in its dealings with related parties.

Three (3) Independent Directors (namely, Mr. Cesar A. Buenaventura, Mr. Eliseo B. Santiago, and Ms. Maria Mercedes M. Corrales) sit on the Board. The Company adopts the definition of Independence in the Securities Regulation Code and the CG Code for PLCs, and considers as an independent director a person who is independent of Management and the controlling shareholder, and is free from any business or other relationship which could, or could reasonably be perceived to, materially interfere with his exercise of independent judgment in carrying out his responsibilities as a director in the Company. Based on the recommendations under the CG Code for PLCs, as adopted in the Manual, the Board organized the following committees:

- Audit Committee – which has the oversight capability over the Company's financial reporting, internal control system, internal and external audit processes, and compliance with applicable laws and regulations. The Audit Committee shall likewise review all material related party transactions and would thus exercise the functions of a Related Party Transaction Committee.
- Corporate Governance Committee – which shall be tasked to assist the Board in the performance of its corporate governance responsibilities, including the functions that were formerly assigned to the Nomination Committee and the Compensation and Remuneration Committee.
- Board Risk Oversight Committee – which shall have the oversight function over the Company's Enterprise Risk Management system, enabling the Board and Management to be in confident position to make well-performed decisions, having taken into consideration risks to significant business activities, plans, and opportunities.

Below are the Committees and their corresponding members:

<b>Audit Committee</b>		
Chairman	-	Mr. Cesar A. Buenaventura – Lead Independent Director
Members	-	Ms. Maria Mercedes M. Corrales – Independent Director Ms. Helen Y. Dee – Non-Executive Director
<b>Corporate Governance Committee</b>		
Chairman	-	Ms. Maria Mercedes M. Corrales – Independent Director
Members	-	Mr. Cesar A. Buenaventura – Lead Independent Director Mr. Eliseo B. Santiago – Independent Director
<b>Board Risk Oversight Committee</b>		
Chairman	-	Mr. Eliseo B. Santiago – Independent Director
Members	-	Mr. Cesar A. Buenaventura – Lead Independent Director Mr. Lorenzo V. Tan – Non-Executive Director

As part of corporate measures to ensure compliance with the principles and policies embodied in the Manual, the Board of Directors designated Atty. Louie Mark R. Limcolioc, as the Company’s Compliance Officer (concurrent Assistant Corporate Secretary). Atty. Limcolioc is responsible for, among matters, determining and measuring compliance with the Manual; appearing before the Philippine SEC upon summons on matters relating to the Manual; identifying, monitoring, and controlling compliance with corporate governance matters; and recommending to the Board of Directors the review of the Manual. Atty. Limcolioc works closely with the Board of Directors, top management, and board committees to evaluate and monitor compliance with the Manual. Specifically, he determines the level of compliance and accordingly recommends the adoption of measures to improve such compliance. Likewise, the various board committees perform oversight duties and functions to ensure proper compliance with the Manual and other corporate policies. The Company also submits governance reports required by the Philippine SEC and the PSE to determine compliance with their rules and regulations, the Manual, and the Code of Corporate Governance. Pursuant to the CG Code for PLCs, the positions of the Corporate Secretary and Compliance Officer are no longer performed by the same person.

In line with the Company’s aspirations for growth and development, the Company continues to work towards enhancing its adherence to the principles and best practices of good corporate governance.

#### Director Compensation Report

		Per Diem	Bonus	Other Compensation*	Total
<b>Directors</b>	<b>2019</b>	<b>372,222.00</b>	<b>-</b>	<b>5,045,026.00</b>	<b>5,417,248</b>
	<b>2020</b>	<b>392,105.00</b>	<b>-</b>	<b>5,282,093.00</b>	<b>5,674,198</b>
	<b>2021</b>	<b>347,953.28</b>	<b>-</b>	<b>5,267,664.00</b>	<b>5,615,617</b>
	<b>2022 est**</b>	<b>300,000.00</b>	<b>-</b>	<b>5,917,291.38</b>	<b>6,217,291</b>

\*Other compensation pertains to the Director’s share in the profit share.

\*\*The 2022 estimate does not yet include profit share.

**BOARD ATTENDANCE**

**PETROENERGY RESOURCES CORPORATION**  
**Procedures and Requirements for Voting and Participation in the 2023 Annual Stockholders' Meeting**

PetroEnergy Resources Corporation (the "Company") will dispense with the physical attendance of its stockholders for the 2023 Annual Stockholders' Meeting (ASM). Instead, the Company will conduct the 2023 ASM scheduled on July 27, 2023 at 4:00 p.m. by remote communication and will conduct electronic voting in absentia.

Only stockholders of record as of June 15, 2023 are entitled to participate and vote in the 2023 ASM.

The Company has adopted the following procedures and requirements to enable its stockholders to participate and vote in the 2023 ASM:

**I. ONLINE REGISTRATION STEPS AND REQUIREMENTS**

- A. Stockholders may register **from 9:00 AM of July 15, 2023 until 5:00 PM of July 24, 2023** to signify his/her/its intention to participate in the 2023 ASM by remote communication. The registration steps and requirements are available through the following link: [http://petroenergy.com.ph/investor\\_relations](http://petroenergy.com.ph/investor_relations).
- B. To register, stockholders shall submit the following requirements to the Office of the Corporate Secretary via email at [corpaffairs@petroenergy.com.ph](mailto:corpaffairs@petroenergy.com.ph):
- B.1. For Individual Stockholders:**
- (i) Scanned valid government issued identification card;
  - (ii) Valid email address and active contact number;
- B.2. For Stockholders with Joint Accounts:**
- (i) Authorization letter signed by all stockholders indicating the name of the person authorized to cast the votes;
  - (ii) Valid email address and active contact number of the authorized stockholder;
  - (iii) Scanned copy of valid government-issued identification card of the authorized stockholder;
- B.3. For Stockholders under PCD Participant/Brokers Account or holding 'Scripless Shares':**
- (i) Broker's Certification on the stockholder's number of shareholdings;
  - (ii) Valid email address and active contact number of the stockholder;
  - (iii) Scanned copy of valid government-issued identification card of stockholder; and
- B.4. For Corporate Stockholders:**
- (i) Secretary's Certificate attesting to the authority of the representative to vote the shares on behalf of the corporate stockholder;
  - (ii) Valid email address and active contact number of authorized representative; and
  - (iii) Valid government-issued identification card of authorized representative.
- C. The documents submitted will then be verified by the Office of the Corporate Secretary with the assistance of the Stock Transfer Agent. The validation process will be completed by the Company no later than three (3) business days from the stockholder's receipt of an email from the Company acknowledging receipt of the stockholder's registration documents. Once validated, the stockholder will receive an email that his/her/its account has been verified and shall be provided instructions for the stockholder's access to the Company's electronic voting and to access the ASM livestreaming link.

**II. ELECTRONIC VOTING IN ABSENTIA**

- A. Duly registered stockholders have the option to vote for the matters contained in the agenda for the 2023 ASM through electronic voting in absentia. The deadline for registration is 5:00 PM of July 24, 2023. Beyond this date, stockholders may no longer avail of the option to electronically vote in absentia.
- B. After verification, the Company shall send a ballot to the registered stockholder through his/her/its e-mail address which shall contain all the agenda items for approval as indicated in the Notice of Meeting and the registered stockholder may vote as follows:

- (1) For items other than Election of Directors, the registered stockholder has the option to vote: In Favor of, Against, or Abstain. The vote is considered cast for all the registered stockholder's shares.
  - (2) For the Election of Directors, the registered stockholder may vote for all nominees, not vote for any of the nominees, or vote for some nominees only, in such number of shares as preferred by the stockholder, provided that the total number of votes cast shall not exceed the number of shares owned, multiplied by the number of directors to be elected. The total number of votes the stockholder is allowed to cast shall be based on the number of shares he/she or it owns.
  - (3) Once voting on the agenda items is finished, the stockholder can proceed to submit the accomplished ballot via email to [corpaffairs@petroenergy.com.ph](mailto:corpaffairs@petroenergy.com.ph).
  - (4) After the ballot has been submitted, the stockholder may no longer change his/her vote. The stockholder will receive a confirmation email that his/her/its vote has been recorded.
- C. Thereafter, the Office of the Corporate Secretary and the Transfer Agent, shall tabulate all valid and confirmed votes cast through electronic voting, together with the votes through proxies.
- D. Registered stockholders shall have until 5:00 PM of July 24, 2023 to cast their votes in absentia. Stockholders will not be allowed to cast votes during the livestream of the 2023 ASM.

### III. VOTING BY PROXY

- A. For individual stockholders holding certificated shares of the Company – Download the proxy form that is available at [http:// petroenergy.com.ph/investor\\_relations](http://petroenergy.com.ph/investor_relations).
- B. For stockholders holding 'scripless' shares, or shares held under a PCD Participant/Broker – Download the proxy form that is available at [http://petroenergy.com.ph/investor\\_relations](http://petroenergy.com.ph/investor_relations). Stockholders are advised to coordinate with their brokers first for the execution of this type of proxy.
- C. For corporate stockholders - Download the proxy form that is available at [http://petroenergy.com.ph/investor\\_relations](http://petroenergy.com.ph/investor_relations). A copy of the duly signed and notarized Secretary's Certificate must be submitted together with the proxy form.
- D. General Instructions on Voting by Proxy:
- (1) Download and fill up the appropriate proxy form. Follow the instructions on how to cumulate or allocate votes in the election of directors.
  - (2) Send the scanned copy of the duly executed proxy form via email to corporate secretary via [corpaffairs@petroenergy.com.ph](mailto:corpaffairs@petroenergy.com.ph) or submit the original proxy form to the Office of the Corporate Secretary at 7<sup>th</sup> Floor, JMT Building, ADB Avenue, Ortigas Center, Pasig City.
  - (3) Deadline for the submission of proxies is at 5:00 PM of July 24, 2023.
  - (4) Validation of proxies will be on July 24, 2023.
  - (5) If a stockholder avails of the option to cast his/her vote electronically in absentia and also issues proxy votes with differing instructions, the duly accomplished ballots sent through e-mail shall replace the proxy votes issued by the stockholder.

### IV. PARTICIPATION BY REMOTE COMMUNICATION

- A. Only duly registered stockholders will be included in determining the existence of a quorum.
- B. Duly registered stockholders may send their questions and/or comments prior to the ASM through email at [corpaffairs@petroenergy.com.ph](mailto:corpaffairs@petroenergy.com.ph). The deadline for submitting questions shall be at **5:00 PM of July 24, 2023**.
- C. The proceedings during the 2023 ASM will be recorded. For any clarifications, please contact the Office of the Corporate Secretary via email at [corpaffairs@petroenergy.com.ph](mailto:corpaffairs@petroenergy.com.ph).

**SAMPLE ONLY**  
**PROXY PETROENERGY RESOURCES CORPORATION**  
**2023 STOCKHOLDERS’ MEETING**

I/WE hereby name and appoint, \_\_\_\_\_, or in her absence, the Chairman of the meeting, as my/our proxy at the annual stockholders’ meeting of **PETROENERGY RESOURCES CORPORATION**. # 2022 MINUTES OF ANNUAL STOCKHOLDERS' MEETING

[https://petroenergy.com.ph/#!/document/perc\\_asm\\_28july2022\\_final](https://petroenergy.com.ph/#!/document/perc_asm_28july2022_final)

**MINUTES OF THE ANNUAL STOCKHOLDERS' MEETING  
OF PETROENERGY RESOURCES CORPORATION**

**DATE** : July 28, 2022  
**TIME** : 4:00 p.m.  
**MANNER** : Via Zoom Conference Meeting

The Chairman, **Ms. Helen Y. Dee**, welcomed all the stockholders to the 2022 Regular Annual Stockholders' Meeting (ASM), and mentioned that the ASM will be conducted through online and recorded video-streaming to minimize the risk posed by the continuing COVID-19 pandemic in the country.

The Chairman also mentioned that the procedures for the ASM were embodied in the Company's Definitive Information Statement duly approved by the Securities and Exchange Commission (SEC). She added that the Stockholders were advised to register online to accord them the opportunity to participate in the ASM; that only questions and concerns submitted online prior to the given deadline will be addressed during the ASM; and that those given during the ASM will be addressed through email after the ASM and will be included in the minutes, accordingly.

The incumbent members of the Board of Directors of the Company, who were then present, were thereafter introduced while their photos were shown on-screen, as follows:

Ms. Helen Y. Dee	-	Chairman
Ms. Milagros V. Reyes	-	Director/President
Ms. Yvonne S. Yuchengco	-	Director/Treasurer
Mr. Cesar A. Buenaventura	-	Lead Independent Director
Ms. Maria Mercedes M. Corrales	-	Independent Director
Mr. Eliseo B. Santiago	-	Independent Director
Mr. Lorenzo V. Tan	-	Director

## I. CERTIFICATION OF SERVICE OF NOTICE

The Corporate Secretary, Atty. Samuel V. Torres, was called to submit proof of the Notice of Meeting. The Corporate Secretary certified that, pursuant to the alternative mode for distributing and providing the notice of meeting in connection with the holding of the ASM for 2022, notices of the meeting were sent to all stockholders of record as of June 15, 2022 in four (4) ways to reach as many stockholders as possible.

First, through publication of the Notice of the ASM, including the agenda, for two (2) consecutive days on June 29, 2022 and June 30, 2022 in The Manila Bulletin and in the Philippine Star, both in print and online editions, as evidenced by the Affidavits of Publication executed by the respective representatives of said publishers. Second, by disclosure with the Philippine Stock Exchange. Third, by posting on the Company's website. Finally, through email for those who have successfully registered online, consistent with applicable SEC Rules and the Company's internal guidelines on participation by electronic means of communication or in absentia.

## II. DETERMINATION OF QUORUM / CALL TO ORDER

The Corporate Secretary certified that there was a quorum for the transaction of any business that may be properly brought before the Body, that out of **568,711,842** outstanding shares entitled to vote, a total of **418,078,268** shares are present, **66,967** shares in person and **418,011,301** shares in proxy, representing **73.51%** of the total outstanding shares. On the basis of the Corporate Secretary's certification, the Chairman called the meeting to order.

## III. APPROVAL OF THE MINUTES OF THE LAST REGULAR ANNUAL STOCKHOLDERS' MEETING HELD ON JULY 29, 2021

The Chairman mentioned that the minutes of the last Regular Annual Stockholders' Meeting held on July 29, 2021 were made available in the Company's website. Stockholders owning 73.51% of the outstanding shares have voted in favor of the following resolution:

*"RESOLVED, That the Minutes of the Regular Annual Stockholders' Meeting held on July 29, 2021 be, as it is hereby, approved."*

#### **IV. APPROVAL OF MANAGEMENT REPORT AND THE 2021 AUDITED FINANCIAL STATEMENTS**

The Chairman announced that the Board of Directors, in a meeting held immediately prior to the stockholders' meeting, approved the declaration of 5% cash dividend, or P0.05 per share, to all stockholders of record as of August 15, 2022 and such cash dividend will be payable on September 8, 2022.

She then requested the President, Ms. Milagros V. Reyes, to deliver the Management Report as follows:

"Dear Fellow Stockholders:

As conveyed in our Annual Report, our Company's consolidated net income in 2021 ended at Php 665 Million, a 3% increase from 2020. We continue to gain returns from our renewable energy (RE) venture as our geothermal, wind, and solar power plants produced 446,000 MW of power last year delivering Php 2.67 Billion in revenues and more significantly abating 316,000 metric tons of carbon dioxide. Our fruitful investment in RE and our pledge to protect the planet, have pushed us towards our next big move – to go entirely renewables.

And we are pleased to report several gains on this strategy. We were awarded with three (3) service contracts to develop 4,000 MW of offshore wind power projects in the country, two (2) service contracts to build and operate solar projects in Luzon and Visayas, and more recently, our onshore Nabas wind power project expansion in Aklan bagged a 20-year power supply agreement under the Green Energy Auction Program (GEAP) of the Department of Energy (DOE).

While we celebrate these positive events, what we are more proud of is how our business achievements translate to a shared value with our people and host communities. Through our We Power H.E.L.P. CSR program, we were able to enhance the resources and human potential of our host communities where we operate. A mandate that is very much an integral part of PetroEnergy's mission.

Our CSR efforts can be traced back to 2006 when we supported public education by sponsoring teachers' trainings for 1,100 teachers across the country. Being a member of YGC and an affiliate of one of pioneering schools in the country, the Mapua schools, education is a cause that is very close to our hearts. Since 2015, we provided scholarship grants and values formation to 50 scholars, from which there are now professional mechanical, electrical, civil, and marine engineers, two (2) are graduates of information technology, and 10 have completed culinary arts and management. Most of them are now working in foreign companies and local public and private firms.

In 2009 when we started our geothermal project, we were presented the opportunity to interact closely with our communities and design more inclusive projects that address their immediate needs. And through our participatory approach to community-building, we were able to transform villages into progressive communities by helping them with their basic needs such as clean water system, electricity for those who have been without electricity for 50 years, quality education, and medical services. Our goal of producing self-sustaining and resilient communities have enabled us to successfully organize chili farmers in Tarlac and women weavers in Aklan to be more productive members of their communities. It is our hope to inspire change and progress, in places where we operate. This is our way of contributing to building our nation's economic and social capital.

And with your continuous support our fellow Shareholders, we are confident that we can continue providing optimum value to our Shareholders and carrying out our mission of uplifting people and communities.

Thank you."

After the President's presentation, the Corporate Secretary informed that the Stockholders owning 73.51% of the outstanding shares have voted in favor of the following resolution:

*"RESOLVED, as it is hereby resolved, that the 2021 Management Report and the 2021 Audited Financial Statements, as made available to the stockholders, be as they are hereby, noted and approved."*

**V. CONFIRMATION AND RATIFICATION OF ALL ACTS, RESOLUTIONS, CONTRACTS AND INVESTMENTS MADE AND ENTERED INTO BY THE BOARD OF DIRECTORS AND MANAGEMENT DURING THE PERIOD JULY 29, 2021 TO JULY 28, 2022**

A resolution for the confirmation and ratification of all acts, resolutions, contracts and investments made and entered into by the Management and/or the Board of Directors for the period July 29, 2021 to July 28, 2022 was shown on the screen. After which, the Corporate Secretary informed that stockholders owning 73.51% of the outstanding shares have voted in favor of the resolution, to wit:

*"RESOLVED, as it is hereby resolved, that all acts, resolutions, contracts and investments made by Management and/or the Board of Directors for the period July 29, 2021 to July 28, 2022, be as they are hereby confirmed, ratified and approved."*

## VI. ELECTION OF SEVEN (7) MEMBERS OF THE BOARD OF DIRECTORS FOR THE YEAR 2022-2023

The Chairman then tackled the next item in the Agenda. She asked asked the Corporate Secretary if he has the list of nominees to the Board of Directors. The Corporate Secretary replied in the affirmative, and that, as of July 15, 2022, the deadline for nominations, seven (7) nominees were screened and short-listed by the Corporate Governance Committee for election as members of the Board of Directors, namely:

- |                               |   |                      |
|-------------------------------|---|----------------------|
| 1. HELEN Y. DEE               | - | Director             |
| 2. MILAGROS V. REYES          | - | Director             |
| 3. YVONNE S. YUCHENGCO        | - | Director             |
| 4. CESAR A. BUENAVENTURA      | - | Independent Director |
| 5. MARIA MERCEDES M. CORRALES | - | Independent Director |
| 6. ELISEO B. SANTIAGO         | - | Independent Director |
| 7. LORENZO V. TAN             | - | Director             |

The Corporate Secretary underscored that among these nominees, Independent Directors, Mr. Cesar A. Buenaventura and Mr. Eliseo B. Santiago, reached the nine (9) years term limit as Independent Directors in 2022. Mr. Buenaventura and Mr. Santiago were, however, nominated for retention and reelection as Independent Directors. He then explained that under the Company's Manual on Corporate Governance and as warranted by the SEC Memorandum Circular No. 19, Series of 2016, the Independent Directors may be retained and reelected upon meritorious justification/s and Stockholders' approval. The justifications for said retention and reelection have been provided to the Stockholders in advance through the Information Statement.

The Corporate Secretary informed that all the shares represented in the meeting or **418,078,268** shares (73.51%) of the outstanding shares, have been voted in favor of the election of all the seven (7) nominees, including the extension and retention of Mr. Buenaventura and Mr. Santiago as Independent Directors.

The Chairman then proclaimed the above-named nominees as elected members of the Board of Directors of the Corporation for the year 2022-2023.

## **VII. APPOINTMENT OF THE COMPANY'S EXTERNAL AUDITORS**

The Chairman stated that the Audit Committee recommended the re-appointment of the firm SyCip Gorres Velayo & Company (SGV) as the Company's external auditor for the year ending December 31, 2022.

The Corporate Secretary informed that Stockholders owning 73.51% of the outstanding shares have voted in favor of the resolution reappointing SGV as external auditor for the year ending December 31, 2022, to wit:

*"RESOLVED, That the auditing firm SyCip Gorres Velayo & Company be, as it is hereby, reappointed as External Auditor of the Company for the calendar year ending December 31, 2022."*

## **VIII. OTHER MATTERS**

The Chairman requested the Corporate Secretary to report the comments and questions submitted to the Company prior to the stated deadline.

The Corporate Secretary then informed that one of the Stockholders, Mr. Jerry T. Chua, submitted his questions which were shown on the screen as follows:

1. What is the current attributable capacity of the Company and target attributable capacity by 2025 and 2030?
2. Is the Company prioritizing solar projects over geothermal and wind? If yes, what is the rationale for this strategy?
3. Are there plans to eventually expand the capacity of Maibarara Geothermal and Nabas Wind Power?

4. What is the timetable for the Company to conclude the feasibility study & pre-development works of the three new offshore wind blocks covering offshore northern Luzon, northern Mindoro, and eastern Panay?
5. Has the Company signed a MOU with a (Danish) technical/financial partner?
6. Will the Company maintain operating control of the highly capital intensive offshore wind projects or open to getting diluted to a minority stake?

The President addressed Mr. Chua's questions.

In response to the questions, the President reported that the Company's current attributable capacity is 138MW. The Company aims to increase its attributable capacity to ~178MW by 2024, and to at least 200 MW by 2030.

The President added that solar farms are faster to put up and the cost to develop the same is lower than that of wind and geothermal. Since the returns are comparable, the Company would prioritize solar.

If the company is to attain its capacity goal, there would be a need to expand its geothermal and wind projects. These are in the Company's focused projects list, especially since the Company has been granted an allocation through the Green Energy Auction Program of the Department of Energy for its wind project in Nabas, Aklan.

As to the offshore wind projects, the President reported that this is in the longer term. The Company is given five (5) years to complete the feasibility studies for the projects with its Danish Company partner with whom a Memorandum of Understanding (MOU) was executed for the study phase. The Company will make its decisions on the operating control after said studies are completed.

**IX. ADJOURNMENT**

Since no other business was brought to the table and that no other questions have been received from the stockholders within the stated deadline nor during the meeting, the meeting was adjourned upon motion duly made and seconded.

## **PART I - BUSINESS AND GENERAL INFORMATION**

### **Item 1 - Business Development**

PetroEnergy Resources Corporation (“PERC” or “PetroEnergy” or the Parent Company) is a publicly-listed domestic corporation. Its registered office and principal place of business is 7/F, JMT Building, ADB Avenue, Ortigas Center, Pasig City.

PERC was organized on September 29, 1994 as Petrotech Consultants, Inc. to provide specialized technical services to its then parent company, Petrofields Corporation, and to companies exploring for oil in the Philippines.

In 1997, PERC simultaneously adopted its present name and changed its primary purpose to oil exploration and development and mining activities. Subsequently in 1999, PERC assumed Petrofields’ oil exploration contracts in the Philippines and the Production Sharing Contract covering the Etame discovery block in Gabon, West Africa.

On August 11, 2004, PERC’s shares of stock were listed at the PSE by way of introduction.

In 2009, following the enactment of Republic Act No. 9513, otherwise known as the “Renewable Energy Act of 2008” (RE Law), PERC amended its articles of incorporation to include among its purposes the business of generating power from renewable sources such as, but not limited to, biomass, hydro, solar, wind, geothermal, ocean and such other renewable sources of power.

On March 31, 2010, PERC incorporated PetroGreen Energy Corporation (PetroGreen or PGEC), its 77%-owned subsidiary (90%-owned in 2021) to act as its renewable energy arm and holding company. PGEC ventured into renewable energy development and power generation through its subsidiaries and affiliate: (a) Maibarara Geothermal, Inc. (MGI, 65%-owned) - owner and developer of the 20 MW Maibarara Geothermal Power Project (MGPP-1) in Santo Tomas, Batangas and its expansion, the 12 MW MGPP-2; (b) PetroSolar Corporation (PetroSolar, 56%-owned) - owner and developer of the 50MW<sub>DC</sub> Tarlac Solar Power Project (TSPP-1) in Tarlac City and its 20 MW<sub>DC</sub> expansion, TSPP-2; and (c) PetroWind Energy, Inc. (“PetroWind”, 40%-owned) – owner and developer of the 36 MW Nabas Wind Power Project (NWPP-1) in Nabas and Malay, Aklan.

MGI and PetroSolar are effectively indirect subsidiaries of PetroEnergy through PetroGreen. PetroGreen owns majority of the voting power of MGI and PetroSolar. PetroEnergy, PetroGreen, MGI and PetroSolar are collectively referred to as the “Group” and were incorporated in the Philippines.

### **Business of Issuer**

#### **Description of Business**

The Group’s four (2) main energy businesses are: (1) upstream oil exploration and (2) development, and power generation from renewable energy resources such as, (a) geothermal, (b) solar, and (c) wind, through the Group’s affiliate, PetroWind.

#### **(1) Upstream Oil Exploration and Development**

Oil and gas are buried several thousands of meters underneath the earth. The explorationist, therefore, neither sees nor touches his target. This lack of physical access, however, is compensated by applying various geological, geophysical, and geochemical exploration tools.

In the actual drilling of hydrocarbon, computer-guided drilling rigs dig rock layers several kilometers below the surface. In offshore exploration and production, robot submarines are used to emplace and control subsea equipment and materials. These intensive application of modern technology requires large amounts of capital. Oil exploration companies worldwide had adopted the prudent strategy of pooling together in a consortium to pursue exploration in order to distribute risk and minimize financial exposures.

The common financial arrangement between host countries and the exploration companies is the sharing in costs and revenues from the sale of the hydrocarbon products. The host country partakes in the costs by allowing the explorationists to recover an agreed percentage of the historical costs before the net proceeds are divided between the government and the consortium.

#### Oil Exploration and Development Projects

The principal properties of the Company consist of various oil areas located in the Philippines and in Gabon. Petroleum production is on-going in the Etame (Gabon) concession, while the other petroleum concessions in the Philippines are still in the advances exploration stages or pre-development stages. The following are a brief description and update on these projects.

#### **Foreign Operations**

##### **Gabon, West Africa**

The Group holds approximately 2.53% participating interest in the Exploration and Production Sharing Contract covering the Etame block in Gabon, West Africa (the “Etame Marin Permit”). The other parties in the consortium are Addax Petroleum Etame, Inc. (33.90%) and VAALCO Gabon (Etame), Inc. (63.58%) (the “Gabon Consortium”), are leaders in their respective areas of operation. VAALCO is the Consortium’s operator, and is in charge of conducting the exploration and production activities in the Gabon contract area.

The EPSC is a contract with the Gabonese Government that gives the holder of the said EPSC exclusive rights and obligations to perform exploration, exploitation, and production activities and in the case of the consortium, within the Etame Marin Permit area.

In August 2021, the Consortium entered into a Bareboat Charter Agreement and Operating Agreement with World Carrier Offshore Services Corporation (World Carrier) to provide and operate a Floating Storage and Offloading (FSO) unit at the Etame Marin field for up to eight (8) years with additional option periods available upon the expiration of the current 20-year Floating Production, Storage and Offloading (FPSO) contract with BW Offshore in September 2022.

In December 2021, the consortium commenced a four-well drilling program in the Etame, Avouma and North Tchibala fields using the Borr Norve jack-up drilling rig, aimed to sustain field production to above 20,000 BOPD.

Etame-8H sidetrack was completed in February 2022. Avouma-3H sidetrack was completed in April 2022, South Tchibala-1HB sidetrack in July 2022, and North Tchibala-2H sidetrack in November 2022. Workovers were also conducted on Ebouri-2H, North Tchibala-1H and Southeast Etame-4H wells within 2022. This resulted in an increase in overall crude production of ~18,000-20,000 BOPD by the end of 2022.

Given the extended EPSC period, the Consortium is currently firming up the most feasible Integrated Field Development Plan (IFDP) to extract the remaining recoverable oil volumes until at least 2028 up to 2038 (final extension). This IFDP may include: 1) production from sour oil reserves, 2) outfield drilling opportunities, and 3) facility maintenance strategies.

##### **Update on Production**

Production was routed to the Petroleo Nautipa, the spread-moored (FPSO) vessel from the Etame, Avouma-Southeast Etame-North Tchibala and Ebouri platforms, and from the wells tied to the subsea Etame manifold. The produced oils were processed and exported from the FPSO, which had a storage capacity of one million barrels of oil (MMBO).

Throughout 2022, facility reconfiguration works were being completed in parallel for the hook-up and commissioning of the new FSO vessel Teli, which replaced the Petroleo Nautipa FPSO vessel in mid-October 2022. The FSO vessel is now operational and receiving crude from all Etame Marin platform wells. The two (2) old subsea wells – Etame-6H and Etame-7H – which were originally connected directly to the old Petroleo Nautipa FPSO, have been hooked-up to the FSO last December 30, 2022. Final punchlist items are currently being completed.

Crude production comes from four (4) oil fields (Etame, Avouma, Ebouri and North Tchibala).

In 2022, total crude production reached 5.94 MMBO. The Consortium managed 11 liftings, resulting in net crude export of 5.133 MMBO, with crude oil market prices ranging from US\$ 76 – US\$ 133 per barrel.

In 2021, total crude production reached 5.42 MMBO. The Consortium managed 11 liftings, resulting in net crude export of 5.867 MMBO, with crude oil market prices ranging from US\$ 50 – US\$85 per barrel.

In 2020, total crude production reached 6.57 MMBO. The Consortium managed 11 liftings, resulting in a net crude export of 6.02 MMBO, with crude oil market prices ranging from US\$ 17 – US\$66 per barrel.

Since the Gabon oilfield has been put on-line in 2002, a total of 130 MMBO have been extracted to date over the last 20 years.

### **Philippine Operations**

#### **SC 6-A - Octon-Malajon Block**

This is one of the first exploration areas in offshore Palawan. It includes about 165,000 hectares of relatively shallow water areas where a string of wells has found non-commercial oil accumulations in varied reservoir horizons. DOE granted in June 2009 the final 15-year extension of the SC-6A service contract.

In 2019, consortium operator Philodrill completed seismic interpretation and mapping works for the northern portion of the Octon-Malajon block, using recent and old SC 6A seismic data and subsurface data from the adjacent Galoc

In 2020, Philodrill engaged Dubai-based consultants LMKR to conduct Quantitative Interpretation (QI) works to determine possible drilling opportunities in the northern portion of the block (Malajon field); the results of which were provided to the consortium in January 2021.

In March 31, 2021, Philodrill gave notice to the DOE that the Joint Venture has elected not to enter the 12<sup>th</sup> year of the final 15-year term of SC 61 and consequently surrender the Service Contract. The limited term remaining in the SC 6-A until its expiry in February 2024 exacerbated by the Covid-19 situation, greatly hampered the timely execution of the programs that the Joint Venture envisage undertaking to pursue appraisal programs and potential development opportunities in the area.

The DOE formally approved the relinquishment of SC 6-A on September 05, 2022.

Following the above, as of December 31, 2021, the Group has written –off the P159.298 million deferred cost.

PERC held a 16.667% participating interest in SC 6-A

#### **SC 14-C2 - West Linapacan, Northwest Palawan**

West Linapacan was discovered in the early 1990s. It produced oil from 1992 to 1996, peaking at 18,000 BOPD, before it was shut-in due to early water incursion.

The SC 14C2 Consortium, led by operator Philodrill Corp., negotiated with a potential farmee for the drilling of potential drilling targets, in exchange for a majority share and Operatorship of SC 14C2. This farm-in is subject to the approval of the Department of Energy (DOE).

While the consortium awaited the farmee’s completion of the farm-in documentation, Philodrill continued to do in-house G&G work over at the West Linapacan area at the interim. For compliance, a “Transition Work Program and Budget, covering November 2020 to March 2021 was submitted to the DOE in November 2020 and was approved.

Throughout the second half of 2021 and 2022, the SC 14-C2 consortium proceeded with a third-party technical evaluation of the West Linapacan B field, to assess potential production opportunities. SC 14-C2 is due to expire in December 2025.

Due to the limited term remaining, the Group assessed the recoverability of the investment included in “Wells, platforms and other facilities” account under “Property, plant and equipment” and recorded Impairment loss amounted to ₱144.40 million in 2021 (nil in 2020 and 2019).

As of December 31, 2021 and 2020, the investment amounts to ₱61.92 million and ₱206.32 million, respectively.

PERC holds a 4.137% participating interest in SC 14C2.

### **SC 75 – Offshore Northwest Palawan**

Service Contract 75 (SC 75) was signed on December 27, 2013 with partners PXP Energy Corporation (50%) and PNOC-Exploration Corporation (35%). The block covers the West Philippine Sea with an area of 616,000 hectares.

On October 14, 2020, the Department of Energy (DOE) issued a formal notice to the SC 75 consortium, lifting the Force Majeure imposed since September 2015. Through this letter, the consortium was notified to resume its Work Program commitments under SC 75, including the committed ~1,000 sq.km 3D seismic survey over the identified leads in SC 75.

On January 06, 2022, the SC 75 consortium officially engaged Shearwater Geoservices Ltd. for the ~1,100 sq.km 3D seismic survey over SC 75 using the M/V Geo Coral seismic vessel. However, the programmed 3D seismic acquisition campaign was suspended on April 06, 2022 after Operator PXP Energy Corporation received a written directive from the DOE to put all exploration activities on hold until the Security, Justice and Peace Coordinating Cluster (SJPPC) issues the necessary clearance to proceed. On April 11, 2022, PXP declared a Force Majeure event over the suspended seismic survey.

The SC 75 consortium is awaiting further instructions from the DOE, while all contracted vessels and personnel for the seismic survey have since demobilized from the SC 75 area.

As of December 31, 2022 and 2021, the corresponding percentages of the Group's participation in the various Petroleum SC areas are as follows:

Gabonese Oil Concessions	2.525%
SC 14C2 - West Linapacan	4.137%
SC 75 - NW Palawan	15.000%

The oil revenues are derived from Gabon Operations. All contractual obligations with the Gabonese Government are complied with. The Philippine contracts are in exploration stage and some contracts are being farmed out to reduce risk inherent to the business.

## **(2) Development, and power generation from Renewable Energy Resources**

### ***(a) Geothermal Energy***

#### **Maibarara Geothermal Power Project**

*Geothermal Renewable Energy Service Contract (GRESK) No. 2010-02-012*

Following the DOE's Philippine Energy Contracting Round for Geothermal in 2009, PetroEnergy signed the Service Contract for the Maibarara Geothermal Power Project (MGPP) on February 1, 2010. PetroEnergy then conducted pre-development activities in 2010 to 2011. In order to carry out the development and operations of the MGPP, PetroEnergy (through its subsidiary, PetroGreen) then created Maibarara Geothermal, Inc. (MGI) along with Trans-Asia Oil and Energy Development Corporation ("Trans-Asia"), subsequently renamed as PHINMA Energy Corporation or "PHINMA", and now known as ACEN Corporation or ("ACEN") and PNOC Renewable Corporation (PNOC RC), with 65%, 25%, and 10% equity ownerships, respectively.

In June 2019, ACEN, the energy platform of Ayala Corporation, completed the acquisition of PHINMA, including PHINMA's 25% share in MGI.

#### **20 MW Maibarara-1 Geothermal Power Plant (MGPP-1)**

The DOE confirmed the commerciality of the 20-MW MGPP-1 in 2011, allowing MGI to proceed with the MGPP's development stage, involving 1) the drilling of two (2) wells to complete the steam production and reinjection well capacities, and 2) the construction of the steamfield and power plant facilities. The MGPP-1's

115kV Transmission Line system was successfully connected to the existing Manila Electric Company (MERALCO) line in September 2013. Upon completion of the reliability and performance testing, the MGPP-1 went on commercial operations on February 8, 2014. All electricity generated are sold to offtaker, ACEN, following the aforementioned acquisition of PHINMA by ACEN.

On February 08-27, 2021, the Maibarara-1 facility had a scheduled minor maintenance shutdown. Various maintenance activities for the unit's mechanical and electrical, and instrumentation facilities, as well as for the switchyard and transmission lines, were carried-out by MGI technical staff and private contractors.

MGPP-1 underwent its second major preventive maintenance shutdowns (PMS) in February 2022; the first having been conducted in 2016.

On the steamfield side, the two (2) production wells dedicated to MGPP-1 operations—Mai-6D and MB-12D—continued to behave consistently with dynamic but sustainable production.

MGPP-1 exported 134.48 GWh and 157.60 GWh of electricity in 2022 and 2021, respectively.

#### 12 MW Maibarara-2 Geothermal Power Plant (MGPP-2)

With the stable performance of the reservoir, MGI decided to pursue an expansion of the MGPP. There was at least 5 MW of excess steam supply from the MGPP-1 wells, and with the ~6 MW capacity of the new well, an expansion of 12 MW was decided and approved in 2015 (MGPP-2).

Major power plant components from Fuji Electric Co. Ltd. (“Fuji”, the same supplier as the MGPP-1) were delivered and installed on site from March to April 2017. MGPP-2 was first synchronized to the grid on March 9, 2018, with the full 12 MW attained on March 18, 2018. Reliability tests were then conducted from March 18 to 27, 2018, during which the power plant was on full 12 MW operation.

The Energy Regulatory Commission (ERC) formally notified MGI of the approval of MGPP-2's Certificate of Compliance (COC) application on April 26, 2018. Subsequently, the MGPP-2 was accepted into the Wholesale Electricity Spot Market (WESM) on April 30, 2018 - pegging the MGPP-2's start of Commercial Operations on the same date. This operationally started the application of MGPP-2's Electricity Supply Agreement (ESA) with PHINMA, now ACEN, wherein all of MGPP-2's generated electricity are sold to ACEN.

Workover operations were conducted on production well MB-15D in June 2022. After which, new production well MB-18D was drilled in September 2022 and hooked-up in November 2022. To date, the field's total gross output is now being sustained at ~33 MW.

MGPP-2 exported 70.23 GWh and 93.80 GWh of electricity in 2022 and 2021, respectively.

Both the MGPP-1 and the MGPP-2 are registered with the Board of Investments and are enjoying the incentives under the Renewable Energy Act of 2008.

#### ***(b) Solar***

##### Tarlac Solar Power Project (TSPP)

##### Solar Energy Service Contract (SESC) No. 2015-03-115

The SESC for the TSPP was awarded by the DOE on March 19, 2015. On June 17, 2015, PGEC and affiliate EEI Power Corporation (“EEIPC”, 100% subsidiary of EEI Corporation), incorporated PetroSolar to undertake the development of the TSPP.

##### 50 MWDC Tarlac Solar Power Project-1 (TSPP-1)

On June 22, 2015, PetroGreen and solar farm lot owner, Luisita Industrial Park Corporation (LIPCO), executed a Lease Agreement for the 55-hectare solar farm development. This was assigned to PetroSolar on September 15, 2015. As the LIPCO property is within the Central Technopark, which is under the jurisdiction of the Philippine Economic Zone Authority (PEZA), PetroSolar was able to register as an Ecozone Utilities Enterprise on July 28, 2015, entitling it to the incentives available to PEZA locators.

After only four (4) months of ground works, the TSPP-1 was completed by mid-January 2016 and was able to

export power to the grid on January 27, 2016. The DOE eventually gave its Certificate of Endorsement (COE) - Feed-in-Tariff (FiT) for TSPP-1, with an official Commercial Operations Date on February 10, 2016. Subsequently, on April 6, 2016, PSC executed its Renewable Energy Payment Agreement (REPA) with the National Transmission Corporation (TransCo), assuring the TSPP-1's revenues from the FiT payment of ₱ 8.69/kWh from 2016 to 2036.

The total energy exported to the grid was 70.33 GWh and 73.47 GWh in 2022 and 2021, respectively.

#### 20 MWDC Tarlac Solar Power Project (TSPP-2)

On September 17, 2018, the BOI formally awarded to PetroSolar the latter's Certificate of Registration for the 20 MW<sub>DC</sub> TSPP-2. This approval entitles the TSPP-2 to enjoy duty-free importations, and a seven-year Income Tax Holiday (ITH), among others.

After the site construction works for the TSPP-2 were completed in March 2019 and its registration with the WESM was secured from the Independent Electricity Market Operator of the Philippines Inc. (IEMOP) on April 21, 2019, the TSPP-2 started exporting power to the grid on April 22, 2019 as part of its testing and commissioning activities. The Energy Regulatory Commission (ERC) conducted its technical inspections for the TSPP-2 on May 31, 2019, as part of PetroSolar's Certificate of Compliance (COC) for TSPP-2.

On February 27, 2020 and March 18, 2020, the DOE formally issued to PSC the Certificate of Confirmation of Commerciality (COCOC) and the Certificate of Endorsement (COE) for TSPP-2, respectively. The COE is a prerequisite to the issuance of the Certificate of Compliance (COC) by the ERC. The COC will determine the official Commercial Operations Date (COD) for TSPP-2.

The ERC issued a Provisional Approval to Operate (PAO) to TSPP-2 on December 16, 2021, subject to PSC's compliance to 1) public offering requirement and 2) terms under PSC's Point-to-Point application, which was approved by the ERC in a Decision promulgated on April 8, 2022. However, PSC filed its Motion for Reconsideration on April 25, 2022 seeking the ERC's approval to allow PSC to implement its proposed interim connection scheme while the route for the soon-to-be constructed Concepcion-Sta. Ignacia is finalized by the National Grid Corporation of the Philippines (NGCP). The said PAO is valid until December 15, 2022, and sets TSPP-2's WESM COD to January 25, 2022.

TSPP-2 exported 29.46 GWh and 30.48 GWh in 2022 and 2021, respectively.

#### Puerto Princesa Solar Power Project (PPSPP)

*Solar Energy Service Contract (SESC) No. 2017-01-360*

The Service Contract for the Puerto Princesa Solar Power Project (PPSPP) was signed by DOE Secretary Alfonso Cusi on February 27, 2017. The PPSPP aims to put up a 10-20 MW off-grid solar hybrid power facility in Puerto Princesa City, Palawan to meet the increasing electricity demand and address the fluctuating electricity situation in the city through solar power.

PetroGreen has secured all local government endorsements needed for eventual facility development. In January 2020, PGEC was among seven (7) pre-qualified bidders for the 20-MW Palawan Main Grid Competitive Selection Process (CSP) of the Palawan Electric Cooperative (PALECO). On March 12, 2020, PALECO issued a bulletin which states that the submission and opening of bids was postponed until further notice.

On January 18, 2021, PALECO issued a bulletin resuming the Palawan Main Grid 20-MW CSP after a 10-month postponement, with minor revisions to the bid terms as approved by the DOE and the National Electrification Administration (NEA). However, PGEC decided to withdraw from said bidding process, owing to PALECO's final Terms of Reference (TOR), which severely limit the economic feasibility of PGEC's planned investment.

On September 7, 2022, PGEC has sent a letter to DOE for the intention to Relinquish the Service Contract and settled the remaining financial obligations under the SESC. As of December 31, 2022 the DOE has not yet given their official approval of the relinquishment of the said SESC.

#### Enrique T. Yuchengco Bldg. Rooftop Solar Power Project (ETY) – Binondo, City of Manila

On April 29, 2021, PGEC completed its first commercial and industrial (C&I) rooftop solar project for the Enrique

T. Yuchengco Bldg. in Binondo, Manila.

The building owner E.T. Yuchengco Inc. (ETY) and project owner PGEC signed a 15-year Rent-to-Own Agreement for a 140.8-kWp solar rooftop facility last January 14, 2021. The rental period commenced upon the project's completion in April 2021. After said 15-year cooperation period, PGEC will turn-over the said rooftop solar facility to ETY free of charge.

The ETY rooftop solar facility exported 0.140 GWh and 0.096 GWh of electricity in 2022 and 2021, respectively.

Bugallon Solar Power Project (BSPP)  
*Solar Energy Operating Contract (SEOC) No. 2022-04-622*

On May 05, 2022, PGEC was awarded a Solar Energy Operating Contract (SEOC) by the DOE for its Bugallon Solar Power Project (BSPP) in Brgy. Salomague Sur, Bugallon, Pangasinan.

For the year, PGEC has completed the Distribution Impact Study (DIS) for the BSPP, which has been approved by the Central Pangasinan Electric Cooperative (CENPELCO), and subsequently endorsed to the National Electrification Administration (NEA) for their approval.

PGEC also secured the Certificate of Non-Overlap (CNO) from the National Commission on Indigenous Peoples (NCIP) for the project, confirming that the project site is outside any ancestral domain and free from any tribal claims.

In parallel, the issuance of the Municipal Resolution endorsing the land reclassification for the BSPP site is still being undertaken by an external legal counsel. Once this is secured, PGEC will lodge its application for the project endorsement by the Pangasinan Sangguniang Panlalawigan (SP) and the Zoning Clearance.

Dagohoy Solar Power Project (DSPP)  
*Solar Energy Operating Contract (SEOC) No. 2022-06-629*

On June 28, 2022, PGEC was awarded a Solar Energy Operating Contract (SEOC) by the DOE for its Dagohoy Solar Power Project (DSPP) in Brgy. San Vicente, Dagohoy, Bohol.

To date, PGEC has secured favorable endorsements for the land reclassification of the DSPP site from the Dagohoy Sangguniang Bayan (SB) last October 2022 and by the Bohol SP last December 2022. Said resolutions are needed to secure the requisite Locational Clearance and Building Permit applications for the DSPP.

NGCP has approved PGEC's application to conduct the SIS for the DSPP via NGCP's Online Transmission Connection Application (OTCA) portal, with the DSPP's SIS proper tentatively scheduled for mid-2023.

While awaiting the SIS conduct, PGEC awarded to Media Construction and Development Corporation (MCDC) the contract for the initial site development works (site grading, access road and drainage construction, perimeter fence and gate). MCDC is targeting completion of site development works by August 2023.

**(c) Wind**

Nabas Wind Power Project (NWPP)  
*Wind Energy Service Contract (WESC) No. 2009-09-002*

The service contract for the Nabas Wind Power Project (NWPP) covers 2,000 hectares of public and private lands in rolling terrain located near the northwestern tip of Panay Island. It lies about 6 km southeast of Caticlan, and electricity-deficient Panay and Boracay islands are natural markets of future power from NWPP.

It was decided that the NWPP will be constructed in two phases: Phase 1 for the existing 36 MW NWPP-1, consisting of 18 Wind Turbine Generators (WTG); while Phase 2 will be a 14 MW development that will have seven (7) WTGs (NWPP-2).

On May 26, 2013, the DOE issued the Confirmation of Commerciality for the 36 MW NWPP-1, making it the third WESC to be declared commercially feasible. Construction of NWPP-1 started in December 2013 and was completed in the first half of 2015.

On June 16, 2015, the DOE released the COE for FIT Eligibility (COE-FIT), endorsing the official start of commercial operation to be June 10, 2015. On August 17, 2015, the ERC approved PWEI's COC for NWPP-1. This confirms the commercial operations date of the wind farm to be June 10, 2015.

The annual total energy exported to the grid were 80.80 GWh, 91.35 GWh and 80.45 GWh in 2022, 2021, and 2020, respectively.

On May 13, 2020, the DOE formally awarded to PetroWind the Certificate of Confirmation of Commerciality (COCOC) for the planned 14-MW Nabas-2 Wind Power Project (NWPP-2). This signifies that NWPP-2 has been approved for construction as being commercially feasible.

In February 17, 2021, the DENR-EMB Region 6 issued the amended Environmental Compliance Certificate (ECC) to PetroWind for NWPP-2, while the Forest Land Use Agreement (FLAg) has been signed by the DENR Central Office in January 04, 2022.

On June 24, 2022, PWEI's NWPP-2 was formally announced as the winning bidder for the 20-MW Visayas wind allocation of the DOE's Green Energy Auction Program (GEAP), for a 20-year offtake term. On September 28, 2022, the DOE issued to PWEI its Certificate of Award for the GEAP wind allocation.

PWEI awarded to VESTAS the WTG Supply, Supervision, and Services Agreements on December 13, 2022 and VESTAS is set to deliver the six (6) NWPP-2 WTGs by the last week of July, 2023. On the other hand, PWEI also awarded and issued the Notice to Proceed (NTP) to EEI Corporation the contract for the Main Balance of Plant (BoP) for the Civil, Electrical (Substation and Switching Station, and Electrical Feeder Lines), including WTG Electro-Mechanical Works installation. Further, the Special Agreement for Protected Areas (SAPA) was officially signed by DENR in early-January 2023. It is the tenurial instrument that gives authority to PWEI to develop NWPP-2 in the approved area for at least 25 years.

*San Vicente Wind Hybrid Power Project (SVWHPP)*  
*Wind Energy Service Contract (WESC) No. 2017-09-118*

On November 11, 2019, the DOE officially awarded to PetroGreen the San Vicente, Palawan WESC. The WESC, effective October 9, 2019, vests PetroGreen with the rights and responsibilities to harness wind energy and develop and operate the corresponding renewable energy facility in the area. The proposed project is situated in the municipality of San Vicente, Palawan, approximately 130 km north of Puerto Princesa.

Activities for the meteorological mast installation program for the San Vicente Wind Hybrid Power Project (SVWHPP) have been put on-hold due to COVID-19-related travel restrictions. Nonetheless, PGEC has secured on May 07, 2020 a Certificate of Non-Coverage (CNC) from the Department of Environment and Natural Resources (DENR) for the mast installation. PGEC also secured a Special Land Use Permit (SLUP) from the DENR on March 09, 2021 for the mast installation in San Vicente.

In December 2020, PGEC's contractor was mobilized to San Vicente, Palawan to carry out the installation works for the 60-meter meteorological mast to be used for the wind measurement campaign of the SVWHPP. The said mast was commissioned and turned-over to PGEC in July, 2021. Since July 2021 up to present, PGEC is continuing with the wind measurement campaign for the SVWHPP to assess the long-term wind resource to support a potential wind-hybrid power project in San Vicente.

***(e) Offshore Wind***

*Northern Mindoro Offshore Wind Power Project*

*Northern Luzon Offshore Wind Power Project*

### East Panay Offshore Wind Power Project

In 2021, PGEC secured three (3) new Wind Energy Service Contracts (WESC) from the DOE covering three (3) offshore wind blocks, namely 1) Northern Luzon Offshore Wind Power Project (located offshore Ilocos Norte), 2) Northern Mindoro Offshore Wind Power Project (located offshore Occidental Mindoro), and 3) Easy Panay Offshore Wind Power Project (located offshore Iloilo). These projects will be developed by PGEC alongside Danish energy firm Copenhagen Energy A/S (CE) through a new Special Purpose Vehicle named “BuhaWind Energy Philippines (BEP)”, duly incorporated in November 2022.

On December 28, 2021, the DOE issued to PGEC its formal endorsements for NGCP’s conduct of the System Impact Studies (SIS) for the three (3) offshore wind blocks. The early issuance will help both DOE and NGCP to plan their grid improvements to accommodate large-scale capacities from these offshore wind projects. PGEC also secured DOE Endorsement to Local Government Units / National Government Agencies for the Northern Luzon project in January 2022.

Throughout 2022, PGEC and CE proceeded with several feasibility studies for the three (3) offshore wind blocks, namely 1) desktop wind and met-ocean resource studies, 2) power market study, and 3) desktop site characterization studies in preparation for detailed geophysical and geotechnical studies.

Specifically for the Northern Luzon block, PGEC and CE commenced with additional pre-development studies, namely 1) initial environmental pre-scoping study, 2) SIS application with NGCP, and 3) initial discussions with contractors for on-site wind measurement campaign.

### **Products**

The group’s main products are revenues from the electricity sales from renewable energy and crude oil production.

Electricity sales contribute 66.48% of the total revenues as of December 31, 2022. These are currently generated from MGPP-1, MGPP-2, TSPP-1 and TSPP-2.

Oil revenues are derived from PERC’s share of producing offshore oil fields in Gabon, West Africa, which contributes 28.46% of the total revenues as of December 31, 2022.

### **Distribution Method**

#### ***Electricity Sales***

For Maibarara Geothermal Power Plant (MGPP) Unit 1 (20 MW) and MGPP Unit 2 (12 MW) which started commercial operations on February 8, 2014 and April 30, 2018, respectively, all the energy exported is sold to ACEN Corporation (formerly PHINMA Energy Corporation), a retail electricity supplier (RES), through an electricity supply agreement (ESA).

For the 50 MWdc Tarlac Solar Power Project (TSPP) which started its commercial operations on February 10, 2016 and qualified for the Fee-in-Tariff (FIT) scheme, all energy is exported to the grid and is distributed to all end-users who are connected to the grid. The National Transmission Corp. (TransCo), as the FIT administrator, facilitates the payments to FIT-eligible plants, such as TSPP.

#### ***Crude oil***

The Consortium entered into a crude sales agreement with Glencore Energy UK Ltd. where a single buyer is committed to buy based on a pricing scheme that is benchmarked on Dated Brent. Dated Brent represents the value of physical crude oil trading for prompt delivery in the open spot market. With this type of agreement, the Consortium will be assured of its crude oil being purchased at a fixed pricing scheme.

Physical transfer of the oil was effected at the offshore production site from the Floating Production Storage and Offloading Vessel (FPSO) to the buyer’s oil tanker. The FPSO was replaced by the FSO in October 2022, carrying out similar functions as the FPSO.

### **Competition**

In the Company’s RE business, there is a risk that bigger power producers, particularly those that operate coal power

plants, may command lower prices and thus be preferred by potential offtakers over the electricity generation from power generating assets of the Company. To mitigate this risk, long-term contracts have been and will be secured for its RE power projects. MGI has secured a long-term Electricity Supply Agreement with PHINMA, now ACEN Corporation ensuring stable and predictable cash flows for the 20-year duration of the agreement. As for the TSPP-1 and NWPP-1, FIT rates of P8.69/kWh and P7.40/kWh, respectively, have been secured from the DOE, with the approval of the Energy Regulatory Commission (ERC).

For the local oil industry, industry, companies form a consortium to explore certain areas due to high cost of exploration. Competition arises when 2 or more parties bid for a single block offered by the government and have to come up with the best program for exploration. Oil companies with local presence in the Philippines include: The Philodrill Corporation, ACEN Corporation formerly, PHINMA Energy, Forum Energy Philippines Corporation, PXP Energy Corporation, among others. The Company formed consortiums with these companies in some Philippine service contracts.

#### **Sources and Availability of Raw Materials and Names of Principal Suppliers**

The Company is not into manufacturing and has no need for raw materials for its business.

#### **Dependence on a single customer or few customers**

For the MGPP-1 and MGPP-2, Electricity Supply Agreements (ESAs) were signed with PHINMA, now ACEN Corporation for a period of 20 years, wherein it will buy all of the energy exported for a fixed agreed price, re-priced every 5 years. These ESAs were later on amended in August 23, 2019 effecting, among others, the extension of the electricity supply period for both plants until June 25, 2039.

For the TSPP-1, consequent to the issuance of FIT COC in its favor, PSC entered into a REPA with the TransCo on April 6, 2016. Under the REPA, TransCo shall pay the FIT Rate for all metered generation of PSC-TSPP1 for a period of twenty (20) years from start of Commercial Operations.

On December 22, 2022, a Power Supply Agreement was signed between PetroSolar and SN Aboitiz Power-Magat, Inc. (SNAP-MI). Therein, PetroSolar agreed to supply and sell all power generated by TSPP2 to SNAP-MI, on an energy-based and “as available” basis, from December 26, 2022 until December 25, 2023.

For the oil liftings, these are sold to a single buyer, Glencore Energy UK Ltd.

#### **Transaction with and/or Dependence on Related Parties**

Please see “Item 12” for discussion on Related Party transactions.

#### **Summary of principal terms and expiration dates of all patents, trademarks, copy rights, licenses, franchises, concessions and royalty agreements**

Aside from the Petroleum Properties and Renewable Energy Service Contracts discussed, there are no other patents, trademarks, copyrights, licenses, franchises, concessions, and royalty agreements entered into by the Group as of December 31, 2022 and 2021.

#### **Need for Government approvals of Principal Products**

Oil industry in the Philippines is regulated by the policies and rules and regulations provided by government agencies like the Departments of Energy (DOE), Finance and Environment and Natural Resources. Moreover, generation and sale of electricity need prior approval from the Energy Regulatory Commission (ERC).

#### **Effect of existing or probable governmental regulations and Costs and Effects of Compliance with Environmental Laws**

For the Renewable Energy Projects, the Company conducted extensive studies to determine the environmental impact and possible mitigating actions to reduce, if not, eliminate potential threats to the environment connected with the power plant operations. In all the power plant sites, active coordination and consultation with local government units and other stakeholders are also being carefully observed.

For MGPP, the Environmental Compliance Certificate (ECC) was issued on August 10, 2010. For TSPP, the ECC issued by the DENR-EMB Region III on August 4, 2015 as amended June 13, 2018 prompting the commencement of ground works on the solar park site and project development. For PWEI, the ECC for the 50 MW NWPP-1 was released by the DENR Region 6 office in June 2012 as amended on 29 March 2021.

The ECCs, being a planning tool guides the respective sites through the Pollution Control Officers (PCOs) in complying with the related environmental rules and regulations. Each power plant religiously implements its respective Environmental Management System to further improve and go beyond compliance in support of the sustainable development goals of the country. Thus, compliance with governmental regulations is embedded in the operations of all the RE projects.

**Amount spent on research and development activities**

- A. Renewable Energy Research and Development  
As of December 31, 2021, the group has Deferred development costs amounting to ₱74.12 million representing costs incurred for the prospective solar and wind power projects.
  
- B. Oil Exploration and development – bulk of the additions to the Wells and Platforms Account (Note 11 of the Consolidated AFS) pertains to PERC’s share in the drilling program.

**Total Number of Employees and Number of Full-Time Employees**

As of December 31, 2022, there were 136 regular employees of the Group. The Group may hire employees in the next twelve (12) months due to increased volume of business, specifically for its renewable energy business.

Below is the break-down of regular employees of PERC and its subsidiaries

PetroEnergy	17
PetroGreen	30
Maibarara	80
PetroSolar	9
Total Employees	136

**Risk Factors**

***Risks Relating to Gabon and the Philippines***

*Political, Economic and Legal Risks in the Philippines*

The Philippines has, from time to time, experienced military unrest, mass demonstrations, and similar occurrences, which have led to political instability. The country has also experienced periods of slow growth, high inflation and significant depreciation of the Peso. The regional economic crisis which started in 1997 negatively affected the Philippine economy resulting in the depreciation of the Peso, higher interest rates, increased unemployment, greater volatility and lower value of the stock market, lower credit rating of the country and the reduction of the country’s foreign currency reserves. There has also been growing concerns about the unrestrained judicial intervention in major infrastructure project of the government.

There is no assurance that the political environment in the Philippines will be stable and that current or future governments will adopt economic policies conducive to sustained economic growth.

Continuous and peaceful operations in the project areas are dependent on the Company’s good relationships with the host local government units. Presently, the Company’s renewable energy projects are located in three provinces: Batangas for its geothermal energy project; Tarlac, for its solar power project; and Aklan for the wind energy project. Currently, a new solar service contract has been secured in Puerto Princesa City. The local governments in these areas-- from the provincial, municipal and barangay levels, including the Palawan Council for Sustainable Development (PCSD) -- are supportive of these projects. Local government endorsements and resolutions have therefore not been a problem in these areas. The Companys’s oil projects, on the other hand are located in Palawan and Visayas. Since these are oil exploration projects, getting local government support have been challenging.

To ensure that host local government units give their support and to mitigate the risk of their withdrawal of support of the Company’s projects, the Company invests in corporate social responsibility projects (CSR). These CSR

projects are geared towards providing long term and sustainable development to the communities within the host local government units, particularly in the areas of health, education, and livelihood.

#### *Political, Economic and Legal Risks in Gabon*

Despite its internal problems, the State of Gabon is said to be politically stable by African standards. Gabon was led by President Omar Bongo, the continent's second longest-serving head of state, who has been in power since 1967 until his death in 2009. Through an election held soon after, his son, Ali-Ben Bongo Ondimba, succeeded him as President. Its political stability and ample natural resources have helped make Gabon a wealthy nation compared to the rest of Sub-Saharan Africa. It must be noted however that Gabon's wealth is not distributed equitably, and almost half of the population lives below the poverty line.

Gabon held a presidential election in August 2016, and the change in administration also introduced new fiscal terms that could likewise change and negatively impact the Company's business. A new Hydrocarbon Law, which took effect since 2014, introduces new fiscal terms for all upstream operators – which include increased government shares and royalties, decreased cost recovery, and the imposition of 35.0% income tax on profit oil – all of which would significantly work in favor of the Gabonese Government. The Consortium was, however, able to secure favorable concessions from the Gabonese Government, like the non-imposition of the 35% income tax on profit oil, which has now been permanently lifted for all upstream oil operators.

The oil industry is the key to Gabon's economy although the government is trying to distance itself from oil dependence and focus on non-oil businesses such as forestry products due to concerns over the life of the oil reserves.

The general political situation in and the state of economy of Gabon may thus influence the growth and profitability of the Company. Any future political or economic instability in Gabon may have a negative effect on the financial results of the Company.

Furthermore, the continuity of the Gabon Operations is dependent on the validity of the permits and licenses issued the Gabon Consortium. A stable regulatory environment that would allow unhampered operations in Gabon is crucial to the Company's continuous profitability.

#### *Technical Risk*

The petroleum exploration industry is a high risk, capital intensive and highly speculative industry. Risks in upstream petroleum exploration include 1) prospectivity of the concession area in terms of actually finding oil in commercial quantity, 2) varying oil prices and project economics, 3) joint venture structuring and key personnel management, among others. Finding oil in commercial quantity is highly dependent on appropriate geologic conditions for oil to accumulate, and be able to be extracted by drilling. Once commercial oil is found, one has to make capital expenditures in terms of field appraisal (determining the extent of the reserves) for proper field development. The Company mitigates this high degree of technical risk through the use of advanced and sophisticated tools, engagement of experienced consultants, and constant intensive discussion and information-sharing with joint venture partners.

From late 2016 onwards, much of the discussions of the Consortium have been over the economic life of the Etame Marin complex. To date, the Consortium believes that it has already recovered 50.00% of the estimated ultimate recoverable reserves, which means that production from the Gamba sand reservoir may soon start to decline as a natural consequence. The planned future drillings in the area are mostly from the deeper Dentale sands. These sands are not as well characterized as the Gamba, thus, putting uncertainty in its production. Two (2) wells are currently producing from these sands.

Moreover, there is not much area to produce the Gamba from within the Etame Marin Permit as some acreage has been relinquished to the government in 2012. There is also the current issue on production of sour gas (hydrogen sulfide gas) within the Gamba sands in the northern Ebouri production sector. Souring usually happens when extraction of oil has already reached deeper in the reservoir.

Souring of wells is a concern which may extend further to the other production fields as extraction continues. Currently, all wells that turned sour are kept shut since the facilities are not designed to handle the corrosive oil. Production from these sour wells may be realized either through installation of processing platforms or re-installation of sour-resistant pipes at the surface facilities. Both options entail high costs.

These risks are key considerations for the Consortium's on-going studies and discussions for the Integrated Field Development Plan (IFDP) for the remainder of the field life. The IFDP aims to 1) augment long-term production by strategic drilling program/s to near-field areas and deeper targets, 2) address the risk of souring by evaluating options for crude sweetening, and 3) optimize the crude handling capacity for more profitable crude sales.

#### *Operational Risk*

The production of crude oil may involve many risks such as breakdown of equipment, unexpected levels of output or efficiency, natural disasters, and the need to comply with further directions of the relevant government authority. Moreover, like most oil discovery areas, there are concerns over how long these reserves will last. Any of the foregoing circumstances could significantly reduce revenues or increase the cost of operating the contract area.

As the field matures, the existing wells age and become more prone to mechanical fatigue and failures. In case these wells fail, the Consortium conducts workover operations on these wells to repair these damages and restore lost crude production. These are budgeted and conducted at regular year intervals in anticipation of potential or unexpected failures for the existing wells.

The Consortium entered into a crude sales agreement with Glencore Energy UK Ltd. where a single buyer is committed to buy based on a pricing scheme that is benchmarked on Dated Brent. With this type of agreement, the Consortium will be assured of its crude oil being purchased at a fixed pricing scheme. Aside from this, the Consortium also plans to balance its operating expenses and to increase oil production to ensure that revenues do not drop drastically as a result of low oil prices.

The Consortium is currently examining the most optimal drilling program to ensure maximum recoverable oil, while ensuring positive returns for the consortium members. This includes an optimal drilling program in which the Consortium could further extract as much of the Gamba and Dentale reservoirs and address the sour oil from the affected wells while keeping capital expenditures and operating expenses at manageable levels to hope for positive returns. These are all heavily dependent on the global oil price trends.

An equally crucial aspect of the IFDP is the efficiency of the storage and offtake facilities for the produced crude oil from the Etame Marin field. The current FPSO contract with BW Offshore will expire in September 2022, with the current vessel, *Petroleo Nautipa* having been operating at the field since first oil in 2002. With an aging vessel only capable of handling ~700,000 bbls of crude and suffering various downtimes resulting to curtailed production, the Consortium is looking to replace the *Petroleo Nautipa* FPSO with a new vessel, which is capable of handling ~1.1 MMbbls of crude. This switch to a new vessel will help to ensure that the field is able to handle and export more crude, while also lessening fewer vessel-related downtimes and assuring unhampered production for the consortium's upcoming drilling campaigns.

#### *Risk of Venturing into Renewable Energy Projects*

The following risks on the Group's ventures in geothermal, wind and solar energy developments may have significant effect in the Group's business, financial condition, and results of operations:

- Offtake risks or market risks;
- Breakdown or failure of power generation equipment, steam supply equipment, transmission lines, pipelines or other necessary equipment or processes, leading to unplanned outages and other operational issues;
- Flaws in the design of equipment or in the construction of an electric generation or steam supply plant;
- Problems with the quality and quantity of geothermal, wind, and solar resources;
- Material changes in law or in governmental permit requirements;
- Operator error;
- Performance below expected levels of output or efficiency;
- Labor disputes, work stoppages, and other industrial actions by employees affecting the projects directly;
- Pollution or environmental contamination affecting the operation of the plants;
- Planned and unplanned power outages due to maintenance, expansion and refurbishment;
- The inability to obtain required governmental permits and approvals including the FIT allocation;
- Opposition from local communities and special interest groups;
- Social unrest and terrorism;
- Engineering and environmental problems;
- Construction and operational delays, or unanticipated cost overruns;

- Force majeure and other catastrophic events such as fires, explosions, earthquakes, floods and acts of terrorism and war that could result in forced outages, personal injury, loss of life, severe damage or destruction of a plants and suspension of operations;
- Grid failure and
- Denial of Land Conversion Application with the Department of Agrarian Reform.

The group cannot assure that future occurrences of any of the events listed above or any other events of a similar or dissimilar nature would not significantly decrease or eliminate the expected revenues from any of its power or steam generating assets, or significantly increase the costs of operating any such assets.

The Group avoids or mitigates the operational risks through proper maintenance of machinery and equipment and by making sure that Operations and Maintenance (O&M) contracts with competent third-party service providers are always active and effective. The Group also ensures that the operating units would hire competent personnel. Design flaws are addressed by professional indemnity insurances that could cover losses from the same. Constant communication with regulators and maintenance of good relations with them help in planning ahead for any potential change in regulations or regulatory requirements. For the social aspects of the projects, the Group maintains a good Corporate Social Responsibility Program, with focus on health, education and livelihood programs, thus helping in achieving host community acceptance, and reduction of social unrest and terrorism. The Group also ensures that the operating units are adequately covered by sabotage and terrorism insurance policies.

#### *Foreign Currency Risk*

A portion of the Company's revenues are denominated in U.S. Dollars. However, the obligation and expenses of the local areas which do not contribute revenues to the Company are denominated in U.S. Dollars. In addition, a substantial portion of the Company's future capital expenditures in Gabon are denominated in currencies other than the Peso. During the last decade, the Philippine economy has from time to time experienced instances of devaluation of the Peso and limited availability of foreign exchange. Recurrence of these conditions may adversely affect the financial condition and results of operations of the Company. The Company does not normally hedge its foreign currency exposures as it believes that it has sufficient revenues in U.S. Dollar and/or Philippine Peso, as the case may be, to answer for corresponding obligations.

#### *Equity Partnership Risk*

The Company has been participating in various oil exploration and development activities in Gabon and the Philippines with other parties. The Company is currently engaged in a production sharing contract with an equity share of 2.525% covering the Etame discovery block in the Atlantic shelf along with its Gabon Consortium partners. Such equity partnership requires the sharing in costs and revenues from the sale of the Etame crude oil. This situation may involve special risks associated with the possibility that the equity partner (i) may have economic or business interests or goals that are inconsistent with those of the Company; (ii) take actions contrary to the interests of the Company; (iii) be unable or unwilling to fulfill its obligations under the production sharing contract or sales contract; or (iv) experience financial difficulties. These conflicts may adversely affect the Company's operations. To date, the Company has not experienced any significant problems with respect to its equity partners.

In the Philippines, the Company, through its subsidiary, PetroGreen, partnered with different foreign and local companies. For MGI, the Company (65.00% through PetroGreen) partnered with PHINMA (25.00%) (PHINMA was acquired by the AC Energy, Inc. and has been renamed to ACEN Corporation or "ACEN") and PNOG RC (10.00%); in PWEI, the Company (40.00% through PetroGreen) partnered with EEIPC (20.00%) and CapAsia ASEAN Wind Holdings Cooperatief U.A. (40.00%) (CapAsia was later acquired by BCPG Public Company Ltd. And renamed to BCPC Wind Cooperatief U.A.); and for PSC, the Company(56.00%) partnered with EEIPC (44.00%).

In September 2022, PetroGreen, PetroEnergy and Kyuden Internation Corporation (Kyuden), a wholly-owned subsidiary of Japan's Kyushu Electric Power Co., Inc., executed the Subscription Agreement and Shareholders' Agreement. Pursuant to the said documents, PetroGreen will issue 712,251,720 shares in two tranches in favor of Kyuden equivalent to 25% ownership interest in PetroGreen upon completion of the conditions precedent for the transaction.

This situation may involve special risks associated with the possibility that the equity partner (i) may have economic or business interests or goals that are inconsistent with those of the Company; (ii) take actions contrary

to the interests of the Company; (iii) be unable or unwilling to fulfill its obligations under the production sharing contract or sales contract; or (iv) experience financial difficulties. These conflicts may adversely affect the Company's operations. Further to these, the Company continues to evaluate joint venture or partnership opportunities.

Cooperation among the joint venture and consortium partners on business decisions is crucial to the sound operation and financial success of these joint venture companies. Although the Company believes it maintains good relationships with its partners, there is no assurance that these relationships will be sustained in the future or that problems will not develop. For example, the Company's joint venture partners may be unable or unwilling to fulfill their obligations, take actions contrary to its policies or objectives, or may experience financial difficulties. If any of these events occur, the businesses of these joint ventures could be severely disrupted, which could have a material adverse effect on PERC's business, financial condition and results of operations.

In order to avoid or mitigate these risks, PERC employs care and prudence in its partner selection. The backgrounds of would be partners are heavily scrutinized; attention is given in knowing the personalities behind the potential partners, their culture, and their industry reputation. The shareholders' agreements or joint venture agreements contain penalty provisions in case a partner refuses or fails to fulfill its obligations. There are likewise exit mechanisms that could be utilized in case the relations among partners become sour.

#### Risks Relating to Change in Regulations

The Group is compliant with the laws, rules and regulations in the Philippines and Gabon that enable it to legally operate or participate in the energy projects it has invested in. In the same manner, the relevant permits, endorsements, clearances applicable to the respective energy projects which the Group has invested in have either been secured or are currently being processed. These permits are based on present rules, regulations and laws of the Philippines and Gabon. There is a risk that the Philippines and Gabon will change any rule, regulation and law that may affect the Group's and its projects' existing permits. To mitigate this risk, the Group constantly monitors the policy direction of both the governments of the Philippines and Gabon in order to anticipate any change in regulation that may affect the Group and its projects.

#### Risks relating to the Environment

The Group's projects involve energy exploration, development and utilization, which entail putting up of infrastructure, erection and installation of equipment and facilities, extraction and utilization of natural resources—all of which may involve temporary disturbances to the environment. To minimize and mitigate the risks involved in these temporary disturbances, the Group ensures that environmental risks (such as erosion and siltation) have been considered during the planning stage of the construction activities and thus the necessary mitigating measures and plans have been incorporated in the projects' environmental management plan. In the case of the NWPP, the PWEI installed slope protection measures to prevent erosion and degeneration of the land.

#### Risk from Natural Calamities

The Philippines is prone to natural calamities such as typhoons, floods, volcanic eruptions, earthquakes, mudslides, and droughts, and thus, the Company's operations and those of its subsidiaries and affiliates may be disrupted by the occurrence of such natural calamities, and could thereby materially and adversely affect the Company's and its subsidiaries' and affiliate's ability to generate revenues. There is no assurance that the insurance coverage maintained by the Company and its subsidiaries and affiliates would adequately compensate them for all damages and economic losses resulting from natural calamities including possible business interruptions. To mitigate this, insurance policies are regularly reviewed and updated as are necessary in accordance with industry standards. Furthermore, the Company and its subsidiaries and affiliates formulated emergency preparedness plans in order to lessen the impact of natural calamities to their respective operations.

#### Risk from the COVID-19 and Similar Pandemic

Manpower for operations may be affected due to state-imposed self-quarantine, partial lockdown, and curfew. To address this, the Company has devised an alternative working arrangement of work-from-home and skeletal workforce scheme for its employees. Business support units were equipped with appropriate protocols and digital tools to be able to support the operations unit and ensure unhampered business operations. Due to travel restrictions, scheduled power plant maintenance by third-party foreign suppliers may also be affected. In preparation for this, the Company has communicated with its Operations and Maintenance (O&M) providers to

strengthen its remote support and provide contingencies. PERC has also ensured that the insurance coverage maintained for the Company, its subsidiaries and affiliates, would adequately compensate for any business interruptions. In addition, there is also the risk relating to compliance with regulatory permits and submissions due to changes in work schedule both in public and private sectors. As a response, PERC regularly monitors the advisories from relevant Government agencies to ensure that requirements are submitted on time.

#### **Financial Risk Management Objectives and Policies**

The Group's principal financial instruments include cash and cash equivalents, financial assets at FVTPL, receivables, restricted cash, loans payable, accounts payable, accrued expenses and dividends payable. The main purpose of these financial instruments is to fund the Group's working capital requirements.

The Group manages and maintains its own portfolio of financial instruments in order to fund its own operations and capital expenditures. Inherent in using these financial instruments are the following risks on liquidity, market and credit.

Please refer to the 2022 Consolidated AFS, Note 27 for the discussion of main financial risks arising from the Group's financial instruments.

#### **Capital Management**

The primary objective of the Group's capital management is to ensure that it maintains a strong credit rating and healthy capital ratios in order to support its business and maximize shareholders' value.

The Group manages its capital structure and makes adjustments to it, in light of changes in economic conditions. To maintain or adjust the capital structure, the Group may increase its debt from creditors, adjust the dividend payment to shareholders or issue new shares.

Based on the Group's assessment, the capital management objectives were met in 2022 and 2021.

Please refer to the 2022 Consolidated AFS, Note 20 for the discussion the Group's Capital Management.

#### **Item 2 - Properties**

The principal properties of the Group consist of various oil areas located in the Philippines and in Gabon, and renewable energy service contracts. Please refer to the "*Business of the Issuer*" for the details of the Production Sharing Contract in Gabon and Service Contracts in the Philippines.

Also, PERC owns a 714-square meter office unit located at 7th Floor, JMT Building, ADB Avenue, Ortigas Center, Pasig City. The title of the Company over the property is clean and free from any lien and encumbrance.

The Group does not intend to acquire additional property in the next twelve (12) months.

#### **Item 3 - Legal Proceedings**

MGI has outstanding input VAT claims for refund with the BIR, Court of Tax Appeals (CTA) and Supreme Court (SC). As of December 31, 2021 and 2021, the outstanding input VAT claims which are still pending with the CTA and SC amounted to ₱123.74 million and ₱126.96 million, respectively.

Aside from the discussions above, The Group is neither a party to, nor is involved in, any litigation that affects or will affect its interests. It has neither any knowledge of any litigation, present or contemplated, against the Company.

There are no other pending legal proceedings to which the Group is a party or which any of its property is subject to.

#### **Item 4 - Submission of Matters to a Vote of Security Holders**

There were no matters that were submitted to a vote of security holders during the fourth quarter of the fiscal year covered by this report.

**PART II - OPERATIONAL AND FINANCIAL INFORMATION**

**Item 5 - Market for Registrant's Common Equity and Related Stockholder Matters**

**A) Market Price of and Dividends on Registrant's Common Equity and Related Stockholder Matters**

**1. Market Information**

Stock Market Price and Dividend on Registrant's Common Equity (last 2 years)

Particulars	1st Quarter		2nd Quarter		3rd Quarter		4th Quarter	
	2022	2021	2022	2021	2022	2021	2022	2021
Par value	Php1.00	Php1.00	Php1.00	Php1.00	Php1.00	Php1.00	Php1.00	Php1.00
High	Php5.23	Php4.14	Php5.49	Php3.25	Php5.40	Php4.13	Php4.90	Php4.47
Low	Php3.90	Php3.50	Php4.53	Php3.64	Php4.40	Php3.91	Php4.35	Php3.90
Volume	4.954MM	7.476MM	6.823MM	3.575MM	2.834MM	4.453MM	.551MM	4.703MM

**2. Holders**

As of December 31, 2022 the Company has 1,991 stockholders.

Hereunder is the list of the top 20 Stockholders (as of December 31, 2022):

STOCKHOLDERS	SHARES	PERCENTAGE
1. PCD Nominee Corporation (Filipino)	526,653,384	92.60%
2. House of Investment, Inc.	21,805,861	3.83%
3. Pan Malayan Management and Investment Corp.	5,377,079	0.95%
6. Hydee Management & Resource Corporation	1,880,779	0.33%
5. Baguyo, Dennis	1,698,888	0.30%
6. PCD Nominee Corp (NF)	1,325,738	0.23%
7. Yan, Lucio	355,468	0.06%
8. Ong Pac, Sally C.	327,030	0.06%
9. R. P. Land Development Corp.	309,078	0.05%
10. Tan, Juanita Uy	300,781	0.05%
11. David Go Securities Corporation	277,949	0.05%
12. Ley, Fely	266,600	0.05%
13. Chen Hua Bi	266,599	0.05%
14. Mendoza, Alberto &/or Jeanie C.	251,492	0.04%
15. Phil. Asia Equity Sec., Inc. U-055	159,959	0.03%
16. Orientrade Securities, Inc.	121,500	0.02%
17. Uy-tioco, George	106,640	0.02%
18. Roque Jr., Gonzalo	90,234	0.02%
19. Chan, Juanito &/or Susana Co	88,865	0.02%

**Minimum Public Ownership**

The Company is compliant with the required Minimum Public Ownership of at least 10% of the total issued and outstanding capital stock, as mandated by Section 3, Article XVIII of the Continuing Listing Requirements of the Listing and Disclosure Rules. As of December 31, 2022, the Company’s public float was 38.03%.

**3. Dividends**

In accordance with the Corporation Code of the Philippines, the Company intends to declare dividends (either in cash or stock or both) in the future. The shareholders of the Company are entitled to receive a proportionate share in cash dividends that may be declared by the Board of Directors out of surplus profits derived from the Company’s operations. The same right exists with respect to a stock dividend, the declaration of which is subject to the approval of stockholders representing at least two-thirds (2/3) of the outstanding shares entitled to vote. The amount will depend on the Company’s profits and its capital expenditure and investment requirements at the relevant time.

**Dividend declaration in two (2) most recent years**

Date of Declaration	Dividends per Share		Record Date	Payment Date
	Cash	Stock		
July 26, 2018	5%		August 24, 2018	September 20, 2018
July 29, 2022	5%		August 15, 2022	September 8 2022

**4. Recent Sale of Unregistered Securities**

There was no sale of unregistered securities for the past three years.

**B) Description of Registrant’s Securities**

1. Common Stock

The details of the Company’s capital stock are as follows:

	No. of shares	Amount
Authorized - 700 million shares at P1.00 par value		
Issued and outstanding	568,711,842	P568,711,842

2. Debt Securities - Not Applicable

3. Stock Options - Not Applicable

4. Securities Subject to Redemption call – Not Applicable

5. Warrants – Not applicable

6. Market Information for Securities Other than Common Equity – Not Applicable

7. Other Securities – Not Applicable

**Item 6 - Management's Discussion and Analysis or Plan of Operation**

**1. Management's Discussion and Analysis (Amounts are in Philippine Peso (P))**

**a. Consolidated Financial Position (As of December 31, 2022 and 2021)**

<b>TOTAL EQUITY</b>	<b>12,377,322,378</b>	<b>8,313,814,660</b>	<b>48.88%</b>	<b>73.59%</b>
<b>TOTAL LIABILITIES AND EQUITY</b>	<b>P16,819,812,099</b>	<b>P13,215,193,276</b>	<b>27.28%</b>	<b>100.00%</b>

**Total assets** amounted to P16.819 billion and P13.215 billion as of December 31, 2022 and December 31, 2021, respectively. Book value is at P11.89/share from P9.81/share.

**Cash and cash equivalents** consist of cash on hand, cash in banks and money market placements with original maturities of not more than three months. The 35.07% net increase from P1.242 billion as of December 31, 2021 to P1.677 billion as of December 31, 2022 is mainly due to the proceeds from issuance of shares to Kyuden International Corporation (KIC).

**Short term investments** with maturities of more than three months and **Restricted cash** accounts likewise

increased as a result of the investments of KIC. Bulk of the restricted cash pertains to the deposit for future stock subscription still under the escrow account as of December 31, 2022.

The **Receivables** account mainly consists of receivables from electricity sales and lifting/sales of crude oil revenue. The 15.16% increase is mainly due to higher outstanding receivables from electricity sales at the end of the year.

**Financial assets at fair value through profit and loss (FVPL)** amounted to P7.540 million and P7.587 million as of December 31, 2022 and 2021, respectively. The market prices of the portfolio are maintained leaving only minimal change in the account.

**Crude oil inventory** increased due to revaluation at a higher price of barrels left unsold during the period.

**Contract Assets – current and non-current portion** pertains to PSC's receivable from TransCo, pertaining to FIT arrears, which is currently recorded at net present value since this will be collected over five (5) years. PSC's collection started this year 2022. The increase is mainly due to additional set-up of the FIT arrears adjustment for the TSPP1 for the period.

**Other current assets** consist of supplies inventory, prepaid expenses, and other current assets. The bulk of the net decrease of 10.25% is mainly due to the withdrawal of SRO funds under escrow account. On April 18, 2022, the remaining SRO funds were withdrawn from the escrow account for the purpose of loan principal and interest payment.

**Property, plant and equipment (PPE)** amounted to P8.197 billion and P7.985 billion as of December 31, 2022 and December 31, 2021, respectively. The 2.65% net increase is mainly due to the following:

- additional 4 new wells in the Gabon Etame Field;
- net impairment reversal of the oil assets (refer to Note 11 and 12 of the Consolidated AFS)

**Deferred oil exploration cost** increased by 169.31% due to Etame Reconfiguration Project related to the switch from old Floating Production Storage and Offloading (FPSO) vessel to new Floating Storage and Offloading (FSO) vessel .

**Investment in a joint venture** refers to the remaining 40.00% shareholdings in PWEI. Bulk of the 8.22% net increase from P1.735 billion to P1.877 billion pertains to the Group's share in net income generated by PWEI during the period. The Group also made additional investment in three newly incorporated special purpose vehicles namely: BuhaWind Energy Northern Luzon Corporation, BuhaWind Energy Northern Mindoro Corporation and BuhaWind Energy East Panay Corporation. during the period amounting to P1.26 million.

**Right of use of asset and lease Liabilities** – these resulted from the first time adoption of the new PFRS 16 – leases in 2019. Please refer to Note 13 of the Consolidated AFS. The 5.68% decline pertains to the amortization of the account during the period.

**Deferred tax assets – net** occurs due to timing differences in recognizing temporary deductible expenses and temporary taxable revenues such as accrued profit share, accretion expenses, accrued retirement liability, provision for probable losses, unrealized gains or losses and change in crude oil inventory. As of December 31, 2022 and December 31, 2021, this amounted to P10.928 million and P12.460 million, respectively. The net decrease pertains to movements of the temporary deductible expenses and temporary taxable revenues during the period.

**The Investment properties-net** account remains the same as of December 31, 2022.

**Other non-current assets** amounted to P455.883 million and P368.875 million as of December 31, 2022 and December 31, 2021, respectively. The 23.59% net increase is mainly due to the additions to Deferred Development Cost related to the exploration, development, production and expansion of renewable energy projects

**Accounts payable and accrued expenses** increased by 47.04% mainly due to accruals of payables to contractors and suppliers.

**Current portion of loan payable increased by 14.41% and Loans payable – net of current portion** decreased by 21.76%, mainly because of reclassification of current portion and settlement of principal loans during the period.

**Lease liabilities – current and non-current** movement is mainly due to the reclassification of current portion for the period.

The decrease in the **Income tax payable** account mainly pertains to the start of TSPP2's tax holiday starting January 2022. The project, which was under the regular tax rate of 25% in previous year is now subject to 5% gross income tax under the PEZA rules.

**Asset retirement obligation** amounted to P66.230 million and P92.810 million as of December 31, 2022 and 2021, respectively. The 28.64% decrease resulted from changes in estimates made during the period.

**Other non-current liabilities** pertains to the Group's accrued retirement liability account, net decrease of 34.31% is mainly due to the change in demographic assumptions.

**Equity attributable to equity holders of the Parent Company** amounted to P6.763 billion or P11.89 book value per share and P5.577 billion or P9.81 book value per share, as of December 31, 2022 and December 31, 2021, respectively. The increase is mainly due to continuous income generation from the Renewable Energy Operations and Oil operations.

**Non-controlling interest (NCI)** pertains to the following:

- 8.55% share of EEI-PC in PetroGreen as of December 31, 2022; 10% as of December 31, 2021
- 14.53% share of KIC in PetroGreen as of December 31, 2022; nil in 2021
- 25% share of Trans-Asia, the 10% share of PNOC-RC, and 23% of the 65% share of EEI-PC (indirect) in MGI;
- 44% share of EEI-PC (direct) and 23% of 56% share (indirect) in PSC;

Non-controlling interest increased by 44.82% from P3.963 billion to P2.583 billion due to net income from RE projects.

**Deposit for future stock subscription** as of December 31, 2022 pertains to the balance of the KIC's subscription amount after deducting the subject shares for the Initial Closing. This account will be converted into shares after the completion of the Second Final Closing on January 10, 2023.

**b. Consolidated Results of Operation (As of December 31, 2022, 2021 and 2020)**

	Years Ended December 31 (Audited)			% Change	% in Total

Minority interest	314,553,781	339,991,700	326,778,799	-7.48%	12.33%
<b>NET INCOME</b>	<b>P863,077,019</b>	<b>P665,426,708</b>	<b>P646,191,220</b>	<b>29.70%</b>	<b>33.83%</b>
<b>Basic/Diluted Earnings Per Share (EPS)</b>	<b>P0.965</b>	<b>P0.572</b>	<b>P0.562</b>		

The Group generated a **consolidated net income** and consolidated net income attributable to equity holders amounting to P863.077 million and P548.523 million; and P665.472 million and P325.435 million as of December 31, 2022 and 2021, respectively.

The net increase in the Financial Performance of the Group is mainly due to the recovery of crude oil prices, continuous operations of the RE projects; decreasing interest expenses (due to the semi-annual settlement of principal instalment due).

**Revenues:**

**Electricity sales** refer to the electricity power generated by MGPP and TSPP. This totalled P1.696 billion as compared to last year's P1.899 billion. The net decline is mainly due to MGPP's one-month preventive maintenance shutdown of the power plant in February, 2022.

**Oil revenues** increased because of the recovery of crude oil price from average of \$69.90/bbl in 2021 to \$106.27/bbl in 2022.

**Other revenues** pertain to passed on Meralco wheeling and ancillary charges. The increase from P61.982 million to P129.112 million is mainly due to increase in ACEN's IEMOP purchase settlement transactions.

**Costs and Expenses:**

**Costs of electricity sales** pertain to the direct costs of generating electricity power including operating and maintenance costs (O&M) of power plant and fluid collection and reinjection system (FCRS), depreciation, and other costs directly attributed to producing electricity; and cost of the passed-on wheeling and ancillary charges. The 13.91% increase mainly pertains to the following:

- PSC's termination of the contracted services for the O&M, and set-up its organic O&M team, which resulted to lower expense during the period; and
- cessation MGI's payment of ancillary charges, beginning 3<sup>rd</sup> quarter of 2022.

The 50.38% increase in **oil production expenses** is mainly resulted from variable expenses increase along with the upward movement of the crude oil prices.

**Depletion** increased mainly due to the additional depletable assets as a result of drilling of new wells.

Any oil produced but not delivered is recognized as crude oil inventory valued at its current crude oil price (net realizable value). The movement in crude oil inventory is presented as **Change in crude oil inventory**.

**General and administrative expenses, Other Income (Charges) and Provision for (Benefit From) Income Tax:**

**General and administrative expenses (G&A)** increased by 22.35% mainly due to the the easement of the travel restrictions brought about by the Covid 19 pandemic.

Other income (charges) amounted to (P109.603) million and (P364.578) million as of December 31, 2022 and 2021, respectively. Below presents the itemized discussion of the changes in other income (charges) – net account.

- 18.59% net decrease in **share in net income of a joint venture** due to PWEI's lower wind speed for the period.
- **interest income** increased mainly due to the short term investment and interest from KIC subscription funds.
- **net foreign exchange gain** increased mainly because of the conversion of the USD accounts to higher peso values.
- market prices from the stocks traded at the PSE declined resulting to turnaround of the **net unrealized losses from the fair value changes on financial assets at FVPL**.
- change in **accretion expense** is mainly due to amendment in estimates.
- recognition of **net impairment reversal** amounting to P11.299 million, due to reversal of Gabon impairment arising from the recovery of crude oil price. The impairment reversal is however partially offset by the impairment of West Linapacan Assets.
- bulk of the **interest expense** pertains to the interest due from loans. The 11.28% decrease in the account is attributed to lower principal loans resulting from annual amortization of principal loans, and
- increase in **miscellaneous income** mainly due to higher time-writing charges during the period.

**Provision for (benefit from) income tax:**

Provision for income tax current pertains to PSC's tax payable - 5.00% provision for income tax under the PEZA incentives and for MGPP, 10% tax rate, after the income tax holiday (for the M1), which ended last February 8, 2021, as part of its BOI incentives under RE Law.

**Non-controlling interest (NCI)** as of December 31, 2022 and 2021 pertains to the following:

- 8.55% share of EEI-PC in PetroGreen as of December 31, 2022; 10% as of December 31, 2021
- 14.53% share of KIC in PetroGreen as of December 31, 2022; nil in 2021
- 25% share of Trans-Asia, the 10% share of PNOG-RC, and 23% of the 65% share of EEI-PC (indirect) in MGI;
- 44% share of EEI-PC (direct) and 23% of 56% share (indirect) in PSC;

**c. Consolidated Financial Position (As of December 31, 2021 and 2020)**

**Total assets** amounted to P13.215 billion and P13.405 billion as of December 31, 2021 and December 31, 2020, respectively. Book value is at P9.81/share from P9.23/share.

**Cash and cash equivalents** consist of cash on hand, cash in banks and money market placements with original maturities of not more than three months. The 2.02% net decrease from P1.267 billion as of December 31, 2020 to P1.242 billion as of December 31, 2021 is mainly due to instalment payment of loans, payments for working capital requirements net of collections from electricity sales and oil lifting proceeds.

The **Receivables** account mainly consists of receivables from electricity sales and lifting/sales of crude oil revenue. The 43.53% increase is mainly due to higher outstanding receivables from electricity sales and higher oil lifting at the end of the year.

**Financial assets at fair value through profit and loss (FVPL)** amounted to P7.587 million and P7.532 million as of December 31, 2021 and 2020, respectively. The market prices of the portfolio are maintained leaving only minimal change in the account.

**Crude oil inventory** declined due to lower barrels left unsold during the period.

**Contract Assets – current and non-current portion** pertains to PSC's receivable from TransCo, pertaining to FIT arrears, which is currently recorded at net present value since this will be collected over five (5) years. Start of PSC's collection is scheduled on year 2022. The increase is mainly due to additional set-up of the FIT arrears adjustment for the TSPP1 for the period.

**Other current assets** consist of restricted cash, supplies inventory, prepaid expenses, and other current assets. The bulk of the net increase of 8.51% is mainly due to additional prepayments and supplies inventory for the period.

**Property, plant and equipment (PPE)** amounted to P7.985 billion and P8.311 billion as of December 31, 2021 and December 31, 2020, respectively. The 3.92% net decrease is mainly due to the following:

- depreciation of the Renewable Energy Power Plants and other assets;
- depletion of the oil assets; and
- net impairment of the oil assets (refer to Note 10 of the Consolidated AFS)

**Deferred oil exploration cost** decreased by 44.99% resulting from the write off of the SC 6A (refer to Note 11 of the Consolidated AFS).

**Investment in a joint venture** refers to the remaining 40.00% shareholdings in PWEI. The 6.10% net increase from P1.635 billion to P1.735 billion pertains to the Group's share in net income generated by PWEI during the period, net of dividend income.

**Right of use of asset and lease Liabilities** – these resulted from the first time adoption of the new PFRS 16 – leases in 2019. Please refer to Note 13 of the Consolidated AFS. The 5.17% decline pertains to the amortization of the account during the period.

**The Investment properties-net** account remains the same as of December 31, 2021.

**Deferred tax assets – net** occurs due to timing differences in recognizing temporary deductible expenses and temporary taxable revenues such as accrued profit share, accretion expenses, accrued retirement liability, provision for probable losses, unrealized gains or losses and change in crude oil inventory. As of December 31, 2021 and December 31, 2020, this amounted to P12.460 million and P5.652 million, respectively. The net increase pertains to movements of the temporary deductible expenses and temporary taxable revenues during the period.

**Other non-current assets** amounted to P368.875 million and P445.434 million as of December 31, 2021 and December 31, 2020, respectively. The 17.19% net decrease is mainly due to the PSC's successful claim of VAT refund amounting to P71.48 million on May 2021.

**Accounts payable and accrued expenses** increased by 2.03% mainly due to accruals made during the year, specifically interest expenses.

**Current portion of loan payable and Loans payable – net of current portion** declined by 3.20% and 16.48%, respectively, mainly because of instalment settlement of principal loans during the period.

**Lease liabilities – current and non-current** movement is mainly due to the interest recognized during the period.

The increase in the **Income tax payable** account mainly pertains to the end of MGPP1's tax holiday on February 2021, the project is now under 10% special tax rate in addition to TSPP1's - 5.00% gross income tax under the PEZA rules; and TSPP2's regular tax rate of 25%.

**Asset retirement obligation** amounted to P92.810 million and P109.160 million as of December 31, 2021 and 2020, respectively. The 14.98% decrease resulted from changes in estimates made during the period.

**Other non-current liabilities** pertains to the Group's accrued retirement liability account, net decrease of 29.38% is mainly due to the change in demographic assumptions.

**Equity attributable to equity holders of the Parent Company** amounted to P5.577 billion or P9.81 book value per share and P5.248 billion or P9.23 book value per share, as of December 31, 2021 and December 31, 2020, respectively. The increase is mainly due to continuous income generation from the Renewable Energy Operations and Oil operations.

**Non-controlling interest (NCI)** pertains to the following:

- 10% share of EEI-PC in PetroGreen;
- 25% share of Trans-Asia, the 10% share of PNOC-RC, and 10% of the 65% share of EEI-PC (indirect) in MGI;
- 44% share of EEI-PC (direct) and 10% of 56% share (indirect) in PSC;

Non-controlling interest increased by 5.94% from P2.583 billion to P2.737 billion due to net income from RE projects.

#### **d. Results of Operations (For the years ended December 31, 2021 and 2020)**

The Group generated a **consolidated net income** and consolidate net income attributable to equity holders amounting to P665.427 million and P325.435 million; and P646.191 million and P319.412 million as of December 31, 2021 and 2020, respectively.

The net increase in the Financial Performance of the Group is mainly due to the recovery of crude oil prices, continuous operations of the RE projects; decreasing interest expenses (due to the semi-annual settlement of principal instalment due). These increases is partially offset by the net impairment recognized from the oil assets.

#### **Revenues:**

**Electricity sales** refer to the electricity power generated by MGPP and TSPP. This totalled P1.9 billion as compared to last year's P1.924 billion. The net decline is mainly due to MGPP's lower generation resulting from scheduled preventive maintenance in 2021, the reduction was partially mitigated by the increase in TSPP's revenues due to higher rates.

**Oil revenues** increased because of the recovery of crude oil price from average of \$49.72/bbl in 2020 to \$69.90/bbl in 2021.

**Other revenues** pertain to passed on Meralco wheeling and ancillary charges. The decline from P116.378 million to P61.982 million is mainly due to the termination of the ancillary services on September 2021.

### Costs and Expenses:

**Costs of electricity sales** pertain to the direct costs of generating electricity power including operating and maintenance costs (O&M) of power plant and fluid collection and reinjection system (FCRS), depreciation, and other costs directly attributed to producing electricity; and cost of the passed-on wheeling and ancillary charges. The 9.59% decline mainly pertains to the following:

- PSC's termination of the contracted services for the O&M, and set-up its organic O&M team, which resulted to lower expense during the period; and
- cessation MGI's payment of ancillary charges, beginning 3<sup>rd</sup> quarter of 2021.

The 11.70% increase in **oil production expenses** is mainly resulted from variable expenses increase along with the upward movement of the crude oil prices.

**Depletion** declined mainly due to lower production bbls. (from (gross) 6,566mmbbls to 5.421mmbbls).

The **Change in crude oil inventory** increased due to lower number of barrels left unsold during the period.

### General and administrative expenses, Other Income (Charges) and Provision for (Benefit From) Income Tax:

**General and administrative expenses (G&A)** declined by 14.46% mainly due to lower expenses resulting from the travel restrictions brought about by the COVID 19 pandemic.

Other income (charges) amounted to (P364.578) million and (P253.621) million as of December 31, 2021 and 2020, respectively. Below presents the itemized discussion of the changes in other income (charges) – net account.

- 10.01% net decrease in **share in net income of a joint venture** due to PWEI's one-time recording of the FIT arrears adjustment for the prior periods in 2020, where as in 2021, FIT arrears recognized is for the current period only.
- **interest income** declined mainly because of lower interest rates during the period.
- there was an upturn in the forex, from net unrealized loss last year to **net unrealized gain** this year mainly because of the conversion of the USD accounts to higher peso values.
- market prices from the stocks traded at the PSE regained resulting to turnaround of the **net unrealized losses from the fair value changes on financial assets at FVPL**, to net unrealized gains this year.
- change in **accretion expense** is mainly due to amendment in estimates.
- recognition of **net impairment reversal (loss)** amounting to P164.323 million, mainly coming from the write-off of the deferred costs of the SC 6A and partial impairment of the SC 14C2, due to relinquishment of the service contract and limited term of the service contract. These impairment however, were partially offset by the reversal of impairment loss of the Gabon assets due to the recovery of the crude oil prices.
- bulk of the **interest expense** pertains to the interest due from loans. The 13.81% decrease in the account is attributed to lower principal loans resulting from annual amortization of principal loans, and
- increase in **miscellaneous income** mainly due to higher time-writing charges during the period.

### **Provision for (benefit from) income tax:**

Provision for income tax current pertains to PSC's tax payable - 5.00% provision for income tax under the PEZA incentives and for MGPP, 10% tax rate, after the income tax holiday (for the M1), which ended last February 8, 2021, as part of its BOI incentives under RE Law.

**Non-controlling interest (NCI)** as of December 31, 2021 and 2020 pertains to the following:

- 10% share of EEI-PC in PetroGreen;
- 25% share of Trans-Asia, the 10% share of PNOC-RC, and 10% of the 65% share of EEI-PC (indirect) in Maibarara;
- 44% share of EEI-PC (direct) and 10% of 56% share (indirect) in to PetroSolar;

**e. Consolidated Financial Position (As of December 31, 2020 and 2019)**

**Total assets** amounted to P13.405 billion and P13.364 billion as of December 31, 2020 and December 31, 2019, respectively.

**Cash and cash equivalents** consist of cash on hand, cash in banks and money market placements with original maturities of not more than three months. The 18.81% net increase from P1.067 billion as of December 31, 2019 to P1.267 billion as of December 31, 2020 is mainly due to collection of electricity sales, net of working capital requirements during the period.

The **Receivables** account mainly consists of receivables from electricity sales and lifting/sales of crude oil revenue. The 17.82% decrease is mainly due to collections made during the period.

**Financial assets at fair value through profit and loss (FVPL)** amounted to P7.532 million and P8.240 million as of December 31, 2020 and 2019, respectively. The 8.60% net decrease is due to net downward movement of the market prices of the Company's investments in stocks traded in the Philippine Stock Exchange (PSE).

**Crude oil inventory** increased due to higher barrels left unsold during the period.

**Other current assets** consist of restricted cash, supplies inventory, prepaid expenses, and other current assets. The bulk of the net decline of 4.24% is mainly due to amortization of prepayments.

**Property, plant and equipment (PPE)** amounted to P8.311 billion and P8.537 billion as of December 31, 2020 and December 31, 2019, respectively. The 2.65% net decrease is mainly due to the continuous depreciation of the Renewable Energy Power Plants and depletion of the oil assets.

**Deferred oil exploration cost** increased by 9.11% resulting from the continuous development of the oil assets.

**Contract assets** pertains to PSC's receivable from TransCo, pertaining to FIT arrears, which is currently recorded at net present value since this will be collected over five (5) years. Start of PSC's collection is scheduled on year 2022.

**Investment in a joint venture** refers to the remaining 40.00% shareholdings in PWEI. The 4.57% net increase from P1.564 million to P1.635 billion pertains to the Group's share in net income generated by PWEI during the period, net of dividend income.

**Right of use of asset and lease Liabilities** – these resulted from the first time adoption of the new PFRS 16 – leases in 2019. Please refer to Note 13 of the 2020 Consolidated Financial Statements. The movements pertain to the amortization of the account during the period.

**The Investment properties-net** account remains the same as of December 31, 2020.

**Deferred tax assets – net** occurs due to timing differences in recognizing temporary deductible expenses and temporary taxable revenues such as accrued profit share, accretion expenses, accrued retirement liability, provision for probable losses, unrealized gains or losses and change in crude oil inventory. As of December 31, 2020 and December 31, 2019, this amounted to P5.652 million and P12.624 million, respectively. The 55.23% pertains to movements of the temporary deductible expenses and temporary taxable revenues during the period.

**Other non-current assets** amounted to P445.434 million and P506.399 million as of December 31, 2020 and December 31, 2019, respectively. The 12.04% net decrease is mainly due to recoupment of advances and amortization of accounts.

**Accounts payable and accrued expenses** increased by 6.94% mainly due to accruals made during the year.

**Current portion of loan payable and Loans payable – net of current portion** declined by 28.58% and 5.59%, respectively, mainly because of settlement of principal loans during the period.

**The bulk of the Income tax payable** pertains to PSC's outstanding tax payable - 5.00% provision for income tax under the PEZA rules. For MGPP, minimal income tax was computed because its principal business is under the

Income tax Holiday, as part of its incentives under RE Law. The increase is mainly due to higher taxable income from PSC, due to the recording of the FIT arrears and full year operations of the TSPP2.

**Asset retirement obligation** amounted to P109.160 million and P90.621 million as of December 31, 2020 and as of December 31, 2019, respectively. The 20.46% increase in this account resulted from changes in estimates and contributions made during the period.

**Other non-current liabilities** net increase of 16.30% is mainly due to increase in the Group's retirement liability.

**Equity attributable to equity holders of the Parent Company** amounted to P5.248 billion or P9.23 book value per share and P4.927 billion or P8.66 book value per share, as of December 31, 2020 and December 31, 2019, respectively. The increase is mainly due to continuous income generation from the Renewable Energy Operations.

**Non-controlling interest** (NCI) pertains to the following:

- 10% share of EEI-PC in PetroGreen;
- 25% share of Trans-Asia, the 10% share of PNOC-RC, and 10% of the 65% share of EEI-PC (indirect) in MGI;
- 44% share of EEI-PC (direct) and 10% of 56% share (indirect) in PSC;

Non-controlling interest increased by 10.47% from P2.338 billion to P2.583 billion due to net income from RE projects.

#### **f. Results of Operations (For the years ended December 31, 2020 and 2019)**

The Group generated a **consolidated net income** amounting to P646.191 million and P533.933 million as of December 31, 2020 and 2019, respectively, representing a 21.02% increase.

The Group generated **consolidated net income attributable to equity holders of the Parent Company** amounting to P319.412 million or P0.562 earnings per share and P292.836 million or P0.515 earnings per share as December 31, 2020 and same period in 2019, respectively. The main drivers of the increase are the recording of the FIT arrears for PSC and PWEL, the full year operations of the TSPP - 2 and TSPP's higher generation due to extended summer months during the period.

#### **Revenues:**

**Electricity sales** refer to the electricity power generated by MGPP and TSPP. The 15.18% net increase is due to the full year operations of TSPP-2; higher generation of the TSPP due to the extended summer months and the effect of the one-time recording of the FIT adjustment.

**Oil revenues** declined, despite the higher volume of production mainly because of lower average crude oil price realized this year as compared last year. Average crude oil price in 2019 was \$64.94/bbl. while in 2020, \$49.72/bbl.

#### **Costs and Expenses:**

**Costs of electricity sales** pertain to the direct costs of generating electricity power including operating and maintenance costs (O&M) of power plant and fluid collection and reinjection system (FCRS), depreciation, and other costs directly attributed to producing electricity. The bulk of the 12.89% increase is mainly due to MGI's costs for MERALCO wheeling charges.

**Cost of oil production** decreased mainly due to lower expenses made during the period. The 47.26% increase in **depletion** is due to increase in production barrels.

The **Change in crude oil inventory** increased due to higher number of barrels left unsold during the period.

#### **General and administrative expenses, Other Income (Charges) and Provision for (Benefit From) Income Tax:**

**General and administrative expenses (G&A)** declined by 5.29% mainly due to lower expenses resulting from the travel restrictions brought about by the COVID 19 pandemic.

Other income (charges) amounted to (P253.621) million and P(272.411) million as of December 31, 2020 and

2019, respectively. Below presents the itemized discussion of the changes in other income (charges) – net account.

- Bulk of the interest expense pertains to the interest due from loans. The decrease in the account is attributed to lower principal loans resulting from annual amortization of principal loans.
- 14.06% net increase in **share in net income of a joint venture** due to PWEI's one-time recording of the FIT arrears adjustment.
- Interest income declined mainly because of lower interest rates during the period.
- Lower effect of forex movements from P7.232 million unrealized loss last year to P3.501 million unrealized loss this year.
- higher losses from the fair value changes on financial assets at FVPL due to slump of the market prices of investments in stocks traded at the PSE resulting from the COVID 19 pandemic;
- 8.36% decrease in accretion expense is mainly due to change in estimates; and
- 54.6% increase in miscellaneous income mainly due to higher time-writing charges during the period.

**Provision for (benefit from) income tax:**

Provision for income tax current - pertains to PSC's outstanding tax payable - 5.00% provision for income tax under the PEZA rules. For MGPP, no income tax was computed because it is under the Income tax Holiday, as part of its incentives under RE Law. The increase is relative to PSC's recording of the FIT arrears adjustment and full year operation of the TSPP2.

**Non-controlling interest (NCI)** as of December 31, 2020 and 2019 pertains to the following:

- 10% share of EEI-PC in PetroGreen;
- 25% share of Trans-Asia, the 10% share of PNOG-RC, and 10% of the 65% share of EEI-PC (indirect) in Maibarara;
- 44% share of EEI-PC (direct) and 10% of 56% share (indirect) in to PetroSolar;

**Key Performance Indicators** (please see attached "Schedule of Financial Soundness Indicators")

**2. Plan of Operations for the next 12 months**

Gabon, West Africa

Crude production will continue from the existing wells as the Gabon Consortium is currently firming up the most feasible Integrated Field Development Plan (IFDP) to extract the remaining recoverable oil volumes.

SC 14C2 - West Linapacan, Northwest Palawan

Operator Philodrill will conduct further G&G activities to validate the feasibility of extracting the remaining recoverable volumes in West Linapacan.

SC 75 - Offshore Northwest Palawan

Subject to government's safety and security clearance over the prospect area, the SC 75 Consortium will proceed with the conduct of a ~1,000 sq.km 3D seismic survey over the identified leads in SC 75.

Maibarara Geothermal Power Project

Power generation from both Maibarara -1 and Maibarara-2 will continue.

Nabas Wind Power Project

The plant will be in continuous operation from the 18 WTGs comprising the project's Phase 1, while construction of the 6 WTGs for Phase 2 will commence.

Tarlac Solar Power Project

TSPP-1 and TSPP-2 will continue to supply electricity to the grid.

Enrique T. Yuchengco Bldg. Rooftop Solar Power Project (ETY)

The ETY rooftop solar facility will continue to supply electricity to the ETY building.

Bugallon Solar Power Project

PGEC to await NEA approval of the DIS for the BSPP, prior to proceeding with final negotiations for the construction contracts.

Dagohoy Solar Power Project

Early site development works will continue for the DSPP site while PGEC awaits the SIS proper.

San Vicente Wind Hybrid Power Project

PGEC will continue with initial feasibility studies for SVWHPP, consisting of: 1) Two-year wind measurement campaign, 2) LGU and regulatory permitting works, and 3) technical and economic feasibility works for a potential wind-hybrid system in San Vicente.

Offshore Wind Power Projects

PGEC and CE will continue with the pre-development Work Programs for the three (3) offshore wind blocks, namely 1) on-site wind measurement campaigns, 2) geophysical and geotechnical campaigns, 3) environmental permitting works, and 4) 3) SIS applications for Northern Mindoro and East Panay blocks.

**Material Commitments**

Aside from the committed developments of the prospective projects, there are no other foreseen material commitments during the period.

**Discussion of Indicators of the Company's Level of Performance**

**Productivity Program**

The development of the prospective renewable energy projects will increase the Group's capacity and power generation, while the prospective four-well drilling program in Gabon Etame, aimed to sustain field production to above 20,000 BOPD.

**Receivable Management**

The group's receivables are mainly due from sale of electricity to ACEN and Transco and crude oil in Etame Gabon, through the consortium operator. These are being recorded once sale is made. Payment is received every 30-45 days following each sale.

For electricity sales from TSPP and NWPP, the payment for the Actual FIT Revenue is sourced from the FIT-All Fund, specifically the Actual FIT Differential (FD) and the Actual Cost Recovery Revenue (ACRR). The FD is the difference between the Actual FIT Revenue and the ACRR and is collected from on-grid consumers as a uniform charge and applied to all billed kilowatt-hours. For FIT-Eligible RE Plants connected to the Wholesale Electricity Spot Market ("WESM"), the ACRR refers to the WESM proceeds remitted to the FIT-All Fund by the Independent Electricity Market Operator of the Philippines, Inc. ("IEMOP"), which took over the Philippine Electricity Market Corporation ("PEMC") as operator of the electricity spot market. PWEI and PSC regularly receive the both the ACRR and FD components on time, which is 45 days after billing date.

PWEI and PSC manage this risk through proper and meticulous allocation of funds, proper timing of expenditures, employment of cost-cutting measures, and sourcing short-term funding requirements from local banks and investment houses or from affiliated companies.

For the twenty (20) years since oil production inception, there was no event that the buyer failed to remit the proceeds of the sale. However, the group is willing to look for another buyer should there be some problem that may happen in the future.

**Liquidity Management**

Management of liquidity requires a flow and stock perspective. Constraint such as political environment, taxation, foreign exchange, interest rates and other environmental factors can impose significant restrictions on firms in management of their financial liquidity.

The Group considers the above factors and pays special attention to its cash flow management. The Company identifies all its cash requirements for a certain period and invests unrestricted funds to money market placements to maximize interest earnings.

The Group does not anticipate any cash flow or liquidity problems within the next twelve (12) months. The Group is not in default of any, note, loan, lease, or other indebtedness or financing arrangement requiring it to make payments.

#### **Inventory Management**

The only inventory is the crude oil produced in Gabon. The buyer lifts certain volume and pays the same in 30 days. The operator sees to it that crude oil inventory does not reach 800,000 barrels at any one time to avoid overflow and to generate revenues to cover production costs.

#### **Cost Reduction Efforts**

In order to reduce costs, the Group employs a total of one hundred thirty six (136) employees with multi-task assignments. The group also implements request for quotations to compare prices, quality of the products and services and negotiate the payment terms.

The Company's general and administrative expense is equivalent to 8.67% of the total revenue.

#### **Rate of Return of Each Stockholder**

The Company has no existing dividend policy. However, the Company intends to declare dividends in the future in accordance with the Corporation Code of the Philippines. Please see Part II, Item 5, 3. Dividends for the Dividend declared for two (2) most recent years.

#### **Item 7 - Financial Statements**

The 2022 Consolidated AFS of the Company are incorporated herein by reference. The schedules listed in the accompanying index to Supplementary Schedules are filed as part of this Form 17-A.

#### **Item 8 – Changes in and Disagreements with Accountants on Accounting and Financial Disclosures**

##### *Information on Independent Auditor*

The external auditor of the Corporation is the auditing firm SyCip Gorres Velayo & Co. (SGV). The same accounting firm has been endorsed by the Audit Committee to the Board. The Board, in turn, approved the endorsement and will nominate the reappointment of the said auditing firm for the stockholders' approval at the scheduled annual stockholders' meeting. The said auditing firm has accepted the Company's invitation to stand for re-election this year.

Audit services of SGV for the calendar year ended December 31, 2022 are the examination of the financial statements of the Company, review of income tax returns and other services related to filing of reports made with the Securities and Exchange Commission and Bureau of Internal Revenue.

Pursuant to SRC Rule 68 Paragraph 3 (b) (1V) (Re: Rotation of External Auditors), the Company has not engaged Ms. Ana Lea C. Bergado, partner of SGV & Co., for more than five (5) years. She was engaged by the Company for examination of the Company's 2021 financial statements.

The company is compliant with the Rotation requirement of its external auditor's certifying partner as required under SRC Rule 68 (3)(b) (1V). A two year cooling off period shall be observed in the re-engagement of same signing partner or individual auditor.

##### *Disagreements with Accountants on Accounting and Financial Disclosures*

As of December 31, 2022, there are no disagreements with the auditors on any matter of accounting principles or practices, financial statement disclosure, or auditing scope or procedures.

##### *Audit and Other Related Fees*

External audit fees (inclusive of VAT) of the Parent Company amounted to:

Particulars	2022	2021
SGV - Audit and review of the registrant's annual financial statements and other services rendered in connection with filing of said financial statements with SEC and BIR.	₱1,478,400	₱1,293,600
SGV - Review of quarterly and annual summary of application of proceeds in stock rights offering	123,200	123,200
Ernts & Young - Filing of tax return to the Gabonese Government and other services	1,122,400	1,015,480
Total	₱2,432,280	₱2,432,280

### PART III - CONTROL AND COMPENSATION INFORMATION

#### Item 9 - Directors and Executive Officers of the Registrant

##### **DIRECTORS AND EXECUTIVE OFFICERS:**

Following are the names, ages, positions and period of services of all directors and executive officers and all persons nominated or chosen to become such:

Name	Age	Position	Citizenship	Period during which individual has served as such
Helen Y. Dee	79	Chairman	Filipino	2001 to present
Milagros V. Reyes	81	Director/President	Filipino	1998 to present
Yvonne S. Yuchengco	69	Director/Treasurer	Filipino	2004 to present
Cesar A. Buenaventura	93	Director/Independent	Filipino	1998 to present
Maria Mercedes M. Corrales	73	Director/Independent	Filipino	2021 to present
Eliseo B. Santiago	72	Director/Independent	Filipino	2013 to present
Lorenzo V. Tan	61	Director	Filipino	2019 to present
Francisco G. Delfin Jr.	61	Vice President	Filipino	2008 to present
Samuel V. Torres	58	Corporate Secretary	Filipino	2006 to present
Louie Mark R. Limcolioc	36	Asst. Corp. Secretary/ Compliance Officer	Filipino	2021 to present
Maria Victoria M. Olivar	51	AVP for Operations	Filipino	2015 to present
Vanessa G. Peralta	37	AVP for Corporate Communication and Chief Information Officer (CIO)	Filipino	2021 to present

The member of the Board of Directors are elected at the general meeting of stockholders, who shall hold office for the term of one (1) year or until their successors shall have been elected and qualified.

The Management Committee members and other Officers of the Company, unless removed by the Board of Directors, shall serve as such until their successors are elected or appointed.

**Members of the Board of Directors**

- Helen Y. Dee - Chairman of the Board
- Milagros V. Reyes - Director and President
- Yvonne S. Yuchengco - Director and Treasurer
- Cesar A. Buenaventura - Lead Independent Director
- Maria Mercedes M. Corrales - Independent Director
- Eliseo B. Santiago - Independent Director
- Lorenzo V. Tan - Director

**Officers:**

- Milagros V. Reyes - President
- Francisco G. Delfin Jr. - Vice President
- Yvonne S. Yuchengco - Treasurer
- Samuel V. Torres - Corporate Secretary
- Louie Mark R. Limcolioc - Asst. Corporate Secretary/Compliance Officer
  
- Maria Victoria M. Olivar - AVP for Operations
- Vanessa G. Peralta - AVP for Corporate Communication and CIO

**a) Board of Directors**

The Company’s Board of Directors is composed of seven (7) members elected by and from among the Company’s stockholders. The Board is responsible for providing overall management and direction of the Company. Board meetings are held on a quarterly basis or as often as required to discuss the Company’s operations, business strategy, policies and other corporate matters. A brief background of each member of the Company’s Board of Directors are provided below:

<b>Helen Y. Dee, 79</b>	<b>Director since 2001 and 2011 as Chairman of the Board to present</b>

**STATEMENT OF MANAGEMENT'S RESPONSIBILITY  
FOR FINANCIAL STATEMENTS**

April 17, 2023

Securities and Exchange Commission  
PICC, Roxas Boulevard, Pasay City

The management of PetroEnergy Resources Corporation is responsible for the preparation and fair presentation of the consolidated financial statements including the schedules attached thereto, for the years ended December 31, 2022 and 2021, in accordance with the prescribed financial reporting framework indicated therein, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern, and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors is responsible for overseeing the Company's financial reporting process.

The Board of Directors reviews and approves the financial statements including the schedules attached thereto, and submits the same to the stockholders or members.

SyCip, Gorra, Veloso & Co., the independent auditor appointed by the stockholders, has audited the financial statements of the company in accordance with Philippine Standards on Auditing, and in its report to the stockholders or members, has expressed its opinion on the fairness of presentation upon completion of such audit.

## INDEPENDENT AUDITOR'S REPORT

The Board of Directors and Stockholders  
PetroEnergy Resources Corporation  
7th Floor, JMT Building, ADB Avenue  
Ortigas Center, Pasig City

### Opinion

We have audited the consolidated financial statements of PetroEnergy Resources Corporation and its subsidiaries (the Group), which comprise the consolidated statements of financial position as at December 31, 2022 and 2021, and the consolidated statements of comprehensive income, consolidated statements of changes in equity and consolidated statements of cash flows for each of the three years in the period ended December 31, 2022, and notes to the consolidated financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Group as at December 31, 2022 and 2021, and its consolidated financial performance and its consolidated cash flows for each of the three years in the period ended December 31, 2022 in accordance with Philippine Financial Reporting Standards (PFRSs).

### Basis for Opinion

We conducted our audits in accordance with Philippine Standards on Auditing (PSAs). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Consolidated Financial Statements* section of our report. We are independent of the Group in accordance with the Code of Ethics for Professional Accountants in the Philippines (Code of Ethics) together with the ethical requirements that are relevant to our audit of the consolidated financial statements in the Philippines, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

### Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. For each matter below, our description of how our audit addressed the matter is provided in that context.

We have fulfilled the responsibilities described in the *Auditor's Responsibilities for the Audit of the Consolidated Financial Statements* section of our report, including in relation to these matters.

Accordingly, our audit included the performance of procedures designed to respond to our assessment of the risks of material misstatement of the consolidated financial statements. The results of our audit procedures, including the procedures performed to address the matters below, provide the basis for our audit opinion on the accompanying consolidated financial statements.

### ***Estimation of oil reserves***

The estimation of oil reserves for Etame block in Gabon, West Africa is a focus area because the resulting estimates have a material impact on the consolidated financial statements, as these are utilized in the impairment testing and the calculation of depletion expense of the related investments. Wells, platforms and other facilities under Property, plant and equipment amounted to ₱763.83 million, Deferred oil exploration costs amounted to ₱311.88 million, and intangible assets amounted to ₱26.85 million as of December 31, 2022. There are inherent uncertainties involved in estimating oil reserve quantities because of the exercise of significant management judgment and consideration of inputs from independent and internal geologists and the complex contractual arrangements involved as regards the Group's share of reserves in the exploration and production sharing contract areas. This uncertainty also depends on the amount of reliable geologic and engineering data available at the time of the estimate and the interpretation of these data.

The disclosures in relation to oil reserves are included in Notes 5, 11, 12, and 16 to the consolidated financial statements.

### ***Audit response***

We considered the competence, capabilities and objectivity of the geologists engaged by the Group to perform an independent assessment of its oil reserves given their qualifications, experience and reporting responsibilities. We reviewed the specialist's report and obtained an understanding of the nature, scope and objectives of their work and basis of the estimates including any changes in the reserves during the year. In addition, we tested the reserves estimates applied to the relevant areas of the consolidated financial statements including impairment testing and recognition of depletion expense.

### ***Recoverability of Wells, Platforms and Other Facilities and Related Assets***

The Group has significant investments consisting of wells, platforms and other facilities which are presented under Property, plant and equipment, production license presented under Intangible assets and Deferred oil exploration costs. The recoverability of these assets, with carrying amount aggregating to ₱1,102.29 million as of December 31, 2022, is affected by fluctuating crude oil prices, among others, and that are tested for impairment when there are indications that the carrying values of these assets may exceed their recoverable amounts. The assessment of the recoverable amount of these assets requires significant judgment and involves estimation using assumptions about future production levels and costs, as well as external inputs such as oil prices and discount rate. Hence, such assessment is a key audit matter in our audit.

The disclosures on the result of impairment testing of the Group's investments are included in Notes 5, 11, 12 and 16 to the consolidated financial statements.

*Audit response*

We involved our internal specialist in evaluating the methodologies and the assumptions used. These assumptions include future production levels and costs, as well as external inputs such as oil prices and discount rate. We compared the key assumptions used such as future production levels against oil reserves and costs against historical data. We tested the parameters used in the determination of the oil prices and discount rate against market data. We also reviewed the Group's disclosures about those assumptions to which the outcome of the impairment test is most sensitive, specifically those that have the most significant effect in the determination of the recoverable amounts of these assets.

***Estimation of asset retirement obligations***

The Group has provisions for the close-down, restoration and environmental obligations on its solar power plant in Tarlac, geothermal power plant in Batangas and interest in oil fields in Gabon totaling to P66.23 million as of December 31, 2022. The Group uses an external technical specialist to assess its share in abandonment cost in the Gabon oil fields, and an internal technical group to estimate the future restoration costs of its solar and geothermal power plant sites. The estimation of the provisions requires significant management judgment in estimating future costs given the nature of each site, the operating activities done, and the facilities constructed, among other considerations. This calculation also requires the management to use a discount and inflation rates for these future costs to bring them to their present value at reporting date.

The Group's disclosures about asset retirement obligations are included in Notes 5 and 19 to the consolidated financial statements.

*Audit response*

We considered the competence, capabilities and objectivity of management's internal and external technical specialists given their qualifications, experience and reporting responsibilities. We reviewed the decommissioning report and obtained an understanding from the internal and external technical specialists about their bases for identifying and estimating the Group's share in abandonment costs in the Gabon oil fields and restoration costs of its solar and geothermal power plant sites. We also evaluated the discount and inflation rates used by comparing these to external data. We also reviewed the Group's disclosures on the assumptions that have the most significant effect in the determination of the amounts of these obligations.

**Other Information**

Management is responsible for the other information. The other information comprises the information included in the SEC Form 20-IS (Definitive Information Statement), SEC Form 17-A and Annual Report for the year ended December 31, 2022 but does not include the consolidated financial statements and our auditor's report thereon. The SEC Form 20-IS (Definitive Information Statement), SEC Form 17-A and Annual Report for the year ended December 31, 2022 are expected to be made available to us after the date of this auditor's report.

Our opinion on the consolidated financial statements does not cover the other information and we will not express any form of assurance conclusion thereon.

In connection with our audits of the consolidated financial statements, our responsibility is to read the other information identified above when it becomes available and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audits, or otherwise appears to be materially misstated.

### **Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements**

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with PFRSs, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Group's financial reporting process.

### **Auditor's Responsibilities for the Audit of the Consolidated Financial Statements**

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with PSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with PSAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the audit. We remain solely responsible for our audit opinion.

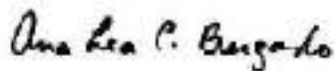

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The engagement partner on the audit resulting in this independent auditor's report is Ana Lea C. Bergado.

# **PETROENERGY RESOURCES CORPORATION AND SUBSIDIARIES**

---

## **NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

---

### **1. Corporate Information**

#### **a. Organization**

PetroEnergy Resources Corporation (“PERC” or “PetroEnergy” or the “Parent Company”) is a publicly-listed domestic corporation. Its registered office and principal place of business is 7th Floor, JMT Building, ADB Avenue, Ortigas Center, Pasig City.

PERC was organized on September 29, 1994 as Petrotech Consultants, Inc. to provide specialized technical services to its then parent company, Petrofields Corporation, and to companies exploring for oil in the Philippines.

In 1997, PERC simultaneously adopted its present name and changed its primary purpose to oil exploration and development and mining activities. Subsequently in 1999, PERC assumed Petrofields’ oil exploration contracts in the Philippines and the Production Sharing Contract covering the Etame discovery block in Gabon, West Africa.

On August 11, 2004, PERC’s shares of stock were listed at the Philippine Stock Exchange (PSE) by way of introduction.

In 2009, following the enactment of Republic Act No. 9513, otherwise known as the “Renewable Energy Act of 2008” (RE Law), PERC amended its articles of incorporation to include among its purposes the business of generating power from renewable sources such as, but not limited to, biomass, hydro, solar, wind, geothermal, ocean and such other renewable sources of power.

On March 31, 2010, PERC incorporated PetroGreen Energy Corporation (“PetroGreen” or “PGEC”), its 77%-owned subsidiary (90%-owned in 2021), to act as its renewable energy arm and holding company. PGEC ventured into renewable energy development and power generation through its subsidiaries and affiliate: (a) Maibarara Geothermal, Inc. (“MGI”, 65%-owned) - owner and Renewable Energy (RE) developer of the 20 MW Maibarara Geothermal Power Project (MGPP-1) in Santo Tomas, Batangas and its expansion, the 12 MW MGPP-2; (b) PetroSolar Corporation (“PetroSolar”, 56%-owned) - owner and RE developer of the 50 MW<sub>DC</sub> Tarlac Solar Power Project (TSPP-1) in Tarlac City and its 20 MW<sub>DC</sub> expansion (TSPP-2); and (c) PetroWind Energy, Inc. (“PetroWind”, 40%-owned associate) - owner and developer of the 36 MW Nabas Wind Power Project (NWPP-1) in Nabas and Malay, Aklan.

MGI and PetroSolar are effectively indirect subsidiaries of PetroEnergy through PetroGreen. PetroGreen owns majority of the voting power of MGI and PetroSolar. PetroEnergy, PetroGreen, MGI and PetroSolar are collectively referred to as the “Group” and were incorporated in the Philippines.

#### **b. Nature of Operations**

The Group’s two (2) main energy businesses are: (1) upstream oil exploration and development, and (2) power generation from renewable energy resources such as, (a) geothermal, (b) solar, and (c) wind, through the Group’s affiliate, PetroWind.

Upstream Oil Exploration and Development

Petroleum production is on-going in the Etame (Gabon) concession, while the other petroleum concessions in the Philippines are still in the advanced exploration stages or pre-development stages.

Renewable Energy

Geothermal Energy

The geothermal projects are the 20 MW MGPP-1 in Sto. Tomas, Batangas that started commercial operations on February 8, 2014 and its expansion, the 12 MW MGPP-2 that started commercial operations on April 30, 2018.

Solar Energy

The Solar power projects are the 50 MW<sub>DC</sub> TSPP-1 in Tarlac City, Tarlac that started commercial operations on February 10, 2016 and its 20 MW<sub>DC</sub> expansion (TSPP-2) which has been commissioned and tested on April 22, 2019 and is now awaiting the issuance of a Certificate of Compliance (COC) from the Energy Regulatory Commission (ERC).

Wind Energy

The wind energy project is the 36-MW NWPP-1 in Nabas, Aklan, where PetroWind has a wind farm. It started its commercial operations on June 10, 2015.

c. Approval of Consolidated Financial Statements

The accompanying consolidated financial statements were approved and authorized for issue by the Board of Directors (BOD) on \_\_\_\_\_.

---

**2. Basis of Preparation**

Basis of Preparation

The accompanying consolidated financial statements have been prepared under the historical cost basis, except for financial assets carried at fair value through profit or loss (FVTPL) which are measured at fair value, and crude oil inventory which is valued at net realizable value (NRV).

The financial statements are presented in Philippine Peso (PHP or ₱), which is the Parent Company's functional currency. All amounts are rounded to the nearest PHP unless otherwise stated.

Statement of Compliance

The accompanying consolidated financial statements have been prepared in compliance with Philippine Financial Reporting Standards (PFRS).

---

**3. Changes in Accounting Policies**

The accounting policies adopted are consistent with those of the previous financial year, except that the Group has adopted the following new accounting pronouncements starting January 1, 2022. Adoption of these pronouncements did not have any significant impact on the Group's financial position or performance.

- Amendments to PFRS 3, *Reference to the Conceptual Framework*
- Amendments to PAS 16, *Plant and Equipment: Proceeds before Intended Use*
- Amendments to PAS 37, *Onerous Contracts – Costs of Fulfilling a Contract*

- *Annual Improvements to PFRSs 2018-2020 Cycle*
  - Amendments to PFRS 1, *First-time Adoption of Philippines Financial Reporting Standards, Subsidiary as a first-time adopter*
  - Amendments to PFRS 9, *Financial Instruments*, Fees in the '10 per cent' test for derecognition of financial liabilities
  - Amendments to PAS 41, *Agriculture, Taxation in fair value measurements*

#### New Accounting Standards, Interpretations and Amendments Effective Subsequent to December 31, 2022

Pronouncements issued but not yet effective are listed below. Unless otherwise indicated, the Group does not expect that the future adoption of the said pronouncements will have a significant impact on its consolidated financial statements. The Group intends to adopt the following pronouncements when they become effective.

##### *Effective beginning on or after January 1, 2023*

- Amendments to PAS 12, *Deferred Tax related to Assets and Liabilities arising from a Single Transaction*
- Amendments to PAS 8, *Definition of Accounting Estimates*
- Amendments to PAS 1 and PFRS Practice Statement 2, *Disclosure of Accounting Policies*

##### *Effective beginning on or after January 1, 2024*

- Amendments to PAS 1, *Classification of Liabilities as Current or Non-current*
- Amendments to PFRS 16, *Lease Liability in a Sale and Leaseback*

##### *Effective beginning on or after January 1, 2025*

- PFRS 17, *Insurance Contracts*

##### *Deferred effectivity*

- Amendments to PFRS 10, *Consolidated Financial Statements*, and PAS 28, *Sale or Contribution of Assets between an Investor and its Associate or Joint Venture*

The Group continues to assess the impact of the above new and amended accounting standards and interpretations effective subsequent to 2022 on the Group's financial statements in the period of initial application. Additional disclosures required by these amendments will be included in the consolidated financial statements when these amendments are adopted.

---

#### 4. **Summary of Significant Accounting Policies**

##### Basis of Consolidation

The consolidated financial statements comprise the financial statements of the Group as at December 31, 2022 and 2021 and for each of the three years in the period ended December 31, 2022. The financial statements of the subsidiaries are prepared in the same reporting year as the Parent Company, using consistent accounting policies.

Below are the subsidiaries, which are all incorporated in the Philippines, with their respective percentage ownership as of December 31:

	2022	2021	2020
PetroGreen	76.92%	90%	90%
Percentage share of PetroGreen in its subsidiaries:			
MGI	65%	65%	65%
PetroSolar	56%	56%	56%
Navy Road Development Corporation (NRDC) – dormant company	100%	100%	100%

Subsidiaries are entities controlled by PERC. PERC controls an investee if and only if PERC has:

- power over the investee (i.e. existing rights that give it the current ability to direct the relevant activities of the investee);
- exposure, or rights, to variable returns from its involvement with the investee; and
- the ability to use its power over the investee the amount of the investor's returns.

When PERC has less than a majority of the voting or similar rights of an investee, PERC considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- the contractual arrangement with the other vote holders of the investee;
- rights arising from other contractual arrangements; and
- the Group's voting rights and potential voting rights.

PERC re-assesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control. Consolidations of a subsidiary begins when PERC obtains control over the subsidiary and ceases when PERC loses control of the subsidiary. Assets, liabilities, income and expenses of a subsidiary acquired or disposed of during the year are included in the consolidated statement of comprehensive income from the date PERC gains control until the date PERC ceases to control the subsidiary.

The consolidated financial statements are prepared using uniform accounting policies for like transactions and other events in similar circumstances. Adjustments where necessary are made to ensure consistency with the policies adopted by the Group. All intra-group balances and transactions, intra-group profits and expenses and gains and losses are eliminated during consolidation.

A change in the ownership interest of a subsidiary, without loss of control, is accounted for as an equity transaction, as transactions with the owners in their capacity as owners. For purchases from non-controlling interests (NCI), the difference between any consideration paid and the relevant share acquired of the carrying value of net assets of the subsidiary is recorded in equity. Gains or losses on disposals to NCI are also recorded in equity.

If the Group loses control over a subsidiary, it:

- derecognizes the assets (including goodwill) and liabilities of the subsidiary, the carrying amount of any NCI and the cumulative translation differences recorded in equity.
- recognizes the fair value of the consideration received, the fair value of any investment retained and any surplus or deficit in the consolidated statement of comprehensive income.
- reclassifies the parent's share of components previously recognized in other comprehensive income (OCI) to the consolidated statement of comprehensive income or retained earnings, as appropriate.

NCI are presented separately from the Parent Company's equity. The portion of profit or loss and net assets in subsidiaries not wholly owned are presented separately in the consolidated statement of comprehensive income and consolidated statement of changes in equity, and within equity in the consolidated statement of financial position.

#### Cash and Cash Equivalents

Cash includes cash on hand and in banks (demand deposits). Cash equivalents are short-term, highly liquid investments that are readily convertible to known amounts of cash with original maturities of three (3) months or less from the dates of acquisition and that are subject to an insignificant risk of change in value.

#### Short-term Investments

This pertains to interest bearing time deposits with terms of more than 3 months but not more than one year.

#### Restricted Cash

Restricted cash is recognized when the Group reserves a portion of its cash for a specific purpose such as to pay loan interest charges and loan principal amortization, and that there are contractual restrictions directly related to the use of and access of the bank accounts. This includes cash held under escrow accounts. Restricted cash that are expected to be used for a period of no more than 12 months after the financial reporting period are classified as current assets, otherwise, these are classified as noncurrent assets.

#### Financial Instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

#### *Financial assets - Initial recognition and measurement*

Financial assets are classified, at initial recognition, as subsequently measured at amortized cost, fair value through other comprehensive income (FVOCI), and FVTPL.

The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the Group's business model for managing them. The Group initially measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss, transaction costs.

In order for a financial asset to be classified and measured at amortized cost or fair value through OCI, it needs to give rise to cash flow that are 'solely payments of principal and interest (SPPI)' on the principal amount outstanding. This assessment is referred to as the SPPI test and is performed at an instrument level.

The Group's business model for managing financial assets refers to how it manages its financial assets in order to generate cash flows. The business model determines whether cash flows will result from collecting contractual cash flows, selling the financial assets, or both.

#### *Subsequent measurement*

For purposes of subsequent measurement, financial assets are classified in four categories:

- Financial assets at amortized cost (debt instruments)
- Financial assets at FVOCI with recycling of cumulative gains and losses (debt instruments)

- Financial assets designated at FVOCI with no recycling of cumulative gains and losses upon derecognition (equity instruments)
- Financial assets at FVTPL

The Group has no financial asset classified as financial assets at FVOCI.

*Financial assets at amortized cost (debt instruments)*

This category is the most relevant to the Group. The Group measures financial assets at amortized cost if both of the following conditions are met:

- the financial asset is held within a business model with the objective to hold financial assets in order to collect contractual cash flows; and
- the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets at amortized cost are subsequently measured using the effective interest (EIR) method and are subject to impairment. Gains and losses are recognized in profit or loss when the asset is derecognized, modified or impaired.

The Group's financial assets at amortized cost include cash and cash equivalents, short-term investments, receivables, restricted cash, and refundable deposits.

*Financial assets at FVTPL*

Financial assets at fair value through profit or loss include financial assets held for trading, financial assets designated upon initial recognition at fair value through profit or loss, or financial assets mandatorily required to be measured at fair value. Financial assets are classified as held for trading if they are acquired for the purpose of selling or repurchasing in the near term. Derivatives, including separated embedded derivatives, are also classified as held for trading unless they are designated as effective hedging instruments. Financial assets with cash flows that are not solely payments of principal and interest are classified and measured at fair value through profit or loss, irrespective of the business model. Notwithstanding the criteria for debt instruments to be classified at amortized cost or at fair value through OCI, as described above, debt instruments may be designated at fair value through profit or loss on initial recognition if doing so eliminates, or significantly reduces, an accounting mismatch.

Financial assets at fair value through profit or loss are carried in the consolidated statement of financial position at fair value with net changes in fair value recognized in the consolidated statement of profit or loss.

This category includes derivative instruments and listed equity investments which the Group had not irrevocably elected to classify at fair value through OCI. Dividends on listed equity investments are also recognized as other income in the consolidated statement of profit or loss when the right of payment has been established.

The Group's financial assets at FVTPL includes marketable equity securities and investment in golf club shares.

#### *Impairment of financial assets*

The Group recognizes an allowance for ECLs for all debt instruments not held at FVTPL. ECLs are based on the difference between the contractual cash flows due in accordance with the contract and all the cash flows that the Group expects to receive, discounted at an approximation of the original effective interest rate. The expected cash flows will include cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms.

ECLs are recognized in two stages. For credit exposures for which there has not been a significant increase in credit risk since initial recognition, ECLs are provided for credit losses that result from default events that are possible within the next 12-months (a 12-month ECL). For those credit exposures for which there has been a significant increase in credit risk since initial recognition, a loss allowance is required for credit losses expected over the remaining life of the exposure, irrespective of the timing of the default (a lifetime ECL).

The Group may consider a financial asset to be in default when internal or external information indicates that the Group is unlikely to receive the outstanding contractual amounts in full before taking into account any credit enhancements held by the Group. A financial asset is written off when there is no reasonable expectation of recovering the contractual cash flows.

#### *Financial Liabilities - Initial recognition and measurement*

Financial liabilities are classified, at initial recognition, as financial liabilities at FVTPL, financial liabilities at amortized cost (loans and borrowings) or as derivatives designated as hedging instruments in an effective hedge, as appropriate.

All financial liabilities are recognized initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

The Group's financial liabilities include accounts payable and accrued expenses, excluding statutory liabilities, loans payable and lease liabilities. The Group does not have financial liabilities at FVTPL.

#### *Subsequent measurement*

After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortized cost using the EIR method. Gains and losses are recognized in profit or loss when the liabilities are derecognized as well as through the EIR amortization process.

Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortization is included as finance costs in the statement of comprehensive income.

#### Derecognition of Financial Assets and Financial Liabilities

##### *Financial assets*

A financial asset (or where applicable, a part of a financial asset or part of a group of similar financial assets) is derecognized when:

- the rights to receive cash flows from the asset have expired;
- the Group retains the rights to receive cash flows from the asset, but has assumed an obligation to pay them in full without material delay to a third party under a "pass-through" arrangement; or
- the Group has transferred its right to receive cash flows from the asset and either (a) has transferred substantially all the risks and rewards of the asset, or (b) has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Group has transferred its rights to receive cash flows from an asset and has neither transferred nor retained substantially all the risks and rewards of the asset nor transferred control of the asset, the asset is recognized to the extent of the Group's continuing involvement in the asset. Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Group could be required to repay.

#### *Financial liabilities*

A financial liability is derecognized when the obligation under the liability is discharged, cancelled or has expired.

Where an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognized in profit or loss.

#### *Offsetting of Financial Instruments*

Financial assets and financial liabilities are set off and the net amount is reported in the consolidated statement of financial position if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously.

#### Fair Value Measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible to by the Group. The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 - Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- Level 3 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Group determines whether transfers have occurred between Levels in the hierarchy by re-assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

#### Crude Oil Inventory

Crude oil inventory is stated at NRV at the time of production. NRV is the estimated selling price less cost to sell. The estimated selling price is the market values of crude oil inventory at the time of production.

#### Other Current Assets

This account comprises supplies inventory, refundable deposit, prepayments and advances to suppliers.

Supplies inventory refers to parts purchased for used in operations. Supplies inventory are stated at the lower of cost or NRV. Cost is determined using the specific identification method. NRV is the current replacement cost of supplies inventory.

Prepayments are expenses paid in advance and recorded as asset before these are utilized. The prepaid expenses are apportioned over the period covered by the payment and charged to the appropriate accounts in profit or loss when incurred. Prepayments that are expected to be realized for a period of no more than 12 months after the financial reporting period are classified as current assets, otherwise, these are classified as noncurrent assets.

Advances to suppliers are reclassified to the proper asset or expense account and deducted from the supplier's billings as specified in the provisions of the contract.

#### Property, Plant and Equipment

Property, plant and equipment, except for land, are stated at cost less accumulated depletion, depreciation and amortization and any accumulated impairment losses. Land is stated at cost less any accumulated impairment losses. The initial cost of the property, plant and equipment consists of its purchase price, including any import duties, taxes and any directly attributable costs of bringing the assets to its working condition and location for its intended use and abandonment costs.

Expenditures incurred after the fixed assets have been put into operation, such as repairs and maintenance, are normally charged to the consolidated statement of comprehensive income in the period in which the costs are incurred. In situations where it can be clearly demonstrated that the expenditures have resulted in an increase in the future economic benefits expected to be obtained from the use of an item of property, plant and equipment beyond its originally assessed standard of performance, the expenditures are capitalized as an additional cost of property, plant and equipment.

Depreciation of an item of property, plant and equipment begins when it becomes available for use, i.e., when it is in the location and condition necessary for it to be capable of operating in the manner intended by management. Depreciation ceases at the earlier of the date that the item is classified as held for sale (or included in a disposal group that is classified as held for sale) in accordance with PFRS 5, *Non-current Assets Held for Sale and Discontinued Operations*, and the date the asset is derecognized.

Wells, platforms and other facilities related to oil operations are depleted using the units-of-production method computed based on estimates of proved reserves. The depletion base includes the exploration and development cost of the producing oilfields.

Land improvements consist of betterments, site preparation and site improvements that ready land for its intended use. These include excavation, non-infrastructure utility installation, driveways, sidewalks, parking lots, and fences.

Property, plant and equipment are depreciated and amortized using the straight-line method over the estimated useful lives of the assets as follows:

	<u>Number of Years</u>
Power plant, FCRS and production wells	25
Office condominium units	15
Land improvements	5
Transportation equipment	4
Office improvements	3
Office furniture and other equipment	2 to 3

The useful lives and depletion, depreciation and amortization methods are reviewed periodically to ensure that the period and method of depletion, depreciation and amortization are consistent with the expected pattern of economic benefits from items of property, plant and equipment.

Construction in progress represents property, plant and equipment under construction and is stated at cost. This includes the cost of construction to include materials, labor, professional fees, borrowing costs and other directly attributable costs. Construction in progress is not depreciated until such time the construction is completed.

Fully depreciated assets are retained in the accounts until they are no longer in use and no further depreciation is credited or charged to current operations.

When the assets are retired or otherwise disposed of, the cost and the related accumulated depletion, depreciation and amortization and any accumulated impairment losses are removed from the accounts and any resulting gain or loss is recognized in profit or loss.

#### Borrowing Costs

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalized as part of the cost of the asset. All other borrowing costs are expensed in the period in which they occur. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds.

#### Deferred Oil Exploration Costs

PERC follows the full cost method of accounting for exploration costs determined on the basis of each SC area. Under this method, all exploration costs relating to each SC are tentatively deferred pending determination of whether the area contains oil reserves in commercial quantities.

Deferred oil and gas exploration costs are assessed at each reporting period for possible indications of impairment. This is to confirm the continued intent to develop or otherwise extract value from the discovery. When this is no longer the case or is considered as areas permanently abandoned, the costs are written off through the consolidated statement of comprehensive income. Exploration areas are considered permanently abandoned if the related permits of the exploration have expired and/or there are no definite plans for further exploration and/or development.

The exploration costs relating to the SC where oil in commercial quantities are discovered are subsequently reclassified to "Wells, platforms and other facilities" shown under "Property and equipment" account in the consolidated statements of financial position upon substantial completion of the development stage.

#### Deferred Development Costs - Geothermal included in Other Noncurrent Assets

All costs incurred in the geological and geophysical activities such as costs of topographical, geological and geophysical studies, rights of access to properties to conduct those studies, salaries and other expenses of geologists, geophysical crews, or others conducting those studies are charged to profit or loss in the year such costs are incurred.

If the results of initial geological and geophysical activities reveal the presence of geothermal resource that will require further exploration and drilling, subsequent exploration and drilling costs are accumulated and deferred under the “Other noncurrent assets” account in the consolidated statement of financial position.

These costs include the following:

- costs associated with the construction of temporary facilities;
- costs of drilling exploratory and exploratory type stratigraphic test wells, pending determination of whether the wells can produce proved reserves; and
- costs of local administration, finance, general and security services, surface facilities and other local costs in preparing for and supporting the drill activities, etc. incurred during the drilling of exploratory wells.

If tests conducted on the drilled exploratory wells reveal that these wells cannot produce proved reserves, the capitalized costs are charged to expense except when management decides to use the unproductive wells for recycling or waste disposal.

Once the project’s technical feasibility and commercial viability to produce proved reserves are established, the exploration and evaluation assets shall be reclassified to “Property, plant and equipment” and depreciated accordingly.

#### Deferred Development Costs - Solar Power Project included in Other Noncurrent Assets

These are costs incurred in the development of the solar plant expansion project. Costs are capitalized if the technological and economic feasibility is confirmed, usually when a project development has reached a defined milestone according to an established project management model. These costs include the following:

- costs incurred for the expansion of the solar plant project
- costs of administration, finance, general and security services and other costs attributed to the expansion of the project.

Deferred development costs of the Solar Power Project is recognized under “Other noncurrent assets” in the statement of financial position. Once the project’s technical feasibility and commercial viability has been established, development costs shall be reclassified to “Property, plant and equipment” and depreciated accordingly.

#### Investment in a Joint Venture (JV)

A JV is a type of joint arrangement whereby the parties that have joint control of the arrangement have rights to the net assets of the joint venture. Joint control is the contractually agreed sharing of control of an arrangement, which exists only when decisions about the relevant activities require unanimous consent of the parties sharing control. Investment in a JV is accounted for under the equity method of accounting.

Under the equity method, the investment in a JV is initially recognized at cost. The carrying amount of the investment is adjusted to recognize changes in the Group’s share of net assets of the JV since the acquisition date.

The consolidated statement of comprehensive income reflects the Group's share of the financial performance of the joint venture. Any change in OCI of those investees is presented as part of the Group's OCI. In addition, when there has been a change recognized directly in the equity of the JV, the Group recognizes its share of any changes, when applicable, in the consolidated statement of changes in equity. Unrealized gains and losses from transactions between the Group and the JV are eliminated to the extent of the interest of the JV.

The aggregate of the Group's share in profit or loss of a JV is shown under "Other income (charges)" in the consolidated statement of comprehensive income and represents profit or loss after tax and non-controlling interests in the subsidiaries of the JV.

The financial statements of the JV are prepared in the same reporting period of the Group. When necessary, adjustments are made to bring the accounting policies in line with those of the Group.

After application of the equity method for the investment in a JV, the Group determines whether it is necessary to recognize an impairment loss on its investment in a JV. At each reporting date, the Group determines whether there is objective evidence that the investment in JV is impaired. If there is such evidence, the Group calculates the amount of impairment as the difference between the recoverable amount of the JV and its carrying value, then recognizes the loss in the consolidated statement of comprehensive income.

Upon loss of joint control over the JV, the Group measures and recognizes any retained investment at its fair value. Any difference between the carrying amount of the joint venture upon loss of joint control and the fair value of the retained investment and proceeds from disposal is recognized in the consolidated statement of comprehensive income.

#### Contract Assets

A contract asset is recognized for the earned consideration for goods or services transferred to a customer before the customer pays or before payment is due. Contract assets are measured at the present value of future collections to be received over a period of time. Contract assets that are expected to be received within 12 months after the financial reporting period are classified as current assets, otherwise, these are classified as noncurrent assets.

#### Intangible Assets

Intangible assets acquired separately are measured on initial recognition at cost. The cost of intangible assets acquired is their fair value as at the date of acquisition. Following initial recognition, intangible assets are carried at cost less accumulated amortization and accumulated impairment losses, if any.

Intangible assets with finite lives are amortized over their useful economic lives and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortization period and the amortization method for an intangible asset with a finite useful life are reviewed at least at the end of each reporting period. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset is accounted for by changing the amortization period or method, as appropriate, and are treated as changes in accounting estimates.

The amortization expense on intangible assets with finite lives is recognized in the consolidated statement of comprehensive income in the expense category consistent with the function of the intangible assets.

Intangible assets are amortized using the straight-line method over the estimated useful lives of the assets as follows:

	Number of Years
Land rights	25
Production license	10
Software license	1.5 to 3

Gains or losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the consolidated statement of comprehensive income when the asset is derecognized.

#### Investment Properties

Investment properties consist of land held for capital appreciation. Land is stated at cost less any impairment in value.

The initial cost of the investment properties comprises its purchase price and any directly attributable costs of bringing the asset to its working condition. Expenditures incurred after the investment properties have been put into operation, such as repairs and maintenance, are normally charged to expense in the year when costs are incurred. In situations where it can be clearly demonstrated that the expenditures have resulted in an increase in the future economic benefits expected to be obtained from the use of an item of investment properties beyond its originally assessed standard of performance, the expenditures are capitalized as an additional cost of investment properties.

Investment property is derecognized when either it has been disposed of or when the investment property is permanently withdrawn from use and no future economic benefit is expected from its disposal. Any gains or losses on the retirement or disposal of investment properties are recognized in the consolidated statement of comprehensive income in the year of retirement or disposal.

Transfers are made to investment properties when, and only when, there is a change in use, evidenced by the end of owner-occupation, commencement of an operating lease to another party or by the end of construction or development. Transfers are made from investment properties when, and only when, there is a change in use, evidenced by commencement of owner-occupation or commencement of development with a view to sell.

#### Interest in Joint Operations

A joint operation is a joint arrangement whereby the parties that have joint control of the arrangement have rights to the assets, and obligations for the liabilities, relating to the arrangement.

The Group recognized in relation to its interest in a joint operation its:

- assets, including its share of any assets held jointly
- liabilities, including its share of any liabilities incurred jointly
- revenue from the sale of its share of the output arising from the joint operation
- share of the revenue from the sale of the output by the joint operation
- expenses, including its share of any expenses incurred jointly

The Group accounts for the assets it controls and the liabilities it incurs, the expenses it incurs and the share of income that it earns from the sale of crude oil by the joint operations.

The Group's participating interest in the Etame block in Gabon, West Africa and participating interests in Philippine service contracts (SCs) are classified as joint operations.

#### Impairment of Nonfinancial Assets

The Group assesses at each reporting date whether there is an indication that an asset (e.g., property, plant and equipment, investment properties, deferred costs, intangible assets and right-of-use assets) may be impaired. If any such indication exists, or when annual impairment testing for an asset is required, the Group estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's fair value less costs to sell and its value in use and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or group of assets.

Where the carrying amount of an asset exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs to sell, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded companies or other available fair value indicators.

An assessment is made at each reporting date as to whether there is any indication that previously recognized impairment losses may no longer exist or may have decreased. If such indication exists, the Group makes an estimate of recoverable amount. A previously recognized impairment loss is reversed only if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognized. If that is the case, the carrying amount of the asset is increased to its recoverable amount. That increased amount cannot exceed the carrying amount that would have been determined, net of depletion, depreciation and amortization had no impairment loss been recognized for the asset in prior years.

#### Capital Stock and Additional Paid-in Capital

The Group records common stock at par value and additional paid-in capital in excess of the total contributions received over the aggregate par values of the equity shares. When the Group issues more than one class of stock, a separate account is maintained for each class of stock and the number of shares issued. Incremental costs incurred directly attributable to the issuance of new shares are shown in equity as a deduction from proceeds, net of tax. When any member of the Group purchases the Group's capital stock (treasury shares), the consideration paid, including any attributable incremental costs, is deducted from equity attributable to the Group's equity holders until the shares are cancelled, reissued or disposed of. Where such shares are subsequently sold or reissued, any consideration received, net of any directly attributable incremental transaction costs and the related tax effects, is included in equity.

#### Retained Earnings

Retained earnings represent the cumulative balance of consolidated net income, effects of changes in accounting policy and other capital adjustments, net of dividend declaration.

#### Cumulative Translation Adjustment

Cumulative translation adjustment represents the resulting exchange differences in the remeasurement of accounts due to change in functional currency.

#### Equity Reserve

Equity reserve is made up of equity transactions other than equity contributions such as gain or loss resulting from increase or decrease of ownership without loss of control.

#### Dividend Distribution

Cash dividends on capital stock are recognized as a liability and deducted from retained earnings when approved by the BOD.

### Revenue Recognition

Revenue is recognized when the control of petroleum and electricity are transferred to the customer at an amount that reflects the consideration which the Group expects to be entitled in exchange for those goods and services. The Group has generally concluded that it is the principal in its revenue arrangements.

#### *Electricity sales*

Revenues from sale of electricity using renewable energy is consummated and recognized over time whenever the electricity generated by the Group is transmitted through the transmission line designated by the buyer, for a consideration.

#### *Oil revenues*

Revenue from crude oil is recognized at a point in time when the control of the goods has transferred from the sellers (Consortium) to the buyer at the delivery point. Revenue is measured at the fair value of the consideration received.

The revenue recognized from the sale of petroleum products pertains to the Group's share in revenue from the joint operations. The revenue sharing is accounted for in accordance with PFRS 11, *Joint Arrangements*.

#### *Other Revenues*

Revenues from passed on wheeling charges are consummated and recognized over time whenever the electricity generated by the Group is transmitted through MERALCO's distribution system, for a consideration. Revenues from pass-on Wholesale Electricity Spot Market (WESM) transactions are consummated and recognized over time whenever the electricity generated by the Group is traded through WESM, for a consideration.

#### *Interest income*

Interest income is recognized as the interest accrues taking into account the effective yield on the asset.

#### *Dividend income*

Dividend income is recognized according to the terms of the contract, or when the right of the payment has been established.

### Share in Net Income of a Joint Venture

Share in net income of a joint venture represents the Group's share in profit or loss of its joint venture, PWEL.

### Miscellaneous Income

Miscellaneous income is recognized when the Group's right to receive the payment is established.

### Costs and Expenses

#### *Cost of electricity sales*

Costs of electricity sales pertain to direct costs in generating electricity power which includes operating and maintenance costs (O&M) for power plant and fluid collection and reinjection system (FCRS), depreciation and other costs directly attributed to producing electricity.

#### *Oil production*

Oil production are costs incurred to produce and deliver crude oil inventory, including transportation, storage and loading, among others.

*Change in crude oil inventory*

Change in crude oil inventory pertains to the movement of beginning and ending crude oil inventory charged as part of cost of sales.

*General and administrative expenses*

General and administrative expenses constitute costs of administering the business.

Costs and expenses are recognized as incurred.

Income Taxes

*Current Tax*

Current tax assets and liabilities for the current and prior periods are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amounts are those that are enacted or substantively enacted at the reporting date.

*Deferred Tax*

Deferred tax is provided using the balance sheet liability method on all temporary differences at the reporting date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

Deferred tax liabilities are recognized for all taxable temporary differences except to the extent that the deferred tax liabilities arise from the: a) initial recognition of goodwill; or b) the initial recognition of an asset or liability in a transaction which is not: i) a business combination; and ii) at the time of the transaction, affects neither accounting profit nor taxable profit or loss.

Deferred tax assets are recognized for all deductible temporary differences with certain exceptions, and carryforward benefits of unused tax credits from excess minimum corporate income tax (MCIT) over regular corporate income tax (RCIT) and unused net operating loss carryover (NOLCO), to the extent that it is probable that sufficient future taxable income will be available against which the deductible temporary differences and carryforward benefits of unused tax credits from excess MCIT and unused NOLCO can be utilized. Deferred tax assets, however, are not recognized when it arises from the: a) initial recognition of an asset or liability in a transaction that is not a business combination; and b) at the time of transaction, affects neither the accounting income nor taxable profit or loss.

The carrying amounts of deferred tax assets are reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient future taxable income will be available to allow all or part of the deferred tax assets to be utilized. Unrecognized deferred tax assets are reassessed at each reporting date, and are recognized to the extent that it has become probable that future taxable income will allow the deferred tax assets to be recovered. The Group does not recognize deferred tax assets and deferred tax liabilities that will reverse during the income tax holiday (ITH).

Deferred tax assets and liabilities are measured at the tax rates that are applicable to the period when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted as of the reporting date.

Deferred tax relating to items recognized outside profit or loss is recognized outside profit or loss. Deferred tax items are recognized in correlation to the underlying transaction either in profit or loss or other comprehensive income.

Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority. Subsidiaries operating in the Philippines file income tax returns on an individual basis. Thus, the deferred tax assets and deferred tax liabilities are offset on a per entity basis.

#### Value-Added Tax (VAT)

Revenues, expenses and assets are recognized net of the amount of VAT, if applicable.

When VAT from sales of goods or services (output VAT) exceeds VAT passed on from purchases of goods or services (input VAT), the excess is recognized as payable in the consolidated statement of financial position. When VAT passed on from purchases of goods or services (input VAT) exceeds VAT from sales of goods and/or services (output VAT), the excess is recognized as an asset in the consolidated statement of financial position as part of "Other noncurrent assets" to the extent of the recoverable amount.

#### Leases

##### *Group as a lessee*

The Group assesses at contract inception whether a contract is, or contains, a lease. That is, if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

##### *Right-of-use assets*

The Group recognizes right-of-use assets at the commencement date of the lease. Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liability. The cost of right-of-use assets includes the amount of lease liability recognized, and lease payments made at or before the commencement date less any lease incentives received and estimate of costs to be incurred by the lessee in dismantling and removing the underlying asset, restoring the site on which it is located or restoring the underlying asset to the condition required by the terms and conditions of the lease, unless those costs are incurred to produce inventories.

Unless the Group is reasonably certain to obtain ownership of the leased asset at the end of the lease term, the recognized right-of-use assets are depreciated on a straight-line basis over the shorter of its estimated useful life and the lease term, as follows:

	Number of Years
Office space	2
Land	18 to 25

##### *Lease liabilities*

At the commencement date of the lease, the Group recognizes lease liability measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Group and payments of penalties for terminating a lease, if the lease term reflects the Group exercising the option to terminate. The variable lease payments that do not depend on an index or a rate are recognized as expense in the period on which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Group uses the incremental borrowing rate at the lease commencement date if the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liability is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liability is

remeasured if there is a modification, a change in the lease term, a change in the in-substance fixed lease payments or a change in the assessment to purchase the underlying asset.

#### *Short-term leases and leases of low-value assets*

The Group applies the short-term lease recognition exemption to its short-term leases (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies to the leases of low-value assets recognition exemption to leases that are considered of low value (i.e., below ₱250,000). Lease payments on short-term leases and leases of low-value assets are recognized as expense on a straight-line basis over the lease term.

#### Retirement Benefits

The cost of providing benefits under the defined benefit plans is actuarially determined using the projected unit credit method. The net defined benefit liability or asset is the aggregate of the present value of the defined benefit obligation at the end of the reporting period reduced by the fair value of plan assets (if any), adjusted for any effect of limiting a net defined benefit asset to the asset ceiling. The asset ceiling is the present value of any economic benefits available in the form of refunds from the plan or reductions in future contributions to the plan.

Defined benefit costs comprise the following:

- Service cost
- Net interest on the net defined benefit liability or asset
- Remeasurements of net defined benefit liability or asset

Service costs which include current service costs, past service costs and gains or losses on non-routine settlements are recognized as expense in the consolidated statement of comprehensive income. Past service costs are recognized when plan amendment or curtailment occurs. These amounts are calculated periodically by independent qualified actuaries.

Net interest on the net defined benefit liability or asset is the change during the period in the net defined benefit liability or asset that arises from the passage of time which is determined by applying the discount rate based on government bonds to the net defined benefit liability or asset. Net interest on the net defined benefit liability or asset is recognized as expense or income in the consolidated statement of comprehensive income.

Remeasurements comprising actuarial gains and losses, return on plan assets and any change in the effect of the asset ceiling (excluding net interest on defined benefit liability) are recognized immediately in OCI in the period in which they arise. Remeasurements are not reclassified to consolidated statement of comprehensive income in subsequent periods.

Plan assets are assets that are held by a long-term employee benefit fund. Plan assets are not available to the creditors of the Group nor can they be paid directly to the Group. Fair value of plan assets is based on market price information. When no market price is available, the fair value of plan assets is estimated by discounting expected future cash flows using a discount rate that reflects both the risk associated with the plan assets and the maturity or expected disposal date of those assets (or, if they have no maturity, the expected period until the settlement of the related obligations). If the fair value of the plan assets is higher than the present value of the defined benefit obligation, the measurement of the resulting defined benefit asset is limited to the present value of economic benefits available in the form of refunds from the plan or reductions in future contributions to the plan.

The Group's right to be reimbursed of some or all of the expenditure required to settle a defined benefit obligation is recognized as a separate asset at fair value when and only when reimbursement is virtually certain.

#### Asset Retirement Obligation (ARO)

The Group records present value of estimated costs of legal and constructive obligations required to restore the oilfields and plant sites upon termination of its operations. The nature of these restoration activities includes dismantling and removing structures, rehabilitating settling ponds, dismantling operating facilities, closure of plant and waste sites, and restoration, reclamation and re-vegetation of affected areas. The obligation generally arises when the asset is constructed or the ground or environment at the sites are disturbed. When the liability is initially recognized, the present value of the estimated cost is capitalized as part of the carrying amount of the ARO assets (included under "Property, plant and equipment") and ARO liability.

Liability and capitalized costs included in oil properties is equal to the present value of the Group's proportionate share in the total decommissioning costs of the consortium on initial recognition. Additional costs or changes in decommissioning costs are recognized as additions or charges to the corresponding assets and ARO when they occur.

For closed sites or areas, changes to estimated costs are recognized immediately in the consolidated statement of comprehensive income.

If the decrease in liability exceeds the carrying amount of the asset, the excess shall be recognized immediately in profit or loss.

For the oil operation, the Group depreciates ARO assets based on units-of-production method.

For the renewable energy, the Group depreciates ARO assets on a straight-line basis over the estimated useful life of the related asset or the service contract term, whichever is shorter, or written off as a result of impairment of the related asset.

The Group regularly assesses the provision for ARO and adjusts the related liability and asset.

#### Foreign Currency-Denominated Transactions and Translation

The consolidated financial statements are presented in PHP, which is the Parent Company's functional and presentation currency. Transactions in foreign currencies are initially recorded in the functional currency using the exchange rate at date of transaction. Monetary assets and liabilities denominated in foreign currencies are reinstated to the functional currency using the closing exchange rate at reporting date.

All exchange differences are taken to the consolidated statement of comprehensive income. Non-monetary items that are measured in terms of historical cost in foreign currency are translated using the exchange rates as at the dates of initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined.

#### Earnings Per Share

Basic earnings per share is computed on the basis of the weighted average number of shares outstanding during the year after giving retroactive effect to any stock split or stock dividends declared and stock rights exercised during the current year, if any.

Diluted earnings per share is computed on the basis of the weighted average number of shares outstanding during the year plus the weighted average number of ordinary shares that would be issued on the conversion of all the dilutive potential ordinary shares into ordinary shares.

#### Segment Reporting

The Group's operating businesses are organized and managed separately according to the nature of the products and services provided, with each segment representing a strategic business unit that offers different products and services, serves different markets subject to different risks and returns. Financial information on business segments is presented in Note 28 to the consolidated financial statements.

#### Provisions and Contingencies

Provisions are recognized when the Group has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. If the effect of the time value of money is material, provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and, where appropriate, the risks specific to the liability.

Where discounting is used, the increase in the provision due to the passage of time is recognized as an interest expense. Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate.

Contingent liabilities are not recognized in the financial statements. They are disclosed unless the possibility of an outflow of resources embodying economic benefits is remote. Contingent assets are not recognized in the financial statements but are disclosed when an inflow of economic benefits is probable. Contingent assets are assessed continually to ensure that developments are appropriately reflected in the financial statements. If it has become virtually certain that an inflow of economic benefits will arise, the asset and the related income are recognized in the consolidated financial statements.

#### Events After the Reporting Period

Post year-end events that provide additional information about the Group's situation at the reporting date (adjusting events) are reflected in the financial statements, if any. Post year-end events that are not adjusting events are disclosed in the notes to consolidated financial statements when material.

---

## **5. Significant Accounting Judgments, Estimates and Assumptions**

The preparation of the consolidated financial statements in compliance with PFRS requires the Group to make judgments, estimates and assumptions that affect the reported amounts of assets, liabilities, income and expenses and disclosure of contingent assets and contingent liabilities. Future events may occur which will cause the assumptions used in arriving at the estimates to change. The effects of any change in judgments, estimates and assumptions are reflected in the consolidated financial statements, as they become reasonably determinable.

Judgments, estimates and assumptions are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

### Judgments

In the process of applying the Group's accounting policies, management has made the following judgments, apart from those involving estimations, which has the most significant effect on the amounts recognized in the consolidated financial statements:

#### *Determination of Functional Currency*

The Parent Company determines its functional currency based on economic substance of underlying circumstances relevant to the Parent Company. The functional currency has been determined to be the PHP based on the economic substance of the Parent Company's business circumstances.

#### *Capitalization of Deferred Oil Exploration Costs and Deferred Development Costs*

Initial capitalization of costs is based on management's judgment that technological and economic feasibility is confirmed, usually when a product development project has reached a defined milestone according to an established project management model. If the accounting policy on capitalization of development costs are not met, such costs are expensed.

As of December 31, 2022 and 2021, the carrying value of deferred oil explorations costs amounted to ₱311.88 million and ₱115.81 million, respectively (see Note 12), and the Group's deferred development costs amounted to ₱74.12 and ₱19.34 million as of December 31, 2022 and 2021, respectively (see Note 16).

#### *Classification of Joint Arrangements*

Judgment is required to determine when the Group has joint control over an arrangement, which requires an assessment of the relevant activities and when the decisions in relation to those activities require unanimous consent. The Group assesses their rights and obligations arising from the arrangement and specifically considers:

- the structure of the joint arrangement – whether it is structured through a separate vehicle
- when the arrangement is structured through a separate vehicle, the Group also considers the rights and obligations arising from:
  - the legal form of the separate vehicle
  - the terms of the contractual arrangement
  - other facts and circumstances, considered on a case by case basis

This assessment often requires significant judgment. A different conclusion about both joint control and whether the arrangement is a joint operation or a joint venture, may materially impact the accounting of the investment.

The Group's investment in PetroWind and Buhawind Energy are structured in a separate incorporated entity. The Group and the parties to the agreement only have the right to the net assets of the joint venture through the terms of the contractual arrangement. Accordingly, the joint arrangement is classified as a joint venture. As of December 31, 2022 and 2021, the Group's investment in a joint venture amounted to ₱1.88 billion and ₱1.73 billion, respectively (see Note 13).

The Group and the parties to the agreement in investment in Gabon, West Africa and investments in petroleum concessions in the Philippines have joint control over its rights to the assets and obligations for the liabilities, relating to the arrangement. Accordingly, the joint arrangements are classified as joint operations (see Notes 11 and 12).

### Estimates and Assumptions

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below.

#### *Estimation of Geothermal Field Reserves*

The Group performed volumetric reserve estimation to determine the reserves of the Maibarara geothermal field. As a requirement for project financing, the Group engaged at its own cost the New Zealand firm Sinclair Knight Merz (SKM) in 2011 to undertake a comprehensive third-party technical review of the Maibarara geothermal field. This review included analysis of the resource assessment performed in-house by the Group as well as a separate SKM reserve estimation and numerical modeling of the Maibarara reserves.

The Group's simulation indicated a mean (P50) proven reserves of 27.8 MW for 25 years. In contrast, SKM calculated the P50 reserves at 44 MW. At 90% probability (P90), the reserves calculated are 28 MW and 12 MW by SKM and the Group, respectively. SKM concluded that the approach taken by the Group is conservative as it limits reservoir thickness to depths where a maximum thickness of 280°C will be encountered although the measured temperature reached as high as 324°C. There is reasonable confidence that the 20 MW (gross) plant development is feasible as the P90 level appears also conservative as with the Group's approach. In addition, SKM identified indicated reserves, translating to 10 MW-26 MW in the area south of and outside the current area of development.

Also, there is a likely geothermal potential south of the proven area where two old wells were drilled and encountered high fluid temperatures ( $T \sim 300^{\circ}\text{C}$ ). MGI identified the southern block as a probable reserve area. SKM in 2011 suggested that the southern block can be classified as Indicated Resource based on the Australian Code as high temperatures have been intersected by the two wells. SKM estimated that the stored heat in the Southern Block has a resource potential equivalent to 12 MW for a project life of 25 years.

An updated reserves estimation using the stored-heat calculation was made in 2015 by the Group as a result of reservoir and production performance and the 2014 drilling campaign. The 2014 drilling proved that the current resource area can produce around 33.1 MW, more than enough to meet the steam requirement of the existing 20 MW power plant plus the 12 MW expansion power plant. Using Monte Carlo simulation to estimate the reserves, the proven resource area has an 80% probability of delivering between 18.1 MW to 50.9 MW over a 25-year operating period. This Monte Carlo simulation also showed that the expected mean reserve for the proven resource area is 30.4 MW for 25 years.

The Group engaged a U.S. firm Geothermal Science, Inc. (GSI) in 2015 to perform a third-party technical appraisal of the resource for the planned 12 MW expansion. This third-party review was also made as a requirement for the project financing of MGPP-2 or M2. GSI adopted the technique from the US Geological Survey Circular 790 in making the probabilistic calculation of the geothermal reserves at Maibarara. Based on this approach, GSI estimates that Maibarara has a minimum or proven reserves of 40.2 MW, P90 for 25 years plant life and Most Likely Reserve of 61.6 MW, P50 for 25 years of plant life.

The Group commenced producing power commercially last February 8, 2014. To date, the current production wells of M1 and M2 are capable of producing 41.4 MW at full-bore capacity. These production wells including the complement reinjection wells are concentrated on the proven resource area.

As of December 31, 2022 and 2021, there has been no significant change in the estimated reserves that would affect the carrying value and useful life of the Group's property, plant and equipment.

#### *Estimation of Proved and Probable Oil Reserves*

The Parent Company assesses its estimate of proved and probable reserves on an annual basis. The estimate is based on the technical assumptions and is calculated in accordance with accepted volumetric methods, specifically the probabilistic method of estimation. Probabilistic method uses known geological, engineering and economic data to generate a range of estimates and their associated probabilities.

All proved and probable reserve estimates are subject to revision, either upward or downward, based on new information, such as from development drilling and production activities or from changes in economic factors, including product prices, contract terms or development plans. Estimates of reserves for undeveloped or partially developed fields are subject to greater uncertainty over their future life than estimates of reserves for fields that are substantially developed and depleted. Estimated oil reserves are utilized in the impairment testing and the calculation of depletion expense using the unit of production method of the investments.

As of December 31, 2022 and 2021, the carrying value of “Wells, Platforms and other Facilities” under “Property, Plant and Equipment” amounted to ₱763.83 million and ₱658.72 million, respectively (see Note 11).

#### *Estimation of Useful Lives of Property, Plant and Equipment*

The Group reviews on an annual basis the estimated useful lives of property, plant and equipment based on expected asset utilization as anchored on business plans and strategies that also consider expected future technological developments and market behavior.

It is possible that future results of operations could be materially affected by changes in these estimates brought about by changes in the factors mentioned. A reduction in the estimated useful lives of property, plant and equipment would increase the recorded depletion, depreciation and amortization expense and decrease noncurrent assets.

There is no change in the estimated useful lives of property, plant and equipment as of December 31, 2022, and 2021 (see Note 11).

#### *Impairment of Nonfinancial Assets*

The Group assesses at each reporting date, whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Group estimates the asset’s recoverable amount. An asset’s recoverable amount is the higher of an asset’s or cash-generating unit’s (CGU) fair value less cost of disposal and its value in use.

Facts and circumstances that would require an impairment assessment as set forth in PFRS 6, *Exploration for and Evaluation of Mineral Resources*, are as follows:

- the period for which the Group has the right to explore in the specific area has expired or will expire in the near future, and is not expected to be renewed;
- substantive expenditure on further exploration for and evaluation of mineral resources in the specific area is neither budgeted nor planned;
- exploration for and evaluation of mineral resources in the specific area have not led to the discovery of commercially viable quantities of mineral resources and the entity has decided to discontinue such activities in the specific area; and
- sufficient data exist to indicate that, although a development in the specific area is likely to proceed, the carrying amount of the exploration and evaluation asset is unlikely to be recovered in full from successful development or by sale.

The related balances of the Group's nonfinancial assets as of December 31 follow:

	2022	2021
Property, plant and equipment (Note 11)	<b>₱8,196,897,057</b>	₱7,870,583,131
Right-of-use assets (Note 14)	<b>342,614,655</b>	363,245,358
Deferred oil exploration costs (Note 12)	<b>311,883,011</b>	115,806,924
Intangible assets (Note 16)	<b>140,262,493</b>	152,727,719
Deferred development costs (Note 16)	<b>74,115,084</b>	19,337,621
Investment properties (Note 15)	<b>1,611,533</b>	1,611,533
	<b>₱9,067,383,833</b>	₱8,523,312,286

There are no indicators of impairment that would trigger impairment review in 2022 and 2021 other than those mentioned below.

#### Gabon, West Africa

The Parent Company believes that the fluctuation in crude oil prices in the market, political risks in Gabon, discount rates and changes in other assumptions such as change in production profile which is based on continued production until the term of the existing PSC are indicators that the assets might be impaired or if there is reversal of prior impairment loss.

In 2018, the Gabonese Government allowed the sixth amendment to the Exploration Production Sharing Contract ("EPSC") that extends the exploitation period for the production licenses by ten (10) years, or from September 2018 until September 2028, extendible by five (5) years and by a final extension of 5 more years. The extension of the EPSC will allow the consortium to maximize the use of the existing facilities that are already in place to increase or maintain production until the field's extended life (see Note 11).

#### SC 14-C2 – West Linapacan

SC 14-C2 has not yet expired and was granted with a 15-year extension of the SC as approved by the DOE from December 18, 2010 to December 18, 2025. The SC 14-C2 consortium proceeded with a third-party technical evaluation to assess potential production opportunities. With the SC nearing its expiration in December 2025, the assets were tested for impairment.

#### SC 6A – Octon-Malajon Block

In March 31, 2021, Philodrill, the operator, gave notice to the DOE that the Joint Venture has elected not to enter the 12<sup>th</sup> year of the final 15-year term of SC 61 and consequently surrender the Service Contract.

#### Impairment loss (reversal)

In assessing whether impairment is required, the carrying value of the asset is compared with its recoverable amount. The recoverable amount is the higher of the asset's fair value less costs to sell and value in use. Given the nature of the Parent Company's activities, information on the fair value of an asset is usually difficult to obtain unless negotiations with potential purchasers or similar transactions are taking place. Consequently, unless indicated otherwise, the recoverable amount used in assessing the impairment loss is value in use.

The Parent Company estimates value in use using a discounted cash flow model using a discount rate of 14.64% in 2022 and 10.00% in 2021 and 2020.

The Parent Company recognized impairment (reversal of impairment) loss for the years ended December 31, 2022 and 2021 (nil in 2020) presented on a net basis:

	2022	2021
Wells, platforms and other facilities – net (Note 11)	<b>(P11,893,541)</b>	P22,489,016
Deferred oil exploration costs – net (Note 12)	<b>594,172</b>	141,834,278
	<b>(P11,299,369)</b>	P164,323,294

*Estimation of Asset Retirement Obligations*

The Group has various legal obligation to decommission or dismantle its assets related to the oil production, geothermal energy project and solar power project at the end of each respective service contract. In determining the amount of provisions for restoration costs, assumptions and estimates are required in relation to the expected costs to restore sites and infrastructure when such obligation exists. The Group recognizes the present value of the obligation to dismantle and capitalizes the present value of this cost as part of the balance of the related property, plant and equipment, which are being depreciated and amortized on a straight-line basis over the useful life of the related assets (for the renewable energy) and based on units-of-production method based on estimates of proved reserves (for the oil operations).

Cost estimates expressed at projected price levels until dismantling date are discounted using rates ranging from 7.13% to 7.16% in 2022 and 4.59% to 5.05% in 2021 to take into account the timing of payments. Each year, the provision is increased to reflect the accretion of discount and to accrue an estimate for the effects of inflation, with charges being recognized as accretion expense (see Note 19).

Changes in the asset retirement obligation that result from a change in the current best estimate of cash flow required to settle the obligation or a change in the discount rate are added to (or deducted from) the amount recognized as the related asset and the periodic unwinding of the discount on the liability is recognized in profit or loss as it occurs.

While the Group has made its best estimate in establishing the asset retirement obligation, because of potential changes in technology as well as safety and environmental requirements, plus the actual time scale to complete decommissioning activities, the ultimate provision requirements could either increase or decrease significantly from the Group's current estimates. The amounts and timing of recorded expenses for any period would be affected by changes in these factors and circumstances.

Asset retirement obligation as of December 31 follows (see Note 19):

	2022	2021
Oil production	<b>P41,728,602</b>	P62,193,875
Geothermal energy project	<b>7,509,078</b>	8,315,413
Solar power project	<b>16,992,650</b>	22,301,555
	<b>P66,230,330</b>	P92,810,843

*Recoverability of input VAT*

The Group maintains an allowance for input VAT based on an assessment of the recoverability of these assets using the historical success rate of VAT refunded from the Bureau of Internal Revenue (BIR). A review is made by the Group on a continuing basis annually to determine the adequacy of the allowance for losses. Allowance for probable losses as of December 31, 2022 and 2021 amounted to P10.39 million. The carrying value of input VAT amounted to P138.32 million and P133.92 million as of December 31, 2022 and 2021, respectively (see Note 16).

*Recognition of deferred tax assets*

The Group reviews the carrying amounts of deferred tax assets at each reporting date and reduces them to the extent that it is no longer probable that sufficient future taxable profit will be available to allow all or part of the deferred tax assets to be utilized.

As of December 31, 2022 and 2021, the Group did not recognize deferred tax assets on certain temporary differences, NOLCO and MCIT as the Group believes that it may not be probable that sufficient taxable income will be available in the near foreseeable future against which the tax benefits can be realized prior to their expiration (see Note 21).

---

**6. Cash and Cash Equivalents and Short-term Investments**

	2022	2021
Cash on hand and in banks	<b>₱434,700,436</b>	₱684,886,621
Cash equivalents	<b>1,242,531,148</b>	556,875,480
Cash and Cash Equivalents	<b>1,677,231,584</b>	1,241,762,101
Short-term investments	<b>₱946,044,355</b>	<b>₱-</b>

Cash in banks earn interest at the prevailing bank deposit rates. Cash equivalents are made for varying periods of up to three months depending on the immediate cash requirements of the Group and earn interest at the prevailing short-term investment rates.

In 2022, the Group has ₱946.04 million short-term investments with periods of more than three months but less than one year.

Interest income earned on cash and cash equivalents and short-term investments amounted to ₱36.29 million, ₱12.91 million and ₱18.03 million in 2022, 2021 and 2020, respectively.

---

**7. Restricted Cash**

	2022	2021
Cash held under escrow for stock subscription	<b>₱1,629,242,070</b>	₱-
Debt service payment and reserve accounts	<b>413,219,105</b>	414,423,370
Share in Etame escrow fund – current portion	<b>20,926,811</b>	3,205,109
Stock Rights Offer (SRO) funds	-	154,549,130
	<b>₱2,063,387,986</b>	<b>₱572,177,609</b>

*Cash held under escrow for stock subscription*

This represents the remaining funds held under escrow related to the Share Subscription Agreement between PetroGreen and Kyuden International Corporation (Kyuden), which was released from the escrow fund in January 2023 (Note 30). Interest income earned on restricted cash amounts to ₱7.6 million in 2022.

*Debt service payment and reserve accounts*

This refers to the amount of fund that the Group is required to maintain in the Debt Service Payment Account (DSPA) and Debt Service Reserve Account (DSRA) pursuant to the Omnibus Loan and Security Agreement (OLSA) of MGI and PetroSolar, respectively (see Note 18). The funds maintained in these accounts are used to pay the forthcoming debt service scheduled every year until the loan is

fully paid off. Under the OLSA, where the banks are one of the parties, the banks shall have the exclusive control over and exclusive right of withdrawal from the restricted cash accounts.

*Stock Rights Offer (SRO) funds*

This refers to the remaining Stock Rights Offering Proceeds held under an escrow account amounting to nil and ₱154.55 million as of December 31, 2022 and 2021, respectively. On April 18, 2022, the remaining SRO funds were withdrawn from the escrow account and will be used to pay loans and interest.

*Share in Etame escrow fund – current portion*

As of December 31, 2022, this represents Parent Company's share in the current portion of the Abandonment Fund related to FPSO decommissioning and Etame Field Asset Retirement Obligations. These funds were released from the escrow account in February 2023.

As of December 31, 2021, this balance includes escrow to secure payment and discharge of the Parent Company's obligations and liabilities under the FPSO contract amounting to ₱3.03 million.

---

8. **Receivables**

	2022	2021
Accounts receivable from:		
Electricity sales and other charges to ACEN (formerly PHINMA) [Note 26]	<b>₱162,536,100</b>	₱147,560,157
Feed-in-Tariff (FiT) revenue from National Transmission Corporation (TransCo)	<b>106,169,169</b>	112,813,280
Electricity sales to Wholesale Electricity Spot Market (WESM) and Other Contracts	<b>92,541,594</b>	52,800,531
Consortium operator	<b>40,550,770</b>	47,982,279
PHESCO, Incorporated (PHESCO)	<b>15,245,231</b>	15,245,231
Affiliate (Note 26)	<b>6,232,978</b>	3,992,899
Others	<b>4,585,274</b>	2,122,487
Interest receivables	<b>23,487,736</b>	1,002,791
Subscription receivable	-	8,300,000
Other receivables	<b>3,526,249</b>	3,526,250
	<b>454,875,101</b>	395,345,905
Less allowance for impairment losses	<b>2,682,452</b>	2,682,452
	<b>₱452,192,649</b>	₱392,663,453

Accounts receivables are generally on 30 days credit term. Interest income earned from the delayed payment of FiT differential and other receivable amounted to ₱0.45 million and ₱0.22 million in 2022 and 2021 (nil in 2020).

Subscription receivable pertains to the receivable from EEI Power Corporation (EEIPC) in relation to equity cash call made by PGEC to be used for the funding of one of its renewable energy projects. EEIPC remitted the amount on January 3, 2022.

---

9. **Financial Assets at Fair Value Through Profit or Loss**

	2022	2021
Marketable equity securities	<b>₱6,770,090</b>	₱6,817,228
Investment in golf club shares	<b>770,000</b>	770,000
	<b>₱7,540,090</b>	₱7,587,228

Net gain (loss) on fair value changes on financial assets at FVTPL included in profit or loss amounted to (₱0.05 million), ₱0.06 million, and (₱0.71 million) in 2022, 2021 and 2020, respectively. Dividend income received from equity securities amounted to ₱0.08 million, ₱0.04 million and ₱0.07 million in 2022, 2021 and 2020, respectively (see Note 25).

---

10. **Other Current Assets**

	2022	2021
Supplies inventory	<b>₱116,790,791</b>	₱128,603,181
Prepaid expenses	<b>27,199,944</b>	26,108,789
Prepaid income taxes	<b>11,068,121</b>	13,085,187
Advances to suppliers	<b>8,004,724</b>	12,037,440
Others	<b>2,216,223</b>	4,322,026
	<b>₱165,279,803</b>	₱184,156,623

*Supplies Inventory*

Supplies inventory refers to purchased supplies and parts that are intended to be used for operations and maintenance.

*Prepaid Expenses*

Prepaid expenses include various prepaid insurances, services and rent. Prepaid expenses also include advance payment for Real Property Taxes (RPT), Stand-by Letter of Credit (SBLC) charges and operations and maintenance professional fees.

## 11. Property, Plant and Equipment

	2022								Total
	Power plants	FCRS and production wells – geothermal	Wells, platforms and other facilities	Land and land improvements	Office condominium units and improvements	Transportation equipment	Office furniture and other equipment	Construction in progress

Power plants represent MGI’s geothermal power plant and PetroSolar’s photovoltaic plant.

The MGI’s construction of the 70/77 MVA Substation started in January 2020 and construction in progress account as of December 31, 2022 mainly includes civil structural, piping and mechanical works for M2, interconnection of MGPP to NGCP 69kV distribution line, design, facilities study and construction of 70/77 MVA MGI Substation related to MGPP-1&2 and Torishima engine driven pump.

Change in ARO estimate and transfers from advances to contractors, deferred oil exploration costs and development costs are considered as noncash investing activities.

Depletion and depreciation expense charged to profit or loss follow:

	2022	2021	2020
Cost of electricity sales (Note 22)	<b>₱418,160,625</b>	₱399,787,122	₱394,231,789
Depletion	<b>85,286,880</b>	76,513,364	82,236,533
General and administrative expenses (Note 24)	<b>10,775,546</b>	6,234,502	11,814,866
	<b>₱514,223,051</b>	₱482,534,988	₱488,283,188

Depletion of wells, platforms and other facilities is presented as a separate item under cost of sales in the consolidated statements of comprehensive income.

As of December 31, 2022 and 2021, the participating interest of PERC in various service contracts areas are as follows:

Gabonese Oil Concessions	2.525%
SC 14-C2 – West Linapacan	4.137%

### **Foreign Operations**

#### *Gabon, West Africa*

##### **Background**

The Group holds approximately 2.53% participating interest in the Exploration and Production Sharing Contract (“EPSC”) covering the Etame block in Gabon, West Africa (the “Etame Marin Permit”). The other parties in the consortium are Addax Petroleum Etame, Inc. (33.90%) and VAALCO Gabon (Etame), Inc. (63.58%) (the “Gabon Consortium”), are leaders in their respective areas of operation. VAALCO is the Consortium’s operator, and is in charge of conducting the exploration and production activities in the Gabon contract area.

The EPSC is a contract with the Gabonese Government that gives the holder of the said EPSC exclusive rights and obligations to perform exploration, exploitation, and production activities and in the case of the consortium, within the Etame Marin Permit area.

In August 2021, the Consortium entered into a Bareboat Charter Agreement and Operating Agreement with World Carrier Offshore Services Corporation (World Carrier) to provide and operate a Floating Storage and Offloading (FSO) unit at the Etame Marin field for up to eight (8) years with additional option periods available upon the expiration of the current 20-year Floating Production, Storage and Offloading (FPSO) contract with BW Offshore in September 2022.

In December 2021, the consortium commenced a four-well drilling program in the Etame, Avouma and North Tchibala fields using the Borr Norve jack-up drilling rig, aimed to sustain field production to above 20,000 BOPD.

Etame-8H sidetrack was completed in February 2022. Avouma-3H sidetrack was completed in April 2022, South Tchibala-1HB sidetrack in July 2022, and North Tchibala-2H sidetrack in November 2022. Workovers were also conducted on Ebouri-2H, North Tchibala-1H and Southeast Etame-4H wells within 2022. This resulted in an increase in overall crude production of ~18,000-20,000 BOPD by the end of 2022.

Given the extended EPSC period, the Consortium is currently firming up the most feasible Integrated Field Development Plan (IFDP) to extract the remaining recoverable oil volumes until at least 2028 up to 2038 (final extension). This IFDP may include: 1) production from sour oil reserves, 2) outfield drilling opportunities, and 3) facility maintenance strategies.

#### Update on Production

Production was routed to the Petroleo Nautipa, the spread-moored (FPSO) vessel from the Etame, Avouma-Southeast Etame-North Tchibala and Ebouri platforms, and from the wells tied to the subsea Etame manifold. The produced oils were processed and exported from the FPSO, which had a storage capacity of one million barrels of oil (MMBO).

Throughout 2022, facility reconfiguration works were being completed in parallel for the hook-up and commissioning of the new FSO vessel Teli, which replaced the Petroleo Nautipa FPSO vessel in mid-October 2022. The FSO vessel is now operational and receiving crude from all Etame Marin platform wells. The two (2) old subsea wells – Etame-6H and Etame-7H – which were originally connected directly to the old Petroleo Nautipa FPSO, have been hooked-up to the FSO last December 30, 2022. Final punchlist items are currently being completed.

Crude production comes from four (4) oil fields (Etame, Avouma, Ebouri and North Tchibala).

In 2022, total crude production reached 5.94 MMBO. The Consortium managed 11 liftings, resulting in net crude export of 5.133 MMBO, with crude oil market prices ranging from US\$76 – US\$133 per barrel.

In 2021, total crude production reached 5.42 MMBO. The Consortium managed 11 liftings, resulting in net crude export of 5.867 MMBO, with crude oil market prices ranging from US\$ 50 – US\$85 per barrel.

In 2020, total crude production reached 6.57 MMBO. The Consortium managed 11 liftings, resulting in a net crude export of 6.02 MMBO, with crude oil market prices ranging from US\$ 17 – US\$66 per barrel.

Since the Gabon oilfield has been put on-line in 2002, a total of 130 MMBO have been extracted as of December 31, 2022 over the last 20 years.

As of December 31, 2022 and 2021, PetroEnergy has investments in Gabon, West Africa included in “Wells, platforms and other facilities” account under “Property, plant and equipment” amounting to ₺763.83 million and ₺596.47 million, respectively. With the increase in crude oil prices and recoverable oil reserves, reversal of impairment loss was recognized amounting to ₺74.14 million in 2022, and ₺121.59 million in 2021 (nil in 2020) [see Note 5].

## **Philippine Operations**

### ***SC 14-C2 – West Linapacan, Northwest Palawan***

West Linapacan was discovered in the early 1990s. It produced oil from 1992 to 1996, peaking at 18,000 BOPD, before it was shut-in due to early water incursion.

The SC 14C2 Consortium, led by operator Philodrill Corp., negotiated with a potential farmee for the drilling of potential drilling targets, in exchange for a majority share and Operatorship of SC 14C2. This farm-in is subject to the approval of the Department of Energy (DOE).

While the consortium awaited the farmee’s completion of the farm-in documentation, Philodrill continued to do in-house G&G work over at the West Linapacan area at the interim. For compliance, a “Transition Work Program and Budget, covering November 2020 to March 2021 was submitted to the DOE in November 2020 and was approved.

Throughout the second half of 2021 and 2022, the SC 14-C2 consortium proceeded with a third-party technical evaluation of the West Linapacan B field, to assess potential production opportunities. SC 14-C2 is due to expire in December 2025.

Due to the limited term remaining, the Group assessed the recoverability of the investment included in “Wells, platforms and other facilities” account under “Property, plant and equipment” and recorded impairment loss amounted to ₱62.25 million and ₱144.40 million in 2022 and 2021, respectively.

As of December 31, 2022 and 2021, PetroEnergy has investments in the West Linapacan Oilfield included in “Wells, platforms and other facilities” account under “Property, plant and equipment” amounts to nil and ₱62.25 million, respectively.

### **Maibarara Geothermal Power Project**

#### ***Geothermal Renewable Energy Service Contract (GRESC) No. 2010-02-012***

Following the DOE Philippine Energy Contracting Round for Geothermal in 2009, PERC signed the Service Contract for the Maibarara Geothermal Power Project (MGPP) on February 1, 2010. PERC then conducted pre-development activities in 2010 to 2011. In order to carry out the development and operations of the MGPP, PetroEnergy (through its subsidiary, PetroGreen) then created Maibarara Geothermal, Inc. (MGI) along with Trans-Asia Oil and Energy Development Corporation (“Trans-Asia”, subsequently renamed as PHINMA Energy Corporation or “PHINMA”, and now known as ACEN Corporation or “ACEN”) and PNOG Renewable Corporation (PNOG RC), with 65%, 25%, and 10% equity ownerships, respectively.

In June 2019, ACEN, the energy platform of Ayala Corporation, completed the acquisition of PHINMA, including PHINMA’s 25% share in MGI.

#### ***20 MW Maibarara-1 Geothermal Power Plant (MGPP-1)***

The DOE confirmed the commerciality of the 20-MW MGPP-1 in 2011, allowing MGI to proceed with the MGPP’s development stage, involving 1) the drilling of two (2) wells to complete the steam production and reinjection well capacities, and 2) the construction of the steamfield and power plant facilities. The MGPP-1’s 115kV Transmission Line system was successfully connected to the existing Manila Electric Company (MERALCO) line in September 2013. Upon completion of the reliability and performance testing, the MGPP-1 went on commercial operations on February 8, 2014. All electricity generated are sold to offtaker, ACEN, following the aforementioned acquisition of PHINMA by ACEN.

On February 08-27, 2021, the Maibarara-1 facility had a scheduled minor maintenance shutdown. Various maintenance activities for the unit’s mechanical and electrical, and instrumentation facilities, as well as for the switchyard and transmission lines, were carried-out by MGI technical staff and private contractors.

MGPP-1 underwent its second major preventive maintenance shutdowns (PMS) in February 2022; the first being conducted in 2016.

On the steamfield side, the two (2) production wells dedicated to MGPP-1 operations—Mai-6D and MB-12D—continued to behave consistently with dynamic but sustainable production.

MGPP-1 transmitted 134.48 GWh and 157.60 GWh of electricity in 2022 and 2021, respectively.

*12 MW Maibarara-2 Geothermal Power Plant (MGPP-2)*

With the stable performance of the reservoir, MGI decided to pursue an expansion of the MGPP. There was at least 5 MW of excess steam supply from the MGPP-1 wells, and with the ~6 MW capacity of the new well, an expansion of 12 MW was decided and approved in 2015 (MGPP-2).

Major power plant components from Fuji Electric Co. Ltd. (“Fuji”, the same supplier as the MGPP-1) were delivered and installed on site from March to April 2017. MGPP-2 was first synchronized to the grid on March 9, 2018, with the full 12 MW attained on March 18, 2018. Reliability tests were then conducted from March 18 to 27, 2018, during which the power plant was on full 12 MW operation.

The Energy Regulatory Commission (ERC) formally notified MGI of the approval of MGPP-2’s Certificate of Compliance (COC) application on April 26, 2018. Subsequently, the MGPP-2 was accepted into the Wholesale Electricity Spot Market (WESM) on April 30, 2018 – pegging the MGPP-2’s start of Commercial Operations on the same date. This operationally started the application of MGPP-2’s Electricity Supply Agreement (ESA) with PHINMA, now ACEN, wherein all of MGPP-2’s generated electricity are sold to ACEN.

Workover operations were conducted on production well MB-15D in June 2022. After which, new production well MB-18D was drilled in September 2022 and hooked-up in November 2022. To date, the field’s total gross output is now being sustained at ~33 MW.

MGPP-2 transmitted 70.23 GWh and 93.80 GWh of electricity in 2022 and 2021, respectively.

Both the MGPP-1 and the MGPP-2 are registered with the Board of Investments and are enjoying the incentives under the Renewable Energy Act of 2008.

*Tarlac Solar Power Project (TSPP)*

***Solar Energy Service Contract (SESC) No. 2015-03-115***

The SESC for the TSPP was awarded by the DOE on March 19, 2015. On June 17, 2015, PGEC and affiliate EEI Power Corporation (“EEIPC”, 100% subsidiary of EEI Corporation), incorporated PetroSolar to undertake the development of the TSPP.

*50 MWDC Tarlac Solar Power Project-1 (TSPP-1)*

On June 22, 2015, PetroGreen and solar farm lot owner, Luisita Industrial Park Corporation (LIPCO), executed a Lease Agreement for the 55-hectare solar farm development. This was assigned to PetroSolar on September 15, 2015. As the LIPCO property is within the Central Technopark, which is under the jurisdiction of the Philippine Economic Zone Authority (PEZA), PetroSolar was able to register as an Ecozone Utilities Enterprise on July 28, 2015, entitling it to the incentives available to PEZA locators.

After only four (4) months of ground works, the TSPP-1 was completed by mid-January 2016 and was able to export power to the grid on January 27, 2016. The DOE eventually gave its Certificate of Endorsement (COE) – Feed-in-Tariff (FiT) for TSPP-1, with an official Commercial Operations Date on February 10, 2016. Subsequently, on April 6, 2016, PSC executed its Renewable Energy Payment Agreement (REPA) with the National Transmission Corporation (TransCo), assuring the TSPP-1's revenues from the FiT payment of 8.69/kWh from 2016 to 2036.

The total energy exported to the grid was 70.33 GWh and 73.47 GWh in 2022 and 2021, respectively.

#### 20 MWDC Tarlac Solar Power Project (TSPP-2)

On September 17, 2018, the BOI formally awarded to PetroSolar the latter's Certificate of Registration for the 20 MWDC TSPP-2. This approval entitles the TSPP-2 to enjoy duty-free importations, and a seven-year Income Tax Holiday (ITH), among others.

After the site construction works for the TSPP-2 were completed in March 2019 and its registration with the WESM was secured from the Independent Electricity Market Operator of the Philippines Inc. (IEMOP) on April 21, 2019, the TSPP-2 started exporting power to the grid on April 22, 2019 as part of its testing and commissioning activities. The ERC conducted its technical inspections for the TSPP-2 on May 31, 2019, as part of PetroSolar's Certificate of Compliance (COC) for TSPP-2.

On February 27, 2020 and March 18, 2020, the DOE formally issued to PSC the Certificate of Confirmation of Commerciality (COCOC) and the Certificate of Endorsement (COE) for TSPP-2, respectively. The COE is a prerequisite to the issuance of the Certificate of Compliance (COC) by the ERC. The COC will determine the official Commercial Operations Date (COD) for TSPP-2.

The ERC issued a Provisional Approval to Operate (PAO) to TSPP-2 on December 16, 2021, subject to PSC's compliance to 1) public offering requirement and 2) terms under PSC's Point-to-Point application, once approved. The said PAO is valid until December 15, 2022, and sets TSPP-2's WESM COD to January 25, 2022.

TSPP-2 exported 29.40 GWh and 30.48 GWh in 2022 and 2021, respectively.

#### *Collateral to Secured Borrowings*

MGI has mortgaged its property classified under property, plant and equipment consisting of real assets and chattel, with a total carrying value of ₱4.64 billion as of December 31, 2022, as collateral in favor of Rizal Commercial Banking Corporation (RCBC) [the Lender], in relation to its two (2) loan facilities (see Note 18). The breakdown of the above value is as follows:

- Real Assets (consisting of land, buildings, land improvements, machinery and equipment) ₱4.52 billion; and
- Chattel (consisting mainly of other machinery and equipment, inventory, furniture and fixtures) ₱117.23 million.

## 12. Deferred Oil Exploration Costs

The movements in deferred oil exploration costs follow:

	2022	2021
<b>Cost</b>		
Balances at beginning of year	<b>₱418,786,296</b>	₱530,976,224
Additions	<b>196,670,258</b>	47,107,706
Write-off / relinquishment (Note 5)	–	(159,297,634)
Balances at end of year	<b>615,456,554</b>	418,786,296
<b>Accumulated impairment losses</b>		
Balances at beginning of year	<b>302,979,372</b>	320,442,728
Impairment loss (reversal) (Note 5)	<b>594,171</b>	(17,463,356)
Balances at end of year	<b>303,573,543</b>	302,979,372
	<b>₱311,883,011</b>	₱115,806,924

Details of deferred oil exploration costs as of December 31 follow:

	2022	2021
<b>Cost</b>		
Gabonese Oil Concessions (Note 11)	<b>₱547,199,509</b>	₱387,776,223
SC. No. 75 – Offshore Northwest Palawan	<b>65,175,859</b>	28,381,074
SC. No. 14 – C2 (West Linapacan) - Northwest Palawan (Note 11)	<b>3,081,186</b>	2,628,999
	<b>615,456,554</b>	418,786,296
<b>Accumulated impairment losses</b>		
Gabonese Oil Concessions (Note 11)	<b>300,492,357</b>	300,492,357
SC. No. 14 – C2 (West Linapacan) – Northwest Palawan (Note 11)	<b>3,081,186</b>	2,487,015
	<b>303,573,543</b>	302,979,372
	<b>₱311,883,011</b>	₱115,806,924

### Philippine Oil Operations – Development Phase

Under the SCs entered into with the DOE covering certain petroleum contract areas in various locations in the Philippines, the participating oil companies (collectively known as “Contractors”) are obliged to provide, at their sole risk, the services, technology and financing necessary in the performance of their obligations under these contracts. The Contractors are also obliged to spend specified amounts indicated in the contract in direct proportion to their work obligations.

However, if the Contractors fail to comply with their work obligations, they shall pay to the government the amount they should have spent, but did not, in direct proportion to their work obligations. The participating companies have Operating Agreements among themselves which govern their rights and obligations under these contracts.

The full recovery of these deferred costs is dependent upon the discovery of oil in commercial quantities from any of the petroleum concessions and the success of future development thereof.

As of December 31, 2022 and 2021, the remaining participating interest of the Parent Company in Petroleum SC areas is SC 75 – Offshore Northwest Palawan wherein the Parent Company has 15% interest.

***SC 75 – Offshore Northwest Palawan***

Service Contract 75 (SC 75) was signed on December 27, 2013 with partners PXP Energy Corporation (PXP energy) [50%] and PNOG-Exploration Corporation (35%). The block covers the West Philippine Sea with an area of 616,000 hectares.

On October 14, 2020, the DOE issued a formal notice to the SC 75 consortium, lifting the Force Majeure imposed since September 2015. Through this letter, the consortium was notified to resume its Work Program commitments under SC 75, including the committed ~1,000 sq.km 3D seismic survey over the identified leads in SC 75.

On January 6, 2022, the SC 75 consortium officially engaged Shearwater Geoservices Ltd. For the ~1,100 sq.km 3D seismic survey over SC 75 using the M/V Geo Coral seismic vessel. However, the programmed 3D seismic acquisition campaign was suspended on April 6, 2022 after Operator PXP Energy received a written directive from the DOE to put all exploration activities on hold until the Security, Justice and Peace Coordinating Cluster (SJPC) issues the necessary clearance to proceed. On April 11, 2022, PXP declared a Force Majeure event over the suspended seismic survey.

The SC 75 consortium is awaiting further instructions from the DOE, while all contracted vessels and personnel for the seismic survey have since demobilized from the SC 75 area.

***SC 6A – Octon-Malajon Block***

This is one of the first exploration areas in offshore Palawan. It includes about 165,000 hectares of relatively shallow water areas where a string of wells has found non-commercial oil accumulations in varied reservoir horizons. DOE granted in June 2009 the final 15-year extension of the SC-6A service contract.

In 2019, consortium operator Philodrill completed seismic interpretation and mapping works for the northern portion of the Octon-Malajon block, using recent and old SC 6A seismic data and subsurface data from the adjacent Galoc

In 2020, Philodrill engaged Dubai-based consultants LMKR to conduct Quantitative Interpretation (QI) works to determine possible drilling opportunities in the northern portion of the block (Malajon field); the results of which were provided to the consortium in January 2021.

In March 31, 2021, Philodrill gave notice to the DOE that the Joint Venture has elected not to enter the 12<sup>th</sup> year of the final 15-year term of SC 61 and consequently surrender the Service Contract. The limited term remaining in the SC 6-A until its expiry in February 2024 exacerbated by the Covid-19 situation, greatly hampered the timely execution of the programs that the Joint Venture envisage undertaking to pursue appraisal programs and potential development opportunities in the area. Following the above, as of December 31, 2021, the Group has written-off the ₱159.298 million deferred cost.

The DOE formally approved the relinquishment of SC 6-A on September 5, 2022.

PERC held a 16.667% participating interest in SC 6-A.

### 13. Investments in Joint Venture

#### **PetroWind Energy Inc.**

The investment in joint venture mainly includes PetroGreen's 40% interest in PetroWind or PWEI, a company incorporated in the Philippines. The primary purpose of PetroWind is to carry on the general business of generating, transmitting and/or distributing power derived from renewable energy sources.

The movements in the carrying value of Investment in PetroWind as of December 31 follow:

	2022	2021
Balance at beginning of year	<b>₱1,734,947,347</b>	₱1,635,213,444
Share in net income of a joint venture	<b>81,512,921</b>	100,127,158
Additional investment during the year	<b>59,041,563</b>	-
Share in other comprehensive income (loss)	<b>761,152</b>	(393,255)
Balance at end of year	<b>₱1,876,262,983</b>	₱1,734,947,347

The cost of the investment in PetroWind amounted to ₱632.12 million and ₱573.08 million as of December 31, 2022 and 2021, respectively.

The carrying value of the investment in PetroWind is equivalent to the Group's 40% share in PetroWind's equity, plus the fair value adjustment of ₱764.49 million recognized when the Group lost control over PetroWind in 2014.

Selected financial information of PetroWind as of December 31 follows:

	2022	2021
Current assets	<b>₱734,099,328</b>	₱593,725,081
Noncurrent assets	<b>3,642,274,467</b>	3,650,831,936
Current liabilities	<b>(340,675,980)</b>	(320,971,396)
Noncurrent liabilities	<b>(1,321,010,473)</b>	(1,562,187,361)
Equity	<b>₱2,714,687,342</b>	₱2,361,398,260

Summary of statements of comprehensive income of PetroWind for the years ended December 31 follows:

	2022	2021	2020
Revenue (electricity sales and other income)	<b>₱735,294,265</b>	₱771,620,028	₱814,551,799
Cost and expenses	<b>(518,807,350)</b>	(523,143,700)	(537,899,312)
Income before tax	<b>216,486,915</b>	248,476,328	276,652,487
Tax benefit (provision)	<b>(12,704,614)</b>	1,841,567	1,513,469
Net income	<b>203,782,301</b>	250,317,895	₱278,165,956
Group's share in net income	<b>₱81,512,921</b>	₱100,127,158	₱111,266,383
Other comprehensive income (loss)	<b>₱1,902,881</b>	(₱983,137)	₱536,894
Group's share other comprehensive income (loss)	<b>₱761,152</b>	(₱393,255)	₱214,758

*Nabas Wind Power Project (NWPP)*

*Wind Energy Service Contract (WESC) No. 2009-09-002*

The service contract for the Nabas Wind Power Project (NWPP) covers 2,000 hectares of public and private lands in rolling terrain located near the northwestern tip of Panay Island. It lies about 6 km southeast of Caticlan, and electricity-deficient Panay and Boracay islands are natural markets of future power from NWPP.

It was decided that the NWPP will be constructed in two phases: Phase 1 for the existing 36 MW NWPP-1, consisting of 18 Wind Turbine Generators (WTG); while Phase 2 will be a 14 MW development that will have seven (7) WTGs (NWPP-2).

On May 26, 2013, the DOE issued the Confirmation of Commerciality for the 36 MW NWPP-1, making it the third WESC to be declared commercially feasible. Construction of NWPP-1 started in December 2013 and was completed in the first half of 2015.

On June 16, 2015, the DOE released the COE for FIT Eligibility (COE-FIT), endorsing the official start of commercial operation to be June 10, 2015. On August 17, 2015, the ERC approved PWEI's COC for NWPP-1. This confirms the commercial operations date of the wind farm to be June 10, 2015.

The annual total energy exported to the grid were 80.80 GWh, 91.31 GWh and 80.45 GWh in 2022, 2021, and 2020, respectively.

On May 13, 2020, the DOE formally awarded to PetroWind the Certificate of Confirmation of Commerciality (COCOC) for the planned 14-MW Nabas-2 Wind Power Project (NWPP-2). This signifies that NWPP-2 has been approved for construction as being commercially feasible.

In February 17, 2021, the DENR-EMB Region 6 issued the amended Environmental Compliance Certificate (ECC) to PetroWind for NWPP-2, while the Forest Land Use Agreement (FLAg) has been signed by the DENR Central Office in January 4, 2022.

On June 24, 2022, PWEI's NWPP-2 was formally announced as the winning bidder for the 20-MW Visayas wind allocation of the DOE's Green Energy Auction Program (GEAP), for a 20-year offtake term. On September 28, 2022, the DOE issued to PWEI its Certificate of Award for the GEAP wind allocation.

PWEI awarded to VESTAS the WTG Supply, Supervision, and Services Agreements on December 13, 2022 and VESTAS is set to deliver the six (6) NWPP-2 WTGs by the last week of July 2023. On the other hand, PWEI also awarded and issued the Notice to Proceed (NTP) to EEI Corporation for the contract on the Main Balance of Plant (BoP) for the Civil, Electrical (Substation and Switching Station, and Electrical Feeder Lines), including WTG Electro-Mechanical Works installation. Further, the Special Agreement for Protected Areas (SAPA) was signed by DENR in January 2023. It is the tenurial instrument that gives authority to PWEI to develop NWPP-2 in the approved area for at least 25 years.

**BuhaWind Energy**

In 2022, the Company made investments totalling ₱1.26 million in three newly incorporated special purpose vehicles namely: BuhaWind Energy Northern Luzon Corporation, BuhaWind Energy Northern Mindoro Corporation and BuhaWind Energy East Panay Corporation.

In 2021, PGEC secured three (3) new Wind Energy Service Contracts (WESC) from the DOE covering three (3) offshore wind blocks, namely 1) Northern Luzon Offshore Wind Power Project (located offshore Ilocos Norte) with WESC No. 2021-05-156, 2) Northern Mindoro Offshore Wind Power Project (located offshore Occidental Mindoro) with WESC No. 2021-06-160, and 3) Easy Panay Offshore Wind Power Project (located offshore Iloilo) with WESC No. 2021-10-183. These projects will be developed by PGEC alongside Danish energy firm Copenhagen Energy A/S (CE) through these entities that were incorporated in November 2022.

On December 28, 2021, the DOE issued to PGEC its formal endorsements for NGCP's conduct of the System Impact Studies (SIS) for the three (3) offshore wind blocks. The early issuance will help both DOE and NGCP to plan their grid improvements to accommodate large-scale capacities from these offshore wind projects. PGEC also secured DOE Endorsement to Local Government Units / National Government Agencies for the Northern Luzon project in January 2022.

Throughout 2022, PGEC and CE proceeded with several feasibility studies for the three (3) offshore wind blocks, namely 1) desktop wind and met-ocean resource studies, 2) power market study, and 3) desktop site characterization studies in preparation for detailed geophysical and geotechnical studies.

Specifically for the Northern Luzon block, PGEC and CE commenced with additional pre-development studies, namely 1) initial environmental pre-scoping study, 2) SIS application with NGCP, and 3) initial discussions with contractors for on-site wind measurement campaign.

As of December 31, 2022, these entities are still in the organization stage and have not yet started its operations.

---

#### 14. Leases

The Group entered into lease contracts for office spaces and land used as geothermal field and photovoltaic (PV) solar power facility. The office space lease agreements are for a period of two (2) years and are renewable by mutual agreement of both parties.

The land lease agreement (LLA) with NPC and PSALM for the geothermal field in Sto. Tomas, Batangas has a lease term of twenty-five (25) years, extendable for another 25 years upon mutual agreement of both parties.

The two lease agreements with Luisita Industrial Park Corporation (LIPCO) for land used for the photovoltaic solar power facility in Ta rlac is for a period of 25 years, renewable by mutual agreement of both parties, generally under the same terms and conditions, with escalation clause of 3% every 2 years.

The Group's obligations under these leases are secured by the lessor's title to the leased assets. The Group is restricted from assigning and subleasing the leased assets.

The Group applies the 'short-term lease' and 'lease of low-value assets' recognition exemptions for all other leases, including leases of vehicles and parking slots.

The rollforward analyses of right-of-use assets follow:

	2022		
	Land	Office Spaces	Total
<b>Cost</b>			
Beginning balance	<b>₱420,180,224</b>	<b>₱9,736,694</b>	<b>₱429,916,918</b>

	<b>₱56,185,795</b>	₱61,092,705	₱59,847,109

Shown below is the maturity analysis of the undiscounted lease payments as of December 31:

	2022	2021
Within one year	<b>₱34,737,976</b>	₱35,854,570
After one year but not more than five years	<b>142,460,919</b>	140,721,525
More than five years but less than 10 years	<b>511,293,446</b>	547,770,816
	<b>₱688,492,341</b>	₱724,346,911

## 15. Investment Properties

As of December 31, 2022 and 2021, this account consists of land and parking lot space (located in Tektite) with cost amounting to ₱1.61 million.

The fair value of the investment properties of the Group is between ₱1 million to ₱1.70 million as of December 31, 2022 and 2021. The Group determined the fair values of the Group's investment properties on the basis of recent sales of similar properties in the same areas as the investment properties and taking into account the economic conditions prevailing at the time the valuations were made.

As of December 31, 2022 and 2021, the fair value of the investment properties is classified under the Level 3 category.

Except for insignificant amounts of real property taxes on the investment properties, no other expenses were incurred, and no income was earned in relation to the investment properties in 2022, 2021 and 2020.

## 16. Other Noncurrent Assets

	2022	2021
Input VAT	<b>₱148,710,625</b>	₱144,308,592
Intangible assets	<b>140,262,493</b>	152,727,719
Deferred development costs	<b>74,115,084</b>	19,337,621
Advances to contractors	<b>45,777,526</b>	–
Restricted cash	<b>31,451,424</b>	44,183,568
Others	<b>25,956,475</b>	18,709,341
	<b>466,273,627</b>	379,266,841
Less allowance for probable losses (Note 24)	<b>10,390,845</b>	10,390,845
	<b>₱455,882,782</b>	₱368,875,996

Provision for probable losses on input VAT amounted to nil in 2022, ₱3.76 million in 2021 and ₱4.97 million in 2020. In 2022, the Group directly written-off input VAT amounting to ₱6.11 million (Note 24).

### *Input VAT*

Input VAT represents VAT passed on from purchases of goods and services that can be claimed against any future liability to the BIR for output VAT from sale of goods and services.

Input VAT also includes outstanding input VAT claims that were applied by MGI for refund with the BIR. As of December 31, 2022 and 2021, the outstanding input VAT claims which are still pending with the CTA and SC amounted to ₱123.74 million and ₱126.96 million, respectively.

*Intangible assets*

Intangible assets pertain to land rights, which refers to grant of easement of right of way entered by PetroSolar to construct, operate, maintain, repair, replace and remove poles, wire, cables, apparatus, and equipment and such other apparatus and structures needed for the transmission line. This also includes production license and software for accounting and for geological interpretation of Gabon Etame oil fields.

	2022

	<b>₱ 13,212,651</b>	<b>₱14,665,276</b>	<b>₱17,318,454</b>

*Advances to contractors*

Advances to contractors pertain to the downpayments to various contractors for the purchase of materials and equipment.

*Restricted cash*

This pertains to the Parent Company's share in the non-current portion of escrow fund for the abandonment of the Etame Marine Permit.

*Deferred development costs*

These pertains to costs incurred in the exploration, development, production and expansion of renewable energy projects.

	<b>2022</b>	2021
Balances at beginning of year	<b>₱19,337,621</b>	₱3,855,595
Additions	<b>52,769,183</b>	15,482,026
Write-offs	<b>2,008,280</b>	-
Balances at end of year	<b>₱74,115,084</b>	₱19,337,621

*Others*

Other noncurrent assets pertain to noncurrent portion of prepaid insurance, security deposits, advances to contractors and lot owners and balance of MERALCO account billing deposits.

---

**17. Accounts Payable and Accrued Expenses**

	<b>2022</b>	2021
Accounts payable	<b>₱263,327,290</b>	₱88,644,203
Accrued expenses		
Utilities	<b>167,881,381</b>	166,352,071
Interest (Note 18)	<b>32,622,802</b>	41,463,079

Less current portion – net of unamortized deferred financing cost	<b>947,144,643</b>	827,882,504
Noncurrent portion	<b>₱2,530,784,409</b>	₱3,234,642,692

### *PetroEnergy's short-term loans payable*

PetroEnergy entered into unsecured loan agreements to finance its investments in Renewable Energy Projects.

#### Omnibus Credit Line Agreement (OCLA) with the Development Bank of the Philippines (DBP)

On April 27, 2015, the Parent Company entered into an OCLA with DBP which provides a credit facility in the principal amount not exceeding ₱420.00 million. Effective January 19, 2021, the credit facility was decreased to ₱300.00 million. Loans payable to DBP are as follows:

As of December 31, 2022:

- ₱63 million with interest rate of 5.8% and maturity on January 10, 2023
- ₱108 million with interest rate of 5.5% and maturity on January 26, 2023
- ₱80 million with interest rate of 5.8% and maturity on June 23, 2023

As of December 31, 2021:

- ₱70 million with interest rate of 5.25% and maturity on May 6, 2022.

#### Short-term Loan with Rizal Commercial Banking Corporation (RCBC)

In 2020, the Parent Company obtained a clean loan from RCBC amounting to ₱150.00 million with interest rate of 4.5% and maturity on November 15, 2021.

On November 15, 2021, PetroEnergy obtained a loan from RCBC amounting to ₱120.00 million with interest of 4.5% and maturity on May 4, 2022.

As of December 31, 2022, the Company has already paid the outstanding short-term loan from RCBC.

Interest expense related to these loans amounted to ₱9.68 million, ₱11.98 million and ₱17.02 million in 2022, 2021 and 2020, respectively. Accrued interest payable amounted to ₱0.56 million and ₱1.21 million as of December 31, 2022 and 2021, respectively (see Note 16).

### *PetroGreen's long-term loans payable*

#### Credit Line Facility with Chinabank

On November 17, 2015, PetroGreen entered into a 5-year credit line facility with Chinabank amounting to ₱500.00 million, subject to repricing on the third anniversary. On the same date, ₱400.00 million out of the total loan facility were drawn by PetroGreen. The loan has an annual interest rate of 5.24% and has no collateral.

The loan is payable every 17<sup>th</sup> of May and November beginning on May 2017. The agreement further specifies that 96.50% of the aggregate principal amount shall be paid on the due date of the loan.

On November 29, 2016, PetroGreen has drawn an additional ₱30.00 million out of the total loan facility. The additional loan from Chinabank has an annual interest rate of 5.33%.

On November 17, 2018, the ₱400.00 million and ₱30.00 million long-term loans payable with interest rate of 5.24% and 5.33%, respectively, were repriced to 8.28% and 8.47%.

In 2019, PetroGreen negotiated for the reduction in the interest rates of the aforementioned loans from 8.28% and 8.47% to 7.14% for both loans. The reduced interest rate was approved by the bank and made effective starting September 19, 2019. This amendment did not result to an extinguishment of the loan.

On November 17, 2020, PetroGreen fully paid the outstanding loans from ChinaBank.

#### Long-term loan with RCBC

On November 16, 2020, PetroGreen obtained a new long-term unsecured loan with RCBC amounting to ₱400.00 million. The loan bears interest at a fixed rate of 4.74% payable semi-annually. The principal amount is payable in five equal annual installments starting November 11, 2021.

As of December 31, 2022 and 2021, the outstanding balance of these loans, net of unamortized deferred financing costs, amounted to ₱239.16 million and ₱318.61 million, respectively.

Interest expense of PetroGreen related to these loans amounted to ₱16.24 million, ₱20.40 million and, ₱31.8 million in 2022, 2021 and 2020, respectively. Accrued interest payable amounted to ₱1.27 million and ₱1.70 million as of December 31, 2022 and 2021, respectively (see Note 14).

#### ***MGI's long-term loans payable***

##### Project Loan Facility Agreements with RCBC

On May 19, 2016, MGI, together with PetroGreen, PHINMA and PNOC RC executed the Project Loan Facility Agreement with RCBC for a ₱1,400.00 million project loan to finance the design, development and construction of MGPP-2 or M2.

On September 5, 2016, MGI, together with PetroGreen, PHINMA and PNOC RC executed another Project Loan Facility Agreement with RCBC for a ₱2,100.00 million project loan to finance the design, development and construction of MGPP-1 or M1. This was done to consolidate the outstanding principal of the term loan under the 2011 OLSA with RCBC and BPI, incidental costs, general corporate expenditures and working capital requirement.

##### a. MGPP-1 or M1 new Loan

The new MGPP-1 or M1 loan amounting to ₱2,100.00 million has a term of ten (10) years from the drawdown date of October 10, 2016. Interest and principal are payable semi-annually. Interest payment started on October 12, 2016, while the twenty (20) semi-annual principal payments started on April 12, 2017.

Interest rate is fixed for the first five (5) years from drawdown date, based on the sum of the prevailing 5-year fixed benchmark rate on the pricing date and the margin of 1.75% (the "Initial Interest Rate"). On the repricing date, the interest for the remaining five (5)-year term of the loan will be the higher of (i) the sum of then prevailing 5-year fixed benchmark rate plus the margin of 1.75%, or (ii) the initial interest rate.

As of December 31, 2022 and 2021, the outstanding balance of this loan amounted to ₱1,034.90 million and ₱1,226.17 million, respectively. Interest expense recognized from the new M1 Loan amounted to ₱71.52 million, ₱82.86 million, ₱94.05 million in 2022, 2021 and 2020, respectively.

b. MGPP-2 or M2 Expansion Loan

The MGPP-2 or M2 Expansion Loan amounting to ₱1,400.00 million has a term of twelve (12) years including thirty-six (36) months grace period from initial drawdown date of June 2, 2016. Interest and principal are payable semi-annually. Interest payment started on October 12, 2016, while the eighteen (18) semi-annual principal payments started on October 12, 2019.

Interest rate is fixed for the first seven (7) years from the initial drawdown date based on the sum of the prevailing 7-year fixed benchmark rate on the pricing date and the applicable margin of (1) 2.25% per annum prior to commercial operations date, or (2) 1.75% per annum from and after the Commercial Operations Date (the “Initial Interest Rate”). For subsequent drawdowns, interest rate will be the three (3) –day simple average interpolated rate based on the remaining tenor and computed using the straight-line method. On the repricing date, the interest for the remaining five (5)-year term of the loan will be the higher of (i) the sum of the then prevailing 5-Year fixed benchmark rate plus the applicable margin, or (ii) the weighted average interest rate during the first seven (7) years of the loan.

As of December 31, 2022 and 2021, the outstanding balance of this loan amounted to ₱943.84 million and ₱1,097.14 million respectively. Interest expense amounted to ₱75.00 million, ₱83.46 million and ₱92.71 million in 2022, 2021 and 2020 respectively.

Accrued interest payable of MGI’s loans amounted to ₱22.89 million and ₱31.66 million and as of December 31, 2022 and 2021, respectively (see Note 16).

The loan covenants covering the outstanding debt of MGI include, among others, the following conditions: maintenance at all times of Debt-to-Equity (DE) Ratio of not greater than 70:30, Default Debt Service Coverage Ratio (DSCR) of at least 1.10x both until full payment of the Loans, and Dividend DSCR of at least 1.20x. MGI is also required to transfer in the DSPA equivalent to one-sixth (1/6) of the amount sufficient to pay for the forthcoming debt service scheduled in April and October of every year until the loan is fully paid off (see Note 9). As of December 31, 2022 and 2021, MGI has been compliant with the above conditions.

***PetroSolar’s long-term loans payable***

On November 12, 2015, the PetroSolar, together with PetroGreen and EEIPC, as third party mortgagors and pledgors, entered into a ₱2,600.00 million OLSA with PNB and DBP specifically to partially finance the design, development, procurement, construction, operation and maintenance of its TSPP.

PetroSolar shall fully pay the loan for the pro-rata account of each lender within twelve (12) years from and after the date of the initial drawdown. Interest and principal are payable semi-annually. Interest payment started on May 27, 2016, while the twenty-two (22) semi-annual principal payments started on November 27, 2016.

The rate of the interest applicable to the facility or the relevant part thereof for each interest period shall be fixed for the first seven periods (7) from the initial drawdown date (the Initial Interest Rate). Prior to the FIT entitlement and collection of FIT revenues of the borrower, the rate shall be the higher of: (i) the aggregate of the seven (7) year PDST-R2 and the initial credit spread of 2.25%, or (ii) the minimum interest rate of 5.75%. Upon FIT entitlement of at least 40MW and collection of FIT revenues by the borrower equivalent to an aggregate of at least ₱473.00 million within a period not exceeding twelve (12) consecutive months, the rate shall be the higher of (i) the weighted average interest rate in

previous drawdowns less the step down credit spread of 0.25%, or (ii) minimum interest rate, and which interest rate shall be applied beginning the following month immediately succeeding the month wherein the aforesaid FIT entitlement and FIT revenue collection thresholds were satisfied. PetroSolar met the criteria for FIT entitlement and aggregate collection of at least ₱473 million within 12 months which resulted to a lower interest rate effective July 2017. The applicable interest rate as of December 31, 2022 and 2021 is equal to 9.12% and 6.71%, respectively.

The loan covenants covering the outstanding debt of PetroSolar include, among others, maintenance of debt-to-equity ratio of 75:25 and establishment of DSPA required balance (see Note 7). As of December 31, 2022 and 2021, PetroSolar is in compliance with the said loan covenants.

As of December 31, 2022 and 2021, the outstanding balance of this loan amounted to ₱1,007.42 million and ₱1,228.64 million, respectively.

Interest expense of PetroSolar related to the loans amounted to ₱89.81 million, ₱104.23 million and ₱120.94 million in 2022, 2021 and 2020, respectively. Accrued interest payable amounted to ₱7.89 million and ₱6.90 million as of December 31, 2022 and 2021, respectively (see Note 16).

PetroSolar mortgaged all of its property and equipment related to TSPP-1 as collateral in connection with the loan (see Note 11).

#### *Deferred financing costs*

Deferred financing costs are incidental costs incurred in obtaining the loan which includes documentary stamp tax, transfer tax, chattel mortgage, real estate mortgage, professional fees, arranger's fee and other costs directly attributable in obtaining the loan. The balance of unamortized deferred financing costs is presented as a deduction from the loans payable account and is amortized over the term of the loan using the effective interest rate method.

Details of the Groups' unamortized deferred financing costs follow:

	2022	2021
Balance at beginning of year	<b>₱20,771,233</b>	₱40,766,823
Less amortization during the year	<b>(10,324,645)</b>	(19,995,590)
Balance at end of year	<b>₱10,446,588</b>	₱20,771,233

## 19. Asset Retirement Obligation

The Group has recognized its share in the abandonment costs associated with the Etame, Avouma and Ebouri oilfields located in Gabon, West Africa, geothermal field located in Sto. Tomas Batangas, and photovoltaic (PV) solar power facility in Tarlac.

Movements in this account follow:

	2022	2021
Balance at beginning of year	<b>₱92,810,843</b>	₱109,159,679
Additions	<b>921,276</b>	-
Change in estimates (Note 11)	<b>(37,729,203)</b>	(23,533,406)
Accretion expense	<b>3,622,334</b>	3,478,294
Foreign exchange adjustment	<b>6,605,080</b>	3,706,276
Balance at end of year	<b>₱66,230,330</b>	₱92,810,843

Discount rates ranging from 7.13% to 7.16% as of December 31, 2022 and 4.59% to 5.05% as of December 31, 2021 were used in estimating the provisions (see Note 5).

## 20. Equity

Under the existing laws of the Republic of the Philippines, at least 60% of the Parent Company's issued capital stock should be owned by citizens of the Philippines for the Parent Company to own and hold any mining, petroleum or renewable energy contract area. As of December 31, 2022, the total issued and subscribed capital stock of the Parent Company is 99.77% Filipino and 23% non-Filipino as compared to 99.83% Filipino and 0.17% non-Filipino as of December 31, 2021.

As of December 31, 2022 and 2021, paid-up capital consists of:

Capital stock – ₱1 par value	
Authorized – 700,000,000 shares	
Issued and outstanding	₱568,711,842
Additional paid-in capital	2,156,679,049
	₱2,725,390,891

The Group's track record of capital stock follows:

	Number of shares registered	Issue/offer price	Date of SEC approval	Number of holders as of year-end

On July 26, 2017, at the BOD meeting, the Parent Company was authorized to raise approximately one billion pesos (₱1,000,000,000) in capital, by offering and issuing to all eligible stockholders as of record date, the rights to subscribe up to all of the existing unissued common shares of the Parent Company (“Stock Rights Offer”).

On September 29, 2017, the Parent Company filed its application for the listing and trading of rights shares with the PSE. On December 13, 2017, the PSE approved the application to list the Rights Shares.

The rights offer entitled eligible stockholders as of record date of January 12, 2018 to subscribe to one rights share for every 2.6 shares held at an offer price of ₱4.80 per share.

The rights offer was undertaken on January 22 to 26, 2018. Following the close of the offer period, the Parent Company successfully completed the stock rights offer for 157,975,512 common shares with gross proceeds of ₱758.28 million and was subsequently listed on the PSE on February 2, 2018.

The proceeds from the stock rights offer were used for the development and expansion plans of the Group’s renewable energy projects, general corporate requirements, and payments of loans and the related interest.

#### *Cumulative Translation Adjustment*

In 2018, because of the change in business circumstances of the Parent Company, management changed its functional currency from United States Dollar (USD) to PHP effective January 31, 2018. All resulting exchange differences in the remeasurement of USD balances to PHP balances were recognized as ‘Cumulative Translation Adjustment’.

#### *Equity Reserve*

On June 9, 2015, PetroEnergy sold its 10% interest in PetroGreen to EEIPC, bringing its ownership in PetroGreen from 100% to 90%. The transaction was accounted as an equity transaction since there was no change in control.

The effect of change in the ownership interest in PetroGreen on the equity attributable to owners of PetroEnergy as a result of the sale of 10% to EEI is summarized as follows:

Consideration received from NCI	₱206,000,000
Carrying amount of NCI sold	(125,950,762)
<u>Excess of consideration received recognized in equity</u>	<u>₱80,049,238</u>

On October 14, 2022, PetroGreen issued 363,244,840 shares to Kyuden (Note 30) resulting to the decrease in the ownership interest of PetroEnergy in PetroGreen from 90% to 76.92%. The transaction was accounted as an equity transaction since there was no loss of control.

The effect of change in the ownership interest in PetroGreen on the equity attributable to owners of PetroEnergy is summarized as follows:

Consideration received from NCI	₱1,687,431,477
Carrying amount of NCI sold	(1,030,763,729)
<u>Excess of consideration received recognized in equity</u>	<u>₱656,667,748</u>

As of December 31, 2022 and 2021, the balance of equity reserve account amounts to ₱736.71 million and ₱80.05 million, respectively.

*Deposit for Stock Subscription*

This account amounting to ₱1.63 billion as of December 31, 2022, represents the amount received from Kyuden under escrow fund (see Note 7) that will be applied as payment for a fixed number of PGEC's shares of stock. In January 2023, the Group classified the deposit for stock subscription into NCI and Equity Reserve (excess of consideration over carrying value of NCI sold) under equity after the NCI, which is Kyuden, acquired the additional ownership interest through completion of all the requirements in the subscription agreement (see Note 30). The deposit for future stock subscription is considered a non-cash financing activity.

*Capital Management*

The primary objective of the Group's capital management is to ensure that it maintains a strong credit rating and healthy capital ratios in order to support its business and maximize shareholders' value.

The Group manages its capital structure and makes adjustments to it, in light of changes in economic conditions. To maintain or adjust the capital structure, the Group may increase its debt from creditors, adjust the dividend payment to shareholders or issue new shares.

As of December 31, 2022 and 2021, the Group monitors capital using a debt-to-equity ratio, which is total liabilities divided by total equity.

The Group's sources of capital as of December 31 are as follows:

	2022	2021
Loans payable	<b>₱3,477,929,052</b>	₱4,062,525,195
Capital stock	<b>568,711,842</b>	568,711,842
Additional paid-in capital	<b>2,156,679,049</b>	2,156,679,049
Retained earnings	<b>3,182,613,298</b>	2,662,525,652
Equity reserve	<b>736,716,986</b>	80,049,238
	<b>₱10,122,650,227</b>	₱9,530,490,976

The table below demonstrates the debt-to-equity ratio of the Group as of December 31:

	2022	2021
Total liabilities	<b>₱4,442,489,721</b>	₱4,901,378,616
Total equity	<b>12,377,322,378</b>	8,313,814,660
Debt-to-equity ratio	<b>0.36:1</b>	0.59:1

Based on the Group's assessment, the capital management objectives were met in 2022 and 2021.

---

**21. Income Taxes**

The provision for (benefit from) income tax consists of:

	2022	2021	2020
Current	<b>₱39,621,178</b>	₱61,593,316	₱35,668,914
Deferred	<b>(1,028,286)</b>	(7,112,682)	6,192,798
	<b>₱38,592,892</b>	₱54,480,634	₱41,861,712

The components of the Group's net deferred tax assets (liabilities) are as follows:

	2022	2021
Deferred income tax assets on:		
Asset retirement obligation	<b>₱15,866,420</b>	₱13,251,358
Accrued retirement liability	<b>354,528</b>	1,994,896
Interest on FIT adjustment	<b>2,096,435</b>	1,331,211
Past service cost and provision	<b>805,369</b>	-
	<b>19,122,752</b>	16,577,465
Deferred income tax liabilities on:		
Oil production revenue	<b>(3,609,298)</b>	(3,154,170)
Unrealized foreign exchange gain	<b>(2,019,574)</b>	(963,028)
Net retirement asset	<b>(2,565,951)</b>	-
	<b>(8,194,823)</b>	(4,117,198)
Deferred income tax assets - net	<b>₱10,927,929</b>	₱12,460,267

As of December 31, 2022 and 2021, the Group did not recognize deferred tax assets on NOLCO, MCIT and allowance for impairment losses, with details as follow as of December 31.

	2022	2021
Allowance for impairment loss	<b>₱207,243,532</b>	₱144,403,009
NOLCO	<b>165,677,258</b>	377,080,656
MCIT	<b>6,040,694</b>	4,884,684
	<b>₱378,961,484</b>	₱526,368,349

As of December 31, 2022 and 2021, the Group did not recognize deferred tax assets on the above as the Group believes that it may not be probable that sufficient taxable income will be available in the near foreseeable future, prior to their expiration, against which the tax benefits can be realized.

Details of the NOLCO and MCIT follow:

	NOLCO		MCIT	
	2022	2021	2022	2021
Beginning balance	<b>₱377,080,656</b>	₱311,510,414	<b>₱4,864,684</b>	₱5,655,412

		<b>₱165,677,258</b>	₱377,080,656		<b>₱6,040,694</b>	₱4,884,684

On September 30, 2020, the BIR issued Revenue Regulations No. 25-2020 implementing Section 4 of “Bayanihan to Recover As One Act” which states that the NOLCO incurred for taxable years 2020 and 2021 can be carried over and claimed as a deduction from gross income for the next five (5) consecutive taxable years immediately following the year of such loss.

The taxable income of the Parent Company is subject to regular income tax rate.

On January 30, 2009, RA No. 9513, *An Act Promoting the Development, Utilization and Commercialization of Renewable Energy Resources and for Other Purposes*, known as the “Renewable Energy Act of 2008” (the Act), became effective. As provided for in the Act, RE developers of RE facilities, including hybrid systems, in proportion to and to the extent of the RE component, for both power and non-power applications, as duly certified by the DOE, in consultation with the BOI, shall pay a corporate tax of ten percent (10%) on its net taxable income as defined in the National Internal Revenue Code of 1997, after the seven (7) years of Income Tax Holiday (ITH), which commences from the first year of operations. MGI started its commercial operations on February 8, 2014 and April 30, 2018 for its BOI registered projects MGPP-1 and MGPP-2, respectively. Taxable income generated from MGPP-1 beginning February 8, 2021 is now subject to corporate tax of 10%. While taxable income from MGPP-2 for 2022 and 2021 is under ITH.

For PetroSolar, on July 28, 2015, the PSC registered with PEZA as an Economic Zone Utilities Enterprise to establish, operate and maintain its 50MW Solar Facility project at the Central Technopark and the sale of electricity in accordance with the representations, commitments and proposals set forth in its application.

PetroSolar shall pay the special tax rate of 5% on its gross income earned from sources within the PEZA economic zone in lieu of paying all national and local income taxes. Gross income earned refers to gross sales derived from any business activity, net of returns, discounts and allowances, less cost of sales, cost of production and allowable expenses as defined by PEZA. Income generated by TSPP-1 from sources outside of PEZA economic zone shall be subject to RCIT.

On January 30, 2009, Republic Act No. 9513, *An Act Promoting the Development, Utilization and Commercialization of Renewable Energy Resources and for Other Purposes*, known as the “Renewable Energy Act of 2008” (the Act), became effective. As provided for in the Act, Renewable Energy (RE) developers of RE facilities, including hybrid systems, in proportion to and to the extent of the RE component, for both power and non-power applications, as duly certified by the DOE, in consultation with the Board of Investments, shall pay a corporate tax of ten percent (10%) on its net taxable income as defined in the National Internal Revenue Code of 1997, after the seven (7) years of Income Tax Holiday (ITH), which commences from the first year of commercial operations.

On December 16, 2021, the Energy Regulatory Commission issued TSPP-2’s Provisional Authority to Operate (PAO) pending the ERC’s approval of the Certificate of Compliance (COC). Due to the receipt of PAO, TSPP-2 is now entitled to ITH incentive.

The reconciliation of the statutory tax rate to the effective income tax rate shown in the consolidated statements of income follows:

	<b>2022</b>	2021	2020
Statutory tax rate	<b>25.00%</b>	25.00%	30.00%
Add (deduct) reconciling items:			
Income from entities subjected to lower rate	<b>(13.96)</b>	(29.14)	(31.51)
Nondeductible expenses	<b>(2.17)</b>	0.73	1.05
Movement in unrecognized deferred tax assets	<b>(3.76)</b>	4.54	7.65
Income subjected to final tax	<b>(0.83)</b>	(0.33)	(0.78)
Unrealized loss (gain) on FVTPL	-	(0.01)	(0.03)
Effect or remeasurement of current and deferred income tax arising from change in tax rate due to CREATE Act	-	(0.20)	-
Others	-	6.98	(0.30)
<b>Effective income tax rate</b>	<b>4.28%</b>	7.57%	6.08%

## 22. Cost of Electricity Sales

	<b>2022</b>	2021	2020
Electricity sales:			
Depreciation and amortization (Notes 11, 14 and 16)	<b>₱446,660,175</b>	₱427,818,501	₱422,437,239
Purchased services and utilities	<b>32,057,441</b>	56,297,222	125,158,126
Rental, insurance and taxes	<b>104,970,100</b>	114,032,759	113,001,690
Personnel costs	<b>74,305,149</b>	66,962,387	67,663,684
Repairs and maintenance	<b>32,076,687</b>	34,315,079	29,031,090
Materials and supplies	<b>19,233,303</b>	19,932,253	14,768,942
Business and other related expenses	<b>31,758,703</b>	27,166,918	8,554,125
Government share and royalty fees	<b>11,341,763</b>	14,443,200	13,859,060
	<b>₱752,403,321</b>	₱760,968,319	₱794,473,956

### *Government share*

Under the GRESC No. 2010-02-012, the RE Developer shall pay the government share equivalent to one and a half percent (1.5%) of the gross income. For this purpose, gross income shall include all proceeds resulting from the sale of renewable energy produced and such other income incidental to and arising from renewable energy generation, transmission and sale of electric power generated from geothermal energy within the Contract Area.

### *Energy Regulation No. 1-94 (ER 1-94)*

Based on ER 1-94, all power producer shall set aside one-centavo per kilowatt-hour (₱0.01/kwh) of the total electricity sales of the energy-generating facility which shall be applied to Generation Facilities and/or energy resource development projects located in all barangays, municipalities, cities, provinces and regions. This is included under "Rental, insurance and taxes."

*Cost of Other revenues*

This pertains to the cost of Pass-on charges to ACEN.

	2022	2021	2020
Cost of other revenues:			
Wheeling and Ancillary & Transmission Charges	<b>₱40,128,180</b>	₱61,357,825	₱115,103,302
Trading Costs & Market Fees	<b>87,260,321</b>	-	-
	<b>₱127,388,501</b>	₱61,357,825	₱115,103,302

### 23. Crude Oil Inventory and Oil Production

*Crude Oil Inventory*

Crude oil inventory is stated at NRV at the time of production. Change in crude oil inventory amounting to (₱1.82 million), ₱22.47 million and (₱23.93 million) is included in “Cost of Sales” in the profit or loss in 2022, 2021 and 2020, respectively.

*Cost of Oil Production*

	2022	2021	2020
Production, transportation and other related expenses	<b>₱278,136,016</b>	₱178,665,694	₱154,375,753

	<b>₱221,232,231</b>	<b>₱180,825,547</b>	<b>₱211,402,211</b>

Others, include miscellaneous expenses such as development assistance, notarization, bank charges, and reproduction expenses.

## 25. Miscellaneous Income (Charges)

	2022	2021	2020
Management income and timewriting fees (Note 26)	<b>₱18,199,133</b>	₱13,958,678	₱13,252,890
Sale of carbon emission credits	<b>10,649,201</b>	–	–
Rental income (Note 26)	<b>1,818,027</b>	1,474,996	857,143
Professional fees (Note 26)	<b>610,000</b>	610,000	550,000
Gain on sale of equipment	<b>338,503</b>	588,606	662,857
Dividend income (Note 9)	<b>79,047</b>	38,134	71,770
Trustee fees	<b>(3,441,674)</b>	(3,649,996)	(4,169,361)
Others	<b>1,795,281</b>	5,396,128	651,378
	<b>₱30,047,518</b>	<b>₱18,416,546</b>	<b>₱11,876,677</b>

Trustee fees pertain to payments of the Group to the facility agent and account trustees for the M1 and M2 loans (see Note 18).

## 26. Related Party Transactions

Parties are considered to be related if one party has the ability, directly or indirectly, to control the other party or exercise significant influence over the other party in making financial and operating decisions. Parties are considered to be related if one party has the ability, directly or indirectly, to control the other party in making financial and operating decisions or the parties are subject to common control or common significant influence (referred to as 'Affiliates'). Related parties may be individuals or corporate entities.

Significant transactions with related parties are as follows:

Related Party/Nature	Transactions for the Years Ended December 31		Outstanding Balance Receivables (Payables) (see Notes 8 and 17)		Terms and Conditions
	2022	2021	2022	2021

- PetroEnergy has an Internal Audit Engagement arrangement with House of Investments, Inc. (HI). These are non-interest bearing and are due and demandable.
- PetroGreen charges rental fees to PetroWind amounting to ₱71,429 every month. These are non-interest bearing and payable when due and demandable.
- Timewriting fees are charged by PetroGreen for accounting, legal management and other support services rendered to PetroWind. Management income refers to charges by PetroEnergy to PetroWind. These are non-interest bearing and are due and demandable.
- Advances represent reimbursements of costs and expenses.
- Electricity sales to ACEN (formerly PHINMA) is pursuant to the Electricity Supply Agreement (see Note 34). This is due and payable on the last business day of the month succeeding the billing period and non-interest bearing if paid within the due date.

- f. PetroGreen charged EEI Power Corporation (EEIPC) amounting to ₱550,000 plus VAT representing charges for the equity valuation study.
- g. The Group leased 77 hectares of land area from LIPCO (Note 14). These are non-interest bearing and payable when due and demandable.
- h. On November 12, 2015, PetroSolar entered into a ₱2.6 billion OLSA with PNB and DBP. PetroGreen and EEIPC signed as the third party mortgagors and pledgors (see Note 18).
- i. PetroWind executed an OLSA with DBP for a loan facility amounting to ₱3.0 billion. PetroEnergy signed as guarantor and PetroGreen signed as guarantor, pledgor and third-party mortgagor (see Note 18).
- j. On April 29, 2021, PGEC completed its first commercial and industrial (C&I) rooftop solar power project for the Enrique T. Yuchengco Bldg. in Binondo, Manila.

The building owner E.T. Yuchengco Inc. (ETY) and project owner PGEC signed a 15-year Rent-to-Own Agreement for a 140.8-kWp solar rooftop facility last January 14, 2021. The rental period commenced upon the project's completion in April 2021. After said 15-year cooperation period, PGEC will turn-over the said rooftop solar facility to ETY free of charge.

#### Compensation of Key Management Personnel

The Group has a profit-sharing plan for directors, officers, managers and employees as indicated in its by-laws. The amount, the manner and occasion of distribution is at the discretion of the BOD, provided that profit share shall not exceed 5% of the audited income before income tax and profit share.

The remuneration of the Group's directors and other members of key management are as follows:

	2022	2021	2020
Salaries and wages and other short-term benefits	<b>₱24,751,739</b>	₱20,810,412	₱20,962,298
Directors' fees	<b>8,775,037</b>	5,438,567	5,674,198
Retirement expense	<b>927,633</b>	1,935,011	2,242,667
	<b>₱34,454,409</b>	₱28,183,990	₱28,879,163

## 27. Financial Instruments

The Group's principal financial instruments include cash and cash equivalents, short-term investments, financial assets at FVTPL, receivables, restricted cash, loans payable, accounts payable, accrued expenses and dividends payable. The main purpose of these financial instruments is to fund the Group's working capital requirements.

#### Categories and Fair Values of Financial Instruments

As of December 31, 2022 and 2021, the carrying amounts of the Group's financial assets and financial liabilities approximate their fair values except for loans payable and lease liabilities. The fair value of the loans payable as of December 31, 2022 and 2021 amounted to ₱3.49 billion and ₱4.13 billion compared to their carrying value of ₱3.48 billion and ₱4.06 billion, respectively.

The methods and assumptions used by the Group in estimating the fair value of financial instruments are:

<b>Financial instruments</b>	<b>Considerations</b>
<i>Cash and cash equivalents, short-term investments, restricted cash, receivables, accounts payable and accrued expenses, and short-term loans payable</i>	Due to the short-term nature of the instruments, carrying amounts approximate fair values as at the reporting date.
<i>Equity securities</i>	Fair values are based on published quoted prices (Level 1).
<i>Golf club shares</i>	Fair values are based on quoted market prices at reporting date (Level 1).
<i>Long-term loans payable</i>	Fair value is based on the discounted value of expected future cash flows using the applicable interest rate for similar type of instruments. The fair value is derived using the prevailing PH BVAL rate in 2022 and 2021.
<i>Lease liabilities</i>	Estimated fair value is based on the discounted value of future cash flows using the prevailing PH BVAL rate in 2022 and 2021.

The fair value is based on the source of valuation as outlined below:

- quoted prices in active markets for identical assets or liabilities (Level 1);
- those involving inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly (Level 2); and
- those with inputs for the asset or liability that are not based on observable market data (unobservable inputs) (Level 3).

In 2022 and 2021, there were no transfers of financial instruments among all levels.

#### Financial Risk Management Objectives and Policies

The Group manages and maintains its own portfolio of financial instruments in order to fund its own operations and capital expenditures. Inherent in using these financial instruments are the following risks on liquidity, market and credit.

#### *Financial Risks*

The main financial risks arising from the Group's financial instruments are liquidity risk, market risk and credit risk.

##### *a. Liquidity Risk*

Liquidity risk is the risk that the Group is unable to meet its financial obligations when due. The Group monitors its cash flow position and overall liquidity position in assessing its exposure to liquidity risk. The Group maintains a level of cash and cash equivalents deemed sufficient to finance its operations and to mitigate the effects of fluctuation in cash flows. To cover its short-term and long-term funding requirements, the Group intends to use internally generated funds as well as to obtain loan from financial institutions. As of December 31, 2022 and 2021, the Group has existing credit line facilities from which they can draw funds from (see Note 18).

The tables below summarize the maturity profile of the Group's financial assets and financial liabilities as of December 31, 2022 and 2021 based on contractual payments:

	2022			
	On demand	1 year or less	More than 1 year	Total
<i>Financial Assets</i>				
Financial assets at FVTPL	₱7,540,090	₱-	₱-	₱7,540,090

<b>Net financial assets (liabilities)</b>	<b>₱1,464,441,388</b>	<b>(₱1,433,202,194)</b>	<b>(₱3,847,614,952)</b>	<b>(₱3,816,375,758)</b>

\*Excluding statutory payables

\*\*Includes future interest payments

**b. Market Risk**

Market risk is the risk of loss on future earnings, on fair values or on future cash flows that may result from changes in market prices. The value of a financial instrument may change as a result of changes in equity prices, foreign currency exchanges rates, interest rates and other market changes.

**Foreign Exchange Risk**

Foreign currency risk is the risk that the value of the Group's financial instruments denominated other than the Group's functional currency diminishes due to unfavorable changes in foreign exchange rates. The Group's transactional currency exposures arise from cash and cash equivalents, receivables and accounts payable and accrued expenses.

The Group's foreign currency-denominated financial instruments as of December 31, 2022 and 2021 follow:

	2022		2021	
	US Dollar	Peso Equivalent	US Dollar	Peso Equivalent
<i>Financial assets</i>				
Cash and cash equivalents	\$2,316,003	₱129,974,085	\$2,096,605	₱106,453,022
Receivables	674,774	37,868,318	892,186	45,299,852
Advances to suppliers	–	–	216,720	11,003,741
Restricted Cash	933,326	52,378,235	933,326	47,388,694
	<b>3,924,103</b>	<b>220,220,638</b>	4,138,837	210,145,309
<i>Financial liabilities</i>				
Accounts payable and accrued expenses	1,187,125	66,621,466	190,197	9,657,062
Net exposure	<b>\$2,736,978</b>	<b>₱153,599,172</b>	\$3,948,640	₱200,488,247

As of December 31, 2022, and 2021, the exchange rates used for conversion are ₱56.120 and ₱50.774 per \$1, respectively.

The following table demonstrates the sensitivity to a reasonably possible change in US dollar exchange rates. With all other variables held constant, the effect on the Group's income before income tax is as follows:

	Increase/(decrease) in foreign currency	Effect on income before income tax
2022	+11%	(₱23,332,043)
	-11%	₱23,332,043
2021	+6%	(₱11,427,613)
	-6%	₱11,427,613

There is no other impact on the Group's equity other than those already affecting income before income tax.

#### Interest Rate Risk

The Group's exposure to market risk for changes in interest rates relates primarily to the Group's loans payable. Interest rate of loans payable is fixed for the first five (5) years or first seven (7) years and will be repriced thereafter.

The table demonstrates the sensitivity to a reasonably possible change in interest rates, with all other variables held constant, of the Group's net income. The Group used the forecasted one-year Treasury bill rate in performing the analysis.

#### *Loans payable*

2022	
Increase/decrease in interest rate (in basis points)	Impact on income before tax
+3% to +161%	(₱83,086,922)
-3% to -161%	83,086,922

2021	
Increase/decrease in interest rate (in basis points)	Impact on income before tax
+40% to +228%	(P40,878,466)
-40% to -228%	40,878,466

There is no other impact on the Group's equity other than those already affecting income before income tax.

c. *Credit Risk*

Credit risk is the possibility of loss for the Group if its receivable counterparties fail to discharge their contractual obligations. With respect to credit risk arising from the other financial assets of the Group, which comprise of cash and cash equivalents, short-term investments, receivables, financial assets at FVTPL, and restricted cash, the Group's exposure to credit risk could arise from default of the counterparty.

The Group trades only with recognized, creditworthy third parties. However, the Group's credit risk exposure is concentrated on a few counterparties as inherent in the oil exploration and production and renewable energy businesses. The Group has a well-defined credit policy and established credit procedures. In addition, receivable balances are being monitored on a regular basis to ensure timely execution of necessary intervention efforts.

The table below summarizes the Group's gross maximum credit risk exposure from its financial instruments and contract asset. These amounts are gross of collateral and credit enhancements, but net of any amounts offset and allowance for impairment losses:

	2022	2021
Financial assets:		
Cash in banks and cash equivalents	<b>P1,673,197,584</b>	P1,237,738,101
Short-term investments	<b>946,044,355</b>	-
Receivables	<b>452,192,649</b>	392,663,453
Financial assets at FVTPL	<b>7,540,090</b>	7,587,228
Refundable deposits	<b>5,323,862</b>	5,213,672
Restricted cash	<b>2,094,839,410</b>	616,361,177
Contract asset	<b>296,358,490</b>	222,238,121
	<b>P5,475,496,440</b>	P2,481,801,752

An impairment analysis is performed at each reporting date using a provision matrix to measure ECL. The mechanics of the ECL calculations and the key elements are, as follows:

- a. *Probability of default (PD)* is an estimate of the likelihood of default over a given time horizon.
- b. *Exposure at default (EAD)* is an estimate of the exposure at a future default date taking into account expected changes in the exposure after the reporting date.
- c. *Loss given default (LGD)* is an estimate of the loss arising in the case where a default occurs at a given time.

ECLs are recognized in two stages. For credit exposures for which there has not been a significant increase in credit risk since initial recognition, ECLs are provided for credit losses that result from default events that are possible within the next 12-months (a 12-month ECL). For those credit exposures for which there has been a significant increase in credit risk since initial recognition, a

loss allowance is required for credit losses expected over the remaining life of the exposure, irrespective of the timing of the default (a lifetime ECL). In its ECL models, the Group relies on a broad range of forward-looking information as economic inputs.

- b. The inputs and models used for calculating ECLs may not always capture all characteristics of the market at the date of the financial statements. To reflect this, qualitative *adjustments* or overlays are occasionally made as temporary adjustments when such differences are significantly material.

The table below shows the aging by class of asset for the Group's financial assets and contract asset as of December 31, 2022 and 2021:

	2022			Total
	Current (High grade)	More than 90 days (Standard grade)	Credit impaired

\*excluding cash on hand

Financial assets are classified as high grade if the counterparties are not expected to default in settling their obligations. Thus, credit risk exposure is minimal. Financial assets are classified as a standard grade if the counterparties settle their obligation with the Group with tolerable delays. Low grade accounts are accounts, which have probability of impairment based on historical trend. These accounts show propensity of default in payment despite regular follow-up actions and

extended payment terms. The Group's cash in banks, cash equivalents, accounts receivable, interest receivable and restricted cash have high grade credit quality.

## 28. Segment Information

For management purposes, the Group is organized into business units based on their products and has four reportable segments as follows:

- The oil production segment is engaged in the oil and mineral exploration, development and production.
- The geothermal energy segment develops and operates geothermal steamfields and power plants.
- The solar energy segment carries out solar energy operations of the Group.
- Other activities pertain to research and investment activities.

No operating segments have been aggregated to form the above reportable operating segments.

Management monitors the operating results of its business units separately for the purpose of making decisions about resource allocation and performance assessment. Segment performance is evaluated based on operating profit or loss and is measured consistently with operating profit or loss in the consolidated financial statements.

	2022					
	Oil Production	Geothermal Energy	Solar Energy	Other Activities	Elimination	Consolidated

InterGroup investments, revenues and expenses are eliminated during consolidation.

## 29. Basic/Diluted Earnings Per Share

The computation of the Group's earnings per share follows:

	2022	2021	2020
Net income attributable to equity holders of the Parent Company	<b>₱548,523,247</b>	₱325,461,592	₱319,412,421
Weighted average number of shares	<b>568,711,842</b>	568,711,842	568,711,842
Basic/diluted earnings per share	<b>₱0.9645</b>	₱0.5723	₱0.5616

Earnings per share are calculated using the net income attributable to equity holders of the Parent Company divided by the weighted average number of shares.

PERC does not have potentially dilutive common stock.

## 30. Non-controlling Interests

As of December 31, 2021, non-controlling interests (NCI) pertain to the 10% shareholdings of EEIPC in PetroGreen, total shareholdings of ACEN (formerly PHINMA) [25%] and PNOC-RC (10%) in MGI and 44% shareholdings of EEIPC in PetroSolar.

As of December 31, 2022, the investment of Kyuden in PGEC resulted to an increase in NCI as discussed below (see Notes 20 and 34). As of December 31, 2022, Kyuden owned 14.53% of PGEC, bringing down the ownership interest of PERC in PGEC from 90% to 76.92%.

As of December 31, 2022 and 2021, the accumulated balances of and net income attributable to non-controlling interests are as follows:

	2022	2021
<b>Accumulated balances of non-controlling interests:</b>		
PetroSolar	<b>₱1,203,285,619</b>	₱1,117,031,352

Dividends paid to non-controlling interests amounted to ₱122.80 million and ₱201.67 million in 2022 and 2021, respectively.

*Increase in non-controlling interests from stock issuances*

*PetroGreen*

December 31, 2022

In September 2022, PetroGreen, PetroEnergy and Kyuden Internation Corporation (Kyuden), a wholly-owned subsidiary of Japan's Kyushu Electric Power Co., Inc., executed the Subscription Agreement and Shareholders' Agreement. Pursuant to the said documents, PetroGreen will issue 712,251,720 shares in two tranches in favor of Kyuden equivalent to 25% ownership interest in PetroGreen upon completion of the conditions precedent for the transaction.

In October 2022, PetroGreen received from Kyuden the payment for the subscription amounting to ₱3.37 billion, which is maintained in an escrow fund with a bank to be release based on the terms of the escrow agreement.

On October 14, 2022, transaction for the "Initial Closing" was completed. The subscription amount of ₱1.72 billion was released from the escrow account and the 363,244,840 shares coming from unissued shares of PetroGreen was issued in favor of Kyuden representing 14.53% ownership interest in PetroGreen.

On November 18, 2022, another ₱21.81 million was released from the escrow account representing the required 25% payment of the 25% subscribed shares for the increase in PetroGreen's authorized capital stock as part of the "Pre-Approval Second Closing". On December 14, 2022, SEC approved the application for increase in authorized capital stock from 2,500,000,000 shares at ₱1.0 par value to 2,849,006,880 shares with same par value.

As of December 31, 2022, the “Second Closing” under the Subscription Agreement is not yet completed since the fulfilment of the Conditions Precedent and the payment/release of the ₱1.63 billion remaining escrow fund was completed only on January 10, 2023. Effectively, Kyuden has 14.53% equity ownership in PetroGreen as of December 31, 2022. This resulted in an increase in non-controlling interest as of December 31, 2022 (see Note 20).

The amount of ₱1.65 billion representing the subscription amount for the “Pre-approval Second Closing” and “Second Closing” transactions are presented as separate line item as Deposit for Stock Subscription under the 2022 Equity section.

On January 10, 2023, the date of “Second Closing”, the remaining balance of the escrow account amounting to ₱1.63 billion was released and the stock certificate for the 349,006,880 subject shares was issued in favor of Kyuden. After the Second Closing on January 10, 2023, Kyuden already holds 25% ownership interest in PetroGreen.

December 31, 2021:

- In 2021, stockholders of PetroGreen subscribed to ₱83.00 million from its unissued stocks which increased the non-controlling interest by ₱8.30 million.

*PetroSolar*

On March 28, 2022, the BOD and Stockholders approved the increase in PetroSolar’s authorized capital stock from ₱1,800,000,000 consisting of 18,000,000 shares at ₱100 par value per share, to ₱1,900,000,000 consisting of 19,000,000 shares at ₱100 par value per share. In compliance with Sec. 37 of the Revised Corporation Code, 25% or 250,000 shares of the authorized capital stock increase must be subscribed, and 25% or 62,500 shares of the subscribed capital stock must be paid up. Of the total subscribed capital stock amounting to ₱25,000,000, cash amounting to ₱6,250,000 equivalent to 62,500 shares was received by PetroSolar on April 6, 2022 as subscription payment for the proposed increase in authorized capital stock. PetroSolar filed its application for the approval of the proposed increase in authorized capital stock with the SEC on May 23, 2022. The said application was approved by the SEC on May 30, 2022. Upon approval, the 62,500 shares subscribed were treated as outstanding shares.

**32. Renewable Energy Act of 2008**

On January 30, 2009, Republic Act No. 9513, *An Act Promoting the Development, Utilization and Commercialization of Renewable Energy Resources and for Other Purposes*, otherwise known as the “Renewable Energy Act of 2008” (the “Act”), became effective. The Act aims to (a) accelerate the exploration and development of renewable energy resources such as, but not limited to, biomass, solar, wind, hydro, geothermal and ocean energy sources, including hybrid systems, to achieve energy self-reliance, through the adoption of sustainable energy development strategies to reduce the country’s dependence on fossil fuels and thereby minimize the country’s exposure to price fluctuations in the international markets, the effects of which spiral down to almost all sectors of the economy; (b) increase the utilization of renewable energy by institutionalizing the development of national and local capabilities in the use of renewable energy systems, and promoting its efficient and cost-effective commercial application by providing fiscal and non-fiscal incentives; (c) encourage the development and utilization of renewable energy resources as tools to effectively prevent or reduce harmful emissions and thereby balance the goals of economic growth and development with the protection of health and environment; and (d) establish the necessary infrastructure and mechanism to carry out mandates specified in the Act and other laws.

As provided for in the Act, Renewable Energy (RE) developers of RE facilities, including hybrid systems, in proportion to and to the extent of the RE component, for both power and non-power applications, as duly certified by the DOE, in consultation with the Board of Investments (BOI), shall be entitled to the following incentives, among others:

- i. Income Tax Holiday (ITH) - For the first seven (7) years of its commercial operations, the duly registered RE developer shall be exempt from income taxes levied by the National Government;
- ii. Duty-free Importation of RE Machinery, Equipment and Materials - Within the first ten (10) years upon issuance of a certification of an RE developer, the importation of machinery and equipment, and materials and parts thereof, including control and communication equipment, shall not be subject to tariff duties;

- iii. Special Realty Tax Rates on Equipment and Machinery - Any law to the contrary notwithstanding, realty and other taxes on civil works, equipment, machinery, and other improvements of a registered RE developer actually and exclusively used for RE facilities shall not exceed one and a half percent (1.5%) of their original cost less accumulated normal depreciation or net book value;
- iv. NOLCO - the NOLCO of the RE developer during the first three (3) years from the start of commercial operation which had not been previously offset as deduction from gross income shall be carried over as deduction from gross income for the next seven (7) consecutive taxable years immediately following the year of such loss;
- v. Corporate Tax Rate - After seven (7) years of ITH, all RE developers shall pay a corporate tax of ten percent (10%) on its net taxable income as defined in the National Internal Revenue Code of 1997, as amended by Republic Act No. 9337;
- vi. Accelerated Depreciation - If, and only if, an RE project fails to receive an ITH before full operation, it may apply for accelerated depreciation in its tax books and be taxed based on such;
- vii. Zero Percent VAT Rate - The sale of fuel or power generated from renewable sources of energy, the purchase of local goods, properties and services needed for the development, construction and installation of the plant facilities, as well as the whole process of exploration and development of RE sources up to its conversion into power shall be subject to zero percent (0%) VAT;
- viii. Cash Incentive of RE Developers for Missionary Electrification - An RE developer, established after the effectivity of the Act, shall be entitled to a cash generation-based incentive per kilowatt-hour rate generated, equivalent to fifty percent (50%) of the universal charge for power needed to service missionary areas where it operates the same;
- ix. Tax Exemption of Carbon Credits - All proceeds from the sale of carbon emission credits shall be exempt from any and all taxes; and
- x. Tax Credit on Domestic Capital Equipment and Services - A tax credit equivalent to one hundred percent (100%) of the value of the VAT and custom duties that would have been paid on the RE machinery, equipment, materials and parts had these items been imported shall be given to an RE operating contract holder who purchases machinery, equipment, materials, and parts from a domestic manufacturer for purposes set forth in the Act.

RE developers and local manufacturers, fabricators and suppliers of locally-produced RE equipment shall register with the DOE, through the Renewable Energy Management Bureau (REMB). Upon registration, a certification shall be issued to each RE developer and local manufacturer, fabricator and supplier of locally-produced renewable energy equipment to serve as the basis of their entitlement to the incentives provided for in the Act. All certifications required to qualify RE developers to avail of the incentives provided for under the Act shall be issued by the DOE through the REMB.

---

### 33. Electric Power Industry Reform Act (EPIRA)

After emerging from the crippling power crisis that occurred in the early 1990s, the Philippine Government embarked on an industry privatization and restructuring program envisioned to ensure the adequate supply of electricity to energize its developing economy. This restructuring scheme is embodied in RA No. 9136, the EPIRA. Approved on June 8, 2001, the EPIRA seeks to ensure quality, reliable, secure and affordable electric power supply; encourage free and fair competition; enhance the inflow of private capital; and broaden the ownership base of power generation, transmission and distribution.

The Government viewed restructuring and reform as a long-term solution to the problems of the power sector. The huge investment requirement for new generation capacity and expansion of the necessary transmission and distribution network was estimated at an annual average of \$1.0 billion. Given its own fiscal constraints, the Government recognized the need for greater private sector involvement in the

power sector. Even though some private sector participation was successfully introduced earlier between the NPC and private investors, this time, the Government is envisioning addressing the power sector inefficiencies and the monopoly in the generation business. EPIRA mandated the overall restructuring of the Philippine electric power industry and called for the privatization of NPC. The restructuring of the electricity industry calls for the separation of the different components of the power sector, namely: generation, transmission, distribution, and supply. On the other hand, the privatization of the NPC involves the sale of the state-owned power firm's generation and transmission assets (e.g. power plants and transmission facilities) to private investors. These two reforms are aimed at encouraging greater competition and attracting more private-sector investments in the power industry.

A more competitive power industry will in turn result in lower power rates and a more efficient delivery of electricity supply to end-users.

Specifically, the EPIRA has the following objectives:

- Achieve transparency with the unbundling of the main components of electricity services, which will be reflected in the consumers' electricity rates;
- Opening up of the electricity market to competition at the wholesale (generation) level to improve efficiency in the operation of power plants and redound to lower electricity prices;
- Enhance further inflow of private capital and broaden ownership base in generation, transmission distribution, and supply of electric power;
- Establish a strong and independent regulatory body that will balance the interest of both the investors by promoting competition through creation of a level playing field and protect the electricity end-users from any market power abuses and anti-competitive behaviors; and
- Accelerate and ensure the total electrification of the country.

---

## 34. Other Material Contracts and Agreements

### **Foreign Petroleum Operations**

#### Joint Operating Agreement - Gabon

The Joint Operating Agreement (JOA) establishes the respective rights and obligations of the members of the Consortium with regard to the operations under the EPSC, including the joint exploration, appraisal, development and production of hydrocarbon reserves from the contract area. VAALCO has been appointed as the Operator of the field and shall continue to act as such until such time that all the JV Partners decide to appoint a new Operator from among them.

#### Crude Oil Sales and Purchase and Services Agreement (COSPA) with Glencore Energy UK Ltd and Mercuria Energy Trading S.A.

In 2015, the JV Partners signed a COSPA with Glencore Energy UK Ltd., a company incorporated in England. The initial agreement was effective from August 1, 2015 to July 31, 2016. There were several extensions until January 31, 2019. In January 2019, the JV Partners entered into a COSPA with Mercuria Energy Trading S.A., a company incorporated in Switzerland. The agreement is effective from February 1, 2019 to January 31, 2020.

Crude Oil Sales and Purchase and Services Agreement (COSPA) with Exxon Mobil Sales and Supply LLC

On December 20, 2019, the JV Partners signed a COSPA with Exxon Mobil Sales and Supply LLC (Exxon), a company incorporated under the laws of the State of Delaware and having its registered office at 251 Little Falls Drive, Wilmington DE 19808. The agreement is effective from February 1, 2020 until January 31, 2021. On December 14, 2020, the first amendment to the COSPA was executed, amending and extending the term of the COSPA with Exxon effective February 1, 2021 until July 31, 2021.

This was further amended on July 2021, effective August 1 2021 to extend the term until January 31, 2022. In January 2022, this was further amended effective February 1, 2022 until July 31, 2022.

Crude Oil Sales and Marketing Agreement (COSMA) with Glencore Energy UK Ltd

On August 16, 2022, PetroEnergy signed a COSMA with Glencore Energy UK Ltd. The agreement is effective from August 16, 2022 to July 31, 2023.

**Renewable Energy Projects**

Revenues from sale of electricity using renewable energy is consummated and recognized over time whenever the electricity generated by the Group is transmitted through the transmission line designated by the buyer, for a consideration.

Set out below is the disaggregation of the Group's revenue from contracts with customers for the years ended December 31, which are presented as Electricity Sales and Other revenues in the statement of comprehensive income:

	2022	2021	2020
Revenue from electricity supply agreement	<b>₱1,016,281,052</b>	₱1,175,250,772	₱1,044,249,958
Revenue sales under Feed-in-Tariff (FIT)	<b>679,650,696</b>	724,475,443	879,290,407
Wheeling charges and trading and market fees	<b>129,112,773</b>	61,981,804	116,377,508
	<b>₱1,825,044,521</b>	₱1,961,708,019	₱2,039,917,873

Renewable Energy Payment Agreement (REPA)

Consequent to the issuance of FIT COC in its favor, PetroSolar entered into a REPA with the TransCo on April 6, 2016. Under the REPA, TransCo shall pay the FIT Rate of 8.69/kWh for all metered generation of PSC for a period of twenty (20) years from start of Commercial Operations.

FIT rate adjustment

On May 26, 2020, the ERC approved Resolution No. 6 series of 2020 approving the adjustment to Feed in Tariff for the years 2016 to 2020 using 2014 as the base year for the consumer price index and foreign exchange. The resolution was published in a newspaper of general circulation on November 17, 2020 and became effective 15 days after.

Total retroactive FIT revenue adjustment recognized in 2020 by PetroSolar measured at present value amounted to ₱132.69 million which will be recovered from TransCo for a period of five (5) years starting 2022. In 2021, PetroSolar recognized additional ₱86.02 million FIT arrears covering the adjustment of the FIT rate for the current year. Interest earned amounted to ₱6.86 million and ₱3.27 million in 2022 and 2021, respectively.

ESA for MGPP-1 and MGPP-2

On September 16, 2011 MGI executed an Electricity Supply Agreement (ESA-1) with Trans-Asia (now ACEN), wherein MGI agreed to sell to Trans-Asia (now ACEN) the entire generated output of MGPP-1 for a period of 20 years commencing from commercial operations on February 8, 2014. On April 26, 2016, MGI entered into another Electricity Supply Agreement (ESA-2) with Trans-Asia (then renamed as PHINMA Energy Corporation and now ACEN), wherein MGI agreed to sell to PHINMA (now ACEN) the entire generated output of the MGPP-2 for a period of 20 years from start of commercial operations on April 30, 2018.

On August 23, 2019, MGI and PHINMA (now ACEN) executed the Amendment to the Unit 1 ESA and Unit 2 ESA which, among others, extended the effectivity of both ESA-1 and ESA-2 until June 25, 2039.

MGI's Interconnection Agreement

MGI signed an Interconnection Agreement (ICA) with Manila Electric Company (MERALCO) for the physical interconnection of the generation and connection facilities of MGI's 20 MW power plant to MERALCO's distribution system. The power facility constructed in Brgy. San Rafael, Sto. Tomas, Batangas is currently connected to MERALCO's existing 115 kV line in Calamba, Laguna.

On July 2014, MGI, Trans-Asia and MERALCO signed a Memorandum of Agreement which effectively waived the payment for MGPP-1's wheeling charges amounting to around 4.30 million per month, beginning 2014 until December 26, 2019.

In a letter dated February 8, 2021, MERALCO informed MGI about its Wheeling Charges Rationalization Program for embedded generators (Program), giving the latter the opportunity to be billed reduced Distribution Wheeling Service (DWS) Charges corresponding to the supply of electricity to Contestable Customers (CCs) within the franchise area of MERALCO, subject to submission of documentary requirements.

On August 25, 2022 and November 17, 2022, MGI received billing adjustment letters from MERALCO to deduct the Bilateral Contract Quantities (BCQ) data that MGI supplied to CCs within the MERALCO franchise area. The adjustments resulted in differential amount of ₱14.05 million for billing periods March to June 2022. This was subsequently billed to MGI by ACEN to recover the amount of Meralco Distribution Wheeling Charges Refund.

Service cum Trade Agreement (Carbon Credits)

On September 7, 2021, MGI (the Party/Seller/Project Owner) entered into a Service cum Trade Agreement with Enking International Energy Services Limited (EKIESL) (the Service Provider/Buyer) in which the latter offered its services on Clean Development Mechanism (CDM) Verification, Issuance and Trading of MGI's Carbon Credits.

For the first crediting period of January 1, 2014 to December 31, 2020, United Nations Framework Convention on Climate Change (UNFCCC)-issued net carbon credits totaled 622,068 tCO<sub>2</sub>e. EKIESL monetized said carbon credits bringing in a net revenue to MGI of US\$192,328 (10,649,201) and remitted to MGI's account on December 23, 2022.

WESM Transactions

On July 1, 2022, MGI entered into an agreement with ACEN to update the current billing and settlement protocols, practices, and procedures to ensure consistency and compliance with the Guidelines and Procedures for Implementation of BIR Ruling OT-323-2021 for WESM Transactions issued by the Independent Electricity Market Operator of the Philippines (IEMOP). This includes trading costs, market fees and pass-on taxes and charges to ACEN in accordance with the agreement. Revenue from

sale derived from WESM transactions with other Market Participants amounted to ₱11.41 million for the period December 26, 2021 to December 25, 2022.

Renewable Energy Payment Agreement (REPA)

Consequent to the issuance of FIT COC in its favor, PetroSolar entered into a REPA with the TransCo on April 6, 2016. Under the REPA, TransCo shall pay the FIT Rate of 8.69/kWh for all metered generation of PSC for a period of twenty (20) years from start of Commercial Operations.

Solar Energy Service Contract (SESC) No. 2017-01-360 – Puerto Princesa, Palawan

The Service Contract for the Puerto Princesa Solar Power Project (PPSPP) was signed by DOE Secretary Alfonso Cusi on February 27, 2017. The PPSPP aims to put up a 10-20 MW off-grid solar hybrid power facility in Puerto Princesa City, Palawan to meet the increasing electricity demand and address the fluctuating electricity situation in the city through solar power.

PetroGreen has secured all local government endorsements needed for eventual facility development. In January 2020, PGEC was among seven (7) pre-qualified bidders for the 20-MW Palawan Main Grid Competitive Selection Process (CSP) of the Palawan Electric Cooperative (PALECO).

On March 12, 2020, PALECO issued a bulletin which states that the submission and opening of bids was postponed until further notice.

On January 18, 2021, PALECO issued a bulletin resuming the Palawan Main Grid 20-MW CSP after a 10-month postponement, with minor revisions to the bid terms as approved by the DOE and the National Electrification Administration (NEA). However, PGEC decided to withdraw from the said bidding process, owing to PALECO's final Terms of Reference (TOR), which severely limit the economic feasibility of PGEC's planned investment.

On September 7, 2022, PGEC has sent a letter to DOE for the intention to Relinquish the Service Contract and settled the remaining financial obligations under the SESC. As of December 31, 2022 the DOE has not yet given their official approval of the relinquishment of the said SESC.

Wind Energy Service Contract (WESC) No. 2017-09-118 – San Vicente, Palawan

On November 11, 2019, the DOE officially awarded to PetroGreen the San Vicente, Palawan WESC. The WESC, effective October 9, 2019, vests PetroGreen with the rights and responsibilities to harness wind energy and develop and operate the corresponding renewable energy facility in the area. The proposed project is situated in the municipality of San Vicente, Palawan, approximately 130 km north of Puerto Princesa.

Activities for the meteorological mast installation program for the San Vicente Wind Hybrid Power Project (SVWHPP) have been put on-hold due to COVID-19-related travel restrictions. Nonetheless, PGEC has secured on May 07, 2020 a Certificate of Non-Coverage (CNC) from the Department of Environment and Natural Resources (DENR) for the mast installation. PGEC also secured a Special Land Use Permit (SLUP) from the DENR on March 09, 2021 for the mast installation in San Vicente.

In December 2020, PGEC's contractor has mobilized to San Vicente, Palawan to carry out the installation works for the 60-meter meteorological mast to be used for the wind measurement campaign of the SVWHPP. The said mast is expected to be commissioned and turned-over to PGEC in July, 2021. Since July 2021 up to present, PGEC is continuing with the wind measurement campaign for the SVWHPP to assess the long-term wind resource to support a potential wind-hybrid power project in San Vicente.

Enrique T. Yuchengco Bldg. Rooftop Solar Power Project (ETY) – Binondo, City of Manila

On April 29, 2021, PGEC completed its first commercial and industrial (C&I) rooftop solar project for the Enrique T. Yuchengco Bldg. in Binondo, Manila.

The building owner E.T. Yuchengco Inc. (ETY) and project owner PGEC signed a 15-year Rent-to-Own Agreement for a 140.8-kWp solar rooftop facility last January 14, 2021. The rental period commenced upon the project's completion in April 2021. After said 15-year cooperation period, PGEC will turn-over the said rooftop solar facility to ETY free of charge.

The ETY rooftop solar facility exported 0.140 GWh and 0.096 GWh of electricity in 2022 and 2021, respectively.

Bugallon Solar Power Project (BSPP)

On May 05, 2022, PGEC was awarded a Solar Energy Operating Contract (SEOC) by the DOE for its Bugallon Solar Power Project (BSPP) in Brgy. Salomague Sur, ugallon, Pangasinan.

For the year, PGEC has completed the Distribution Impact Study (DIS) for the BSPP, which has been approved by the Central Pangasinan Electric Cooperative (CENPELCO), and subsequently endorsed to the National Electrification Administration (NEA) for their approval.

PGEC also secured the Certificate of Non-Overlap (CNO) from the National Commission on Indigenous Peoples (NCIP) for the project, confirming that the project site is outside any ancestral domain and free from any tribal claims.

In parallel, the issuance of the Municipal Resolution endorsing the land reclassification for the BSPP site is still being undertaken by an external legal counsel. Once this is secured, PGEC will lodge its application for the project endorsement by the Pangasinan Sangguniang Panlalawigan (SP) and the Zoning Clearance.

Dagohoy Solar Power Project (DSPP)

On June 28, 2022, PGEC was awarded a Solar Energy Operating Contract (SEOC) by the DOE for its Dagohoy Solar Power Project (DSPP) in Brgy. San Vicente, Dagohoy, Bohol.

To date, PGEC has secured favorable endorsements for the land reclassification of the DSPP site from the Dagohoy Sangguniang Bayan (SB) last October 2022 and by the Bohol SP last December 2022. Said resolutions are needed to secure the requisite Locational Clearance and Building Permit applications for the DSPP.

NGCP has approved PGEC's application to conduct the SIS for the DSPP via NGCP's Online Transmission Connection Application (OTCA) portal, with the DSPP's SIS proper tentatively scheduled for mid-2023.

While awaiting the SIS conduct, PGEC awarded to Media Construction and Development Corporation (MCDC) the contract for the initial site development works (site grading, access road and drainage construction, perimeter fence and gate). MCDC is targeting completion of site development works by August 2023.

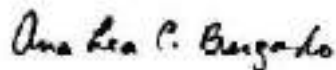

## **INDEPENDENT AUDITOR'S REPORT ON SUPPLEMENTARY SCHEDULES**

The Board of Directors and Stockholders  
PetroEnergy Resources Corporation  
7th floor, JMT Building, ADB Avenue  
Ortigas Center, Pasig City

We have audited in accordance with Philippine Standards on Auditing, the consolidated financial statements of PetroEnergy Resources Corporation and its subsidiaries (the Group) as at and for the years ended December 31, 2022 and 2021, and for each of the three years in the period ended December 31, 2022, and have issued our report thereon dated April 17, 2023. Our audits were made for the purpose of forming an opinion on the basic financial statements taken as a whole. The schedules listed in the Index to the Consolidated Financial Statements and Supplementary Schedules are the responsibility of the Group's management. These schedules are presented for purposes of complying with the Revised Securities Regulation Code Rule 68 and are not part of the basic financial statements. These schedules have been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, fairly state, in all material respects, the financial information required to be set forth therein in relation to the basic financial statements taken as a whole.

**PETROENERGY RESOURCES CORPORATION AND SUBSIDIARIES**  
**SUPPLEMENTARY INFORMATION AND DISCLOSURES REQUIRED ON**  
**REVISED SRC RULE 68**  
**DECEMBER 31, 2022**

Philippine Securities and Exchange Commission (SEC) issued the revised Securities Regulation Code Rule SRC Rule 68 which consolidates the two separate rules and labeled in the amendment as “Part I” and “Part II”, respectively. It also prescribed the additional information and schedule requirements for issuers of securities to the public.

Below are the additional information and schedules required by Revised SRC Rule 68 that are relevant to the Group. This information is presented for purposes of filing with the SEC and is not required part of the basic financial statements.

Schedule A. Financial Assets

The Group is not required to disclose the financial assets in equity securities as the total financial assets at fair value through profit and loss securities amounting to ₱7.54 million do not constitute 5% or more of the total current assets of the Group as at December 31, 2022.

Schedule B. Amounts Receivable from Directors, Officers, Employees, Related Parties and Principal Stockholders (Other than Related Parties)

As of December 31, 2022, there are no amounts receivable from directors, officers, employees, related parties and principal stockholders that aggregates each to more than ₱100,000 or 1% of total assets whichever is less.

Schedule C. Amounts Receivable from Related Parties which are Eliminated during the Consolidation of Financial Statements

The following is the schedule of receivables from related parties, which are eliminated in the consolidated financial statements as at December 31, 2022:

Name and Designation of debtor	Balance at beginning of period	Additions	Amounts Collected	Amounts written off	Not Current	Balance at end of period
PetroGreen Energy Corporation	₱111,310	₱4,916,990	₱4,701,856	₱-	₱-	₱326,444
Maibarara Geothermal, Inc.	9,529	4,665,294	3,750,547	-	-	924,276
PetroSolar Corporation	9,529	4,091,038	3,860,760	-	-	239,807
	₱130,368	₱13,673,322	₱12,313,163	₱-	₱-	₱1,490,527

Schedule D. Long-term Debt

Please refer to the Consolidated Audited Financial Statement, Note 18 for details of the loans.

Schedule E. Indebtedness to Related Parties (Long-Term Loans from Related Companies)

The Group has no outstanding long-term indebtedness to related parties as of December 31, 2022.

Schedule F. Guarantees of Securities of Other Issuers

The Group does not have guarantees of securities of other issuers as of December 31, 2022.

Schedule G. Capital Stock

Title of issue	Number of shares authorized	Number of shares issued and outstanding as shown under related balance sheet caption	Number of Shares reserved for options, warrants, conversion and other rights	Number of shares held by related parties	Directors, Officers and Employees	Others
Common Shares	700,000,000	568,711,842	–	165,468,725	6,029,534	397,213,583

**PETROENERGY RESOURCES CORPORATION AND SUBSIDIARIES**  
**SCHEDULE OF FINANCIAL SOUNDNESS INDICATORS**  
**AS OF DECEMBER 31, 2022 and 2021**

*Financial Soundness Indicators*

Below are the financial ratios that are relevant to the Group for the year ended December 31, 2022 and 2021:

Financial ratios		<b>2022</b>	2021
Current ratio	$\frac{\text{Total current assets}}{\text{Total current liabilities}}$	<b>3:50:1</b>	1.96:1
Acid test ratio	$\frac{\text{Total current assets} - \text{inventories} - \text{other current assets}}{\text{Total current liabilities}}$	<b>3.38:1</b>	1.35:1
Solvency ratio	$\frac{\text{After tax net profit} + \text{depreciation}}{\text{Long-term} + \text{short-term liabilities}}$	<b>0.32:1</b>	0.24:1
Debt-to-Equity Ratio	$\frac{\text{Total liabilities}}{\text{Total stockholder's equity}}$	<b>0.36:1</b>	0.59:1
Asset-to-Equity Ratio	$\frac{\text{Total assets}}{\text{Total stockholder's equity}}$	<b>1.36:1</b>	1.69:1
Interest rate coverage ratios	$\frac{\text{Earnings before interest and taxes (EBIT)}}{\text{Interest expense}^*}$	<b>4.05:1</b>	3.16:1
Return on equity	$\frac{\text{Net income}}{\text{Average shareholder's equity}}$	<b>8.34%</b>	8.24%
Return on assets	$\frac{\text{Net income}}{\text{Average assets}}$	<b>5.75%</b>	5.00%
Return on revenue	$\frac{\text{Net income}}{\text{Total revenue}}$	<b>33.83%</b>	27.47%
Earnings per share	$\frac{\text{Net income}}{\text{Weighted average no. of shares}}$	<b>₱0.9645</b>	₱0.5723
Price Earnings Ratio	$\frac{\text{Closing price}}{\text{Earnings per share}}$	<b>₱4.98</b>	₱7.08
(Forward)			
Long term debt-to-equity ratio	$\frac{\text{Long term debt}}{\text{Total stockholder's equity}}$	<b>0.24:1</b>	<b>0.44:1</b>

## Contextual Information

Company Details	
<b>Name of Organization</b>	PetroEnergy Resources Corporation (PERC)
<b>Location of Headquarters</b>	7F JMT Bldg. ADB Avenue, Ortigas Center, Pasig City
<b>Location of Operations</b>	Pasig City, Metro Manila; Batangas, Tarlac, and Aklan, Philippines
<b>Report Boundary: Legal entities (e.g. subsidiaries and affiliate) included in this report*</b>	<p>This report mainly covers information on the following operations of PERC:</p> <ul style="list-style-type: none"> <li>• PetroGreen Energy Corporation (PGEN) – the renewable energy subsidiary of PERC</li> <li>• Maibarara Geothermal, Inc. (MGI) - developer and operator of Maibarara-1 (20 MW) and Maibarara-2 (12 MW) Geothermal Power Projects (MGPP) in Sto. Tomas, Batangas</li> <li>• PetroWind Energy, Inc. (PWEI) - developer and operator of Nabas-1 (36 MW) and Nabas-2 (13.2 MW) Wind Power Project (NWPP) in Nabas-Malay, Aklan</li> <li>• PetroSolar Corporation (PSC), developer and operator of Tarlac-1 (50 MW<sub>DC</sub>) and Tarlac-2 (20 MW<sub>DC</sub>) Solar Power Projects (TSPP) in Tarlac City</li> </ul>
<b>Business Model, including Primary Activities, Brands, Products, and Services</b>	Renewable energy development and power generation and oil exploration and development
<b>Reporting Period</b>	January 1 to December 31, 2022
<b>Highest Ranking Person responsible for this report</b>	Milagros V. Reyes (President)

## Materiality Process

### Explain how you applied the materiality principle (or the materiality process) in identifying your material topics

PERC's Sustainability Team conducted several meetings on what the material topics are for PERC, while reviewing the direction and focus of sustainability within the Company. Sustainability issues and several perspectives were discussed to determine financial and non-financial performance drivers. PERC employed the following materiality determination processes:

- 1. Understanding the Sustainability Context:** The first step was to study and understand sustainability frameworks and models and to assess how the Company could design its own or adopt existing frameworks. Sustainability and related concepts were defined to identify applicable financial and non-financial metrics. This exercise helped the Sustainability Team to focus on how PERC could positively contribute to the economy, environment, and society.
- 2. Identifying Material Topics:** The Sustainability Team came up with an initial list of material topics, which were further validated through group discussions with sustainability point persons per unit, including middle management, power plant heads, stakeholder touch points (to grasp stakeholder perspectives), and data handlers and verifiers. In finalizing the material topics, the following guide questions were used:
  - (a) Is it a key capital/risk/opportunity?
  - (b) Does our key business of power development and generation impact it?
  - (c) Do our business processes directly affect it?
  - (d) Does our product/service contribute significant impact to it?
  - (e) Is there a trend that will make it (the topic) material in the future?
- 3. Defining Performance and Management Approach:** Once the list of material topics were identified, relevant metrics were identified. The Sustainability Team also referred to the Global Reporting Initiative (GRI) standards, a globally recognized sustainability reporting tool, to craft PERC's own management approaches. These approaches were aimed at mitigating risks and improving the performance metrics. The UN Sustainable Development Goals (SDGs) were also used as a guide for identifying the Company's societal, environmental, and economic impact and value.

# ECONOMIC

## Economic Performance

### Direct Economic Value Generated and Distributed

Disclosure	Amount	Units
Direct economic value generated (revenue)*	2,717,255,644	PhP
Direct economic value retained	558,723,189	PhP
Direct economic value distributed:	2,158,532,455	PhP
a. Employee wages and benefits	183,265,013	PhP
b. Payments to suppliers, other operating costs	1,462,756,564	PhP
c. Dividends given to stockholders and interest payments to loan providers	442,640,844	PhP
d. Taxes given to government	65,585,218	PhP
e. Investments to community (e.g. donations, CSR)	4,284,816	PhP

\*Direct economic value generated (revenue) and operating costs includes PERC's oil revenues and operating costs from four (4) oil fields located in Gabon, West Africa. However, these oil fields are not included in the scope of this Sustainability Report since PERC is not the operator of the Gabon petroleum operations. VAALCO Energy Inc., the operator of Gabon operations, promotes sustainable practices as indicated in their Sustainable Report available at <https://www.vaalco.com/sustainability/sustainability-report>

The Philippine government has committed to accelerate the utilization of renewable energy resources in order to reduce harmful greenhouse gas emissions and achieve economic development while protecting the environment. As proof of this commitment, the Renewable Energy Act of 2008 (RE Law) gave incentives and privileges to support renewable energy development.

### Direct Economic Value

#### Discussion on Impacts and Risks: Where they occur, stakeholders affected, and management approach

In 2022, PERC generated ₱2.72 billion of direct economic impact, of which 79.44% (₱2.16 billion) was distributed among suppliers, employees, providers of capital, government, and community investments/donations.

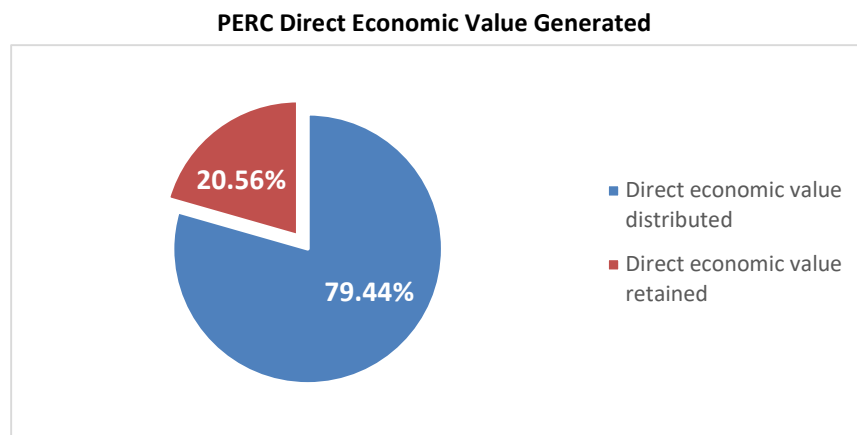

Figure 1: PERC Direct Economic Value Generated. PERC distributed 79.44% of economic value generated, and retained 20.56%

### Breakdown of PERC Direct Economic Value Distribution

Figure 2: Breakdown of PERC Direct Economic Value Distribution shows the distribution of impact per stakeholder.

In relation to economic impact, PERC recognizes the following risks, which affect the Company’s shareholders, employees, and other stakeholders:

#### (1) Risks related to operational preparedness due to climate-related risks

The Philippines is one of the most susceptible countries to climate-related hazards, including extreme warming events, extreme rainfall, sea level rise, and increase in ocean temperature. In 2013, the Philippines was hit by *Typhoon Haiyan* (locally *Super Typhoon Yolanda*), one of the most powerful typhoons ever recorded. Haiyan caused approximately US\$2.98 billion in damages. Scientists agree that weather disturbances and natural calamities could adversely affect a Company’s ability to generate revenue and perform its operations.

For PERC, actual and potential impacts of climate-related risks include plant outages, damage to major power plant components, damage to road network and offices, loss of means of communication, sub-optimal performance of power plant components, and general business interruption.

To manage these risks, PERC ensures that these risks are considered during financial and business strategic planning so that appropriate and reasonable protection, redundancy, and mitigating measures can be put in place. Specifically, PERC practices the following mitigating measures:

- Taking advantage of existing technologies, such as wind turbines that can withstand extreme winds, installation of lightning arresters, bio-engineering measures for slope and road protection, etc., to mitigate impact;
- Reinforcing and strengthening of major power plant components such as transmission poles, WTG foundations, and ground cables;
- Implementing monitoring protocols for climatic parameters such as ambient temperature, humidity, rainfall, and wind patterns;
- Institutionalizing disaster-preparedness and crisis-response protocols; and
- Regularly reviewing and ensuring that insurance coverages are adequate and up-to-date.

## **(2) Uncertainty in government regulations particularly in issuance of Feed-in-Tariff (FiT)**

The Feed-in-Tariff (FiT) is a fixed-rate per kWh that electricity consumers pay to finance renewable energy incentives in the Philippines. The FiT was included in the Renewable Energy (RE) Act of 2008 to increase investments in renewable energy. Changes in regulations and different policy interpretations may result in reduction of FiT, and therefore may affect the Company's revenue and income.

To mitigate this risk, PERC constantly monitors policy directions to anticipate changes in regulations that could affect its projects. Also, PERC continuously strengthens ties with government agencies such as the Department of Energy (DOE) and the Energy Regulatory Commission (ERC) by participating in seminars and meetings to be abreast with new rules and regulations and by maintaining its advocacy efforts through industry associations.

## **(3) Inability to get returns on capital investments**

PERC may also be exposed to equity partnership risk. For its RE projects, PERC partners with other firms to form Joint Venture (JV) operating companies. Business decisions made by these JV partnerships have a crucial effect on the sound operation and financial success of PERC's business. Although the Company maintains good relationships with its partners, there is no assurance that these relationships will be sustained in the future or that problems would not develop. For example, the Company's joint venture partners may be unable or unwilling to fulfil their obligations, take actions contrary to its policies or objectives, or may experience financial difficulties. If any of these events occur, the businesses of these joint ventures could be severely disrupted, which could have a material adverse effect on PERC's business, financial condition, and operations.

In order to avoid or mitigate these risks, PERC employs care and prudence in selecting its partners. The background of potential partners is heavily scrutinized, attention paid to the personalities behind the potential partners, their culture, reputation, and track record. The shareholders' agreements or joint venture agreements also contain penalty provisions in case a partner refuses or fails to fulfil its obligations. There are likewise exit mechanisms that could be utilized in case the relations among partners become unfavorable.

## **(4) Inability to retain key people**

Due to high competitiveness in the power industry, key people may be pirated by other energy companies. This is a risk when PERC is unable to provide competitive compensation and benefits to its employees. Since PERC operates in a lean structure, there are risks on business continuity in case of resignations in key positions. Since the required skill sets are highly technical or specific, there could be a longer or steeper learning curve among new hires.

To manage this risk, the Company employs a strong mentor-mentee approach where coaching and in-house trainings are extensively practiced. Reporting lines among senior management, middle management, and rank-and-file are kept simple and non-bureaucratic to encourage constant communication and learning among all levels of function. A stringent and non-discriminatory screening among applicants is implemented to ensure skills and job match. The Company also continuously studies industry practices on compensation and benefits to offer a competitive package to potential employees.

## **(5) Risks related to opposition from local communities**

Without proper social preparations, PERC may be exposed to opposition from local communities. This may arise when the community does not understand the importance and benefits of the energy project. Opposition may also be a result of the Company's inability to foster a mutually-beneficial relationship with the communities.

To manage this risk, PERC cultivates a good relationship with the communities and implements an extensive and integrated Corporate Social Responsibility (CSR) Program with focus on health, education, and livelihood. This program is designed, implemented, and reviewed in partnership with community members to ensure input from the community, incorporating their own desires and constraints. PERC's CSR program is also subject to occasional third-party reviews by NGOs and academics, when needed. This approach has helped PERC achieve a high degree of host community acceptance and partnership engagement in the project sites.

## **(6) Risks due to health crisis or pandemic**

Risks related to health crisis were widely experienced when COVID-19 pandemic hit the world. There were disruptions in economic activities, global supply, and working environment. Like any other companies, PERC also recognized these risks and had to introduce innovation in its operations and working arrangements.

To manage this risk, PERC activated its Crisis Management Team (CMT) to implement protocols and guidelines to ensure business continuity while prioritizing the health of its employees and their families. Flexible working arrangements were introduced, IT infrastructure was strengthened to enable employees to work remotely, regular COVID-19 testing and monitoring were implemented, and strict health protocols were observed in the project sites and head office. In 2022, although COVID-19 cases were significantly reduced, PERC still implements health and safety protocols in offices and project sites.

## **(7) Cyber security risks**

Because of the rapid technological and digital transformations around the world, cyber security risks and attacks also increased tremendously. PERC's business may also be affected by common cyber attacks such as phishing, malwares, social engineering, and ransomware among others. Such attacks may possibly result in interruption of business, unavailability of services, or unauthorized disclosure of information.

To mitigate this risk, PERC implements cyber security measures such as firewall, endpoint protection, security policies and controls, as well as maintains a regular security information and awareness campaigns.

## **Discussion on Opportunities**

While PERC ensures multiple and strategic management of risks for business continuity, taking advantage of opportunities would also allow it to expand in the coming years.

PERC's main opportunity for continued growth is the increase in the Philippines' electricity demand. And with the current climate crisis, there will be more calls for investments in renewable energy. Already major multi-lateral financial institutions, such as the World Bank and the Asian Development Bank (ADB), as well as large private banks, have declared moratorium on loans for new coal-powered facilities. PERC could tap into this

opportunity by focusing its growth towards RE. PERC's growth strategy is anchored on judiciously selecting and developing viable projects, promoting resiliency to climate-related risks, and contributing to the country's need for indigenous and cleaner energy sources.

PERC also recognizes the opportunity to enhance investors' confidence by maintaining efficient operations of its power plants. This can be achieved through the use of technology that would optimize revenue and reduce operating costs. With a stronger connection with investors, PERC can leverage on the Company's credibility and good reputation to attract more investments, gain access to increased credit, and reduce risks related to equity partnership.

Opportunities also exist in interactions with key stakeholders such as with employees, suppliers, and host communities. By identifying each employee's abilities and providing suitable paths for professional growth, PERC will attract more talents and increase employee retention. Building trust and maintaining a professional relationship with suppliers will help in ensuring that PERC gets quality products and services as needed. Fostering good and mutually beneficial relationships with the surrounding communities through continuous, effective, and impactful CSR programs will likewise improve business sustainability and showcase the Company's commitment to being a good corporate citizen.

## Climate-related risks and opportunities

**Governance** - Disclose the organization's governance around climate-related risks and opportunities.

### **1. Describe the board's oversight of climate-related risks and opportunities**

To manage risks, which include climate-related risks, the PERC Board has established the Board Risk Oversight Committee (BROC) whose function is to oversee the risk management processes being performed at each operating level. The BROC monitors the effectiveness of the policies, procedures, and practices adopted by PERC and decides on measures to adopt to enable the Company to prepare for climate-related risks.

### **2. Describe management's role in assessing and managing climate-related risks and opportunities**

The management, in coordination with BROC, has the following roles to address climate-related risks:

- a. Reinforcing the importance of risk management and internal control by integrating them in organizational governance;
- b. Communicating opportunities for strategic or business objectives so the staff can contribute in identifying and managing risks; and
- c. Promoting a clear message for all staff on the importance of managing risks and their impact.

**Strategy** - Disclose the actual and potential impacts of climate-related risks and opportunities on the organization's businesses, strategy, and financial planning where such information is material.

### **1. Describe the climate-related risks and opportunities the organization has identified over the short, medium and long term**

The following are some of the climate-related risks that may have significant impact to the Company's business, financial condition, and results of operations:

- a. Equipment breakage due to natural disasters (e.g. typhoon, flooding);
- b. Sub-optimal performance of major power plant components (e.g. cooling tower, PV panels, etc.) due to climate-related factors (e.g. increase in temperature);
- c. Grid disruptions due to typhoons and other weather disturbances;
- d. Loss of communication lines;
- e. Breakdown of IT and networking facilities used for plant monitoring; and
- f. Damage to access roads due to natural erosion or landslides.

Amidst these risks, PERC recognizes the following opportunities that the Company may explore:

- a. Merging technology, energy systems, and advanced analytics to be able to predict outages due to temperature, humidity, precipitation changes, among others;
- b. Incorporating reinforcements in the design of power plants to curb effects of climate change;
- c. Designing a more comprehensive disaster preparedness, crisis response, and business continuity protocols;
- d. Investing more on in-house talent development to reduce dependency on third-party suppliers or service providers; and
- e. Institutionalizing further the environmental protection program for each site/project.

**Risk Management** - Disclose how the organization identifies, assesses, and manages climate-related risks

**1. Describe the organization’s processes for identifying and assessing climate- related risks**

During pre-development stage of power projects, PERC conducts a social and environmental impact assessment to determine possible risks and impacts, including those coming from climatic risks, and plan for the necessary mitigation. Aside from the baseline assessments, another stage wherein risks are also considered is during the financial and business strategy planning. This is to ensure that governance measures are in place to identify, monitor, and mitigate risks.

**2. Describe the organization’s processes for managing climate- related risks**

PERC’s renewable energy facilities are exposed to climate-related risks, such as stronger and more frequent weather disturbances. These risks are taken into account as early as the facility’s designing and planning stage. Thus, PERC practices the following climate-related risk management approaches:

- a. Taking advantage of existing technologies to mitigate impacts such as wind turbines that can withstand extreme winds, installation of lightning arresters, and other bio-engineering measures;
- b. Reinforcing and strengthening of major power plant components such as transmission poles, WTG foundations, and ground cables;
- c. Implementing protocols to monitor changes in temperature, weather, and wind patterns;
- d. Institutionalizing disaster-preparedness response protocols; and
- e. Maintaining adequate insurance coverage.

**3. Describe how processes for identifying, assessing, and managing climate- related risks are integrated into the organization’s overall risk management**

The Board of Directors, through the BROCC, is responsible for providing oversight to PERC’s fulfilment of management accountability and governance expectations in relation to management of climate-related risks. The line management is responsible for implementing the policy standards, management of

mitigating measures through periodic assessments, development of direct channels for communication with employees, and monitoring and reporting of business challenges encountered in the course of managing the climate-related risks.

PERC also engages an internal auditor to regularly review the controls and progress in implementing the mitigating measures. All employees are responsible for the proactive assessment and documentation of significant climate-related risks and taking prompt action to manage and communicate to the management for needed business decisions.

**Metrics and Targets-** Disclose the metrics and targets used to assess and manage relevant climate-related risks and opportunities where such information is material

**1. Disclose the metrics used by the organization to assess climate- related risks and opportunities in line with its strategy and risk management process**

Since PERC’s objective is to avoid plant outage or minimize plant shutdown due to climate-related risks, the most important metric used in managing risks is continuous and efficient power generation. The latter is assessed in terms of daily gross and net electricity produced, capacity factor, availability factor, and outages experienced. PERC also uses other metrics like its compliance with environmental laws, its utilized budget for repairs, and its insurance claims due to these risks, to assess how well the Company manages these climate-related risks and opportunities.

Procurement Practices

Proportion of spending on local suppliers

Disclosure	Quantity	Units
Percentage of procurement budget used for significant locations of operations that is spent on local suppliers	55	%

**Procurement Practices**

**Discussion on Impacts and Risks: Where they occur, stakeholders affected, and management approach**

PERC’s primary risk regarding supply chain is the limited choices among local suppliers due to highly technical project requirements that are often not available locally. As a consequence, many items must be sourced abroad. This leads to inventory, transport/logistics, and foreign-exchange -related risks, where PERC may stockpile items (and thus invest more capital in non-moving items), as future deliveries of these imported items may be delayed due to uncontrollable circumstances.

To manage these risks, PERC accredits various suppliers to broaden choices and ensure supplier reliability. There is also proper coordination among business units to ensure the availability of inventory, when needed; and that enough spare parts of key components are sourced in advance. PERC follows accreditation policies and processes to assess its suppliers. As a general rule, PERC partners only with credible and globally known suppliers for its major equipment to ensure that PERC gets products with global standards and quality.

Due to certain equipment being highly technical in nature, PERC has to source machinery like generators, solar PV panels, and transformers and their spare parts from overseas suppliers. An Operations and Management (O&M) agreement is entered between the equipment supplier and operating company to ensure efficient operations and ready availability of critical imported equipment and parts. On the other hand, day-to-day

supplies and simple maintenance materials and products are all sourced locally.

In 2022, there were lesser procurement-related activities due to the pandemic.

### Discussion on Opportunities

There is an opportunity to increase the Company’s support to local suppliers. At present, there is no formal or institutionalized program for such initiative. However, prioritizing purchase from local suppliers and service providers is done as a matter of practice. PERC may improve the practice by putting the preference for local suppliers into a formal policy. In addition, the RE Act of 2008 provides incentives to local RE suppliers and manufacturers in the form of VAT exemptions. If these incentives can be promoted, these local suppliers can save hundreds of millions in VAT payments.

### Anti-corruption

#### Training on Anti-corruption Policies and Procedures

Disclosure	Quantity	Units
Percentage of employees to whom the organization’s anti-corruption policies and procedures have been communicated to	100	%
Percentage of business partners to whom the organization’s anti-corruption policies and procedures have been communicated to	100	%
Percentage of directors and management that have received anti-corruption training	100	%
Percentage of employees that have received anti-corruption training	10%	%

#### Incidents of Corruption

Disclosure	Quantity	Units
Number of incidents in which directors were removed or disciplined for corruption	0	#
Number of incidents in which employees were dismissed or disciplined for corruption	0	#
Number of incidents when contracts with business partners were terminated due to incidents of corruption	0	#

### Anti-Corruption

#### Discussion on Impacts and Risks: Where they occur, stakeholders affected, and management approach

Corruption, whether it is committed by internal, external, or colluding parties, remains a risk despite policies and procedures in place designed to prevent it. Corruption results in diluted economic impact and loss of confidence in the Company by both internal and external partners.

PERC communicates its anti-corruption policies and procedures to its external partners via PERC’s Supplier Accreditation Policy. All potential suppliers must abide by the Accreditation Policy, which requires suppliers to declare relatives and friends employed with PERC and its affiliates.

PERC abides by the highest ethical and legal standards set by the House of Investments (HI) and the Yuchengco Group of Companies (YGC). PERC sets and enforces its own policies as follows (more information posted in [www.petroenergy.com.ph](http://www.petroenergy.com.ph)):

- PERC Code of Business Conduct
- PERC Related Party Transactions
- PERC Conflict of Interest
- PERC Insider Trading
- PERC Whistleblowing Policy

The above-mentioned policies cover all of PERC's directors, officers, employees, consultants, and contractors, including those of its subsidiaries.

PERC's Whistleblowing Policy enables employees to submit to their immediate manager/superior written reports and documentation on incidents of corruption or inappropriate conduct. If the employee has reason to believe that they will not receive a fair hearing and objective treatment, they may submit their written reports to the Human Resource Department (HRD). All concerns will be treated in confidence. Complaints or concerns given anonymously will be ignored unless there is a document or other corroborating evidence given together with the anonymous allegation.

All PERC employees, from rank-and-file to director-level, are made aware of PERC's anti-corruption policies during the mandatory employee orientation/reorientation. All the new employees are briefed on the Company's Code of Ethics which they have to sign-off and acknowledge. Current employees receive reorientations about the Company policies so they are reminded to comply with the Company's standards and ethics. The directors and managers of the Company also attend annual seminars on corporate governance to refresh and update their knowledge on anti-corruption measures.

In 2022, there were no incidents of corruption committed by PERC's directors, employees, nor business partners.

### **Discussion on Opportunities**

At present, only directors and managers receive training on anti-corruption. This will be extended to include other employees as part of PERC's training program. Also, suppliers are only accredited once, as a requirement for their inclusion in the supplier database. The Company may consider regular supplier audits to ensure their continued compliance with relevant laws and regulations.

## ENVIRONMENT

### Resource Management

#### Energy consumption within the organization:

Disclosure	Quantity	Units
Energy consumption (gasoline)	9,127	Liters
Energy consumption (LPG)**	0	m <sup>3</sup>
Energy consumption (diesel)	818,145	Liters
Energy consumption (electricity)	19,847,317	kWh

In 2022, there was a significant increase in total energy consumption for gasoline and diesel because employees were transported to and from work as part of continuing health and safety protocol against COVID-19.

#### **Energy consumption within the organization**

##### **Discussion on Impacts and Risks: Where they occur, stakeholders affected, and management approach**

PERC experiences reduced risk in energy availability, because it obtains most of its electricity requirement from its own renewable energy operations.

Among PERC's power plants, MGPP consumes the most electricity for its operational needs. This is mainly due to the 24/7 operations of this baseload geothermal power plant. PERC has no formal program yet in reducing energy consumption across the Company. However, PERC implements practical means to save on consumption. Air-conditioning units are maintained at 24°C and run for only nine (9) hours in the staff's quarters and for eight (8) hours in office/logistics offices. Signs and reminders to conserve electricity are also installed around the office premises. During lunch break, a 1.5 hour lights-off is also observed daily. Energy management trainings for employees are also conducted to raise awareness on energy conservation and to help in establishing systems and processes to improve energy efficiency and usage.

#### **Discussion on Opportunities**

PERC is planning to implement formal monitoring guidelines and schemes to keep track of energy reduction initiatives. The baseline information can be a tool for financial and administrative planning and for designing energy management innovations.

#### Water consumption within the organization

Disclosure	Quantity	Units
Water withdrawal	263,438.51	m <sup>3</sup>
Water consumption	264,355.51	m <sup>3</sup>
Water recycled and reused	0	m <sup>3</sup>

In 2022, there was a significant increase in water consumption and withdrawal compared to 2021 specifically in the project sites because the employees started to report on site. This resulted in increased domestic water consumption. In addition, major preventive maintenance works particularly in the Maibarara power plant was conducted, which contributed to the increase in water consumption.

## Water consumption within the organization

### Discussion on Impacts and Risks: Where they occur, stakeholders affected, and management approach

PERC sites withdraw water from the local aquifers via deep wells. These deep wells have the necessary permits from the National Water Resources Board (NWRB). The maximum amount of water allowed to be withdrawn from the aquifer is set by the permit. The risks of water consumption are from over-extraction (which may lead to ground subsidence) and competition with the local community for the water resource (which may lead to negative community relations).

To manage the risk, PERC ensures that there is proper monitoring of water use in all power plants through a water flow meter. PSC also uses a water withdrawal logbook. MGPP uses water holding tanks in both of its Fluid Collection Reinjection System (FCRS) and power plant operations.

The biggest consumer of water among PERC's projects is MGPP, where freshwater is used to dilute and quickly cool the hot brine in the open thermal ponds before being reinjected back into the reservoir. Otherwise, water consumption within PERC is limited to domestic use in the power plants and offices.

Water reduction strategies include consistent preventive maintenance of water equipment and facilities and the rapid repair of leaks or damage in the water system. NWPP also reuses its non-potable water for other non-operational activities on site.

### Discussion on Opportunities

PERC will implement formal monitoring schemes to closely manage and conserve water consumption. PERC will also continue to help in management of watershed areas such as in Makiling Forest Reserve adjacent to the MGPP and in the Bambran watershed a few km south of TSPP.

## Materials used by the organization

*N/A – no construction of new power plant in 2022*

Disclosure	Quantity	Units
Materials used by weight or volume		
• Renewable	Not Applicable	kg/liters
• non-renewable		
• Solar PV panels	0	panels
• Aggregates and back-filling materials (gravel, sand, basecourse, backfill)	0	m <sup>3</sup>
• Cement	0	tons
• Steel	0	kg
• Oil	0	liters

## Materials used by the organization

### Discussion on Impacts and Risks: Where they occur, stakeholders affected, and management approach

The quantity of materials used per year is dependent on the Company's growth plan. Materials consumption is strictly monitored, because any wasted material translates to additional cost. Materials consumption is estimated based on previous projects'/previous years' consumption and activities for that particular year.

Another risk in using such materials is the generation of hazardous wastes, such as used oil from the maintenance of the turbines. Hazardous wastes have a potential impact on the environment and human health if not handled, stored, or treated properly. More in-depth discussion on hazardous waste management is found in the Hazardous Waste Management section.

**Discussion on Opportunities**

PERC will start monitoring the renewable and non-renewable materials used in day-to-day operations, such as the reams of paper, printer ink cartridges, and other office supplies used in the Head Office, so there is awareness of the amount of materials used and the Company can plan on how to save on usage.

Ecosystems and biodiversity (whether in upland/watershed or coastal/marine)

Operational sites owned, leased, managed in, or adjacent to, protected areas and areas of high biodiversity value outside protected areas	<ul style="list-style-type: none"> <li>Maibarara Geothermal Power Project in Sto. Tomas, Batangas</li> <li>Nabas Wind Power Project in Nabas-Malay, Aklan</li> </ul>	Power plants
Habitats protected or restored	<ul style="list-style-type: none"> <li>Maibarara: 1 hectare through three planting activity</li> <li>Nabas: 7.14 hectares through tree planting activity</li> </ul>	ha
IUCN Red List species and national conservation list species with habitats in areas affected by operations	See separate tables below	

**For Maibarara Geothermal Power Project:**

**Flora:** Seven species are listed in the 2006 IUCN Red List of Threatened Species and DENR DAO 2007-01 (National Red List of Threatened Philippine Plants) as either vulnerable or critically endangered species (See table below). All the seven threatened species are trees.

Threatened Species recorded in the study area	Common name	Conservation status
<i>Artocarpus blancoi</i>	Antipolo	Vulnerable
<i>Celtis luzonica</i>	Magabuyo	Vulnerable
<i>Drynaria quercifolia</i>	Pakpak lawin	Vulnerable
<i>Koordersiendendron pinnatum</i>	Amugis	Vulnerable
<i>Macaranga grandifolia</i>	Takip asin	Vulnerable
<i>Parashorea malaanonan</i>	Bagtikan	Critically endangered
<i>Pterocarpus indicus</i>	Narra	Critically endangered

**Fauna:** No threatened species listed in the IUCN Red List and CITES List were recorded in the study area. Most of the recorded species are common and wide in distribution.

**For Nabas Wind Power Project:**

**Flora:** Only one (1) species is listed in the 2006 IUCN Red List of Threatened Species and DENR DAO 2007-01 (National Red List of Threatened Philippine Plants): narra (*Pterocarpus indicus*)

**Fauna** Seven (7) species are listed in the IUCN Red List and CITES. This means that hunting and trade of these species are strictly prohibited and is punishable by law under RA 9147 or the Philippine Wildlife Act of 1995.

Threatened Species recorded in the study area	Common name	Conservation status
<i>Sus cebifrons</i>	Visayan Warty Pig	Critically Endangered
<i>Macaca fascicularis</i>	Long-tailed macaque	CITES App. II
<i>Prionailurus bengalensis</i>	Leopard Cat	CITES II
<i>Spilornis cheela</i>	Crested Serpent Eagle	CITES II
<i>Haliastur indus</i>	Brahminy kite	CITES II
<i>Varanus salvator</i>	Water monitor lizard	CITES II
<i>Malayopython reticulatus</i>	Reticulated python	CITES II

**Ecosystems and biodiversity**

**Discussion on Impacts and Risks: Where they occur, stakeholders affected, and management approach**

Since PERC operates renewable energy power plants, attached risks related to biodiversity and ecosystem are inherently lower compared to operating fossil fuel power plants. However, these RE plants still have environmental risks. Examples of which are some changes in surrounding landscapes during the construction process, bird strikes on wind turbine towers during operations, etc.

PERC uses technological measures and cooperation with the local community to reduce impact to biodiversity and ecosystems.

PERC has two (2) facilities located adjacent to protected areas and areas of high biodiversity value: Maibarara Geothermal Power Project (adjacent to Mount Makiling Forest Reserve [MMFR]) and Nabas Wind Power Project (adjacent to Northwest Panay Peninsula Natural Park [NPPNP]). The MMFR covers 4,244 hectares and is under the jurisdiction of the University of the Philippines-Los Baños (UPLB). The NPPNP covers 12,009 hectares and is under the jurisdiction of the Northwest Panay Biodiversity Management Council (NPBMC).

For NWPP, bird strikes are mitigated through DTBird - a shutdown-on-demand technology that was installed in the wind turbines to minimize bird mortality. This system consists of several modules including the detection, dissuasion, stoppage, and collision control when the presence of birds is detected near the turbines. As important, prior to development, the environmental impact assessment study revealed that the wind farm’s project site is not a path for migratory birds.

The RE plants also take steps to be good partners with the protected area management agencies and with the local communities. MGPP has an ongoing Memorandum of Understanding (MOU) with UPLB to protect the Makiling forest through tree planting and allocation of support funds. The project funded the construction of two (2) watchtowers inside the MMFR to help in the protection and conservation of the area. The towers, similar to a lookout tower, serve as a forest station of MMFR forest guards so they can patrol the area against illegal activities, such as cutting of trees, slash and burn farming, etc.

MGPP also promotes habitat protection, which includes maintenance and protection of trees planted during the previous year. Planting and maintenance of flowering trees (fire trees *Delonix regia*) along the boundary of MMFR is covered by MOA between MGI and LGU of Sto. Tomas, Batangas in accordance with the policies of UPLB -College of Forestry and Natural Resources (UPLB-CFNR) which has jurisdiction over the area. The nearby communities were tapped for the tree planting activities, as well as the maintenance and protection of planted trees inside the MMFR.

In NWPP, the staff and communities partner together for an annual tree planting activity with continuous monitoring, protection, and maintenance of the planted trees. Information Education Campaign (IEC) on biodiversity and wildlife and forest protection for the host community are likewise conducted.

**Discussion on Opportunities**

The Nabas wind farm has been identified as a potential ecotourism site, and NWPP is already constructing a viewing deck to promote and enhance the ecotourism features of the wind farm. PERC is looking forward to developing an ecotourism plan with the LGUs and local communities, alongside the current construction of the view deck. The planned ecotourism development aims to increase awareness in environment protection and to provide additional sources of income for the local government and communities.

**Environmental impact management**

**Air Emissions**

*GHG \**

<b>Disclosure</b>	<b>Quantity</b>	<b>Units</b>
Direct (Scope 1) GHG Emissions	155	Tons CO <sub>2</sub> e
Energy indirect (Scope 2) GHG Emissions	1,986	Tons CO <sub>2</sub> e
Emissions of ozone-depleting substances (ODS)	0	Tons

\* GHG calculations from <https://www.epa.gov/energy/greenhouse-gas-equivalencies-calculator>

**Air Emissions**

**Discussion on Impacts and Risks: Where they occur, stakeholders affected, and management approach**

As a developer and operator of renewable energy facilities, majority of PERC’s overall GHG emissions are Scope 1 due to the fuel consumption of necessary equipment and vehicles. MGPP generates and uses its own electricity 24/7. NWPP also operates 24 hours, while TSPP generates its own electricity during the day and get feedback power from the main grid at night.

Basic energy reduction initiatives are already in place, such as use of energy-efficient lighting and equipment, scheduled operation of air conditioners in offices and staff quarters, and regular preventive maintenance of equipment for efficient usage.

The 20 MW Maibarara Geothermal Power Project has been approved under the Clean Development Scheme of the UN Framework Convention on Climate Change and is qualified for carbon credits. This approval signifies PERC’s commitment to lower carbon emission through its renewable energy operations.

## Discussion on Opportunities

PERC is targeting emissions reduction from transportation such as from fuel use through proper vehicle assignment (maximum seating capacity), carpooling in going to office, or by telecommuting, if applicable. At present, there is no explicit policy on reducing emissions.

PERC recognizes the opportunities in telecommuting as an alternative working arrangement to reduce GHG emissions. Although this is not possible for staff assigned in the power plant operations and maintenance, this can be applied to the staff in the business support units. PERC will continue to strengthen the robustness and security of its IT to allow for safe and efficient remote work for the staff whenever possible or needed. In addition, PERC will also increase its investments in online collaboration tools and platforms to enable staff engagement in a remote work setting.

### Air pollutants

Disclosure	Quantity	Units
NO <sub>x</sub> (NO <sub>2</sub> )	104	mg/Nm <sup>3</sup>
SO <sub>x</sub>	Not Applicable	µg/Nm <sup>3</sup>
Persistent organic pollutants (POPs)	Not Applicable	Kg
Volatile organic compounds (VOCs)	Not Applicable	Kg
Hazardous air pollutants (HAPs)	Not Applicable	µg/Nm <sup>3</sup>
Particulate matter (PM)	Not Applicable	µg/Nm <sup>3</sup>
CO	273	mg/Nm <sup>3</sup>
H <sub>2</sub> S	Below 0.007	ppm

\*Air pollutant disclosure from MGPP only. NWPP and TSPP do not emit air pollutants during operations.

### **Air pollutants**

#### **Discussion on Impacts and Risks: Where they occur, stakeholders affected, and management approach**

As a developer and operator of renewable energy power plants, PERC emits much less air pollutants compared to power plants using fossil fuel. PERC's major source of air pollutants during operations is the MGPP. The NWPP and TSPP do not emit air pollutants during operations. PERC also does not use ozone-depleting substances in its operations.

MGPP emits 97% less sulfur compounds and 99% less CO<sub>2</sub> compared to fossil fuel plants of similar size. In particular, geothermal plants emit NO<sub>x</sub>, CO, and H<sub>2</sub>S as part of its operations. Hydrogen sulfide is naturally found in geothermal reservoirs and is the source of the "rotten egg" smell in geothermal facilities.

In MGPP, NO<sub>2</sub> and CO are tested annually, while H<sub>2</sub>S levels are monitored regularly through Continuous Air Monitoring Stations (CAMS) located upwind and downwind the project site. Results show that the levels of NO<sub>2</sub>, CO, and H<sub>2</sub>S are compliant with regulatory requirements and are below the limits set by the Department of Environment and Natural Resources (DENR).

### **Discussion on Opportunities**

PERC will continue to monitor emissions and ensure compliance with the standards set by regulatory agencies. The Company will also look into, and study, available applicable technologies and process improvements that could help reduce air pollutants.

PERC is also studying the viability of H<sub>2</sub>S abatement systems. These systems, however, have not yet been installed in any local geothermal plants and have unconvincing success rates abroad. More information can be found in the Significant Impacts to Local Communities section.

## Solid and Hazardous Wastes

### Solid Waste

Disclosure	Quantity	Units
Total solid waste generated	61,909.62	kg
Reusable	0	kg
Recyclable	4,262	kg
Composted (landscaping waste + composted food waste)	1,353	kg
Incinerated	0	kg
Residuals/Landfilled	3,242	kg

In 2022, there was a significant increase in solid waste generated due to the scheduled preventive maintenance of Maibarara geothermal power plant. Waste monitoring and management are in place to ensure that effects of these wastes are mitigated.

### **Solid waste management**

#### **Discussion on Impacts and Risks: Where they occur, stakeholders affected, and management approach**

Solid waste is a risk to both human health and the environment as a whole. Improper disposal of solid waste could lead to the spread of diseases and release of harmful substances into the environment. It also opens the Company to legal and financial repercussions.

The power plants are able to either compost or reuse food and garden waste. Food waste from the kitchen of the Control Buildings and the power plants is collected and composted or given to community members to be used as feed for domestic animals. Fruit and vegetable peelings and garden wastes are also composted.

The power plants also generate recyclable waste such as scrap tires, PET bottles, and cans. Scrap tires are donated to schools to be converted into planters. PET bottles are turned into eco-bricks as part of a community recycling initiative with nearby schools and communities.

All other recyclable materials and non-recyclable materials are disposed through DENR-accredited waste haulers. At present, the waste generation in the head office is not monitored. Overall, all power plants strictly comply with the proper management and disposal of wastes in relation to RA 9003 and RA 6969 of DENR EMB.

### **Discussion on Opportunities**

PERC is looking forward to implementing more projects focused on upscaling wastes to be converted into more useful materials. The Company will also look at expanding the eco-brick project to involve more stakeholders. Another project under study is the provision of mobile libraries converted from a container van. These and other recycling initiatives will be more formalized and monitored.

## Hazardous Waste

Disclosure	Quantity	Units
Total weight of hazardous waste generated		
• Used lead acid batteries (D406)	80	kg
• Used oil (I101)	11,745	Liters
• Busted fluorescent lamps (D407)	75	kg
• Waste electrical and electronic equipment (M506)	1,478	kg
• Other hazardous waste	48,532	kg
Total weight of hazardous waste transported/disposed properly	60,905	kg

### **Hazardous waste management**

#### **Discussion on Impacts and Risks: Where they occur, stakeholders affected, and management approach**

Renewable energy power plants generate much less hazardous wastes compared to fossil fuel power plants. Such wastes have potential impact on the environment and human health if not properly handled. Risks applicable to PERC's operations include accidental spills, deliberate releases into the environment, improper storage, and improper disposal.

All PERC power plant operations comply with DENR rules and regulations on hazardous waste handling, storage, transport, and treatment/disposal. Each project site has a Pollution Control Officer (PCO) who is responsible for organizing the collection, transportation, , and disposal of hazardous waste off-site. In MGPP, the monitoring and management of hazardous waste has been formalized in the *Management of Waste from Geothermal Operation* manual.

Prior to disposal, all hazardous wastes are stored in impermeable and covered bins within a designated onsite hazardous waste storage facility. Training for hazardous waste handling and storage is also provided for personnel such as security, janitorial, and third party contractors, who may come into contact with the hazardous waste.

Used oil from the wind and geothermal power plants are disposed in partnership with *Bantay Langis*, the used oil recycling program of ABS-CBN Lingkod Kapamilya Foundation, Inc. (ALKFI). PERC donates the monetary value of the used oil to ALKFI, which goes to the Foundation's environmental protection programs.

All other hazardous wastes are transported and treated by hazardous waste transporters and treaters accredited by DENR. All treated wastes are issued with a Certificate of Treatment/Disposal by the partner treater.

#### **Discussion on Opportunities**

PERC may extend the partnership with ALKFI for hazardous waste to other projects. Current protocols, procedures, and technologies used may also be assessed to see if there are ways to minimize the generation of hazardous waste. An onsite audit of hazardous waste treaters' facilities may also be conducted to ensure that the hazardous wastes are treated properly.

## Effluents

Disclosure	Quantity	Units
Total volume of water discharges	8,085	m <sup>3</sup>
Percent of wastewater recycled	0	%

## Effluents

### Discussion on Impacts and Risks: Where they occur, stakeholders affected, and management approach

Improper wastewater discharge has a negative effect on the environment through pollution, increased sedimentation, and potentially spreading of diseases. It also opens the Company to legal repercussions.

All the power plants generate domestic wastewater. The wastewater goes through a three-chambered septic tank with concrete flooring. Once full, the septic tank is siphoned by an accredited third party contractor for proper disposal. The building where the head office is located also has its own septic tank.

In addition to effluents, MGPP also monitors the water quality of the brine used in its turbines.

MGPP uses a single-flash, condensing steam power cycle. The setup pumps hot water at high pressure from the reservoir into a “flash tank” on the surface. Because the flash tank is at a much lower temperature, the hot water quickly “flashes” into steam. The steam powers the turbines that generate electricity. Afterwards, the steam is cooled and condenses back into water (the brine). The brine is dumped into a thermal pond to allow further cooling, before it is reinjected into the ground through the reinjection wells.

The brine is not considered “effluent” because it is not discharged into the environment after use, but is still monitored because it may contain heavy metals that could contaminate groundwater. It is monitored through regular sampling and checking of its components.

### Discussion on Opportunities

PERC will continue to research on and study available technologies that may help in managing water discharges. The Company will also continue to ensure compliance with regulatory obligations and ensure that any water discharge will not harm the environment and surrounding communities.

## Environmental compliance

### Non-compliance with Environmental Laws and Regulations

Disclosure	Quantity	Units
Total amount of monetary fines for non-compliance with environmental laws and/or regulations	0	PhP
No. of non-monetary sanctions for non-compliance with environmental laws and/or regulations	0	#
No. of cases resolved through dispute resolution mechanism	0	#

## **Environmental compliance**

### **Discussion on Impacts and Risks: Where they occur, stakeholders affected, and management approach**

PERC prioritizes compliance with all environmental laws applicable to the Company's operations. Any non-compliance has regulatory risk, resulting in fines and/or sanctions which would affect the Company's credibility or worse disrupt the Company's operations. More importantly, the risk of actual environmental damage may also affect the Company's relationship with surrounding communities. Reputational risk is also present, as non-compliance may result in the stakeholders losing confidence in PERC.

PERC's approach in implementing compliance is to ensure that each project site has a DENR-accredited Pollution Control Officer (PCO) who is responsible for complying with permitting and reportorial requirements. An annual strategic and assessment planning is conducted with the PCOs in order to assess and strategize plans and programs for the coming year. PERC's good relationship with the local community also gives it the opportunity to investigate or remedy potential complaints before it becomes a regulatory issue.

In 2022, PERC did not receive any monetary fines nor non-monetary sanctions for non-compliance with environmental laws.

### **Discussion on Opportunities**

PERC will continue to foster good relationships with regulating agencies and local communities to ensure that environmental issues are easily monitored, documented, and remedied. PERC will also capitalize on existing collaborative and online tools to allow for a centralized monitoring and documentation among the PCOs. PERC will also explore on how to use analytics to better understand environmental data and enable the Company to predict and anticipate possible environmental issues.

## SOCIAL

### Employee Management

#### Employee Hiring and Benefits

##### Employee data

Disclosure	Quantity	Units
Total number of employees <sup>1</sup>	154	
a. Number of female employees	47	#
b. Number of male employees	107	#
Attrition rate <sup>2</sup>	6.49	%
Ratio of lowest paid employee against minimum wage	1.55:1*	ratio

\*Lowest-paid employee is paid 1.43x the minimum wage.

1 Disclosure includes permanent employees only

2 Attrition rate = (no. of new hires – no. of turnover)/(average of total no. of employees of previous year and total no. of employees of current year. May also be considered as Labor Turnover.

##### Employee benefits

List of Benefits	Y/N	FEMALE		MALE	
		% coverage	% availed	% coverage	% availed
SSS	Y	100%	33%	100%	44%

AVAILED – Proportion of covered permanent employees who used the benefit

1 Parental Leaves include Maternity, Paternity, and Solo Parent leaves

### Employee hiring and benefits

#### Discussion on Impacts and Risks: Where they occur, stakeholders affected, and management approach

Due to its technical operations, PERC requires personnel with highly technical skill sets. Because of this, there is high competition among energy companies for skilled personnel.

The Company implements stringent, non-discriminatory applicant screenings to ensure not only skills and job match, but diversity in the workforce. The Company also continuously studies industry best practices in compensation and benefits to create competitive and attractive employment offers to new hires.

Once hired, employees benefit from a strong mentor-mentee approach, where coaching and in-house training are extensively practiced. Reporting lines among senior management, middle management, and rank-and-file employees are kept simple and non-bureaucratic to encourage constant communication and learning across all levels. These ensure that strong work ethics are passed on and cultivated among the staff.

PERC offers competitive compensation and employee benefits and promotes work-life balance. To keep talents within the Company, PERC invests in employee well-being programs to maintain high morale and keep employee turn-over low. The Company also promotes teamwork by ensuring proper turnover of tasks during leaves of absence. This allows the employee to take time off when needed, while ensuring continued function of the business unit during his/her absence. Employees are also provided with career and professional growth opportunities to maximize their talents and abilities.

PERC also provides further educational support by sending its staff to various certification trainings. Key staff are sent to supervisory and managerial training courses in the Asian Institute of Management (AIM). Engineers are also sent to attend technical courses overseas in geothermal, wind, and solar power plant operations and management.

**Discussion on Opportunities**

To further promote work-life balance among employees, PERC will explore the applicability of telecommuting to allow the staff to have more time with their families. Furthermore, as the Company grows and become more profitable, PERC will study how it can provide additional incentives and long-term benefits to its employees.

**Employee Training and Development**

Disclosure	Quantity	Units
Total training hours provided to employees	5,087	hours
a. Female employees	693	hours
b. Male employees	4,394	hours
Average training hours provided to employees	33.04	hours/employee
a. Female employees	41.07	hours/employee
b. Male employees	14.75	hours/employee

**Employee training and development**

**Discussion on Impacts and Risks: Where they occur, stakeholders affected, and management approach**

As a Company operating in a highly technical field, PERC needs to constantly update its employees’ knowledge and expertise. Since PERC personnel consists of highly trained individuals with a specific set of technical skills, the Company identifies employee piracy by other energy companies as a risk.

To address this, the Company continuously provides in-house and external trainings to employees to promote career and professional growth. There is also a service bond for every training rendered, depending on the total training cost.

## Discussion on Opportunities

PERC will continue to provide trainings to the employees. This will also serve as venues to identify future leaders of the Company to ensure business sustainability. Career development activities also allow the HR Department to review career gaps and design more effective training programs for employees.

### Labor-Management Relations

Disclosure	Quantity	Units
% of employees covered with Collective Bargaining Agreements	0	%
Number of consultations conducted with employees concerning employee-related policies	Not Applicable	#

PERC employees are not covered by a Collective Bargaining Agreement.

### **Labor-Management relations**

#### **Discussion on Impacts and Risks: Where they occur, stakeholders affected, and management approach**

Good relationships between PERC management and employees is necessary to PERC's business sustainability. Risks related to labor-management relation include business disruptions due to potential negative impact of employee-employer or employee-employee conflicts. To address these risks, PERC ensures that platforms for grievances are well-established and communicated to employees.

PERC employs a peace mechanism to resolve employees' grievances and concerns with other employees. In the mechanism, the employees are advised to try to resolve the grievances as close to the source as possible through informal or verbal means. If the matter still cannot be resolved, the process continues and becomes formal, wherein complainants must submit a written complaint to be followed by a mediation meeting. Should the parties fail to reach amicable settlement, the grievance shall be elevated before a panel of three (3) members to finally resolve the dispute.

At the management level, employees are consulted, usually informally or through direct communication, if there are issues or concerns that could affect how they work, such as policy changes. To ensure a good working environment, the Company also organizes teambuilding sessions and social gatherings among employees. These activities enable the group to form a strong bond among one another and to promote teamwork.

## Discussion on Opportunities

To further strengthen labor-management relations, PERC will promote more open dialogues and communication across all levels of function. PERC will also design and distribute a PERC Employee Handbook to help the employees understand PERC's corporate culture, core values, and principles. The Handbook will also contain operational guidelines that will equip the staff to work harmoniously with others and to help them adapt, innovate, and evolve as a PERC employee and as a person. Furthermore, PERC will continue to offer career improvement and work-life balance opportunities so the employees will feel valued and inspired.

## Diversity and Equal Opportunity

Disclosure	Quantity	Units
% of female workers in the workforce	47	%
% of male workers in the workforce	107	%
Number of employees from indigenous communities and/or vulnerable sector*	0	#

\*Vulnerable sector includes, elderly, persons with disabilities, vulnerable women, refugees, migrants, internally displaced persons, people living with HIV and other diseases, solo parents, and the poor or the base of the pyramid (BOP; Class D and E).

### Diversity and equal opportunity

#### Discussion on Impacts and Risks: Where they occur, stakeholders affected, and management approach

PERC values diversity by observing non-discriminatory practices in the hiring process. PERC focuses on capabilities, skills, and qualifications of potential employees. This allows PERC to reduce risks associated with lack of diversity, including unwanted limitations in perspectives that can affect effective product and service development and highly-informed decision making. Promoting diversity can also help manage risks to brand and reputation.

The Company has started providing more local and international training in management and energy systems for female employees. Female engineers are also assigned to take on more supervisory roles in resource management and operations.

PERC is also providing opportunities to hire from local communities for the upkeep and simple maintenance works in the power plant sites. In PWEI, local communities were trained to install the geotextile and coco-fibers used for slope stabilization.

#### Discussion on Opportunities

PERC recognizes that there are still opportunities to explore in terms of increasing female participation in traditionally male-dominated units such as in operations, which can positively impact brand and reputation and organizational perspectives.

The Company will continue the increased training opportunities and availability of supervisory/managerial roles for female engineers.

## Workplace Conditions, Labor Standards, and Human Rights

### Occupational Health and Safety

Disclosure	Quantity	Units
Safe Man-Hours <sup>1</sup>	517,378	Man-hours
No. of work-related injuries	1	#
No. of work-related fatalities	0	#
No. of work related ill-health	0	#
No. of safety drills/trainings	406	hours

<sup>1</sup> Safe man-hours for 2022.

## Occupational health and safety

### Discussion on Impacts and Risks: Where they occur, stakeholders affected, and management approach

Given the nature of renewable energy power plants, there are several safety-related risks. For example, there are risks associated with working on heights for wind farm operations. The plants are also exposed to risks like earthquakes, fires, typhoons, and other natural disasters, which may result in safety incidents. There are also manmade risks such as risks in operating large equipment and working with chemicals and hazardous materials.

To mitigate these risks, standard operating procedures for health and safety of the highest standards are observed. This is to ensure a safe working environment for employees. There are Safety and Security Officers assigned to all sites to ensure that safety and health standards are implemented. Since there is a risk in working at heights, PERC provides trainings and certifications specifically for that job. Annual first-aid drills are done in all sites.

There are also annual OHS seminars and trainings to ensure that employees are updated on best practices in health and safety. In 2022, 406 employee training hours were dedicated to health and safety training. To further promote a culture of safety, the Company gives incentive tokens to employees if they are able to perform with no lost time accident.

As a result of PERC's safety program and initiatives, PERC's operating power facilities have been recognized for excellence in occupational safety by the DOE and Safety and Health Association of the Philippine Energy Sector, Inc. (SHAPES, Inc.).

### Discussion on Opportunities

PERC will continue to cultivate the culture of health and safety across its operations. The Company will work continuously with other OHS practitioners to enable a sharing of best practices in OHS.

### Labor Laws and Human Rights

Disclosure	Quantity	Units
No. of legal actions or employee grievances involving forced or child labor	0	#

**Do you have policies that explicitly disallows violations of labor laws and human rights (e.g. harassment, bullying) in the workplace?**

Topic	Y/N	If Yes, cite reference in the Company policy
Forced labor	No	
Child labor	No	
Human rights	No	

## Labor laws and human rights

### Discussion on Impacts and Risks: Where they occur, stakeholders affected, and management approach

PERC ensures ethical business by abiding by its Code of Ethics and Business Conduct. While forced labor, child labor, and human rights are not explicitly discussed in formal policies, existing laws and regulations on labor and human rights are deemed written in the Company's policies and are strictly observed as part of the Company's compliance with all national and local laws and regulations around these issues.

### Discussion on Opportunities

There is an opportunity for PERC to strengthen its commitment to the promotion of human rights. PERC could include in its Company policies, specific provisions on human rights, including anti-child labor, anti-forced labor, and respect for vulnerable groups.

## Supply Chain Management

### Do you have a supplier accreditation policy? If yes, please attach the policy or link to the policy: YES

Procurement Shared Services (PSS) is a shared procurement services organization for all YGC members, including PERC and its subsidiaries. It is responsible for providing essential procurement shared services to YGC members including, but not limited to, vendor management, strategic sourcing of repetitive items, management of big ticket purchases, enterprise spend analysis, and procurement risk management. It also develops, implements, and enforces procurement policies, procedures, guidelines, and practices for all YGC members. Aside from this, PERC also has its own Supplier Accreditation Policy.

### Procurement Shared Services (PSS) Supplier Accreditation Policy:

Topic	Y/N	Link or reference to policy
Environmental performance	N	Not explicitly mentioned in the PSS Supplier Accreditation Policy, but potential suppliers must submit copies of relevant valid environmental permits as part of the Supplier Profile Form required for accreditation.
Forced labor	N	Not explicitly mentioned in the PSS Supplier Accreditation Policy, but it is implicit due to suppliers being required to comply with all laws.
Child labor	N	Not explicitly mentioned in the PSS Supplier Accreditation Policy, but it is implicit due to suppliers being required to comply with all laws.
Human rights	N	Not explicitly mentioned in the PSS Supplier Accreditation Policy, but it is implicit due to suppliers being required to comply with all laws.
Bribery and corruption	Y	Code of Ethics for Suppliers, section on Bribes, Kickbacks, and Gifts from Suppliers

### PERC Supplier Accreditation Policy:

Topic	Y/N	Link or reference to policy
Environmental performance	N	PERC-OP-01A Accreditation of Suppliers <ul style="list-style-type: none"> <li>Required environmental permits, if any</li> </ul>
Forced labor	N	Not explicitly mentioned in the PERC Supplier Accreditation Policy, but it is implicit due to suppliers being required to comply with all laws.
Child labor	N	Not explicitly mentioned in the PERC Supplier Accreditation Policy, but it is implicit due to suppliers being required to comply with all laws.

Human rights	N	Not explicitly mentioned in the PERC Supplier Accreditation Policy, but it is implicit due to suppliers being required to comply with all laws.
Bribery and corruption	Y	Section 18: Bribery as cause for blacklisting of accredited supplier

## Supply chain management

### Discussion on Impacts and Risks: Where they occur, stakeholders affected, and management approach

PERC identifies possible risks related to uncontrollable external factors (e.g. a pandemic) that have a large impact on the general economy and could possibly affect PERC's supply schedules and availability. To mitigate this, PERC partners with international and local suppliers with good track record and credibility. These firms are known to have good practices in business continuity and are backed by strong financial and management foundation.

The PERC supplier accreditation process is subject to the following:

1. Supplier's submission of required documents;
2. Site visit of PERC Purchasing and Logistics;
3. Report on site visit, quality of items delivered, and interview of the Supplier's various suppliers and other customers; and
4. Review and approval by the Accreditation Committee.

Suppliers are assessed based on credentials of the company, including its track record on compliance with existing laws and regulations, price and credit terms, span of business to other clientele, years in business, capitalization, and successful transactions with others.

PERC reviews the list of accredited suppliers annually. Product and service review include the following criteria: quality of products and services in compliance with requirements, compliance with delivery time, competitive prices and terms of payments, timely responses to queries, and after-sales service. In addition, under provision No. 18 of the PERC's Supplier Accreditation Policy, suppliers are blacklisted if found to be bribing anybody in the Company.

At present, the PERC accreditation policy does not include assessment of environmental and social risks, aside from required regulatory compliance (e.g. DENR permits, DOLE clearance, etc.). The policy is also limited to Tier 1 suppliers, so this may affect the effectiveness of suppliers' assessment and key supply chain risks may be overlooked.

### Discussion on Opportunities

PERC may explore enhancing supplier assessment to include other sustainability criteria. Moreover, PERC can also work on including Tier 2 suppliers (sub-suppliers) to enhance evaluation and minimize exposure to supply chain risks.

## Relationship with Community

### Significant Impacts on Local Communities

Operations with significant (positive or negative) impacts on local communities (exclude CSR projects; this has to be business operations)	Location	Vulnerable groups (if applicable) *	Does the particular operation have impacts on indigenous people (Y/N)?	Collective or individual rights that have been identified that or particular concern for the community	Mitigating measures (if negative) or enhancement measures (if positive)
Maibarara Geothermal Power Project	Sto. Tomas, Batangas	Not Applicable	No	Odor coming from the geothermal plant caused by H <sub>2</sub> S	Continuous Air quality Monitoring System (CAMS) installed near facility, shows H <sub>2</sub> S concentrations are within or below DENR standards  Constant engagement with community to educate them on plant operations and reassure compliance with DENR
Nabas Wind Power Project	Nabas-Malay, Aklan	Not Applicable	No	Local hiring for applicable jobs	Health, Education, and Livelihood Projects
Tarlac Solar Power Project	Tarlac City	Not Applicable	No	Local hiring for applicable jobs	Health, Education, and Livelihood Projects

\*Vulnerable sector includes children and youth, elderly, persons with disabilities, vulnerable women, refugees, migrants, internally displaced persons, people living with HIV and other diseases, solo parents, and the poor or the base of the pyramid (BOP; Class D and E)

For operations that are affecting IPs, indicate the total number of Free and Prior Informed Consent (FPIC) undergoing consultations and Certification Preconditions (CPs) secured and still operational and provide a copy or link to the certificates if available: **NOT APPLICABLE**

Certificates	Quantity	Units
FPIC process is still undergoing	Not Applicable	#

### Significant impacts on local communities

#### Discussion on Impacts and Risks: Where they occur, stakeholders affected, and management approach

As an operator of RE generation facilities, PERC has much less impact on the local community compared to standard fossil fuel power plants. However, impacts still exist through potential air pollution from the power

plants (geothermal) and competition for water resources. PERC mitigates these by complying with all environmental regulations and consistent engagement with the community.

An example of this is the engagement between MGPP and a nearby residential community. The residential community complained of foul odor coming from operations. The odor was hydrogen sulfide (H<sub>2</sub>S), which is a gas that is inherent in all geothermal fields and is not “generated”. In 2013, MGPP installed two Continuous Air Quality Monitoring Stations (CAMS) to monitor H<sub>2</sub>S: one in the upwind and one in the downwind side of the project area, about 400-500m from the power plant complex.

Results of the CAMS show that H<sub>2</sub>S levels are below the DENR ambient limit of 0.07ppm. Additional air quality monitoring through the services of an independent third-party has been implemented since 2015, even if complaints were not coming from residents nearest the community, but from an affluent gated community farther away from the project site. MGPP continues to hold dialogues with the community by giving numerous presentations explaining how a geothermal power plant operates and how its environmental and social impact are mitigated and managed.

PERC’s projects involving the local communities have also received recognition both locally and internationally. Some of these include:

- **2017:** PWEI was awarded by Asian Power Magazine with the 2017 Environmental Upgrade of the Year Award for its innovative environmental protection program that simultaneously enhances the ecotourism value of the area while providing livelihood and skills development for its host communities;
- **2018:** PWEI received a citation from DENR, commending its efforts on the site rehabilitation and restoration. In the citation, DENR requested to present its environmental programs to other contractors and project developers in Aklan to serve as guide and model;
- **2019:** PSC was chosen by ASEAN Business Awards as the Philippine winner; and
- **2017 to 2019:** PERC received the Outstanding Community Awards from PEZA for three (3) consecutive years.
- **2020:** PWEI received the Top Community Care Award from MORS’ Asia Corporate Excellence & Sustainability Awards (ACES)
- **2020:** PSC became a Hall of Fame Awardee of PEZA’s Outstanding Community Awards

### **Discussion on Opportunities**

To improve further the relationship with communities, PERC will continue its CSR program under the *We Power H.E.L.P.* banner. The Company will also assist the communities so that they could access RE incentives, such as the ER1-94 Benefit to Host Communities from the DOE. PERC will assist them in terms of drafting project proposals, opening bank accounts, and implementing and monitoring approved projects.

## Customer Management

### Customer Satisfaction

Disclosure	Score	Did a third party conduct the customer satisfaction study (Y/N)?
Customer satisfaction	None	Not Applicable

### Customer management

#### Discussion on Impacts and Risks: Where they occur, stakeholders affected, and management approach

As an energy generator, PERC's customers are retail electricity suppliers, Wholesale Electricity Spot Market (WESM) participants, and the government as represented by the National Transmission Corporation (TransCo). Risks in customer management include being unable to meet contractual demands due to force majeure or abrupt changes in government policies, which may lead to decreased customer satisfaction and possible termination of supply contract.

To mitigate this risk, PERC ensures a good relationship with its customers through constant meetings and dialogues.

#### Discussion on Opportunities

Currently, PERC does not have a formal survey questionnaire to score customer satisfaction, but this can be included as one area for improving future customer management.

### Health and Safety

Disclosure	Quantity	Units
No. of substantiated complaints on product or service health and safety*	0	#
No. of complaints addressed	0	#

*\*Substantiated complaints include complaints from customers that went through the organization's formal communication channels and grievance mechanisms as well as complaints that were lodged to and acted upon by government agencies.*

### Health and Safety

#### Discussion on Impacts and Risks: Where they occur, stakeholders affected, and management approach

PERC considers the health and safety of its product (electricity from renewable energy) to be a top priority. Risks include potential damage to equipment and loss of life.

PERC supplies electricity from renewable energy to the grid. Prior to the start of any project, a Grid Impact Study is done with the National Grid Corporation of the Philippines (NGCP) to ensure that the grid can handle the generated electricity. From the geothermal steam turbines, wind turbines, and solar panels, the electricity goes to the switchyard then to a substation so it can be safely (with correct voltage) distributed through the transmission lines, and finally to household and industrial end-users.

#### Discussion on Opportunities

PERC is currently evaluating its policies to ensure that it continues to protect customer health and safety and that the policies are updated and compliant with current laws and regulations.

### Marketing and labelling

Disclosure	Quantity	Units
No. of substantiated complaints on marketing and labelling*	0	#
No. of complaints addressed	0	#

*\*Substantiated complaints include complaints from customers that went through the organization's formal communication channels and grievance mechanisms as well as complaints that were lodged to and acted upon by government agencies.*

Company marketing and labelling is not material to PERC, as its customers are retail electricity suppliers, WESM participants, and TRANSCO.

### Customer privacy

Disclosure	Quantity	Units
No. of substantiated complaints on customer privacy*	0	#
No. of complaints addressed	0	#
No. of customers, users and account holders whose information is used for secondary purposes	0	#

*\*Substantiated complaints include complaints from customers that went through the organization's formal communication channels and grievance mechanisms as well as complaints that were lodged to and acted upon by government agencies.*

### **Customer privacy**

#### **Discussion on Impacts and Risks: Where they occur, stakeholders affected, and management approach**

As a matter of policy, PERC respects and upholds data privacy rights and ensure that all personal data collected from customers, suppliers, and other third parties are processed pursuant to the provisions of the Data Privacy Act of 2012. Risks due to loss of customer privacy include damage to the companies' reputation, disruption in operations, possible legal liabilities, and financial loss.

To mitigate the risk, PERC puts utmost importance to the privacy of its external and internal customers through the following data handling guidelines:

- PERC only collects data for the Company's business purpose and interest
- PERC receives consent from customers through signed Data Protection and Confidentiality Agreements
- The access to and use of collected data are only allowed by authorized representatives of PERC and are protected by adequate physical and digital protection.
- Data that are no longer necessary are deleted, except in cases identified by PERC's Legal and HR Departments.

PERC is also covered with Cyber Insurance Policy that includes protection to Data Privacy exposures. In 2022, PERC did not receive any substantiated complaints on customer privacy. PERC has also designated a Data Privacy Officer (DPO) and has implemented a Data Privacy Manual.

#### **Discussion on Opportunities**

PERC can still improve its adherence to the Data Privacy Act by strengthening its policies on data privacy and constant awareness promotion and education among its employees.

## Data Security

Disclosure	Quantity	Units
No. of data breaches, including leaks, thefts and losses of data	0	#

### Data security

#### Discussion on Impacts and Risks: Where they occur, stakeholders affected, and management approach

Increased use of technology also increases the risks in cyberattacks and data breaches. This is a risk that is also recognized by PERC for its power plant and business operations. To mitigate the risk, PERC strengthened its IT infrastructure and processes. This includes security hardening, standardization, and implementation of IT policies and guidelines for all employees. PERC also ensures that Cyber Insurance is in place and up-to-date to mitigate cyber fraud and cybersecurity risks.

#### Discussion on Opportunities

PERC's data security can be improved further by strengthening adherence to Data Privacy Act and ensuring that employees are aware on how to avoid data breaches and leaks.

## UN SUSTAINABLE DEVELOPMENT GOALS

### Product or Service Contribution to UN SDGs

Key products and services and its contribution to sustainable development.

Key Products and Services	Societal Value / Contribution to UN SDGs	Potential Negative Impact of Contribution	Management Approach to Negative Impact
Renewable energy	7.2 Increase in global percentage of renewable energy  7.B Expand and upgrade energy services for developing countries	Land use changes  Potential impacts to biodiversity  Competition with local community for freshwater sources	Environmental Impact Assessment (EIA) for project sites  Site rehabilitation and protection through bioengineering measures  Partnership with PAMB, LGUs, NGOs, local community, and other stakeholders for biodiversity protection  Controlled usage of freshwater

PetroEnergy Resources Corporation (PERC) renewable energy (RE) subsidiary PetroGreen Energy Corporation, has equity ownership in three (3) companies that operate five (5) separate power stations:

- Maibarara Geothermal, Inc. (MGI), developer and operator of Maibarara-1 (20 MW) and Maibarara-2 (12 MW) Geothermal Power Project in Sto. Tomas, Batangas;
- PetroWind Energy, Inc. (PWEI), developer and operator of Nabas-1 (36 MW) and Nabas-2 (13.2 MW) Wind Power Project in Nabas-Malay, Aklan
- PetroSolar Corporation (PSC), developer and operator of Tarlac-1 (50 MW<sub>DC</sub>) and Tarlac-2 (20 MW<sub>DC</sub>) Solar Power Project in Tarlac

**NOTE:**

This general form is applicable to companies engaged in Agriculture, Fishery, Forestry, Mining, and Quarrying, Manufacturing, Electricity, Gas and Water, Construction, Wholesale and Retail Trade, Transportation, Storage and Communications, Hotels and Restaurants, Real Estate, Community, Social and Personal Services, other forms of production, and general business operations. This form is also applicable to other companies that do not have industry-specific Special Forms. Special forms shall be used by publicly-held companies and those engaged in non-bank financial intermediation activities, credit granting, and activities auxiliary to financial intermediation, which require secondary license from SEC.

Domestic corporations are those which are incorporated under Philippine laws or branches/subsidiaries of foreign corporations that are licensed to do business in the Philippines where the center of economic interest or activity is within the Philippines. On the other hand, foreign corporations are those that are incorporated abroad, including branches of Philippine corporations operating abroad.

Financial Institutions are corporations principally engaged in financial intermediation, facilitating financial intermediation, or auxiliary financial services. Non-Financial institutions refer to corporations that are primarily engaged in the production of market goods and non-financial services.

**Item No. 9 – Other Events**

Yuchengo-led PetroEnergy Resources Corporation's (PERC) consolidated net income as of September 30, 2022 improved by 24% to P677MM from P544MM over the same period last year.

The bulk of PERC's revenues is derived from electricity sales of its RE operating units under holding firm PetroGreen Energy Corporation (PGEC). These include the 32MW Maibarara Geothermal Project of Maibarara Geothermal, Inc., the 70MW Tarlac Solar Project of PetroSolar Corporation, and the 36MW Nabas-1 Wind Project of PetroWind Energy Inc. Oil revenues from its minority stake in the Etame oil concession in offshore Gabon, West Africa provide the balance of steady earnings for the company.

PERC posted P1.92B revenues for the nine months of 2022, a 10% increase from P1.74B revenues last year. This healthy financial growth is due largely to higher global crude oil prices, and to higher offtake rates for PSC's Tarlac-2 solar power plant. This resulted in a 44% increase in Net Income attributable to PERC Parent.

**Item No. 9 – Other Events**

PetroGreen Energy Corporation (PGEC) and its partner Copenhagen Energy (CE) will form three (3) separate special purpose vehicles (SPV) that will oversee the investment and development of their offshore wind service contracts awarded by the Department of Energy (DOE) in 2021.

Incorporation documents were signed on November 4, 2022, by PGEC and CE for Buhawind Energy Northern Luzon, Buhawind Energy Northern Mindoro, and Buhawind Energy East Panay with total aggregate capacity of about 4.0 GW.

PGEC is the renewable energy holding unit of Yuchengco-led and publicly listed PetroEnergy Resources Corporation (PERC). Through its operating subsidiaries, PGEC also operates five power stations using geothermal, wind, and solar energy. These are the 32 MW Maibarara Geothermal Power Plant in Batangas, 36 MW Nabas Wind Project with ~14 MW planned expansion in Nabas and Malay, Aklan, and the 70 MWDC Tarlac Solar Project in Tarlac City.

Recently, PGEC also launched its Dagohoy solar project in Bohol which will increase its total solar operating units to 100MW while PetroWind Energy Inc. (PWEI), its onshore wind unit, won the Visayas grid wind allocation in the first DOE Green Energy Auction Program (GEAP) last June 2022.

Meanwhile, CE is a Danish energy trading and developer of solar, onshore wind, and offshore wind projects. Incorporated in 2020, CE's offshore wind pipeline has grown to over 28 GW, with projects across Denmark, Australia, Ireland, Italy, and the Philippines.

PetroWind Energy Inc. and Vestas signing of Turbine Supply and Maintenance Contract for Nabas Wind Farm

**Background/Description of the Disclosure**

Please see attached.

**Other Relevant Information**

----

**Filed on behalf by:**

<b>Name</b>	Louie Mark Limcolioc
<b>Designation</b>	Assn. Corporate Secretary

**PetroWind Energy Inc. (PWEI) and Vestas sign turbine supply and maintenance contract for Nabas Wind Farm**

Yuchengco-led energy firm PetroWind Energy Inc. and global wind turbine manufacturer, Vestas, signed the supply, operations, and maintenance contract for PWEI’s 13.2 MW Nabas-2 Wind Power Project in Aklan (Nabas-2).

*PWEI and Vestas executives during the contract signing for Nabas-2 last December 13, 2022.*

*(From L-R: Paul Elmer C. Morala - PGEC AVP for Power Plant Operations, Mark Xavier Libardo – Puno & Puno Law Associate Counsel , Richie Avigale Ramos-Pilares – Puno & Puno Law Senior Partner, Maria Victoria M. Olivar - PERC AVP for Operations, Antoine Croize – Vestas Senior Sales Manager, Francisco G. Delfin, Jr. - PGEC Vice President and COO, Milagros V. Reyes - PERC President, Robert Santos - PGEC Legal Counsel, Atty. Jose M. Layug, Jr. – Puno & Puno Law Senior Partner)*

Vestas will supply six (6) units of 2.2 MW wind turbine generators (WTG) and will handle the operations and maintenance of the wind farm through a 10-year O&M agreement. “We welcome this new partnership with Vestas. Being one of the leading energy solution providers worldwide, we are confident that Vestas will bring the latest advancements in wind farm technology and best practices in O&M for Nabas-2,” says AVP for Power Plant Operations Paul Elmer C. Morala.

Nabas-2, located in the same service contract block as the existing 36 MW Nabas-1 project of PWEI, will add 13.2 MW capacity to the project. Earlier this year, PWEI won the contract to supply clean and renewable power from Nabas-2 to the Visayas grid, in the Department of Energy’s Green Energy Auction Program (GEAP).

PWEI is a joint venture of PetroGreen Energy Corporation (PGEC), EEI Power Corporation (EEI Power) and BCPG Public Company Ltd. of (BCPG) Thailand. PGEC is the renewable energy arm of publicly-listed PetroEnergy Resources Corporation (PERC), a member of the Yuchengco Group of Companies (YGC).

**Item No. 9 – Other Events**

At the meeting of the Board of Directors of PetroEnergy Resources Corporation (PERC) held today, November 7, 2022, through electronic means of communication, at which meeting a quorum was present, the Board approved the reallocation of the remaining Stock Rights Offering (SRO) proceeds, as follows:

<b>Project</b>	<b>Remaining SRO proceeds</b>	<b>Transfer of Allocation</b>	<b>New SRO Proceeds Allocation</b>
Various Prospective RE Power Projects	₱ 167,669,788	₱ (167,669,788)	₱ -
Payment of Loans and Interest		167,669,788	167,669,788
<b>Total</b>	<b>₱ 167,669,788</b>	<b>₱ -</b>	<b>₱ 167,669,788</b>

It may be recalled that on March 15, 2022, the Board approved the reallocation of the SRO Proceeds for the funding of various prospective renewable energy projects. In today's meeting, the remaining SRO proceeds will be reallocated to pay PERC's outstanding loans totaling P170 million which were previously used to fund equity portion of project costs for the existing 36 MW Phase 1 of the Nabas Wind Power Project and 20MWDC Phase 2 of the Tarlac Solar Power Project.

**Item No. 9 – Other Events**

PetroEnergy Resources Corporation announces that the two (2) new PetroGreen Energy Corporation solar power projects get DOE and DENR approvals. Please see attached disclosure.

## **SIGNATURES**

Pursuant to the requirements of the Securities Regulation Code, the issuer has duly caused this report to be signed on behalf by the undersigned hereunto duly authorized.

### **PETROENERGY RESOURCES CORPORATION**

Issuer

**By:**  **Atty. Louie Mark R. Limcolioc**  
Assistant Corporate Secretary/  
Compliance Officer

Date: **July 5, 2022**

## **TWO (2) NEW PETROGREEN SOLAR POWER PROJECTS**

### **GET DOE and DENR APPROVALS**

PetroGreen Energy Corporation (PGEC), the renewable holding unit of publicly listed and Yuchengco-led PetroEnergy Resources Corporation (PERC), has reached several key milestones for two (2) new utility-scale solar power projects – the 25MWdc Bugallon project in Pangasinan and the 27 MWdc Dagohoy project in Bohol.

PERC AVP Maria Victoria M. Olivar declared, “We have secured the solar energy operating contracts from the Department of Energy (DOE) and the corresponding environmental compliance certificate (ECCs) from the Department of Environment and Natural Resources (DENR) for these two (2) new ventures. Resolutions of support for the projects have also been granted by the local governments of Pangasinan and Bohol, for which we are grateful. Our final investment decision now awaits the closing of on-going discussions with selected contractors and project lender.”

As investor and developer of renewable energy projects in the country, PGEC has significant stakes in the 32 MW Maibarara geothermal facility in Batangas operated by Maibarara Geothermal, Inc. (MGI), the 36 MW Nabas-1 wind power project in Aklan by PetroWind Energy Inc. (PWEI) and the 70MWDC Tarlac solar power facility by PetroSolar Corporation (PSC). It also recently acquired three new offshore wind blocks from the DOE covering offshore northern Luzon, northern Mindoro, and eastern Panay.

“These two (2) new solar projects continue PERC’s calibrated expansion of our renewable energy (RE) assets even as we carefully wind down our upstream petroleum operations to go completely renewables in the near future. These new projects not only contribute to the government’s goal of increasing RE’s share in our generation mix but will also provide fresh investments and critical power supply in two (2) high-growth areas of the country – Bohol and Pangasinan,” added PERC President Milagros V. Reyes.

## Yuchengco RE Unit Launches New Bohol Solar Power Project

On September 27, 2022, PetroGreen Energy Corporation (PGEC) held a ceremonial project launch for its planned 27 MW<sub>DC</sub> Dagohoy Solar Power Project (DSPP) in Brgy. San Vicente, Dagohoy, Bohol. Governor Erico Aristotle “Aris” Aumentado, together with key local government officials of the Dagohoy, Barangay Council of San Vicente, and senior executives of PGEC, led the symbolic laying of capsule containing the project’s conceptual design.

The DSPP is a renewable energy project of the Department of Energy (DOE), which will be developed and operated by PGEC. It will be located in a 22-hectare site and will use 61,200 solar panels. “Once operational, we expect DSPP to produce approximately 36 GWh of electricity annually, enough to serve around 15,000 households,” PGEC Assistant Vice President for Operations Maria Victoria M. Olivar explains. “At present, PGEC is completing all the necessary pre-development permits, and we are very thankful to Bohol Province for the encouraging support to investors such as PGEC. Barring any delays, we expect to complete and commercially operate the solar power facility by fourth quarter of 2024, at the earliest,” expounds Olivar.

Dagohoy Municipal Mayor Hermie Relampagos welcomes the development and called it a game-changer that can help transform their town. “We are very happy that PGEC chose to invest in our town,” declares Mayor Hermie. “Dagohoy is a 5<sup>th</sup> class municipality and we know that projects such as DSPP, will bring socio-economic benefits that can help our people. We are ready and willing to extend all the help and support we can give to make this successful, because this is a project that the people of Dagohoy can be proud of,” adds Mayor Hermie.

As a solar power project, DSPP will have no greenhouse gas emission and is considered to be cleaner and more environment-friendly than fossil-fired power plants. “This project is very much aligned with our vision of *Green Bohol*,” said Gov. Aris Aumentado. “As I emphasized in my inaugural address in June 2022, one of our priorities is a stable, reliable, and affordable power supply, which is key to making Bohol more attractive for investors, sustaining a lively tourism industry, and ensuring the Province’ continuous economic growth,” says Gov. Aumentado.

PGEC, a renewable energy firm under the Yuchengco Group of Companies (YGC), holds interests in the 32 MW Maibarara Geothermal Power Project (MGPP) in Batangas, 36 MW Nabas-1 Wind Power Plant in Aklan, and the 70 MW<sub>dc</sub> Tarlac Solar Power Project (TSPP) in Tarlac City.

**Item No. 9 – Other Events**

At the meeting of the Board of Directors of PetroEnergy Resources Corporation (PERC), held today, September 15, 2022, through electronic means of communication, at which meeting a quorum was present, the Board approved the signing of a Share Subscription Agreement and Shareholders' Agreement with Kyuden International Corporation (KIC) – a wholly-owned subsidiary of Japan's Kyushu Electric Power Co., Inc.

Pursuant to the said documents, PERC's renewable energy subsidiary, PetroGreen Energy Corporation (PGEC), will issue primary shares in favor of KIC equal to 25% equity stake in PGEC upon completion of the conditions precedent for the transaction. This will effectively reduce PERC's interest in PGEC from 90% to 67.5%.

PetroEnergy Resources Corporation approves signing of documents to issue shares equal to 25% equity in PetroGreen Energy Corporation to Kyuden International Corporation

**Background/Description of the Disclosure**

At the meeting of the Board of Directors of PetroEnergy Resources Corporation (PERC), held today, September 15, 2022, through electronic means of communication, at which meeting a quorum was present, the Board approved the signing of a Share Subscription Agreement and Shareholders' Agreement with Kyuden International Corporation (KIC) – a wholly-owned subsidiary of Japan's Kyushu Electric Power Co., Inc.

Pursuant to the said documents, PERC's renewable energy subsidiary, PetroGreen Energy Corporation (PGEC), will issue primary shares in favor of KIC equal to 25% equity stake in PGEC upon completion of the conditions precedent for the transaction. This will effectively reduce PERC's interest in PGEC from 90% to 67.5%.

## **PetroEnergy's Group Consolidated Net Income Up 31% for H1 2022**

Yuchengco Group of Companies (YGC)-led PetroEnergy Resources Corporation's (PERC) 1<sup>st</sup> Half 2022 consolidated net income grew 31% to P506MM from P386MM over the same period last year. The robust financial performance was largely due to the increase in global crude oil prices (from average \$64.63/bbl to average \$111.26/bbl) and higher offtake sales for PetroSolar Corporation's (PSC) Tarlac-2 Solar Power Plant. These led to a 51% increase in net income attributable to equity holders of PERC in first half of 2022 compared to same period last year.

PERC derives the bulk of its revenues from electricity sales from renewable energy (RE) power plants by operating units of its RE holding firm PetroGreen Energy Corporation. These include the 32MW Maibarara geothermal project by Maibarara Geothermal, Inc., the 70MW Tarlac solar project by PSC, and the 36 MW Nabas-1 wind project by PetroWind Energy Inc. Oil revenues from its minority stake in the Etame oil concession in offshore Gabon, West Africa provide the balance of steady revenues for the company. Last month, PERC declared a 5% cash dividend or PhP 0.05 per share to all its stockholders of record as of August 15, 2022.

## **PetroEnergy's 2022 1Q consolidated net income up 48%**

PetroEnergy Resources Corporation's 1<sup>st</sup> Quarter 2022 consolidated net income improved by 48% from P170 million in 1<sup>st</sup> Quarter 2021 to P253 million. The net income attributed to equity holders of PERC also increased by 67% from P106 million to P177 million.

The improvement in the financial performance is mainly due to higher crude oil prices (from average \$60.97/bbl in 1Q, 2021 to average \$107.95/bbl in 1Q, 2022), higher electricity sales from the Tarlac Solar and Nabas Wind power plants, and reduced interest expenses resulting from installment payments of loan principals.

As of the 1st Quarter 2021, the Group maintained a healthy financial position with total assets of P13.6 Billion and total equity of P8.6 Billion. The book value as of 1<sup>st</sup> Q 2022 reached P10.12/share.

<b>Subject of News Report</b>	PetroEnergy to focus on solar, offshore wind farms
<b>Date of Publication</b>	Feb 24, 2022

**Clarification of News Report**

We submit our reply in compliance with the Phil. Stock Exchange's requested clarification on the below statements in the BusinessWorld news article posted today:

"PETROENERGY Resources Corp. targets to add 400 megawatts (MW) to its portfolio in the next three to four years, while it plans to build three offshore wind farms in the long term, a company official said.

'In the next one to two years, we will add 100 MW of new solar projects and another 300 MW in the next three to four years, while in the long term we are betting on offshore wind because of the advantages of the offshore wind in scaling up the renewable energy generation,' said PetroEnergy Vice-President Francisco G. Delfin during the Rizal Commercial Banking Corp. (RCBC) virtual forum on sustainability on Wednesday.

....

Mr. Delfin said PetroEnergy is also planning to expand its 32-MW Maibarara geothermal power plant, but this will take a back seat as the company's priority is its new solar and offshore wind projects.

...."

We confirm the aforementioned statements made by Mr. Delfin in the BusinessWorld news article published today. The solar and wind pipeline projects of around 400 megawatts (MW) capacity is part of PetroEnergy Resources Corporation's medium to long term plan. To clarify, however, these projects will be implemented through its renewable energy subsidiaries, PetroGreen Energy Corporation, PetroSolar Corporation, or other new subsidiaries that may be formed. Further details about these projects will be disclosed in the future, in compliance with PSE rules on public disclosures.

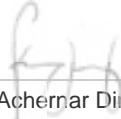

**Other Relevant Information**

Please note that the development of the above-stated power projects

is subject to technical/economic feasibility, and the issuance/approval of government permits/clearances relevant to the same.

## **PetroEnergy Records Slight Increase in 2021 Consolidated Income**

Publicly-listed and Yuchengco-led PetroEnergy Resources Corporation (PERC) recorded a 3% increase in its 2021 consolidated net income, from Php 646MM in 2020 to Php 655MM in 2021. Net income attributable to parent company also improved by 2% over the same period from Php 319 MM to Php 325 MM.

PERC is engaged in petroleum production through the Etame consortium in Gabon, West Africa and in renewable energy (RE) generation in the Philippines through its subsidiary PetroGreen Energy Corporation (PGEN) that owns and develops power stations utilizing geothermal, wind, and solar energy.

PERC's strong financial performance in 2021 was driven largely by recovery in global crude oil prices from an average price of \$49.72/bbl to \$69.90/bbl; and higher electricity sales from the Tarlac-2 Solar Power Plant due to higher spot rates during the period. These profit drivers, however, were offset by impairment recorded on the company's West Linapacan and Octon petroleum service contracts amounting to Php 304MM resulting to a lower than realized net income for the year.

In 2021, the Group maintained a healthy financial position with total assets of P13.2 Billion and total equity of P8.3 Billion. Through the continuous operations of its renewable energy projects, the Group was able to pay its currently maturing obligations to existing lenders and sustain other working capital requirements. The book value per share increased by 6% from P9.23/share to P9.81/ share.

PETROENERGY RESOURCES CORPORATION

**PETROENERGY RESOURCES CORPORATION  
2018 1:2.6 Stock Rights Offering  
Reallocation of the Use of Proceeds**

On March 15, 2022, the Board of Directors of PetroEnergy Resources Corporation (PERC) approved the reallocation of the Use of Proceeds from the Company’s 1:2.6 Stock Rights Offering (SRO). Pursuant to this, PERC will reallocate P167,669,788.00 for the funding of various prospective renewable energy power projects in the pipeline.

The remaining balance of the SRO proceeds were allocated for the 20 MWp Tarlac Solar Power Project Phase 2 (TSPP-2), 14 MW Phase 2 of the Nabas Wind Power Project (NWPP-2), and the 10-20 MWp Puerto Princesa Solar Power Project (PPSPP), distributed as follows:

<b>Project</b>	<b>Remaining SRO proceeds</b>
20 MWp TSPP-2	₱ 37,542,464
14 MW NWPP-2	65,063,662
10-20 MW PPSPP	65,063,662
<b>Total</b>	<b>₱ 167,669,788</b>

The remaining SRO proceeds will be reallocated as follows:

<b>Project</b>	<b>Remaining SRO proceeds</b>	<b>Transfer of Allocation</b>	<b>New SRO Proceeds Allocation</b>
20 MWp TSPP-2	₱ 37,542,464	₱ (37,542,464)	₱ -
14 MW NWPP-2	65,063,662	(65,063,662)	-
10-20 MW PPSPP	65,063,662	(65,063,662)	-
Various Prospective RE Power Projects		167,669,788	167,669,788
<b>Total</b>	<b>₱ 167,669,788</b>	<b>₱ -</b>	<b>₱ 167,669,788</b>

**Rationale for the Reallocation of the Use of Proceeds**

The reallocation will allow flexibility in funding multiple projects in the pipeline, including the NWPP-2 and the PPSPP.

**STATEMENT OF MANAGEMENT'S RESPONSIBILITY  
FOR FINANCIAL STATEMENTS**

April 17, 2023

Securities and Exchange Commission  
PICC, Roxas Boulevard, Pasig City

The management of PetroEnergy Resources Corporation is responsible for the preparation and fair presentation of the financial statements including the schedules attached therein, for the years ended December 31, 2022 and 2021, in accordance with the prescribed financial reporting framework indicated therein, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors is responsible for overseeing the Company's financial reporting process.

The Board of Directors reviews and approves the financial statements including the schedules attached therein, and submits the same to the stockholders or members.

SYCip, Goras, Velayo & Co., the independent auditor appointed by the stockholders, has audited the financial statements of the company in accordance with Philippine Standards on Auditing, and in its report to the stockholders or members, has expressed its opinion on the fairness of presentation upon completion of such audit.

## INDEPENDENT AUDITOR'S REPORT

The Board of Directors and Stockholders  
PetroEnergy Resources Corporation  
7th floor, JMT Building, ADB Avenue  
Ortigas Center, Pasig City

### Report on the Audit of the Parent Company Financial Statements

#### Opinion

We have audited the parent company financial statements of PetroEnergy Resources Corporation (the Parent Company), which comprise the parent company statements of financial position as at December 31, 2022 and 2021, and the parent company statements of comprehensive income, parent company statements of changes in equity and parent company statements of cash flows for each of the three years in the period ended December 31, 2022, and notes to the parent company financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying parent company financial statements present fairly, in all material respects, the financial position of the Parent Company as at December 31, 2022 and 2021, and its financial performance and its cash flows for each of the three years in the period ended December 31, 2022 in accordance with Philippine Financial Reporting Standards (PFRSs).

#### Basis for Opinion

We conducted our audits in accordance with Philippine Standards on Auditing (PSAs). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Parent Company Financial Statements* section of our report. We are independent of the Parent Company in accordance with the Code of Ethics for Professional Accountants in the Philippines (Code of Ethics) together with the ethical requirements that are relevant to our audit of the parent company financial statements in the Philippines, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### Responsibilities of Management and Those Charged with Governance for the Parent Company Financial Statements

Management is responsible for the preparation and fair presentation of the parent company financial statements in accordance with PFRSs, and for such internal control as management determines is necessary to enable the preparation of parent company financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the parent company financial statements, management is responsible for assessing the Parent Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Parent Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Parent Company's financial reporting process.

## **Auditor's Responsibilities for the Audit of the Parent Company Financial Statements**

Our objectives are to obtain reasonable assurance about whether the parent company financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with PSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these parent company financial statements.

As part of an audit in accordance with PSAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the parent company financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Parent Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Parent Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the parent company financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Parent Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the parent company financial statements, including the disclosures, and whether the parent company financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

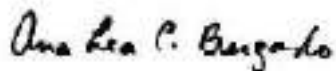

### **Report on the Supplementary Information Required Under Revenue Regulations No. 15-2010**

The supplementary information required under Revenue Regulations No. 15-2010 for purposes of filing with the Bureau of Internal Revenue is presented by management of PetroEnergy Resources Corporation in a separate schedule. Revenue Regulations No. 15-2010 requires the information to be presented in the notes to financial statements. Such information is not a required part of the basic financial statements. The information is also not required by the Revised Securities Regulation Code Rule 68. Our opinion on the basic financial statements is not affected by the presentation of the information in a separate schedule.

---

## **NOTES TO PARENT COMPANY FINANCIAL STATEMENTS**

---

### **1. Corporate Information**

PetroEnergy Resources Corporation (PERC or PetroEnergy or the Parent Company), formerly Petrotech Consultants, Inc., was organized on September 29, 1994 to provide specialized technical services to its then parent company, Petrofields Corporation, and to companies exploring for oil in the Philippines. PetroEnergy's shares of stock are publicly traded in the Philippine Stock Exchange (PSE).

In 1997, PERC simultaneously adopted its present name and changed its primary purpose to oil exploration and development and mining activities. Subsequently in 1999, PERC assumed Petrofields' oil exploration contracts in the Philippines and the Production Sharing Contract covering the Etame discovery block in Gabon, West Africa.

On August 11, 2004, PERC's shares of stock were listed at the PSE by way of introduction.

In 2009, following the enactment of Republic Act No. 9513, otherwise known as the "Renewable Energy Act of 2008", PERC amended its articles of incorporation to include among its purposes the business of generating power from renewable sources such as, but not limited to, biomass, hydro, solar, wind, geothermal, ocean and such other renewable sources of power.

The registered office and principal place of business is 7th Floor, JMT Building, ADB Avenue, Ortigas Center, Pasig City.

The accompanying parent company financial statements were approved and authorized for issue by the Board of Directors (BOD) on April 17, 2023.

---

### **2. Basis of Preparation**

#### Basis of Preparation

The accompanying financial statements have been prepared under the historical cost basis, except for financial assets carried at fair value through profit or loss (FVTPL) which are measured at fair value and crude oil inventory which is valued at net realizable value (NRV).

The financial statements are presented in Philippine Peso (PHP or ₱), which is also the Parent Company's functional currency. All amounts are rounded to the nearest PHP unless otherwise stated.

#### Statement of Compliance

The parent company financial statements have been prepared in accordance with Philippine Financial Reporting Standards (PFRSs).

The Parent Company also prepares and issues consolidated financial statements for the same period as the parent company financial statements, presented in compliance with PFRSs, which can be obtained from the Parent Company's registered office address mentioned in Note 1. The parent company financial statements must be read in conjunction with the consolidated financial statements.

---

### 3. Changes in Accounting Policies and Disclosures

The accounting policies adopted are consistent with those of the previous financial year, except that the Parent Company has adopted the new accounting pronouncements starting January 1, 2022. Adoption of these pronouncements did not have any significant impact on the Parent Company's financial position or performance.

- Amendments to PFRS 3, *Reference to the Conceptual Framework*
- Amendments to PAS 16, *Plant and Equipment: Proceeds before Intended Use*
- Amendments to PAS 37, *Onerous Contracts – Costs of Fulfilling a Contract*
- *Annual Improvements to PFRSs 2018-2020 Cycle*
  - Amendments to PFRS 1, *First-time Adoption of Philippines Financial Reporting Standards, Subsidiary as a first-time adopter*
  - Amendments to PFRS 9, *Financial Instruments, Fees in the '10 per cent' test for derecognition of financial liabilities*
  - Amendments to PAS 41, *Agriculture, Taxation in fair value measurements*

#### New Accounting Standards, Interpretations and Amendments Effective Subsequent to December 31, 2022

Pronouncements issued but not yet effective are listed below. The Parent Company does not expect that the future adoption of the said pronouncements to have a significant impact on its financial statements.

##### *Effective beginning on or after January 1, 2023*

- Amendments to PAS 12, *Deferred Tax related to Assets and Liabilities arising from a Single Transaction*
- Amendments to PAS 8, *Definition of Accounting Estimates*
- Amendments to PAS 1 and PFRS Practice Statement 2, *Disclosure of Accounting Policies*

##### *Effective beginning on or after January 1, 2024*

- Amendments to PAS 1, *Classification of Liabilities as Current or Non-current*
- Amendments to PFRS 16, *Lease Liability in a Sale and Leaseback*

##### *Effective beginning on or after January 1, 2025*

- PFRS 17, *Insurance Contracts*

##### *Deferred effectivity*

- Amendments to PFRS 10, *Consolidated Financial Statements*, and PAS 28, *Sale or Contribution of Assets between an Investor and its Associate or Joint Venture*

The Parent Company continues to assess the impact of the above new and amended accounting standards and interpretations effective subsequent to 2022 on the Parent Company's financial statements in the period of initial application. Additional disclosures required by these amendments will be included in the parent company financial statements when these amendments are adopted.

---

#### 4. Summary of Significant Accounting Policies

##### Cash and Cash Equivalents

Cash includes cash on hand and in banks (demand deposits). Cash equivalents are short-term, highly liquid investments that are readily convertible to known amounts of cash with original maturities of three (3) months or less from the dates of acquisition and that are subject to an insignificant risk of change in value.

##### Financial Instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

##### *Financial assets - Initial recognition and measurement*

Financial assets are classified, at initial recognition, as subsequently measured at amortized cost, fair value through other comprehensive income (FVOCI), and FVTPL.

The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the Parent Company's business model for managing them. The Parent Company initially measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss, transaction costs.

In order for a financial asset to be classified and measured at amortized cost or fair value through OCI, it needs to give rise to cash flow that are 'solely payments of principal and interest (SPPI)' on the principal amount outstanding. This assessment is referred to as the SPPI test and is performed at an instrument level.

The Parent Company's business model for managing financial assets refers to how it manages its financial assets in order to generate cash flows. The business model determines whether cash flows will result from collecting contractual cash flows, selling the financial assets, or both.

##### *Subsequent measurement*

For purposes of subsequent measurement, financial assets are classified in four categories:

- Financial assets at amortized cost (debt instruments)
- Financial assets at FVOCI with recycling of cumulative gains and losses (debt instruments)
- Financial assets designated at FVOCI with no recycling of cumulative gains and losses upon derecognition (equity instruments)
- Financial assets at FVTPL

The Parent Company has no financial asset classified as financial assets at FVOCI.

##### *Financial assets at amortized cost (debt instruments)*

This category is the most relevant to the Parent Company. The Parent Company measures financial assets at amortized cost if both of the following conditions are met:

- The financial asset is held within a business model with the objective to hold financial assets in order to collect contractual cash flows; and
- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets at amortized cost are subsequently measured using the effective interest (EIR) method and are subject to impairment. Gains and losses are recognized in profit or loss when the asset is derecognized, modified or impaired.

The Parent Company's financial assets at amortized cost include cash and cash equivalents, receivables and restricted cash.

*Financial assets at FVTPL*

Financial assets at FVTPL include financial assets held for trading, financial assets designated upon initial recognition at FVTPL, or financial assets mandatorily required to be measured at fair value. Financial assets are classified as held for trading if they are acquired for the purpose of selling or repurchasing in the near term. Derivatives, including separated embedded derivatives, are also classified as held for trading unless they are designated as effective hedging instruments. Financial assets with cash flows that are not solely payments of principal and interest are classified and measured at fair value through profit or loss, irrespective of the business model. Notwithstanding the criteria for debt instruments to be classified at amortized cost or at FVTOCI, as described above, debt instruments may be designated at FVTPL on initial recognition if doing so eliminates, or significantly reduces, an accounting mismatch.

Financial assets at FVTPL are carried in the parent company statement of financial position at fair value with net changes in fair value recognized in the parent company statement of profit or loss.

This category includes derivative instruments and listed equity investments which the Parent Company had not irrevocably elected to classify at fair value through OCI. Dividends on listed equity investments are also recognized as other income in the parent company statement of profit or loss when the right of payment has been established.

The Parent Company's financial assets at FVTPL includes marketable equity securities and investment in golf club shares.

*Impairment of financial assets*

The Parent Company recognizes an allowance for ECLs for all debt instruments not held at FVTPL. ECLs are based on the difference between the contractual cash flows due in accordance with the contract and all the cash flows that the Parent Company expects to receive, discounted at an approximation of the original effective interest rate. The expected cash flows will include cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms.

ECLs are recognized in two stages. For credit exposures for which there has not been a significant increase in credit risk since initial recognition, ECLs are provided for credit losses that result from default events that are possible within the next 12-months (a 12-month ECL). For those credit exposures for which there has been a significant increase in credit risk since initial recognition, a loss allowance is required for credit losses expected over the remaining life of the exposure, irrespective of the timing of the default (a lifetime ECL).

The Parent Company may consider a financial asset to be in default when internal or external information indicates that the Parent Company is unlikely to receive the outstanding contractual amounts in full before taking into account any credit enhancements held by the Parent Company. A financial asset is written off when there is no reasonable expectation of recovering the contractual cash flows.

*Financial Liabilities - Initial recognition and measurement*

Financial liabilities are classified, at initial recognition, as financial liabilities at FVTPL, financial liabilities at amortized cost (loans and borrowings) or as derivatives designated as hedging instruments in an effective hedge, as appropriate.

All financial liabilities are recognized initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs. The Parent Company does not have financial liabilities at FVTPL.

*Subsequent measurement*

After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortized cost using the EIR method. Gains and losses are recognized in profit or loss when the liabilities are derecognized as well as through the EIR amortization process.

Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortization is included as finance costs in the parent company statement of comprehensive income.

The Parent Company's loans and borrowings include accounts payable and accrued expenses, excluding statutory liabilities, and loans payable.

Derecognition of Financial Assets and Financial Liabilities

*Financial assets*

A financial asset (or where applicable, a part of a financial asset or part of a group of similar financial assets) is derecognized when:

- the rights to receive cash flows from the asset have expired;
- the Parent Company retains the rights to receive cash flows from the asset, but has assumed an obligation to pay them in full without material delay to a third party under a "pass-through" arrangement; or
- the Parent Company has transferred its right to receive cash flows from the asset and either (a) has transferred substantially all the risks and rewards of the asset, or (b) has neither transferred nor retained substantially all the risks and rewards of the asset but has transferred control of the asset.

When the Parent Company has transferred its rights to receive cash flows from an asset and has neither transferred nor retained substantially all the risks and rewards of the asset nor transferred control of the asset, the asset is recognized to the extent of the Parent Company's continuing involvement in the asset. Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Parent Company could be required to repay.

*Financial liabilities*

A financial liability is derecognized when the obligation under the liability is discharged, cancelled or has expired.

Where an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognized in profit or loss.

#### Offsetting of Financial Instruments

Financial assets and financial liabilities are set off and the net amount is reported in the parent company statement of financial position if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously.

#### Fair Value Measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability

The principal or the most advantageous market must be accessible to by the Parent Company. The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

The Parent Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the parent company financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 - Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- Level 3 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognized in the parent company financial statements on a recurring basis, the Parent Company determines whether transfers have occurred between Levels in the hierarchy by re-assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

#### Crude Oil Inventory

Crude oil inventory is stated at NRV at the time of production. NRV is the estimated selling price less cost to sell. The estimated selling price is the market values of crude oil inventory at the time of production.

#### Other Current Assets

Other current assets mainly consist of prepayments and restricted cash. Prepayments are expenses paid in advance and recorded as asset before these are utilized. This account comprises prepaid expenses and prepaid taxes. The prepaid expenses are apportioned over the period covered by the payment and charged to the appropriate accounts in profit or loss when incurred and the prepaid taxes represent amount withheld by the Parent Company's customers. Prepaid taxes are deducted from income tax payable. Prepayments that are expected to be realized for a period of no more than 12 months after the financial reporting period are classified as current assets, otherwise, these are classified as noncurrent

assets. Restricted cash is recognized when the Parent Company reserves a portion of its cash for a specific purpose and that there are contractual restrictions directly related to the use of and access of the bank accounts. This includes cash held under escrow accounts. Restricted cash that are expected to be used for a period of no more than 12 months after the financial reporting period are classified as current assets, otherwise, these are classified as noncurrent assets.

#### Property and Equipment

Property and equipment are stated at cost less accumulated depletion, depreciation and any accumulated impairment losses. The initial cost of the property and equipment consists of its purchase price, including any import duties, taxes and any directly attributable costs of bringing the assets to its working condition and location for its intended use and abandonment costs.

Expenditures incurred after the fixed assets have been put into operation, such as repairs and maintenance, are normally charged to expense in the period in which the costs are incurred. In situations where it can be clearly demonstrated that the expenditures have resulted in an increase in the future economic benefits expected to be obtained from the use of an item of property and equipment beyond its originally assessed standard of performance, the expenditures are capitalized as an additional cost of property and equipment.

Depreciation of an item of property and equipment begins when it becomes available for use, i.e., when it is in the location and condition necessary for it to be capable of operating in the manner intended by management. Depreciation ceases at the earlier of the date that the item is classified as held for sale (or included in a disposal group that is classified as held for sale) in accordance with PFRS 5, *Non-current Assets Held for Sale and Discontinued Operations*, and the date the asset is derecognized.

Wells, platforms and other facilities are depleted using the unit-of-production method computed based on estimates of proved reserves. The depletion base includes the exploration and development cost of the producing oil fields.

Other property and equipment are depreciated and amortized using the straight-line method over the estimated useful lives of the assets as follows:

	<u>Number of Years</u>
Office condominium units	15
Office improvements	3
Transportation equipment	4
Office furniture and other equipment	2 - 3

The useful lives and depletion and depreciation method are reviewed periodically to ensure that the period and method of depletion, depreciation and amortization are consistent with the expected pattern of economic benefits from items of property and equipment.

Fully depreciated assets are retained in the accounts until they are no longer in use and no further depreciation is credited or charged to current operations.

When the assets are retired or otherwise disposed of, the cost and the related accumulated depreciation are removed from the accounts and any resulting gain or loss is reflected in the Parent Company statements of comprehensive income.

#### Deferred Oil Exploration Costs

The Parent Company follows the full cost method of accounting for exploration costs determined on the basis of each SC area. Under this method, all exploration costs relating to each SC are tentatively deferred pending determination of whether the area contains oil reserves in commercial quantities.

Deferred oil exploration costs are assessed at each reporting period for possible indications of impairment. This is to confirm the continued intent to develop or otherwise extract value from the discovery. When this is no longer the case or is considered as areas permanently abandoned, the costs are written off through the statement of comprehensive income. Exploration areas are considered permanently abandoned if the related permits of the exploration have expired and/or there are no definite plans for further exploration and/or development.

The exploration costs relating to the SC where oil in commercial quantities are discovered are subsequently reclassified to “Wells, platforms and other facilities” shown under “Property and equipment” account in the statements of financial position upon substantial completion of the development stage. On the other hand, all costs relating to an abandoned SC are written off in the year the area is permanently abandoned. SCs are considered permanently abandoned if the SCs have expired and/or there are no definite plans for further exploration and/or development.

#### Investment Properties

Investment properties consist of land held for capital appreciation. Land is stated at cost less any impairment in value.

The initial cost of the investment properties comprises of purchase price and any directly attributable costs of bringing the asset to its working condition.

Investment property is derecognized when either it has been disposed of or when the investment property is permanently withdrawn from use and no future economic benefit is expected from its disposal. Any gains or losses on the retirement or disposal of investment properties are recognized in profit or loss in the year of retirement or disposal.

Transfers are made to investment properties when, and only when, there is a change in use, evidenced by the end of owner-occupation, commencement of an operating lease to another party or by the end of construction or development. Transfers are made from investment properties when and only when, there is a change in use, evidenced by commencement of owner-occupation or commencement of development with a view to sell.

#### Investments in Subsidiaries

The Parent Company’s investments in subsidiaries are accounted for using the cost method less any impairment in value. Subsidiaries are entities over which the Parent Company has control. Control is achieved when the Parent Company is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee.

Specifically, the Parent Company controls an investee if and only it has:

- power over the investee (i.e. existing rights that give it the current ability to direct the relevant activities of the investee)
- exposure, or rights, to variable returns from its involvement with the investee, and
- the ability to use its power over the investee to affect its returns

When the Parent Company has less than a majority of the voting or similar rights of an investee, it considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- The contractual arrangement with the other vote holders of the investee
- Rights arising from other contractual arrangements
- The Parent Company’s voting rights and potential voting rights

The Parent Company re-assesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control. Consolidation of a subsidiary begins when the Parent Company obtains control over the subsidiary and ceases when the Parent Company loses control of the subsidiary. Assets, liabilities, income and expenses of a subsidiary acquired or disposed of during the year are included in profit or loss from the date the Parent Company gains control until the date the Parent Company ceases to control the subsidiary.

#### Impairment of Nonfinancial Assets

The Parent Company assesses at each reporting date whether there is an indication that an asset (e.g. property and equipment, investment properties, deferred oil exploration costs, and investments in subsidiaries) may be impaired. If any such indication exists, or when annual impairment testing for an asset is required, the Parent Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's fair value less costs to sell and its value in use and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or group of assets.

Where the carrying amount of an asset exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs to sell, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded companies or other available fair value indicators.

An assessment is made at each reporting date as to whether there is any indication that previously recognized impairment losses may no longer exist or may have decreased. If such indication exists, the Parent Company makes an estimate of recoverable amount. A previously recognized impairment loss is reversed only if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognized. If that is the case, the carrying amount of the asset is increased to its recoverable amount. That increased amount cannot exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognized for the asset in prior years.

#### Capital Stock and Additional Paid-in Capital

The Parent Company records common stock at par value and additional paid-in capital in excess of the total contributions received over the aggregate par values of the equity shares. When the Parent Company issues more than one class of stock, a separate account is maintained for each class of stock and the number of shares issued. Incremental costs incurred directly attributable to the issuance of new shares are shown in equity as a deduction from proceeds, net of tax. When any member of the Parent Company purchases the Parent Company's capital stock (treasury shares), the consideration paid, including any attributable incremental costs, is deducted from equity attributable to the Parent Company's equity holders until the shares are cancelled, reissued or disposed of. Where such shares are subsequently sold or reissued, any consideration received, net of any directly attributable incremental transaction costs and the related tax effects is included in equity.

#### Retained Earnings

Retained earnings represent accumulated earnings and losses of the Parent Company less dividends declared and with consideration of any changes in accounting policies and adjustments applied retroactively. The retained earnings of the Parent Company are available for dividends only upon approval and declaration of the BOD. When the balance as of a reporting date is debit, the account is captioned as "Deficit".

Unappropriated retained earnings represent the portion which is free and can be declared as dividends to stockholders. Appropriated retained earnings represent the portion which has been restricted and therefore is not available for any dividend declaration.

#### Revenue Recognition

Revenue is recognized when the control of petroleum are transferred to the customer at an amount that reflects the consideration which the Parent Company expects to be entitled in exchange for those goods. The Parent Company has generally concluded that it is the principal in its revenue arrangements.

#### *Oil revenues*

Revenue from crude oil is recognized at a point in time when the control of the goods has transferred from the sellers (consortium) to the buyer at the delivery point. Revenue is measured at the fair value of the consideration received.

The revenue recognized from the sale of petroleum products pertains to the Parent Company's share in revenue from the joint operations. The revenue sharing is accounted for in accordance with PFRS 11.

#### *Interest income*

Interest income is recognized as the interest accrues taking into account the effective yield on the asset.

#### *Management fee*

Revenue from accounting, legal and other support services rendered to its subsidiaries are recognized when earned.

#### Costs and Expenses

##### *Oil production*

Oil production are costs incurred to produce and deliver crude oil inventory, including transportation, storage and loading, among others.

##### *General and administrative expenses*

General and administrative expenses constitute costs of administering the business. Costs and expenses are recognized as incurred.

#### Leases

##### *Short-term leases and leases of low-value assets*

The Parent Company applies the short-term lease recognition exemption to its short-term leases of parking slots and vehicles (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the leases of low-value assets recognition exemption to leases of storage units that are considered of low value (i.e., below ₱250,000). Lease payments on short-term leases and leases of low-value assets are recognized as expense on a straight-line basis over the lease term.

#### Income Taxes

##### *Current Tax*

Current tax assets and liabilities for the current and prior periods are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amounts are those that are enacted or substantively enacted at the reporting date.

##### *Deferred Tax*

Deferred tax is provided using the balance sheet liability method on temporary differences at the reporting date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

Deferred tax is recognized on differences between the carrying amounts of assets and liabilities in the financial statements and their corresponding tax bases (known as temporary differences). Deferred tax liabilities are recognized for all taxable temporary differences. Deferred tax assets are recognized for all deductible temporary differences, carryforward of unused tax credits from excess minimum corporate income tax (MCIT) over regular corporate income tax and unused net operating losses carryover (NOLCO), to the extent that it is probable that future taxable profit will be available against which the deductible temporary differences, and the carryforward of unused tax credits from excess MCIT and unexpired NOLCO can be utilized.

The carrying amounts of deferred tax assets are reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient future taxable income will be available to allow all or part of the deferred tax assets to be utilized. Unrecognized deferred tax assets are reassessed at each reporting date and are recognized to the extent that it has become probable that future taxable income will allow the deferred tax assets to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are applicable to the period when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted as of the statement of financial position date.

Deferred tax relating to items recognized outside profit or loss is recognized outside profit or loss. Deferred tax items are recognized in correlation to the underlying transaction either in profit or loss or other comprehensive income.

Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

#### Retirement benefits

The cost of providing benefits under the defined benefit plans is actuarially determined using the projected unit credit method. The net defined benefit liability or asset is the aggregate of the present value of the defined benefit obligation at the end of the reporting period reduced by the fair value of plan assets (if any), adjusted for any effect of limiting a net defined benefit asset to the asset ceiling. The asset ceiling is the present value of any economic benefits available in the form of refunds from the plan or reductions in future contributions to the plan.

Defined benefit costs comprise the following:

- Service costs
- Net interest on the net defined benefit liability or asset
- Remeasurements of net defined benefit liability or asset

Service costs which include current service costs, past service costs and gains or losses on non-routine settlements are recognized as expense in the statements of comprehensive income. Past service costs are recognized when plan amendment or curtailment occurs. These amounts are calculated periodically by independent qualified actuary.

Net interest on the net defined benefit liability or asset is the change during the period in the net defined benefit liability or asset that arises from the passage of time which is determined by applying the discount rate based on government bonds to the net defined benefit liability or asset. Net interest on the net defined benefit liability or asset is recognized as expense or income in the statements of comprehensive income.

Remeasurements comprising actuarial gains and losses, return on plan assets and any change in the effect of the asset ceiling (excluding net interest on defined benefit liability) are recognized immediately in OCI in the period in which they arise. Remeasurements are not reclassified to statements of comprehensive income in subsequent periods. All remeasurements recognized in OCI account “Remeasurement loss on net accrued retirement liability” are not reclassified to another equity account in subsequent periods.

Plan assets are assets that are held by a long-term employee benefit fund. Plan assets are not available to the creditors of the Parent Company, nor can they be paid directly to the Parent Company. Fair value of plan assets is based on market price information. When no market price is available, the fair value of plan assets is estimated by discounting expected future cash flows using a discount rate that reflects both the risk associated with the plan assets and the maturity or expected disposal date of those assets (or, if they have no maturity, the expected period until the settlement of the related obligations).

The Parent Company’s right to be reimbursed of some or all of the expenditure required to settle a defined benefit obligation is recognized as a separate asset at fair value when and only when reimbursement is virtually certain.

#### Asset Retirement Obligation (ARO)

The Parent Company is legally required to share in the abandonment costs associated with the oilfields. The Parent Company recognizes the fair value of the liability for this obligation and capitalizes the present value of these costs as part of the balance of the related property and equipment accounts, which are depleted using the unit-of-production method computed based on estimates of proved reserves, or written off as a result of impairment of the related asset.

The Parent Company amortizes ARO liability using the EIR method and recognizes accretion expense over the service contract term in profit or loss.

The Parent Company regularly assesses the provision for ARO and adjusts the related liability.

#### Value-Added Tax (VAT)

Revenues, expenses and assets are recognized net of the amount of VAT, if applicable.

When VAT from sales of goods or services (output VAT) exceeds VAT passed on from purchases of goods or services (input VAT), the excess is recognized as payable in the statement of financial position. When VAT passed on from purchases of goods or services (input VAT) exceeds VAT from sales of goods and/or services (output VAT), the excess is recognized as an asset in the statement of financial position as part of “Other noncurrent assets” to the extent of the recoverable amount.

#### Foreign Currency-denominated Transactions

Transactions in foreign currencies are initially recorded using the applicable exchange rate at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are translated using the applicable exchange rate at the reporting date. Differences arising from translation of monetary assets and liabilities are taken to “Net unrealized foreign exchange gain (loss)”.

#### Earnings Per Share (EPS)

Basic earnings per share is computed on the basis of the weighted average number of shares outstanding during the year after giving retroactive effect to any stock split or stock dividends declared and stock rights exercised during the current year, if any.

Diluted earnings per share is computed on the basis of the weighted average number of shares outstanding during the year plus the weighted average number of ordinary shares that would be issued on the conversion of all the dilutive potential ordinary shares into ordinary shares.

The Parent Company does not have potentially dilutive common stock.

#### Segment Reporting

The Parent Company has only one reportable segment that is engaged in the oil and mineral exploration, development and production. Financial information on business segments is presented in Note 26 to the financial statements.

#### Provisions and Contingencies

Provisions are recognized when the Parent Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Where the Parent Company expects a provision to be reimbursed, the reimbursement is recognized as a separate asset but only when the reimbursement is virtually certain. If the effect of the time value of money is material, provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and, where appropriate, the risks specific to the liability. Where discounting is used, the increase in the provision due to the passage of time is recognized as an interest expense. Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate.

Contingent liabilities are not recognized in the financial statements. They are disclosed unless the possibility of an outflow of resources embodying economic benefits is remote. Contingent assets are not recognized in the financial statements but are disclosed when an inflow of economic benefits is probable. Contingent assets are assessed continually to ensure that developments are appropriately reflected in the financial statements. If it has become virtually certain that an inflow of economic benefits will arise, the asset and the related income are recognized in the financial statements.

#### Events After the Reporting Period

Post year-end events up to the date of the auditors' report that provide additional information about the Parent Company's situation at the reporting date (adjusting events) are reflected in the financial statements, if any. Post year-end events that are not adjusting events are disclosed in the notes to financial statements when material.

---

## 5. Significant Accounting Judgments, Estimates and Assumptions

The preparation of the Parent Company financial statements in compliance with PFRS requires the Parent Company to make judgments, estimates and assumptions that affect the reported amounts of assets, liabilities, income and expenses and disclosure of contingent assets and contingent liabilities. Future events may occur which will cause the assumptions used in arriving at the estimates to change. The effects of any change in judgments, estimates and assumptions are reflected in the Parent Company financial statements, as they become reasonably determinable.

Judgments, estimates and assumptions are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

### Judgments

In the process of applying the Parent Company's accounting policies, management has made the following judgments, apart from those involving estimations, which has the most significant effect on the amounts recognized in the Parent Company financial statements:

#### *Determination of Functional Currency*

The Parent Company determines the functional currency based on economic substance of underlying circumstances relevant to the Parent Company. The functional currency has been determined to be the PHP based on the economic substance of the Parent Company's business circumstances.

#### *Capitalization of Deferred Oil Exploration Costs*

Initial capitalization of costs is based on management's judgment that technological and economic feasibility is confirmed, usually when a product development project has reached a defined milestone according to an established project management model. If the accounting policy on capitalization of development costs are not met, such costs are expensed. As of December 31, 2022 and 2021, the carrying value of deferred oil explorations costs amounted to ₱311.88 million and ₱115.81 million, respectively (see Note 11).

### Estimates and Assumptions

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below.

#### *Impairment of investments in subsidiaries*

The Parent Company assesses at the end of each reporting period whether there is any indication that its investments in subsidiaries may be impaired. If any such indication exists, the Parent Company estimates the recoverable amount of the asset.

The factors that the Parent Company considers important which could trigger an impairment review include the following:

- Significant underperformance relative to expected historical or projected future operating results;
- Significant changes in the manner of use of the acquired assets or the strategy for overall business; and
- Significant negative industry or economic trends.

No indication of impairment was noted in 2022 and 2021. As of December 31, 2022 and 2021, the carrying value of investments in subsidiaries amounted to ₱2.17 billion for both years. As of December 31, 2022 and 2021, allowance for impairment loss on investment in a dormant subsidiary amounted to ₱2.86 million (see Note 12).

#### *Estimation of Proved and Probable Oil Reserves*

The Parent Company assesses its estimate of proved and probable reserves on an annual basis. The estimate is based on the technical assumptions and is calculated in accordance with accepted volumetric methods, specifically the probabilistic method of estimation. Probabilistic method uses known geological, engineering and economic data to generate a range of estimates and their associated probabilities.

All proved and probable reserve estimates are subject to revision, either upward or downward, based on new information, such as from development drilling and production activities or from changes in economic factors, including product prices, contract terms or development plans. Estimates of reserves for undeveloped or partially developed fields are subject to greater uncertainty over their future life

than estimates of reserves for fields that are substantially developed and depleted. Estimated oil reserves are utilized in the impairment testing and the calculation of depletion expense using the unit of production method of the investments.

As of December 31, 2022 and 2021, the carrying value of “Wells, Platforms and other Facilities” under “Property and Equipment” amounted to ₱763.83 million and ₱658.72 million, respectively (see Note 10).

*Impairment of Wells, Platforms and other Facilities and Deferred Oil Exploration Costs*

The Parent Company assesses at each reporting date, whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Parent Company estimates the asset’s recoverable amount. An asset’s recoverable amount is the higher of an asset’s or cash-generating unit’s (CGU) fair value less cost of disposal and its value in use.

The recoverable amount is the higher of an asset’s or cash-generating unit’s (CGU) fair value less cost of disposal and its value in use. The fair value less cost of disposal is the amount obtainable from the sale of an asset in an arm’s length transaction while value in use is the present value of estimated future cash flows expected to arise from the continuing use of an asset or CGU and from its disposal at the end of its useful life.

In determining the present value of estimated future cash flows expected to be generated from the continued use of an asset or CGU, the Parent Company is required to make estimates and assumptions that can materially affect the Parent Company’s financial statements.

Facts and circumstances that would require an impairment assessment as set forth in PFRS 6, *Exploration for and Evaluation of Mineral Resources*, are as follows:

- The period for which the Parent Company has the right to explore in the specific area has expired or will expire in the near future, and is not expected to be renewed;
- Substantive expenditure on further exploration for and evaluation of mineral resources in the specific area is neither budgeted nor planned;
- Exploration for and evaluation of mineral resources in the specific area have not led to the discovery of commercially viable quantities of mineral resources and the entity has decided to discontinue such activities in the specific area; and
- Sufficient data exist to indicate that, although a development in the specific area is likely to proceed, the carrying amount of the exploration and evaluation asset is unlikely to be recovered in full from successful development or by sale.

There are no indicators of impairment that would trigger impairment review in 2022 and 2021 other than those mentioned below.

a. Gabon, West Africa

The Parent Company believes that the fluctuation in crude oil prices in the market, political risks in Gabon, discount rates and changes in other assumptions such as change in production profile which is based on continued production until the term of the existing Exploration Production Sharing Contract (“EPSC”) are indicators that the assets might be impaired or if there is reversal of prior impairment loss.

In 2018, the Gabonese Government allowed the sixth amendment to the EPSC that extends the exploitation period for the production licenses by ten (10) years, or from September 2018 until September 2028, extendible by five (5) years and by a final extension of 5 more years. The extension of the EPSC will allow the consortium to maximize the use of the existing facilities that are already in place to increase or maintain production until the field’s extended life (see Note 10).

b. SC 14-C2 - West Linapacan

SC 14-C2 has not yet expired and was granted with a 15-year extension of the SC as approved by the DOE from December 18, 2010 to December 18, 2025. The SC 14-C2 consortium proceeded with a third-party technical evaluation to assess potential production opportunities. With the SC nearing its expiration in December 2025, the assets were tested for impairment.

c. SC 6A - Octon-Malajon Block

In March 31, 2021, Philodrill, the operator, gave notice to the DOE that the Joint Venture has elected not to enter the 12th year of the final 15-year term of SC 61 and consequently surrender the Service Contract.

d. Impairment loss (reversal)

In assessing whether impairment is required, the carrying value of the asset is compared with its recoverable amount. The recoverable amount is the higher of the asset's fair value less costs to sell and value in use. Given the nature of the Parent Company's activities, information on the fair value of an asset is usually difficult to obtain unless negotiations with potential purchasers or similar transactions are taking place. Consequently, unless indicated otherwise, the recoverable amount used in assessing the impairment loss is value in use.

The Parent Company estimates value in use using a discounted cash flow model using a discount rate of 14.64% and 10.00% as of December 31, 2022 and 2021, respectively.

The Parent Company recognized impairment (reversal of impairment) loss for the years ended December 31, 2022 and 2021 (nil in 2020) presented on a net basis:

	2022	2021
Wells, platforms and other facilities – net (Note 10)	<b>(P11,893,541)</b>	P22,489,016
Deferred oil exploration costs – net (Note 11)	<b>594,172</b>	141,834,278
	<b>(P11,299,369)</b>	P164,323,294

As of December 31, 2022 and 2021, the net carrying value of the assets forming part of the CGU are as follows:

	2022	2021
Wells, platforms and other facilities (Note 10)	<b>P763,828,912</b>	P658,719,269
Production license (Note 14)	<b>26,582,207</b>	31,205,200
Deferred oil exploration costs (Note 11)	<b>246,707,152</b>	87,425,850
	<b>P1,037,118,271</b>	P777,350,319

*Estimation of asset retirement obligation*

The Parent Company has a legal obligation to share in the abandonment costs associated with the oilfields. The Parent Company recognizes the present value of the obligation in its share in the abandonment costs and capitalizes the present value of this cost as part of the balance of the related property and equipment, which are depleted using the unit-of-production method computed based on estimates of proved reserves.

Cost estimates expressed at projected price levels at the date of the estimate are discounted using a rate of 7.13% and 4.59% as of December 31, 2022 and 2021, respectively, to take into account the timing of payments. Each year, the provision is increased to reflect the accretion of discount and to accrue an estimate for the effects of inflation, with charges being recognized as accretion expense (see Note 17).

Changes in the asset retirement obligation that result from a change in the current best estimate of cash flow required to settle the obligation or a change in the discount rate are added to (or deducted from) the amount recognized as the related asset and the periodic unwinding of the discount on the liability is recognized in profit or loss as it occurs.

While the Parent Company has made its best estimate in establishing the asset retirement obligation, because of potential changes in technology as well as safety and environmental requirements, plus the actual time scale to complete decommissioning activities, the ultimate provision requirements could either increase or decrease significantly from the Parent Company's current estimates. The amounts and timing of recorded expenses for any period would be affected by changes in these factors and circumstances.

The Parent Company's asset retirement obligation amounted to ₱41.73 million and ₱62.19 million as of December 31, 2022 and 2021, respectively (see Note 17).

*Estimation of retirement benefits*

The cost of defined benefit pension plans and the present value of the pension obligation are determined using actuarial valuation. The actuarial valuation involves making various assumptions including determination of discount rates and future salary increases, among others. Due to the complexity of the valuation, the underlying assumptions and its long-term nature, defined benefit obligations are highly sensitive to changes in these assumptions. All assumptions are reviewed at the end of each accounting period. The net pension liability (asset) amounted to (₱10.26 million) and ₱2.88 million as of December 31, 2022 and 2021, respectively (see Note 19).

*Recognition of deferred tax assets*

The Parent Company reviews the carrying amounts of deferred tax assets at each reporting date and reduces them to the extent that it is no longer probable that sufficient future taxable profit will be available to allow all or part of the deferred tax assets to be utilized.

As of December 31, 2022 and 2021, the Parent Company did not recognize deferred tax assets on certain temporary differences, NOLCO and MCIT as the Parent Company believes that it may not be probable that sufficient taxable income will be available in the near foreseeable future against which the tax benefits can be realized prior to their expiration (see Note 20).

---

## 6. Cash and Cash Equivalents

	<b>2022</b>	2021
Cash on hand and in banks	<b>₱36,689,565</b>	₱130,681,179
Cash equivalents	<b>279,421,840</b>	28,683,383
	<b>₱316,111,405</b>	₱159,364,562

Cash in banks earn interest at the prevailing bank deposit rates. Cash equivalents earn interest at the prevailing short-term placement rates.

Interest income earned on cash in banks and cash equivalents amounted to ₱2.98 million, ₱0.09 million and ₱0.54 million in 2022, 2021 and 2020, respectively.

## 7. Financial Assets at FVTPL

	2022	2021
Marketable equity securities	<b>₱6,770,090</b>	₱6,817,228
Investment in golf club shares	<b>770,000</b>	770,000
	<b>₱7,540,090</b>	₱7,587,228

Net gain (loss) on fair value changes on financial assets at FVTPL included in the parent company profit or loss amounted to (₱0.05 million), ₱0.06 million and (₱0.71 million) in 2022, 2021 and 2020, respectively. Dividend income received from equity securities amounted to ₱79,047, ₱38,134 and ₱71,770 in 2022, 2021 and 2020, respectively.

## 8. Receivables

	2022	2021
Accounts receivable from:		
Consortium operator	<b>₱41,055,254</b>	₱47,982,278
Due from related parties (Note 23)	<b>1,765,776</b>	139,897
Others	<b>57,816</b>	57,815
Interest receivable	<b>146,359</b>	38,900
	<b>43,025,205</b>	48,218,890
Less allowance for doubtful accounts	<b>2,682,453</b>	2,682,452
	<b>₱40,342,752</b>	₱45,536,438

The Parent Company's receivables are mainly due from consortium operator and are due within one (1) year.

## 9. Other Current Assets

	2022	2021
Restricted cash	<b>₱20,926,811</b>	₱157,754,239
Prepaid taxes	<b>4,321,601</b>	6,762,091
Prepaid expenses	<b>2,216,300</b>	2,189,745
Advances to suppliers	<b>453,612</b>	11,166,714
Refundable deposits	<b>448,721</b>	349,721
Supplies	<b>99,580</b>	99,580
	<b>₱28,466,625</b>	₱178,322,090

The Parent Company's restricted cash consists of the following:

### *Restricted cash - Share in Etame escrow fund (current portion)*

As of December 31, 2022, this represents Parent Company's share in the current portion of the Abandonment Fund related to FPSO decommissioning and Etame Field Asset Retirement Obligations. These funds were released from the escrow account in February 2023.

As of December 31, 2021, this balance includes escrow to secure payment and discharge of the Parent Company's obligations and liabilities under the FPSO contract amounting to ₱3.03 million.

*Restricted cash – Stock Rights Offering (SRO)*

Restricted cash pertains to the remaining unused portion of the SRO Proceeds held under an escrow account amounting to ₱154.55 million as of December 31, 2021. On April 18, 2022, the remaining SRO funds were withdrawn from the escrow account and will be used to pay loans and interest.

Interest income earned on restricted cash amounted to ₱.09 million, ₱0.73 million and ₱1.87 million in 2022, 2021 and 2020, respectively.

**10. Property and Equipment**

	2022					Total
	Wells, Platforms and Other Facilities	Office Condominium Unit and Improvements	Transportation Equipment	Office Furniture and Other Equipment		
<b>Cost</b>						
Balances at beginning of year	₱2,222,351,170	₱41,590,986	₱27,368,920	₱26,378,693		₱2,317,689,769
Additions	207,643,520	792,416	17,738,407	2,414,608		228,588,951
Change in ARO estimate (Note 17)	(29,140,538)	-	-	-		(29,140,538)
Balances at end of year	2,400,854,152	42,383,402	45,107,327	28,793,301		2,517,138,182

The Parent Company has remaining payables pertaining to additions to property and equipment amounting to nil and ₱2.59 million as of December 31, 2022 and 2021, respectively. These are considered as noncash investing activities in the statement of cash flows.

Transfers from deferred oil exploration costs and changes in ARO estimate are considered as noncash investing activities.

There are no property and equipment items that are pledged as security to liabilities as of December 31, 2022 and 2021.

As of December 31, 2022 and 2021, the participating interest of the Parent Company in various service contracts areas are as follows:

Gabonese Oil Concessions	2.525%
West Linapacan - SC 14C2	4.137%

### **Foreign Operations**

#### *Gabon, West Africa*

##### Background

The Group holds approximately 2.53% participating interest in the Exploration and Production Sharing Contract (“EPSC”) covering the Etame block in Gabon, West Africa (the “Etame Marin Permit”). The other parties in the consortium are Addax Petroleum Etame, Inc. (33.90%) and VAALCO Gabon (Etame), Inc. (63.58%) (the “Gabon Consortium”), are leaders in their respective areas of operation. VAALCO is the Consortium’s operator, and is in charge of conducting the exploration and production activities in the Gabon contract area.

The EPSC is a contract with the Gabonese Government that gives the holder of the said EPSC exclusive rights and obligations to perform exploration, exploitation, and production activities and in the case of the consortium, within the Etame Marin Permit area.

In August 2021, the Consortium entered into a Bareboat Charter Agreement and Operating Agreement with World Carrier Offshore Services Corporation (World Carrier) to provide and operate a Floating Storage and Offloading (FSO) unit at the Etame Marin field for up to eight (8) years with additional option periods available upon the expiration of the current 20-year Floating Production, Storage and Offloading (FPSO) contract with BW Offshore in September 2022.

In December 2021, the consortium commenced a four-well drilling program in the Etame, Avouma and North Tchibala fields using the Borr Norve jack-up drilling rig, aimed to sustain field production to above 20,000 BOPD.

Etame-8H sidetrack was completed in February 2022. Avouma-3H sidetrack was completed in April 2022, South Tchibala-1HB sidetrack in July 2022, and North Tchibala-2H sidetrack in November 2022. Workovers were also conducted on Ebouri-2H, North Tchibala-1H and Southeast Etame-4H wells within 2022. This resulted in an increase in overall crude production of ~18,000-20,000 BOPD by the end of 2022.

Given the extended EPSC period, the Consortium is currently firming up the most feasible Integrated Field Development Plan (IFDP) to extract the remaining recoverable oil volumes until at least 2028 up to 2038 (final extension). This IFDP may include: 1) production from sour oil reserves, 2) outfield drilling opportunities, and 3) facility maintenance strategies.

#### Update on Production

Production was routed to the *Petroleo Nautipa*, the spread-moored (FPSO) vessel from the Etame, Avouma-Southeast Etame-North Tchibala and Ebouri platforms, and from the wells tied to the subsea Etame manifold. The produced oils were processed and exported from the FPSO, which had a storage capacity of one million barrels of oil (MMBO).

Throughout 2022, facility reconfiguration works were being completed in parallel for the hook-up and commissioning of the new FSO vessel *Teli*, which replaced the *Petroleo Nautipa* FPSO vessel in mid-October 2022. The FSO vessel is now operational and receiving crude from all Etame Marin platform wells. The two (2) old subsea wells – Etame-6H and Etame-7H – which were originally connected directly to the old *Petroleo Nautipa* FPSO, have been hooked-up to the FSO last December 30, 2022. Final punchlist items are currently being completed.

Crude production comes from four (4) oil fields (Etame, Avouma, Ebouri and North Tchibala).

In 2022, total crude production reached 5.94 MMBO. The Consortium managed 11 liftings, resulting in net crude export of 5.133 MMBO, with crude oil market prices ranging from US\$76 – US\$133 per barrel.

In 2021, total crude production reached 5.42 MMBO. The Consortium managed 11 liftings, resulting in net crude export of 5.867 MMBO, with crude oil market prices ranging from US\$50 – US\$85 per barrel.

In 2020, total crude production reached 6.57 MMBO. The Consortium managed 11 liftings, resulting in a net crude export of 6.02 MMBO, with crude oil market prices ranging from US\$17 – US\$66 per barrel.

Since the Gabon oilfield has been put on-line in 2002, a total of 130 MMBO has been extracted to date over the last 20 years.

As of December 31, 2022 and 2021, PetroEnergy has investments in Gabon, West Africa included in “Wells, platforms and other facilities” account under “Property, plant and equipment” amounting to ₱763.83 million and ₱596.47 million, respectively. Reversal of impairment loss amounted to ₱74.14 million in 2022 and ₱121.59 million in 2021 (nil in 2020).

#### Philippine Operations

##### ***SC 14-C2 – West Linapacan, Northwest Palawan***

West Linapacan was discovered in the early 1990s. It produced oil from 1992 to 1996, peaking at 18,000 BOPD, before it was shut-in due to early water incursion.

The SC 14C2 Consortium, led by operator Philodrill Corp., negotiated with a potential farmee for the drilling of potential drilling targets, in exchange for a majority share and Operatorship of SC 14C2. This farm-in is subject to the approval of the Department of Energy (DOE).

While the consortium awaited the farmee’s completion of the farm-in documentation, Philodrill continued to do in-house G&G work over at the West Linapacan area at the interim. For compliance, a

“Transition Work Program and Budget, covering November 2020 to March 2021 was submitted to the DOE in November 2020 and was approved.

Throughout the second half of 2021 and 2022, the SC 14-C2 consortium proceeded with a third-party technical evaluation of the West Linapacan B field, to assess potential production opportunities. SC 14-C2 is due to expire in December 2025.

Due to the limited term remaining, PetroEnergy assessed the recoverability of the investment included in “Wells, platforms and other facilities” account under “Property, plant and equipment” and recorded impairment loss amounting to ₱62.25 million and ₱144.07 million in 2022 and 2021 (nil in 2020), respectively.

As of December 31, 2022 and 2021, PetroEnergy has investments in the West Linapacan Oilfield included in “Wells, platforms and other facilities” account under “Property, plant and equipment” amounts to nil and ₱62.25 million, respectively.

## 11. Deferred Oil Exploration Costs

The movements in deferred oil exploration costs follow:

	2022	2021
<b>Cost</b>		
Balances at beginning of year	<b>₱418,786,296</b>	₱530,976,224
Additions	<b>196,670,258</b>	47,107,706
Write-off / relinquishment (Note 5)	–	(159,297,634)
Balances at end of year	<b>615,456,554</b>	418,786,296
<b>Accumulated impairment losses</b>		
Balances at beginning of year	<b>302,979,372</b>	320,442,728
Impairment loss (reversal) (Note 5)	<b>594,171</b>	(17,463,356)
Balances at end of year	<b>303,573,543</b>	302,979,372
	<b>₱311,883,011</b>	₱115,806,924

Details of deferred oil exploration costs as of December 31 follow:

	2022	2021
<b>Cost</b>		
Gabonese Oil Concessions (Note 10)	<b>₱547,199,509</b>	₱387,776,223
NW Palawan -SC 75	<b>65,175,859</b>	28,381,074
West Linapacan - SC 14C2 (Note 10)	<b>3,081,186</b>	2,628,999
	<b>615,456,554</b>	418,786,296
<b>Accumulated impairment losses</b>		
Gabonese Oil Concessions (Note 10)	<b>300,492,357</b>	300,492,357
West Linapacan - SC 14C2 (Note 10)	<b>3,081,186</b>	2,487,015
	<b>303,573,543</b>	302,979,372
	<b>₱311,883,011</b>	₱115,806,924

As of December 31, 2022, the Parent Company has remaining payables pertaining to additions to deferred oil exploration costs amounting to ₱11.93 million (nil in 2021). This is considered as noncash investing activities in the statement of cash flows.

### **Philippine Oil Operations - Development Phase**

Under the SCs entered into with the DOE covering certain petroleum contract areas in various locations in the Philippines, the participating oil companies (collectively known as “Contractors”) are obliged to provide, at their sole risk, the services, technology and financing necessary in the performance of their obligations under these contracts. The Contractors are also obliged to spend specified amounts indicated in the contract in direct proportion to their work obligations.

However, if the Contractors fail to comply with their work obligations, they shall pay to the government the amount they should have spent but did not in direct proportion to their work obligations. The participating companies have Operating Agreements among themselves which govern their rights and obligations under these contracts.

The full recovery of these deferred costs is dependent upon the discovery of oil in commercial quantities from any of the petroleum concessions and the success of future development thereof.

As of December 31, 2022 and 2021, the remaining participating interest of the Parent Company in Petroleum SC areas is SC 75 – Offshore Northwest Palawan wherein the Parent Company has 15% interest.

#### ***SC 75 - Offshore Northwest Palawan***

Service Contract 75 (SC 75) was signed on December 27, 2013 with partners PXP Energy Corporation (PXP energy) [50%] and PNO-Exploration Corporation (35%). The block covers the West Philippine Sea with an area of 616,000 hectares.

On October 14, 2020, the Department of Energy (DOE) issued a formal notice to the SC 75 consortium, lifting the Force Majeure imposed since September 2015. Through this letter, the consortium was notified to resume its Work Program commitments under SC 75, including the committed ~1,000 sq.km 3D seismic survey over the identified leads in SC 75.

On January 6, 2022, the SC 75 consortium officially engaged Shearwater Geoservices Ltd. for the ~1,100 sq.km 3D seismic survey over SC 75 using the M/V Geo Coral seismic vessel. However, the programmed 3D seismic acquisition campaign was suspended on April 6, 2022 after Operator PXP Energy received a written directive from the DOE to put all exploration activities on hold until the Security, Justice and Peace Coordinating Cluster (SJPC) issues the necessary clearance to proceed. On April 11, 2022, PXP Energy declared a Force Majeure event over the suspended seismic survey.

The SC 75 consortium is awaiting further instructions from the DOE, while all contracted vessels and personnel for the seismic survey have since demobilized from the SC 75 area.

#### ***SC 6A - Octon-Malajon Block***

This is one of the first exploration areas in offshore Palawan. It includes about 165,000 hectares of relatively shallow water areas where a string of wells has found non-commercial oil accumulations in varied reservoir horizons. DOE granted in June 2009 the final 15-year extension of the SC-6A service contract.

In 2019, consortium operator Philodrill completed seismic interpretation and mapping works for the northern portion of the Octon-Malajon block, using recent and old SC 6A seismic data and subsurface data from the adjacent Galoc Field.

In 2020, Philodrill engaged Dubai-based consultants LMKR to conduct Quantitative Interpretation (QI) works to determine possible drilling opportunities in the northern portion of the block (Malajon field); the results of which were provided to the consortium in January 2021.

In March 31, 2021, Philodrill gave notice to the DOE that the Joint Venture has elected not to enter the 12th year of the final 15-year term of SC 61 and consequently surrender the Service Contract. The limited term remaining in the SC 6-A until its expiry in February 2024 exacerbated by the Covid-19 situation, greatly hampered the timely execution of the programs that the Joint Venture envisage undertaking to pursue appraisal programs and potential development opportunities in the area. Following the above, as of December 31, 2021, the Group has written-off the ₱159.30 million deferred cost.

The DOE formally approved the relinquishment of SC 6-A on September 5, 2022.

PERC held a 16.667% participating interest in SC 6-A.

## 12. Investments in Subsidiaries

	2022	2021
<b>Cost</b>		
PetroGreen		
Beginning balance	<b>₱2,165,058,153</b>	₱2,090,358,153
Additions	-	74,700,000
	<b>2,165,058,153</b>	2,165,058,153
Navy Road Development Corporation (NRDC)	<b>2,861,646</b>	2,861,646
	<b>2,167,919,799</b>	2,167,919,799
Accumulated impairment losses	<b>(2,861,646)</b>	(2,861,646)
	<b>₱2,165,058,153</b>	₱2,165,058,153

In 2021, additional investment was made by the Parent Company in PetroGreen amounting to ₱74.70 million representing 74,700,000 shares.

Dividend income received from subsidiaries amounted to ₱36.00 million, ₱150.93 million and nil in 2022, 2021 and 2020, respectively.

Information on the Parent Company's subsidiaries, which were all incorporated in the Philippines, are as follows:

<b>Subsidiaries</b>	<b>Nature of Business</b>	<b>Percentage of Ownership</b>
PetroGreen	Holding Company and undertakes renewable energy projects.	76.92% in 2022 and 90% in 2021 (same in 2020)
NRDC	As of December 31, 2022 and 2021, NRDC has not commenced commercial operations and has not incurred any expenses. The management of the Parent Company intends to liquidate NRDC and has provided for full impairment losses on its investment in NRDC.	100%

Below are the subsidiaries of PERC, through PetroGreen, which are all incorporated in the Philippines, with their respective percentage ownership as of December 31, 2022, 2021 and 2020:

<b>Subsidiaries</b>	<b>Nature of Business</b>	<b>Percentage of Ownership of PetroGreen</b>
MGI	Engaged in geothermal renewable energy production and generation	65%
PetroSolar	Engaged in solar renewable energy production and generation	56%

The summarized financial information of these subsidiaries is provided below.

### 13. Investment Properties

As of December 31, 2022 and 2021, this account consists of land and parking lot space (located in Tektite) with cost amounting to ₱1.61 million.

The fair value of the investment properties of the Parent Company is between ₱1 million to ₱1.70 million as of December 31, 2022 and 2021. The Parent Company determined the fair values of the Parent Company's investment properties on the basis of recent sales of similar properties in the same areas as the investment properties and taking into account the economic conditions prevailing at the time the valuations were made.

As of December 31, 2022 and 2021, the fair value of the investment properties is classified under the Level 3 category.

Except for insignificant amounts of real property taxes on the investment properties, no other expenses were incurred, and no income was earned in relation to the investment properties in 2022, 2021 and 2020.

#### 14. Other Noncurrent Assets

	2022	2021
Restricted cash	<b>₱31,451,424</b>	₱44,183,568
Intangible assets, net	<b>26,850,855</b>	31,479,592
Others	<b>1,238,289</b>	1,134,299
	<b>₱59,540,568</b>	₱76,797,459

##### *Restricted cash*

This pertains to the Parent Company's share in the non-current portion of escrow fund for the abandonment of the Etame Marine Permit.

##### *Intangible assets*

Intangible assets pertain to production license and software for accounting and for geological interpretation of Gabon Etame oil fields.

Others	<b>140,453</b>	87,365
	<b>₱121,068,117</b>	₱54,228,289

Accounts payable include Dividends payable pertaining to unclaimed checks amounting to ₱10.96 million and ₱10.66 million as of December 31, 2022 and 2021, respectively.

Other accrued expenses include utilities and security services, among others.

The Parent Company's accounts payable and accrued expenses are due within one year.

## 16. Loans Payable

The Parent Company's short-term loans payable as of December 31 follow:

	2022	2021
Principal, balance at beginning of year	<b>₱190,000,000</b>	₱228,500,000
Add availments during the year	<b>561,000,000</b>	268,500,000
Less principal payments during the year	<b>(500,000,000)</b>	(307,000,000)
Principal, balance at end of year	<b>₱251,000,000</b>	₱190,000,000

The Parent Company entered into unsecured loan agreements specifically to finance its Etame Expansion Project and investments in Renewable Energy Projects.

### Omnibus Credit Line Agreement (OCLA) with the Development Bank of the Philippines (DBP)

On April 27, 2015, the Parent Company entered into an OCLA with DBP which provides a credit facility in the principal amount not exceeding ₱420.00 million. Effective January 19, 2021, the credit facility was decreased to ₱300.00 million. Loans payable to DBP are as follows:

As of December 31, 2022:

- ₱63 million with interest rate of 5.8% and maturity on January 10, 2023
- ₱108 million with interest rate of 5.5% and maturity on January 26, 2023
- ₱80 million with interest rate of 5.8% and maturity on June 23, 2023

As of December 31, 2021:

- ₱70 million with interest rate of 5.25% and maturity on May 6, 2022.

### Short-term Loan with Rizal Commercial Banking Corporation (RCBC)

In 2020, the Parent Company obtained a clean loan from RCBC amounting to ₱150.00 million with interest rate of 4.5% and maturity on November 15, 2021.

On November 15, 2021, PetroEnergy obtained a loan from RCBC amounting to ₱120.00 million with interest of 4.5% and maturity on May 4, 2022.

As of December 31, 2022, the Company has already paid the outstanding short-term loan from RCBC.

Interest expense related to these loans amounted to ₱9.68 million, ₱11.98 million and ₱17.02 million in 2022, 2021 and 2020, respectively. Accrued interest payable amounted to ₱0.56 million and ₱1.21 million as of December 31, 2022 and 2021, respectively (see Note 15).

## 17. Asset Retirement Obligation

The Parent Company has recognized its share in the abandonment costs associated with the Etame, Ebouri and Avouma oilfields located in Gabon, West Africa.

Movements in this account follow:

	2022	2021
Balances at beginning of year	<b>₱62,193,875</b>	₱64,070,738
Change in estimate (Note 10)	<b>(29,140,538)</b>	(7,453,085)
Accretion expense	<b>2,070,184</b>	1,869,946
Foreign exchange adjustment	<b>6,605,081</b>	3,706,276
Balances at end of year	<b>₱41,728,602</b>	₱62,193,875

The asset retirement obligation of the Parent Company is expected to be settled at the end of its EPSC. Discount rate of 7.13% and 4.59% as of December 31, 2022 and 2021, respectively, were used in estimating the provision for the oilfields offshore Gabon, West Africa.

## 18. Equity

Under the existing laws of the Republic of the Philippines, at least 60% of the Parent Company's issued capital stock should be owned by citizens of the Philippines for the Parent Company to own and hold any mining, petroleum or renewable energy contract area. As of December 31, 2022, the total issued and subscribed capital stock of the Parent Company is 99.77% Filipino and .23% non-Filipino as compared to 99.83% Filipino and 0.17% non-Filipino as of December 31, 2021.

As of December 31, 2022 and 2021, paid-up capital consists of:

Capital stock - ₱1 par value	
Authorized - 700,000,000 shares	
Issued and outstanding	₱568,711,842
Additional paid-in capital	2,156,679,049
	₱2,725,390,891

The Parent Company's track record of capital stock follows:

	Number of shares registered	Issue/offer price	Date of SEC approval	Number of holders as of year-end
Listing by way of introduction -				
August 11, 2004	84,253,606	₱3/share	August 4, 2004

On July 26, 2017, at the BOD meeting, the Parent Company was authorized to raise approximately one billion pesos (₱1,000,000,000) in capital, by offering and issuing to all eligible stockholders as of record date, the rights to subscribe up to all of the existing unissued common shares of the Parent Company (“Stock Rights Offer”).

On September 29, 2017, the Parent Company filed its application for the listing and trading of rights shares with the PSE. On December 13, 2017, the PSE approved the application to list the Rights Shares.

The rights offer entitled eligible stockholders as of record date of January 12, 2018 to subscribe to one rights share for every 2.6 shares held at an offer price of ₱4.80 per share.

The rights offer was undertaken in January 22 to 26, 2018. Following the close of the offer period, the Parent Company successfully completed the stock rights offer for 157,975,512 common shares with gross proceeds of ₱758.28 million and was subsequently listed on the PSE on February 2, 2018.

The proceeds from the stock rights offer were used for the development and expansion plans of the Group’s renewable energy projects and general corporate requirements.

#### *Dividend Declaration*

On July 28, 2022, the BOD approved the declaration of 5% cash dividend or ₱0.05 per share to all stockholders of record as of August 15, 2022 and payable on September 8, 2022.

#### *Cumulative Translation Adjustment*

In 2018, because of the change in business circumstances of the Parent Company, management changed its functional currency from United States Dollar (USD) to PHP effective January 31, 2018. All resulting exchange differences in the remeasurement of USD balances to PHP balances were recognized as ‘Cumulative Translation Adjustment’.

#### *Capital Management*

The primary objective of the Parent Company’s capital management is to ensure that it maintains a strong credit rating and healthy capital ratios in order to support its business and maximize shareholders’ value.

The Parent Company manages its capital structure and makes adjustments to it, in light of changes in economic conditions. To maintain or adjust the capital structure, the Parent Company may adjust the dividend payment to shareholders or issue new shares.

As of December 31, 2022 and 2021, the Parent Company’s sources of capital are as follows:

	<b>2022</b>	2021
Capital stock	<b>₱568,711,842</b>	₱568,711,842
Additional paid-in capital	<b>2,156,679,049</b>	2,156,679,049
Retained earnings	<b>251,413,711</b>	53,226,723
Re-measurement gain (loss) on defined benefit obligation	<b>5,196,628</b>	(1,668,698)
Cumulative translation adjustment	<b>356,478,170</b>	356,478,170
	<b>₱3,338,479,400</b>	₱3,133,427,086

The table below demonstrates the debt-to-equity ratios of the Parent Company as of December 31:

	2022	2021
Total liabilities	<b>₱413,796,719</b>	₱309,304,397
Total equity	<b>3,338,479,400</b>	3,133,427,086
Debt-to-equity ratio	<b>0.12:1</b>	0.10:1

Based on the Parent Company's assessment, the capital management objectives were met in 2022 and 2021.

The Company has no externally imposed capital requirements as of December 31, 2022 and 2021.

## 19. Retirement Benefits

The Parent Company has a funded noncontributory defined benefit retirement plan (the Plan) for all of its employees. The Plan provides for normal and early retirement, as well as, death and disability benefits. The latest retirement valuation was as of December 31, 2022.

The retirement fund is administered by Rizal Commercial Banking Corporation (RCBC), appointed as trustee. The fund has no investments in the Parent Company's equity as of December 31, 2022 and 2021.

Pension benefits cost consists of:

	2022	2021
Current service cost	<b>₱1,504,536</b>	₱3,069,277
Net interest expense (income)	<b>203,976</b>	(148,578)
Pension benefits cost	<b>₱1,708,512</b>	₱2,920,699

The accrued retirement liability (net pension asset) recognized in the parent company statements of financial position as of December 31 are as follows:

	2022	2021
Present value of defined benefit obligation	<b>₱21,214,781</b>	₱36,835,491
Fair value of plan assets	<b>(31,478,585)</b>	(33,953,258)
Accrued retirement liability (asset)	<b>(₱10,263,804)</b>	₱2,882,233

The movements in the accrued retirement liability (asset) recognized in the Parent Company statements of financial position are as follows:

	2022	2021
Beginning balance	<b>₱2,882,233</b>	(₱5,649,041)
Pension benefits cost	<b>1,708,512</b>	2,920,699
Re-measurement loss (gains) on defined benefit plan	<b>(9,153,768)</b>	5,610,575
Contributions	<b>(5,700,781)</b>	-
Ending balance	<b>(₱10,263,804)</b>	₱2,882,233

The details of the re-measurement gains (losses) recognized in other comprehensive income are as follows:

	2022	2021
Actuarial gains (losses) arising from changes in:		
Financial assumptions	<b>₱1,869,991</b>	(₱937,662)
Demographic assumptions	<b>1,477,169</b>	-
Experience adjustments	<b>7,341,834</b>	(3,554,828)
Return on plan assets (excluding amount included in net interest)	<b>(1,535,226)</b>	(1,118,085)
	<b>₱9,153,768</b>	(₱5,610,575)

Changes in the present value of the defined benefit obligation are as follows:

	2022	2021
Beginning balance	<b>₱36,835,491</b>	₱28,305,207
Current service cost	<b>1,504,536</b>	3,069,277
Interest cost	<b>1,808,623</b>	968,517
Benefits paid	<b>(8,244,875)</b>	-
Actuarial loss (gain)	<b>(10,688,994)</b>	4,492,490
Ending balance	<b>₱21,214,781</b>	₱36,835,491

Changes in the fair value of plan assets as of December 31 are as follows:

	2022	2021
Beginning balance	<b>₱33,953,258</b>	₱33,954,248
Benefit paid	<b>(8,244,875)</b>	-
Interest income	<b>1,604,647</b>	1,117,095
Actuarial loss	<b>(1,535,226)</b>	(1,118,085)
Contributions	<b>5,700,781</b>	-
Ending balance	<b>₱31,478,585</b>	₱33,953,258

The actual return on plan assets amounted to ₱69,421 and (₱990) in 2022 and 2021, respectively.

The components of net plan assets are as follows:

	2022	2021
Investments in quoted government securities	<b>₱31,389,851</b>	₱33,896,310
Interest receivable	<b>155,955</b>	131,455
Trust fee payable	<b>(67,221)</b>	(74,507)
	<b>₱31,478,585</b>	₱33,953,258

The principal actuarial assumptions used in determining retirement benefits benefit obligation as of December 31 follows:

	2022	2021
Salary rate increase	<b>8.00%</b>	7.00%
Discount rate	<b>7.31%</b>	4.91%

The sensitivity analysis below has been determined based on reasonably possible changes of each significant assumption on the accrued retirement liability as of December 31, assuming all other assumptions were held constant:

Assumptions:	Increase (decrease)	
	2022	2021
Discount rate:		
+0.5%	(P1,195,520)	(P1,195,520)
-0.5%	1,315,680	1,315,680
Salary increase rate:		
+1%	2,715,176	2,715,176
-1%	(2,316,283)	(2,316,283)

Shown below is the maturity analysis of the undiscounted benefit payments as of December 31, 2022 and 2021:

	2022	2021
Less than one year	P 24,386,387	P24,386,387
More than five years to 10 years	7,016,415	7,016,415
More than 10 years to 15 years	15,803,663	15,803,663
More than 15 years to 20 years	3,885,702	3,885,702
More than 20 years	116,380,019	116,380,019

## 20. Income Tax

The provision for (benefit from) income tax for the years ended December 31 consists of:

	2022	2021	2020
Current	P3,049,490	P1,556,340	P56,357
Deferred	(51,550)	(6,427,462)	7,327,986
	P2,997,940	(P4,871,122)	P7,384,343

Provision for current income tax in 2022, 2021 and 2020 pertains to MCIT.

President Rodrigo Duterte signed into law on March 26, 2021 the Corporate Recovery and Tax Incentives for Enterprises (CREATE) Act to attract more investments and maintain fiscal prudence and stability in the Philippines. Republic Act (RA) 11534 or the CREATE Act introduces reforms to the corporate income tax and incentives systems. It takes effect 15 days after its complete publication in the Official Gazette or in a newspaper of general circulation or April 11, 2021.

The following are the key changes to the Philippine tax law pursuant to the CREATE Act which have an impact on the Parent Company:

- Effective July 1, 2020, regular corporate income tax (RCIT) rate is reduced from 30% to 25%. Corporations with net taxable income exceeding P5 million and total assets exceeding P100 million (excluding land on which the business entity's office, plant and equipment are situated) during the taxable year, the RCIT rate is reduced to 25%.
- MCIT rate reduced from 2% to 1% of gross income effective July 1, 2020 to June 30, 2023.
- Imposition of improperly accumulated earnings tax (IAET) is repealed.

As of December 31, 2022 and 2021, the Parent Company did not recognize deferred tax assets on NOLCO, MCIT and allowance for impairment losses, with details as follow as of December 31.

	2022	2021
Allowance for impairment loss	<b>₱207,243,532</b>	₱144,403,009
NOLCO	<b>43,230,774</b>	224,262,306
MCIT	<b>4,662,188</b>	3,384,311
	<b>₱255,136,494</b>	₱372,049,626

The Parent Company believes that it may not be probable that sufficient taxable income will be available in the near foreseeable future against which the tax benefits can be realized prior to reversal and expiration of NOLCO and MCIT. Details of the NOLCO and MCIT follow as of December 31, 2022 follow:

	NOLCO		MCIT	
	2022	2021	2022	2021
Beginning balance	<b>₱224,262,306</b>	₱139,398,990	<b>₱3,384,311</b>	₱4,215,054
Additions	-	94,573,860	<b>3,049,490</b>	1,570,430
Applied	<b>(181,031,532)</b>	-	-	-
Expiration	-	(9,710,544)	<b>(1,771,613)</b>	(2,401,173)
Ending balance	<b>₱43,230,774</b>	₱224,262,306	<b>₱4,662,188</b>	₱3,384,311

Year Incurred	Year of Expiration	NOLCO		Year of Expiration	MCIT	
		2022	2021		2022	2021
2022	2025	<b>₱-</b>	₱-	2025	<b>₱3,049,490</b>	₱-
2021	2026	<b>43,230,774</b>	94,573,860	2024	<b>1,570,430</b>	1,570,430
2020	2025	-	108,752,259	2023	<b>42,268</b>	42,268
2019	2022	-	20,936,187	2022	-	1,771,613
		<b>₱43,230,774</b>	₱224,262,306		<b>₱4,662,188</b>	₱3,384,311

On September 30, 2020, the BIR issued Revenue Regulations No. 25-2020 implementing Section 4 of “Bayanihan to Recover As One Act” which states that the NOLCO incurred for taxable years 2020 and 2021 can be carried over and claimed as a deduction from gross income for the next five (5) consecutive taxable years immediately following the year of such loss.

The components of the Parent Company’s net deferred tax assets follow:

	2022	2021
Deferred tax assets recognized in net income:		
Net asset retirement obligation	<b>₱14,734,652</b>	₱12,173,360
Accrued retirement liability	-	720,558
	<b>14,734,652</b>	12,893,918
Deferred tax liabilities recognized in net income:		
Production revenue	<b>(3,609,299)</b>	(3,154,170)
Unrealized foreign exchange gain	<b>(2,019,574)</b>	(963,028)
Net retirement asset	<b>(2,565,951)</b>	-
	<b>(8,194,824)</b>	(4,117,198)
	<b>₱6,539,828</b>	₱8,776,720

The reconciliation of the statutory tax rate to the effective income tax rate shown in the parent company statements of comprehensive income follows:

	2022	2021	2020
Statutory tax rate	25.00%	(25.00%)	30.00%
Add (deduct) reconciling items:			
Non-taxable income	(5.16)	156.34	(0.03)
Movement in unrecognized deferred tax assets	(18.38)	(109.65)	(38.04)
Non-deductible expenses	0.17	(1.24)	1.44
Interest income subjected to final tax	(0.33)	0.85	(0.90)
Unrealized loss (gain) on FVTPL	0.01	0.06	0.25
Others	-	(1.94)	(0.20)
Effect or remeasurement of current and deferred income tax arising from change in tax rate due to CREATE Act	-	0.76	-
<b>Effective income tax rate</b>	<b>1.31%</b>	<b>20.18%</b>	<b>8.60%</b>

## 21. Oil Production

	2022	2021	2020
Production, transportation and other related expenses	<b>₱297,717,142</b>	₱178,665,694	₱154,375,753
Storage and loading expenses	<b>48,992,296</b>	48,992,296	48,958,540
Amortization (Note 14)	<b>4,622,993</b>	4,622,993	4,622,993
Supplies and facilities	<b>284,802</b>	284,802	245,499
Others	<b>3,718,985</b>	3,718,985	3,325,006
	<b>₱355,336,218</b>	₱236,284,770	₱211,527,791

## 22. General and Administrative Expenses

	2022	2021	2020
Salaries and wages (Note 23)	<b>₱57,316,528</b>	₱43,105,285	₱39,599,421
Professional, director's fees and others	<b>15,827,568</b>	13,148,160	12,302,378

### 23. Related Party Transactions

Parties are considered to be related if one party has the ability, directly or indirectly, to control the other party or exercise significant influence over the other party in making financial and operating decisions. Parties are also considered to be related if they are subject to common control or significant influences. Related parties may be individuals or corporate entities.

Details of related party transactions are as follows:

Related Party/Nature	Amount of Transactions		Outstanding Balance		Terms and Conditions
	2022	2021	2022	2021	
<b>Subsidiaries</b>					
<b>PetroGreen Energy Corporation</b>

	2022	2021	2022	2021	
			(2,664,325)	(P4,384,857)	

- a. Advances pertain to the reimbursable operating expenses incurred by the Parent Company in behalf of PetroGreen, MGI, PetroSolar and PetroWind. The related parties paid for the documentary stamp taxes (DST) of these reimbursements. These are non-interest bearing and payable when due and demandable.
- b. Time-writing fees are charged by PetroGreen for accounting, legal management and other support services rendered to the Parent Company. These are noninterest bearing and is due on demand within one year or less.
- c. Accounts payable to PetroGreen pertain to the reimbursable operating expenses incurred by PetroGreen in behalf of the Parent Company. The Parent Company paid for the DST of these reimbursements. These are non-interest bearing and payable when due and demandable.
- d. Annual management fees are collected from PetroSolar and PetroWind representing technical, legal, accounting and other management activities rendered.
- e. Accounts payable to NRDC pertain to the noninterest bearing outstanding amount owed by the Parent Company to NRDC as of December 31, 2022 and 2021 (Note 15).
- f. PetroEnergy has an Internal Audit Engagement arrangement with House of Investments (HI). These are non-interest bearing and are due and demandable.
- g. On November 4, 2013, PetroWind executed an OLSA with the Development Bank of the Philippines for a loan facility of up to P2.8 billion which was later increased to P3.0 billion. The Parent Company signed the OLSA as a guarantor.

#### Compensation of Key Management Personnel of the Parent Company

The Parent Company has a profit-sharing plan for directors, officers, managers and employees as indicated in its by-laws. The amount, the manner and occasion of distribution is at the discretion of the BOD, provided that profit share shall not exceed 5% of the audited income before income tax and profit share.

The remuneration of the Parent Company's directors and other members of key management are as follows:

	2022	2021	2020
Salaries and wages and other short-term benefits	<b>P24,751,739</b>	P20,810,412	P20,962,298
Directors' fees	<b>10,140,906</b>	5,438,567	5,674,198
Retirement expense	<b>1,708,512</b>	1,935,011	2,242,667
	<b>P36,601,157</b>	P28,183,990	P28,879,163

## 24. Financial Instruments

The Parent Company's principal financial instruments include cash and cash equivalents, trading and investment securities (financial assets at FVTPL) and receivables. The main purpose of these financial instruments is to fund the Parent Company's working capital requirements.

### Categories and Fair Values of Financial Instruments

The carrying amount of the Parent Company's financial assets and financial liabilities approximate their fair values.

The methods and assumptions used by the Parent Company in estimating the fair value of financial instruments are:

<b>Financial instruments</b>	<b>Considerations</b>
<i>Cash and cash equivalents, receivables, and restricted cash</i>	Due to the short-term nature of the instruments, carrying amounts approximate fair values as of the reporting date.
<i>Equity securities</i>	Fair values are based on published quoted prices (Level 1).
<i>Golf club shares</i>	Fair values are based on quoted market prices at reporting date (Level 1).
<i>Accounts payable and accrued expenses; short-term loans</i>	Due to the short-term nature of the instrument, carrying amounts approximate fair values.

### Financial Risk Management Objectives and Policies

The Parent Company manages and maintains its own portfolio of financial instruments in order to fund its own operations and capital expenditures. Inherent in using these financial instruments are the following financial risks on liquidity, market and credit.

#### *a. Liquidity Risk*

Liquidity risk is the risk that the Parent Company is unable to meet its financial obligations when due. The Parent Company monitors its cash flow position and overall liquidity position in assessing its exposure to liquidity risk. The Parent Company maintains a level of cash and cash equivalents deemed sufficient to finance its operations and to mitigate the effects of fluctuation in cash flows. To cover its short-term and long-term funding requirements, the Parent Company intends to use internally generated funds as well as to obtain loan from financial institutions.

\*Excluding statutory payables

b. *Market Risk*

Market risk is the risk of loss on future earnings, on fair values or on future cash flows that may result from changes in market prices. The value of a financial instrument may change as a result of changes in equity prices, foreign currency exchange rates, interest rates and other market changes.

Foreign Exchange Risk

Foreign currency risk is the risk that the value of the Parent Company's financial instruments denominated other than the Parent Company's functional currency diminishes due to unfavorable changes in foreign exchange rates. The Parent Company's transactional currency exposures arise from cash and cash equivalents, receivables, restricted cash and accounts payable and accrued expenses.

The following table sets forth the foreign currency-denominated financial instruments of the Parent Company as of December 31, 2022 and 2021:

	2022		2021	
	US Dollar	Peso Equivalent	US Dollar	Peso Equivalent
<i>Financial assets</i>				
Cash and cash equivalents	<b>\$1,463,404</b>	<b>₱82,126,238</b>	\$2,096,605	₱106,453,022
Receivables	<b>674,774</b>	<b>37,868,318</b>	892,186	45,299,852
Advances to suppliers			216,720	11,003,741
Restricted cash	<b>933,326</b>	<b>52,378,235</b>	933,326	47,388,694
	<b>3,071,504</b>	<b>172,372,791</b>	4,138,837	210,145,309
<i>Financial liabilities</i>				
Accounts payable and accrued expenses	<b>1,187,125</b>	<b>66,621,466</b>	190,197	9,657,062
<b>Net exposure</b>	<b>\$1,884,379</b>	<b>₱105,751,325</b>	<b>\$3,948,640</b>	<b>₱200,488,247</b>

As of December 31, 2022 and 2021, the exchange rates used for conversion are ₱56.12 per \$ and ₱50.77 per \$, respectively.

The following table demonstrates the sensitivity to a reasonably possible change in US dollar exchange rates. With all other variables held constant, the effect on the Parent Company's loss before is as follows:

<b>2022</b>	
Increase/(decrease) in foreign currency exchange rate	Effect on loss before income tax
+11%	<b>₱11,134,571</b>
-11%	<b>(11,134,571)</b>
<b>2021</b>	
Increase/(decrease) in foreign currency exchange rate	Effect on loss before income tax
+6%	₱11,427,613
-6%	(11,427,613)

There is no other impact on the Parent Company's equity other than those already affecting loss before income tax.

c. *Credit Risk*

Credit risk represents the loss that the Parent Company would incur if counterparties fail to perform under their contractual obligations. The Parent Company established controls and procedures on its credit policy to determine and monitor the credit worthiness of customers and counterparties. There are significant concentrations of credit risk within the Parent Company since most of its financial assets are with consortium operator, although credit risk is immaterial.

The Parent Company has a well-defined credit policy and established credit procedures. In addition, receivable balances are being monitored on a regular basis to ensure timely execution of necessary intervention efforts.

The table below summarizes the Parent Company's gross maximum credit risk exposure from its financial instruments. These amounts are gross of collateral and credit enhancements, but net of any amounts offset and allowance for impairment losses:

	<b>2022</b>	2021
Cash in banks and cash equivalents	<b>₱316,111,405</b>	₱159,364,562
Receivables	<b>40,342,752</b>	45,536,438
Financial assets at FVTPL	<b>7,540,090</b>	7,587,228
Refundable deposits	<b>448,721</b>	349,721
Restricted cash	<b>52,378,235</b>	201,937,807
	<b>₱416,821,203</b>	₱414,775,756

An impairment analysis is performed at each reporting date using a provision matrix to measure ECL. The mechanics of the ECL calculations and the key elements are, as follows:

- Probability of default (PD)* is an estimate of the likelihood of default over a given time horizon.
- Exposure at default (EAD)* is an estimate of the exposure at a future default date taking into account expected changes in the exposure after the reporting date.
- Loss given default (LGD)* is an estimate of the loss arising in the case where a default occurs at a given time.

ECLs are recognized in two stages. For credit exposures for which there has not been a significant increase in credit risk since initial recognition, ECLs are provided for credit losses that result from default events that are possible within the next 12-months (a 12-month ECL). For those credit exposures for which there has been a significant increase in credit risk since initial recognition, a loss allowance is required for credit losses expected over the remaining life of the exposure, irrespective of the timing of the default (a lifetime ECL). In its ECL models, the Group relies on a broad range of forward looking information as economic inputs.

The inputs and models used for calculating ECLs may not always capture all characteristics of the market at the date of the financial statements. To reflect this, qualitative adjustments or overlays are occasionally made as temporary adjustments when such differences are significantly material.

For cash and cash equivalents and quoted government securities, the Parent Company applies the low credit risk simplification where the Parent Company measures the ECLs on a 12-month basis based on the probability of default and loss given default which are publicly available. The Parent Company also evaluates the credit rating of the bank and other financial institutions to determine whether the debt instrument has significantly increased in credit risk and to estimate ECLs.

The Parent Company considers its cash and cash equivalents and quoted government securities as high grade since these are placed in financial institutions of high credit standing. Accordingly, ECLs relating to these debt instruments rounds to nil.

The following tables show the aging of financial assets as of December 31, 2022 and 2021:

	2022		Total
	Within one year	Credit impaired	
Cash and cash equivalents*	<b>₱316,111,405</b>	<b>₱-</b>	<b>₱316,111,405</b>

## 25. Basic/Diluted Earnings (Loss) Per Share

The computation of the Parent Company's EPS follows:

	<b>2022</b>	2021	2020
Net income (loss)	<b>₱226,622,580</b>	₱29,010,846	(₱93,295,082)
Weighted average number of shares	<b>568,711,842</b>	568,711,842	568,711,842
Basic/diluted earnings (loss) per share	<b>₱0.3985</b>	₱0.0510	(₱0.1640)

Earnings per share are calculated using the net income attributable to equity holders of the Parent Company divided by the weighted average number of shares.

---

## 26. Segment Information

The Parent Company has only one reportable segment which is oil and mineral exploration, development and production.

Operating results of the Parent Company are regularly reviewed by the management, to make decisions about resources to be allocated to the segment and assess its performance. Segment revenue and segment expenses are measured in accordance with PFRS. The presentation and classification of segment revenue and segment expenses are consistent with the presentation and classification in the statements of comprehensive income.

The Parent Company's primary operations are located in Gabon, Africa. All revenues are generated from sale of oil products in Gabon, West Africa.

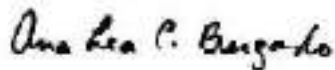

## **INDEPENDENT AUDITOR'S REPORT ON SUPPLEMENTARY SCHEDULES**

The Board of Directors and Stockholders  
PetroEnergy Resources Corporation  
7th floor, JMT Building, ADB Avenue  
Ortigas Center, Pasig City

We have audited in accordance with Philippine Standards on Auditing, the parent company financial statements of PetroEnergy Resources Corporation as at December 31, 2022 and 2021 and for each of the three years in the period ended December 31, 2022 and have issued our report thereon dated April 17, 2023. Our audits were made for the purpose of forming an opinion on the basic financial statements taken as a whole. The schedules listed in the Index to Parent Company Financial Statements and Supplementary Schedules are the responsibility of the Company's management. These schedules are presented for purposes of complying with the Revised Securities Regulation Code Rule 68 and are not part of the basic financial statements. These schedules have been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, fairly states, in all material respects, the information required to be set forth therein in relation to the basic financial statements taken as a whole.

April 17, 2023

**PETROENERGY RESOURCES CORPORATION**  
**SUPPLEMENTARY INFORMATION AND DISCLOSURES REQUIRED ON**  
**REVISED SRC RULE 68**  
**DECEMBER 31, 2022**

Philippine Securities and Exchange Commission (SEC) issued the Revised Securities Regulation Code Rule SRC Rule 68 which consolidates the two separate rules and labeled in the amendment as “Part I” and “Part II”, respectively. It also prescribed the additional information and schedule requirements for issuers of securities to the public.

Below are the additional information and schedules required by Revised SRC Rule 68 that are relevant to the Parent Company. This information is presented for purposes of filing with the SEC and is not required part of the basic financial statements.

Schedule A. Financial Assets

The Parent Company is not required to disclose the financial assets in equity securities as the total financial assets at fair value through profit and loss securities amounting to ₱7.54 million do not constitute 5% or more of the total current assets of the Parent Company as at December 31, 2022.

Schedule B. Amounts Receivable from Directors, Officers, Employees, Related Parties and Principal Stockholders (Other than Related Parties)

As of December 31, 2022, there are no amounts receivable from directors, officers, employees, related parties and principal stockholders that aggregates each to more than ₱100,000 or 1% of total assets whichever is less.

Schedule C. Amounts Receivable from/Payable to Related Parties which are eliminated during the Consolidation of Financial Statements

Amounts Receivable from/Payable to PetroGreen, Maibarara, PetroSolar and NRDC (see Note 23) are eliminated during the Consolidation of the Financial Statements.

Schedule D. Long-term Debt

The Parent Company has no outstanding long-term debt as of December 31, 2022.

Schedule E. Indebtedness to Related Parties (Long Term Loans from Related Companies)

The Parent Company has no outstanding long-term indebtedness to related parties as of December 31, 2022.

Schedule F. Guarantees of Securities of Other Issuers

The Parent Company does not have guarantees of securities of other issuers as of December 31, 2022.

Schedule G. Capital Stock

Title of issue	Number of shares authorized	Number of shares issued and outstanding as shown under related balance sheet caption	Number of Shares reserved for options, warrants, conversion and other rights	Number of shares held by related parties	Directors, Officers and Employees	Others
Common Shares	700,000,000	568,711,842	–	165,468,725	6,029,534	397,213,583

# PETROENERGY RESOURCES CORPORATION

## MAP OF RELATIONSHIPS OF THE COMPANIES WITHIN THE GROUP

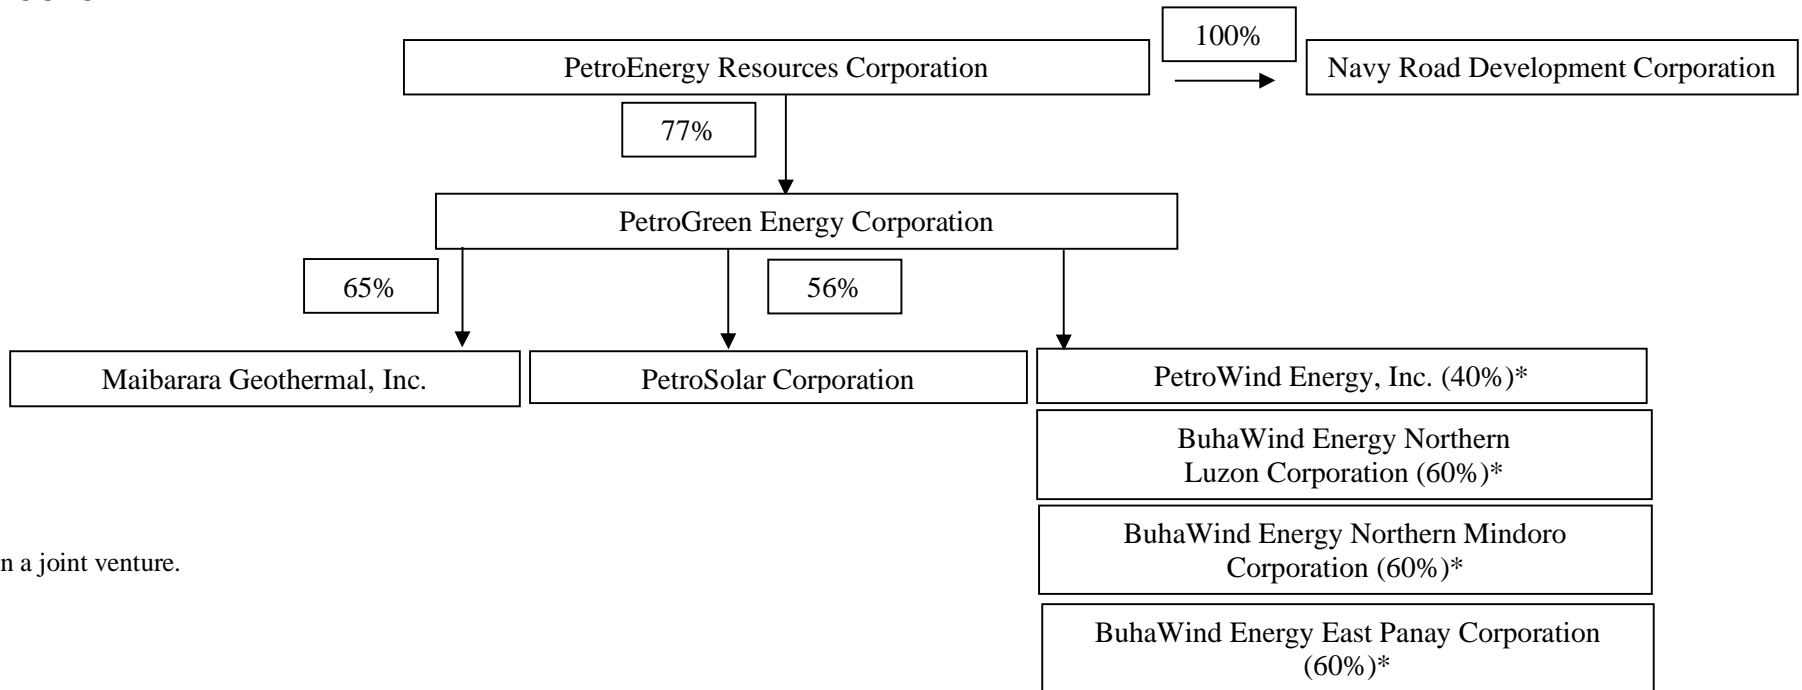

---

### Group Structure

Below is a map showing the relationship between and among the Group and its subsidiaries as of December 31, 2022:

### PETROENERGY RESOURCES CORPORATION

#### GROUP STRUCTURE

\*Investments in a joint venture.

**PETROENERGY RESOURCES CORPORATION**  
**REPORT ON SRO PROCEEDS**  
**December 31, 2022**

On July 26, 2017, at the BOD meeting, the Parent Company was authorized to raise approximately one billion pesos (₱1,000,000,000) in capital, by offering and issuing to all eligible stockholders as of record date, the rights to subscribe up to all of the existing unissued common shares of the Parent Company (“Stock Rights Offer”).

On September 29, 2017, the Parent Company filed its application for the listing and trading of rights shares with the PSE. On December 13, 2017, the PSE approved the application to list the Rights Shares.

The rights offer entitled eligible stockholders as of record date of January 12, 2018 to subscribe to one rights share for every 2.6 shares held at an offer price of ₱4.80 per share.

The rights offer was undertaken in January 22 to 26, 2018. Following the close of the offer period, the Parent Company successfully completed the stock rights offer for 157,975,512 common shares with gross proceeds of ₱758.28 million and was subsequently listed on the PSE on February 2, 2018.

The proceeds from the stock rights offer will be used for the development and expansion plans of the Group’s renewable energy projects and general corporate requirements.

On July 12, 2018, the Board of Directors approved the reallocation of the Use of Proceeds. A portion of the amount previously allotted for the Phase 2 of the Tarlac Solar Power Project amounting to ₱177,720,542.00 was re-allocated for the payment of the Company’s loans and corresponding interest. The said loans partially funded the equity portions of the 36 MW Phase 1 of the Nabas Wind Power Project, and the 50MWDC Phase 1 of the Tarlac Solar Power Project. The SRO proceeds allocated to this activity were utilized in full.

On November 7, 2022, the Board of Directors approved the reallocation of the Use of Proceeds for the payment of the Company’s loans and corresponding interest, which were incurred to partially fund the equity portions of project costs for the existing 36 MW Phase 1 of the Nabas Wind Power Project and 20MWDC Phase 2 of the Tarlac Solar Power Project.

During the 4th quarter of 2022 and 1st quarter of 2023, the Company partially paid the outstanding loans and interest. The SRO proceeds allocated to this activity were utilized in full.

The table below shows the gross and net proceeds; each expenditure item where the proceeds were used:

	<u>2022</u>			<u>Total</u>
	<u>From inception to 31-Dec-21</u>	<u>As of 3rd Quarter</u>	<u>4th Quarter</u>	
<b>Less: Expenditures</b>				
A. Development and expansion of Renewable Energy Projects	370,129,536	-	-	370,129,536
B. General and Corporate requirements	36,774,276	-	-	36,774,276
C. Loans and Interest	177,720,542	-	13,155,000	190,875,542
<b>Total Expenses Allocated to Proceeds</b>	<u>584,624,354</u>	<u>-</u>	<u>13,155,000</u>	<u>597,779,354</u>
<b>Remaining proceeds as of December 31, 2022</b>				<u><u>PhP154,514,788</u></u>

## **PETROENERGY RESOURCES CORPORATION AND SUBSIDIARIES**

---

### **NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

---

#### **1. Corporate Information**

a. Organization

PetroEnergy Resources Corporation (“PERC” or “PetroEnergy” or the “Parent Company”) is a publicly-listed domestic corporation. Its registered office and principal place of business is 7th Floor, JMT Building, ADB Avenue, Ortigas Center, Pasig City.

PERC was organized on September 29, 1994 as Petrotech Consultants, Inc. to provide specialized technical services to its then parent company, Petrofields Corporation, and to companies exploring for oil in the Philippines.

In 1997, PERC simultaneously adopted its present name and changed its primary purpose to oil exploration and development and mining activities. Subsequently in 1999, PERC assumed Petrofields’ oil exploration contracts in the Philippines and the Production Sharing Contract covering the Etame discovery block in Gabon, West Africa.

On August 11, 2004, PERC’s shares of stock were listed at the Philippine Stock Exchange (PSE) by way of introduction.

In 2009, following the enactment of Republic Act No. 9513, otherwise known as the “Renewable Energy Act of 2008” (RE Law), PERC amended its articles of incorporation to include among its purposes the business of generating power from renewable sources such as, but not limited to, biomass, hydro, solar, wind, geothermal, ocean and such other renewable sources of power.

On March 31, 2010, PERC incorporated PetroGreen Energy Corporation (“PetroGreen” or “PGEC”), its 67.5%-owned subsidiary (76.92%-owned in 2022), to act as its renewable energy arm and holding company. PGEC ventured into renewable energy development and power generation through its subsidiaries and affiliate: (a) Maibarara Geothermal, Inc. (“MGI”, 65%-owned) - owner and Renewable Energy (RE) developer of the 20 MW Maibarara Geothermal Power Project (MGPP-1) in Santo Tomas, Batangas and its expansion, the 12 MW MGPP-2; (b) PetroSolar Corporation (“PetroSolar”, 56%-owned) - owner and RE developer of the 50 MW<sub>DC</sub> Tarlac Solar Power Project (TSPP-1) in Tarlac City and its 20 MW<sub>DC</sub> expansion (TSPP-2); and (c) PetroWind Energy, Inc. (“PetroWind”, 40%-owned associate) - owner and developer of the 36 MW Nabas Wind Power Project (NWPP-1) in Nabas and Malay, Aklan.

MGI and PetroSolar are effectively indirect subsidiaries of PetroEnergy through PetroGreen. PetroGreen owns majority of the voting power of MGI and PetroSolar. PetroEnergy, PetroGreen, MGI and PetroSolar are collectively referred to as the “Group” and were incorporated in the Philippines.

b. Nature of Operations

The Group’s two (2) main energy businesses are: (1) upstream oil exploration and development, and (2) power generation from renewable energy resources such as, (a) geothermal, (b) solar, and (c) wind, through the Group’s affiliate, PetroWind.

#### Upstream Oil Exploration and Development

Petroleum production is on-going in the Etame (Gabon) concession, while the other petroleum concessions in the Philippines are still in the advanced exploration stages or pre-development stages.

#### Renewable Energy

##### Geothermal Energy

The geothermal projects are the 20 MW MGPP-1 in Sto. Tomas, Batangas that started commercial operations on February 8, 2014 and its expansion, the 12 MW MGPP-2 that started commercial operations on April 30, 2018.

##### Solar Energy

The Solar power projects are the 50 MW<sub>DC</sub> TSPP-1 in Tarlac City, Tarlac that started commercial operations on February 10, 2016 and its 20 MW<sub>DC</sub> expansion (TSPP-2) which has been commissioned and tested on April 22, 2019 and is now awaiting the issuance of Certificate of Compliance (COC) from the Energy Regulatory Commission (ERC).

##### Wind Energy

The wind energy project is the 36-MW NWPP-1 in Nabas, Aklan, where PetroWind has a wind farm. It started its commercial operations on June 10, 2015.

c. Approval of Consolidated Financial Statements

The accompanying unaudited consolidated interim financial statements as of and for the period ended March 31, 2023 were approved and authorized for issue by the Board of Directors (BOD).

---

## 2. **Basis of Preparation**

### Basis of Preparation

The accompanying consolidated financial statements have been prepared under the historical cost basis, except for financial assets carried at fair value through profit or loss (FVTPL) which are measured at fair value, and crude oil inventory which is valued at net realizable value (NRV).

The financial statements are presented in Philippine Peso (PHP or ₱), which is the Parent Company's functional currency. All amounts are rounded to the nearest PHP unless otherwise stated.

### Statement of Compliance

The consolidated financial statements have been prepared in compliance with Philippine Financial Reporting Standards (PFRS).

---

## 3. **Changes in Accounting Policies**

The accounting policies adopted are consistent with those of the previous financial year, except that the Group has adopted the following new accounting pronouncements starting January 1, 2022. Adoption of these pronouncements did not have any significant impact on the Group's financial position or performance.

- Amendments to PFRS 3, *Reference to the Conceptual Framework*
- Amendments to PAS 16, *Plant and Equipment: Proceeds before Intended Use*
- Amendments to PAS 37, *Onerous Contracts – Costs of Fulfilling a Contract*
- *Annual Improvements to PFRSs 2018-2020 Cycle*

- Amendments to PFRS 1, *First-time Adoption of Philippines Financial Reporting Standards, Subsidiary as a first-time adopter*
- Amendments to PFRS 9, Financial Instruments, Fees in the '10 per cent' test for derecognition of financial liabilities
- Amendments to PAS 41, *Agriculture, Taxation in fair value measurements*

New Accounting Standards, Interpretations and Amendments Effective Subsequent to December 31, 2022

Pronouncements issued but not yet effective are listed below. Unless otherwise indicated, the Group does not expect that the future adoption of the said pronouncements will have a significant impact on its consolidated financial statements. The Group intends to adopt the following pronouncements when they become effective.

*Effective beginning on or after January 1, 2023*

- Amendments to PAS 12, *Deferred Tax related to Assets and Liabilities arising from a Single Transaction*
- Amendments to PAS 8, *Definition of Accounting Estimates*
- Amendments to PAS 1 and PFRS Practice Statement 2, *Disclosure of Accounting Policies*

*Effective beginning on or after January 1, 2024*

- Amendments to PAS 1, *Classification of Liabilities as Current or Non-current*
- Amendments to PFRS 16, *Lease Liability in a Sale and Leaseback*

*Effective beginning on or after January 1, 2025*

- PFRS 17, *Insurance Contracts*

*Deferred effectivity*

- Amendments to PFRS 10, *Consolidated Financial Statements*, and PAS 28, *Sale or Contribution of Assets between an Investor and its Associate or Joint Venture*

The Group continues to assess the impact of the above new and amended accounting standards and interpretations effective subsequent to 2022 on the Group's financial statements in the period of initial application. Additional disclosures required by these amendments will be included in the consolidated financial statements when these amendments are adopted.

---

#### 4. Summary of Significant Accounting Policies

Basis of Consolidation

The consolidated financial statements comprise the financial statements of the Group as at March 31, 2023, March 31, 2022 and December 31, 2022. The financial statements of the subsidiaries are prepared in the same reporting year as the Parent Company, using consistent accounting policies.

Below are the subsidiaries, which are all incorporated in the Philippines, with their respective percentage ownership as of March 31, 2023, March 31, 2022 and December 31, 2022:

	31-Mar-2023	31-Mar-2022	31-Dec-2022
PetroGreen	67.50%	90.00%	76.92%
Percentage share of PetroGreen in its subsidiaries:			
MGI	65.00%	65.00%	65.00%
PetroSolar	56.00%	56.00%	56.00%
Navy Road Development Corporation (NRDC)			
– dormant company	100.00%	100.00%	100.00%

Subsidiaries are entities controlled by PERC. PERC controls an investee if and only if PERC has:

- power over the investee (i.e. existing rights that give it the current ability to direct the relevant activities of the investee);
- exposure, or rights, to variable returns from its involvement with the investee; and
- the ability to use its power over the investee the amount of the investor's returns.

When PERC has less than a majority of the voting or similar rights of an investee, PERC considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- the contractual arrangement with the other vote holders of the investee;
- rights arising from other contractual arrangements; and
- the Group's voting rights and potential voting rights.

PERC re-assesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control. Consolidations of a subsidiary begins when PERC obtains control over the subsidiary and ceases when PERC loses control of the subsidiary. Assets, liabilities, income and expenses of a subsidiary acquired or disposed of during the year are included in the consolidated statement of comprehensive income from the date PERC gains control until the date PERC ceases to control the subsidiary.

The consolidated financial statements are prepared using uniform accounting policies for like transactions and other events in similar circumstances. Adjustments where necessary are made to ensure consistency with the policies adopted by the Group. All intra-group balances and transactions, intra-group profits and expenses and gains and losses are eliminated during consolidation.

A change in the ownership interest of a subsidiary, without loss of control, is accounted for as an equity transaction, as transactions with the owners in their capacity as owners. For purchases from non-controlling interests (NCI), the difference between any consideration paid and the relevant share acquired of the carrying value of net assets of the subsidiary is recorded in equity. Gains or losses on disposals to NCI are also recorded in equity.

If the Group loses control over a subsidiary, it:

- derecognizes the assets (including goodwill) and liabilities of the subsidiary, the carrying amount of any NCI and the cumulative translation differences recorded in equity.
- recognizes the fair value of the consideration received, the fair value of any investment retained and any surplus or deficit in the consolidated statement of comprehensive income.
- reclassifies the parent's share of components previously recognized in other comprehensive income (OCI) to the consolidated statement of comprehensive income or retained earnings, as appropriate.

NCI are presented separately from the Parent Company's equity. The portion of profit or loss and net assets in subsidiaries not wholly owned are presented separately in the consolidated statement of comprehensive income and consolidated statement of changes in equity, and within equity in the consolidated statement of financial position.

#### Cash and Cash Equivalents

Cash includes cash on hand and in banks (demand deposits). Cash equivalents are short-term, highly liquid investments that are readily convertible to known amounts of cash with original maturities of three (3) months or less from the dates of acquisition and that are subject to an insignificant risk of change in value.

#### Short-term Investments

This pertains to interest bearing time deposits with terms of more than 3 months but not more than one year.

#### Restricted Cash

Restricted cash is recognized when the Group reserves a portion of its cash for a specific purpose such as to pay loan interest charges and loan principal amortization, and that there are contractual restrictions directly related to the use of and access of the bank accounts. This includes cash held under escrow accounts. Restricted cash that are expected to be used for a period of no more than 12 months after the financial reporting period are classified as current assets, otherwise, these are classified as noncurrent assets.

#### Financial Instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

#### *Financial assets - Initial recognition and measurement*

Financial assets are classified, at initial recognition, as subsequently measured at amortized cost, fair value through other comprehensive income (FVOCI), and FVTPL.

The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the Group's business model for managing them. The Group initially measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss, transaction costs.

In order for a financial asset to be classified and measured at amortized cost or fair value through OCI, it needs to give rise to cash flow that are 'solely payments of principal and interest (SPPI)' on the principal amount outstanding. This assessment is referred to as the SPPI test and is performed at an instrument level.

The Group's business model for managing financial assets refers to how it manages its financial assets in order to generate cash flows. The business model determines whether cash flows will result from collecting contractual cash flows, selling the financial assets, or both.

#### *Subsequent measurement*

For purposes of subsequent measurement, financial assets are classified in four categories:

- Financial assets at amortized cost (debt instruments)
- Financial assets at FVOCI with recycling of cumulative gains and losses (debt instruments)
- Financial assets designated at FVOCI with no recycling of cumulative gains and losses upon derecognition (equity instruments)

- Financial assets at FVTPL

The Group has no financial asset classified as financial assets at FVOCI.

*Financial assets at amortized cost (debt instruments)*

This category is the most relevant to the Group. The Group measures financial assets at amortized cost if both of the following conditions are met:

- the financial asset is held within a business model with the objective to hold financial assets in order to collect contractual cash flows; and
- the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets at amortized cost are subsequently measured using the effective interest rate (EIR) method and are subject to impairment. Gains and losses are recognized in profit or loss when the asset is derecognized, modified or impaired.

The Group's financial assets at amortized cost include cash and cash equivalents, short-term investments, receivables, restricted cash, and refundable deposits.

*Financial assets at FVTPL*

Financial assets at fair value through profit or loss include financial assets held for trading, financial assets designated upon initial recognition at fair value through profit or loss, or financial assets mandatorily required to be measured at fair value. Financial assets are classified as held for trading if they are acquired for the purpose of selling or repurchasing in the near term. Derivatives, including separated embedded derivatives, are also classified as held for trading unless they are designated as effective hedging instruments. Financial assets with cash flows that are not solely payments of principal and interest are classified and measured at fair value through profit or loss, irrespective of the business model. Notwithstanding the criteria for debt instruments to be classified at amortized cost or at fair value through OCI, as described above, debt instruments may be designated at fair value through profit or loss on initial recognition if doing so eliminates, or significantly reduces, an accounting mismatch.

Financial assets at fair value through profit or loss are carried in the consolidated statement of financial position at fair value with net changes in fair value recognized in the consolidated statement of profit or loss.

This category includes derivative instruments and listed equity investments which the Group had not irrevocably elected to classify at fair value through OCI. Dividends on listed equity investments are also recognized as other income in the consolidated statement of profit or loss when the right of payment has been established.

The Group's financial assets at FVTPL includes marketable equity securities and investment in golf club shares.

*Impairment of financial assets*

The Group recognizes an allowance for Expected Credit Losses (ECLs) for all debt instruments not held at FVTPL. ECLs are based on the difference between the contractual cash flows due in accordance with the contract and all the cash flows that the Group expects to receive, discounted at an approximation of the original effective interest rate. The expected cash flows will include cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms.

ECLs are recognized in two stages. For credit exposures for which there has not been a significant increase in credit risk since initial recognition, ECLs are provided for credit losses that result from

default events that are possible within the next 12-months (a 12-month ECL). For those credit exposures for which there has been a significant increase in credit risk since initial recognition, a loss allowance is required for credit losses expected over the remaining life of the exposure, irrespective of the timing of the default (a lifetime ECL).

The Group may consider a financial asset to be in default when internal or external information indicates that the Group is unlikely to receive the outstanding contractual amounts in full before taking into account any credit enhancements held by the Group. A financial asset is written off when there is no reasonable expectation of recovering the contractual cash flows.

#### *Financial Liabilities - Initial recognition and measurement*

Financial liabilities are classified, at initial recognition, as financial liabilities at FVTPL, financial liabilities at amortized cost (loans and borrowings) or as derivatives designated as hedging instruments in an effective hedge, as appropriate.

All financial liabilities are recognized initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

The Group's financial liabilities include accounts payable and accrued expenses, excluding statutory liabilities, loans payable and lease liabilities. The Group does not have financial liabilities at FVTPL.

#### *Subsequent measurement*

After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortized cost using the EIR method. Gains and losses are recognized in profit or loss when the liabilities are derecognized as well as through the EIR amortization process.

Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortization is included as finance costs in the statement of comprehensive income.

#### Derecognition of Financial Assets and Financial Liabilities

##### *Financial assets*

A financial asset (or where applicable, a part of a financial asset or part of a group of similar financial assets) is derecognized when:

- the rights to receive cash flows from the asset have expired;
- the Group retains the rights to receive cash flows from the asset, but has assumed an obligation to pay them in full without material delay to a third party under a "pass-through" arrangement; or
- the Group has transferred its right to receive cash flows from the asset and either (a) has transferred substantially all the risks and rewards of the asset, or (b) has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Group has transferred its rights to receive cash flows from an asset and has neither transferred nor retained substantially all the risks and rewards of the asset nor transferred control of the asset, the asset is recognized to the extent of the Group's continuing involvement in the asset. Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Group could be required to repay.

##### *Financial liabilities*

A financial liability is derecognized when the obligation under the liability is discharged, cancelled or has expired.

Where an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognized in profit or loss.

#### *Offsetting of Financial Instruments*

Financial assets and financial liabilities are set off and the net amount is reported in the consolidated statement of financial position if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously.

#### Fair Value Measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible to by the Group. The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 - Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- Level 3 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Group determines whether transfers have occurred between Levels in the hierarchy by re-assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

#### Crude Oil Inventory

Crude oil inventory is stated at NRV at the time of production. NRV is the estimated selling price less cost to sell. The estimated selling price is the market values of crude oil inventory at the time of production.

#### Other Current Assets

This account comprises supplies inventory, refundable deposit, prepayments and advances to suppliers.

Supplies inventory refers to parts purchased for used in operations. Supplies inventory are stated at the lower of cost or NRV. Cost is determined using the specific identification method. NRV is the current replacement cost of supplies inventory.

Prepayments are expenses paid in advance and recorded as asset before these are utilized. The prepaid expenses are apportioned over the period covered by the payment and charged to the appropriate accounts in profit or loss when incurred. Prepayments that are expected to be realized for a period of no more than 12 months after the financial reporting period are classified as current assets, otherwise, these are classified as noncurrent assets.

Advances to suppliers are reclassified to the proper asset or expense account and deducted from the supplier's billings as specified in the provisions of the contract.

#### Property, Plant and Equipment

Property, plant and equipment, except for land, are stated at cost less accumulated depletion, depreciation and amortization and any accumulated impairment losses. Land is stated at cost less any accumulated impairment losses. The initial cost of the property, plant and equipment consists of its purchase price, including any import duties, taxes and any directly attributable costs of bringing the assets to its working condition and location for its intended use and abandonment costs.

Expenditures incurred after the fixed assets have been put into operation, such as repairs and maintenance, are normally charged to the consolidated statement of comprehensive income in the period in which the costs are incurred. In situations where it can be clearly demonstrated that the expenditures have resulted in an increase in the future economic benefits expected to be obtained from the use of an item of property, plant and equipment beyond its originally assessed standard of performance, the expenditures are capitalized as an additional cost of property, plant and equipment.

Depreciation of an item of property, plant and equipment begins when it becomes available for use, i.e., when it is in the location and condition necessary for it to be capable of operating in the manner intended by management. Depreciation ceases at the earlier of the date that the item is classified as held for sale (or included in a disposal group that is classified as held for sale) in accordance with PFRS 5, *Non-current Assets Held for Sale and Discontinued Operations*, and the date the asset is derecognized.

Wells, platforms and other facilities related to oil operations are depleted using the units-of-production method computed based on estimates of proved reserves. The depletion base includes the exploration and development cost of the producing oilfields.

Land improvements consist of betterments, site preparation and site improvements that ready land for its intended use. These include excavation, non-infrastructure utility installation, driveways, sidewalks, parking lots, and fences.

Property, plant and equipment are depreciated and amortized using the straight-line method over the estimated useful lives of the assets as follows:

	<u>Number of Years</u>
Power plant, FCRS and production wells	25
Office condominium units	15
Land improvements	5
Transportation equipment	4
Office improvements	3
Office furniture and other equipment	2 to 3

The useful lives and depletion, depreciation and amortization methods are reviewed periodically to ensure that the period and method of depletion, depreciation and amortization are consistent with the expected pattern of economic benefits from items of property, plant and equipment.

Construction in progress represents property, plant and equipment under construction and is stated at cost. This includes the cost of construction to include materials, labor, professional fees, borrowing costs and other directly attributable costs. Construction in progress is not depreciated until such time the construction is completed.

Fully depreciated assets are retained in the accounts until they are no longer in use and no further depreciation is credited or charged to current operations.

When the assets are retired or otherwise disposed of, the cost and the related accumulated depletion, depreciation and amortization and any accumulated impairment losses are removed from the accounts and any resulting gain or loss is recognized in profit or loss.

#### Borrowing Costs

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalized as part of the cost of the asset. All other borrowing costs are expensed in the period in which they occur. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds.

#### Deferred Oil Exploration Costs

PERC follows the full cost method of accounting for exploration costs determined on the basis of each SC area. Under this method, all exploration costs relating to each SC are tentatively deferred pending determination of whether the area contains oil reserves in commercial quantities.

Deferred oil and gas exploration costs are assessed at each reporting period for possible indications of impairment. This is to confirm the continued intent to develop or otherwise extract value from the discovery. When this is no longer the case or is considered as areas permanently abandoned, the costs are written off through the consolidated statement of comprehensive income. Exploration areas are considered permanently abandoned if the related permits of the exploration have expired and/or there are no definite plans for further exploration and/or development.

The exploration costs relating to the SC where oil in commercial quantities are discovered are subsequently reclassified to "Wells, platforms and other facilities" shown under "Property and equipment" account in the consolidated statements of financial position upon substantial completion of the development stage.

#### Deferred Development Costs - Geothermal included in Other Noncurrent Assets

All costs incurred in the geological and geophysical activities such as costs of topographical, geological and geophysical studies, rights of access to properties to conduct those studies, salaries and other expenses of geologists, geophysical crews, or others conducting those studies are charged to profit or loss in the year such costs are incurred.

If the results of initial geological and geophysical activities reveal the presence of geothermal resource that will require further exploration and drilling, subsequent exploration and drilling costs are accumulated and deferred under the "Other noncurrent assets" account in the consolidated statement of financial position.

These costs include the following:

- costs associated with the construction of temporary facilities;
- costs of drilling exploratory and exploratory type stratigraphic test wells, pending determination of whether the wells can produce proved reserves; and

- costs of local administration, finance, general and security services, surface facilities and other local costs in preparing for and supporting the drill activities, etc. incurred during the drilling of exploratory wells.

If tests conducted on the drilled exploratory wells reveal that these wells cannot produce proved reserves, the capitalized costs are charged to expense except when management decides to use the unproductive wells for recycling or waste disposal.

Once the project's technical feasibility and commercial viability to produce proved reserves are established, the exploration and evaluation assets shall be reclassified to "Property, plant and equipment" and depreciated accordingly.

Deferred Development Costs - Solar Power Project included in Other Noncurrent Assets

These are costs incurred in the development of the solar plant expansion project. Costs are capitalized if the technological and economic feasibility is confirmed, usually when a project development has reached a defined milestone according to an established project management model. These costs include the following:

- costs incurred for the expansion of the solar plant project
- costs of administration, finance, general and security services and other costs attributed to the expansion of the project.

Deferred development costs of the Solar Power Project is recognized under "Other noncurrent assets" in the statement of financial position. Once the project's technical feasibility and commercial viability has been established, development costs shall be reclassified to "Property, plant and equipment" and depreciated accordingly.

### Investment in a Joint Venture (JV)

A JV is a type of joint arrangement whereby the parties that have joint control of the arrangement have rights to the net assets of the joint venture. Joint control is the contractually agreed sharing of control of an arrangement, which exists only when decisions about the relevant activities require unanimous consent of the parties sharing control. Investment in a JV is accounted for under the equity method of accounting.

Under the equity method, the investment in a JV is initially recognized at cost. The carrying amount of the investment is adjusted to recognize changes in the Group's share of net assets of the JV since the acquisition date.

The consolidated statement of comprehensive income reflects the Group's share of the financial performance of the joint venture. Any change in OCI of those investees is presented as part of the Group's OCI. In addition, when there has been a change recognized directly in the equity of the JV, the Group recognizes its share of any changes, when applicable, in the consolidated statement of changes in equity. Unrealized gains and losses from transactions between the Group and the JV are eliminated to the extent of the interest of the JV.

The aggregate of the Group's share in profit or loss of a JV is shown under "Other income (charges)" in the consolidated statement of comprehensive income and represents profit or loss after tax and non-controlling interests in the subsidiaries of the JV.

The financial statements of the JV are prepared in the same reporting period of the Group. When necessary, adjustments are made to bring the accounting policies in line with those of the Group.

After application of the equity method for the investment in a JV, the Group determines whether it is necessary to recognize an impairment loss on its investment in a JV. At each reporting date, the Group determines whether there is objective evidence that the investment in JV is impaired. If there is such evidence, the Group calculates the amount of impairment as the difference between the recoverable amount of the JV and its carrying value, then recognizes the loss in the consolidated statement of comprehensive income.

Upon loss of joint control over the JV, the Group measures and recognizes any retained investment at its fair value. Any difference between the carrying amount of the joint venture upon loss of joint control and the fair value of the retained investment and proceeds from disposal is recognized in the consolidated statement of comprehensive income.

### Contract Assets

A contract asset is recognized for the earned consideration for goods or services transferred to a customer before the customer pays or before payment is due. Contract assets are measured at the present value of future collections to be received over a period of time. Contract assets that are expected to be received within 12 months after the financial reporting period are classified as current assets, otherwise, these are classified as noncurrent assets.

### Intangible Assets

Intangible assets acquired separately are measured on initial recognition at cost. The cost of intangible assets acquired is their fair value as at the date of acquisition. Following initial recognition, intangible assets are carried at cost less accumulated amortization and accumulated impairment losses, if any.

Intangible assets with finite lives are amortized over their useful economic lives and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortization period and the amortization method for an intangible asset with a finite useful life are reviewed at least at the end of each reporting period. Changes in the expected useful life or the expected pattern of

consumption of future economic benefits embodied in the asset is accounted for by changing the amortization period or method, as appropriate, and are treated as changes in accounting estimates.

The amortization expense on intangible assets with finite lives is recognized in the consolidated statement of comprehensive income in the expense category consistent with the function of the intangible assets.

Intangible assets are amortized using the straight-line method over the estimated useful lives of the assets as follows:

	<u>Number of Years</u>
Land rights	25
Production license	10
Software license	1.5 to 3

Gains or losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the consolidated statement of comprehensive income when the asset is derecognized.

#### Investment Properties

Investment properties consist of land held for capital appreciation. Land is stated at cost less any impairment in value.

The initial cost of the investment properties comprises its purchase price and any directly attributable costs of bringing the asset to its working condition. Expenditures incurred after the investment properties have been put into operation, such as repairs and maintenance, are normally charged to expense in the year when costs are incurred. In situations where it can be clearly demonstrated that the expenditures have resulted in an increase in the future economic benefits expected to be obtained from the use of an item of investment properties beyond its originally assessed standard of performance, the expenditures are capitalized as an additional cost of investment properties.

Investment property is derecognized when either it has been disposed of or when the investment property is permanently withdrawn from use and no future economic benefit is expected from its disposal. Any gains or losses on the retirement or disposal of investment properties are recognized in the consolidated statement of comprehensive income in the year of retirement or disposal.

Transfers are made to investment properties when, and only when, there is a change in use, evidenced by the end of owner-occupation, commencement of an operating lease to another party or by the end of construction or development. Transfers are made from investment properties when, and only when, there is a change in use, evidenced by commencement of owner-occupation or commencement of development with a view to sell.

#### Interest in Joint Operations

A joint operation is a joint arrangement whereby the parties that have joint control of the arrangement have rights to the assets, and obligations for the liabilities, relating to the arrangement.

The Group recognized in relation to its interest in a joint operation its:

- assets, including its share of any assets held jointly
- liabilities, including its share of any liabilities incurred jointly
- revenue from the sale of its share of the output arising from the joint operation
- share of the revenue from the sale of the output by the joint operation
- expenses, including its share of any expenses incurred jointly

The Group accounts for the assets it controls and the liabilities it incurs, the expenses it incurs and the share of income that it earns from the sale of crude oil by the joint operations.

The Group's participating interest in the Etame block in Gabon, West Africa and participating interests in Philippine service contracts (SCs) are classified as joint operations.

#### Impairment of Nonfinancial Assets

The Group assesses at each reporting date whether there is an indication that an asset (e.g., property, plant and equipment, investment properties, deferred costs, intangible assets and right-of-use assets) may be impaired. If any such indication exists, or when annual impairment testing for an asset is required, the Group estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's fair value less costs to sell and its value in use and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or group of assets.

Where the carrying amount of an asset exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs to sell, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded companies or other available fair value indicators.

An assessment is made at each reporting date as to whether there is any indication that previously recognized impairment losses may no longer exist or may have decreased. If such indication exists, the Group makes an estimate of recoverable amount. A previously recognized impairment loss is reversed only if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognized. If that is the case, the carrying amount of the asset is increased to its recoverable amount. That increased amount cannot exceed the carrying amount that would have been determined, net of depletion, depreciation and amortization had no impairment loss been recognized for the asset in prior years.

#### Capital Stock and Additional Paid-in Capital

The Group records common stock at par value and additional paid-in capital in excess of the total contributions received over the aggregate par values of the equity shares. When the Group issues more than one class of stock, a separate account is maintained for each class of stock and the number of shares issued. Incremental costs incurred directly attributable to the issuance of new shares are shown in equity as a deduction from proceeds, net of tax. When any member of the Group purchases the Group's capital stock (treasury shares), the consideration paid, including any attributable incremental costs, is deducted from equity attributable to the Group's equity holders until the shares are cancelled, reissued or disposed of. Where such shares are subsequently sold or reissued, any consideration received, net of any directly attributable incremental transaction costs and the related tax effects, is included in equity.

#### Retained Earnings

Retained earnings represent the cumulative balance of consolidated net income, effects of changes in accounting policy and other capital adjustments, net of dividend declaration.

#### Cumulative Translation Adjustment

Cumulative translation adjustment represents the resulting exchange differences in the remeasurement of accounts due to change in functional currency.

#### Equity Reserve

Equity reserve is made up of equity transactions other than equity contributions such as gain or loss resulting from increase or decrease of ownership without loss of control.

#### Dividend Distribution

Cash dividends on capital stock are recognized as a liability prior to actual distribution and deducted from retained earnings when approved by the BOD.

#### Revenue Recognition

Revenue is recognized when the control of petroleum and electricity are transferred to the customer at an amount that reflects the consideration which the Group expects to be entitled in exchange for those goods and services. The Group has generally concluded that it is the principal in its revenue arrangements.

#### *Electricity sales*

Revenues from sale of electricity using renewable energy is consummated and recognized over time whenever the electricity generated by the Group is transmitted through the transmission line designated by the buyer, for a consideration.

#### *Oil revenues*

Revenue from crude oil is recognized at a point in time when the control of the goods has transferred from the sellers (Consortium) to the buyer at the delivery point. Revenue is measured at the fair value of the consideration received.

The revenue recognized from the sale of petroleum products pertains to the Group's share in revenue from the joint operations. The revenue sharing is accounted for in accordance with PFRS 11, *Joint Arrangements*.

#### *Other Revenues*

Revenues from passed on wheeling charges are consummated and recognized over time whenever the electricity generated by the Group is transmitted through MERALCO's distribution system, for a consideration. Revenues from pass-on Wholesale Electricity Spot Market (WESM) transactions are consummated and recognized over time whenever the electricity generated by the Group is traded through WESM, for a consideration.

#### *Interest income*

Interest income is recognized as the interest accrues taking into account the effective yield on the asset.

#### *Dividend income*

Dividend income is recognized according to the terms of the contract, or when the right to the payment has been established.

#### Share in Net Income of a Joint Venture

Share in net income of a joint venture represents the Group's share in profit or loss of its joint venture, PWEI.

#### Miscellaneous Income

Miscellaneous income is recognized when the Group's right to receive the payment is established.

#### Costs and Expenses

##### *Cost of electricity sales*

Costs of electricity sales pertain to direct costs in generating electricity power which include operating and maintenance costs (O&M) for power plant and fluid collection and reinjection system (FCRS), depreciation and other costs directly attributed to producing electricity.

*Oil production*

Oil production are costs incurred to produce and deliver crude oil inventory, including transportation, storage and loading, among others.

*Change in crude oil inventory*

Change in crude oil inventory pertains to the movement of beginning and ending crude oil inventory charged to cost of sales.

*General and administrative expenses*

General and administrative expenses constitute costs of administering the business.

Costs and expenses are recognized as incurred.

Income Taxes

*Current Tax*

Current tax assets and liabilities for the current and prior periods are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amounts are those that are enacted or substantively enacted at the reporting date.

*Deferred Tax*

Deferred tax is provided using the balance sheet liability method on all temporary differences at the reporting date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

Deferred tax liabilities are recognized for all taxable temporary differences except to the extent that the deferred tax liabilities arise from the: a) initial recognition of goodwill; or b) the initial recognition of an asset or liability in a transaction which is not: i) a business combination; and ii) at the time of the transaction, affects neither accounting profit nor taxable profit or loss.

Deferred tax assets are recognized for all deductible temporary differences with certain exceptions, and carryforward benefits of unused tax credits from excess minimum corporate income tax (MCIT) over regular corporate income tax (RCIT) and unused net operating loss carryover (NOLCO), to the extent that it is probable that sufficient future taxable income will be available against which the deductible temporary differences and carryforward benefits of unused tax credits from excess MCIT and unused NOLCO can be utilized. Deferred tax assets, however, are not recognized when it arises from the: a) initial recognition of an asset or liability in a transaction that is not a business combination; and b) at the time of transaction, affects neither the accounting income nor taxable profit or loss.

The carrying amounts of deferred tax assets are reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient future taxable income will be available to allow all or part of the deferred tax assets to be utilized. Unrecognized deferred tax assets are reassessed at each reporting date, and are recognized to the extent that it has become probable that future taxable income will allow the deferred tax assets to be recovered. The Group does not recognize deferred tax assets and deferred tax liabilities that will reverse during the income tax holiday (ITH).

Deferred tax assets and liabilities are measured at the tax rates that are applicable to the period when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted as of the reporting date.

Deferred tax relating to items recognized outside profit or loss is recognized outside profit or loss. Deferred tax items are recognized in correlation to the underlying transaction either in profit or loss or other comprehensive income.

Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority. Subsidiaries operating in the Philippines file income tax returns on an individual basis. Thus, the deferred tax assets and deferred tax liabilities are offset on a per entity basis.

#### Value-Added Tax (VAT)

Revenues, expenses and assets are recognized net of the amount of VAT, if applicable.

When VAT from sales of goods or services (output VAT) exceeds VAT passed on from purchases of goods or services (input VAT), the excess is recognized as payable in the consolidated statement of financial position. When VAT passed on from purchases of goods or services (input VAT) exceeds VAT from sales of goods and/or services (output VAT), the excess is recognized as an asset in the consolidated statement of financial position as part of "Other noncurrent assets" to the extent of the recoverable amount.

#### Leases

##### *Group as a lessee*

The Group assesses at contract inception whether a contract is, or contains, a lease. That is, if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

##### *Right-of-use assets*

The Group recognizes right-of-use assets at the commencement date of the lease. Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liability. The cost of right-of-use assets includes the amount of lease liability recognized, and lease payments made at or before the commencement date less any lease incentives received and estimate of costs to be incurred by the lessee in dismantling and removing the underlying asset, restoring the site on which it is located or restoring the underlying asset to the condition required by the terms and conditions of the lease, unless those costs are incurred to produce inventories.

Unless the Group is reasonably certain to obtain ownership of the leased asset at the end of the lease term, the recognized right-of-use assets are depreciated on a straight-line basis over the shorter of its estimated useful life and the lease term, as follows:

	<u>Number of Years</u>
Office space	2
Land	18 to 25

##### *Lease liabilities*

At the commencement date of the lease, the Group recognizes lease liability measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Group and payments of penalties for terminating a lease, if the lease term reflects the Group exercising the option to terminate. The variable lease payments that do not depend on an index or a rate are recognized as expense in the period on which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Group uses the incremental borrowing rate at the lease commencement date if the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liability is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liability is

remeasured if there is a modification, a change in the lease term, a change in the in-substance fixed lease payments or a change in the assessment to purchase the underlying asset.

#### *Short-term leases and leases of low-value assets*

The Group applies the short-term lease recognition exemption to its short-term leases (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies to the leases of low-value assets recognition exemption to leases that are considered of low value (i.e., below ₱250,000). Lease payments on short-term leases and leases of low-value assets are recognized as expense on a straight-line basis over the lease term.

#### Retirement Benefits

The cost of providing benefits under the defined benefit plans is actuarially determined using the projected unit credit method. The net defined benefit liability or asset is the aggregate of the present value of the defined benefit obligation at the end of the reporting period reduced by the fair value of plan assets (if any), adjusted for any effect of limiting a net defined benefit asset to the asset ceiling. The asset ceiling is the present value of any economic benefits available in the form of refunds from the plan or reductions in future contributions to the plan.

Defined benefit costs comprise the following:

- Service cost
- Net interest on the net defined benefit liability or asset
- Remeasurements of net defined benefit liability or asset

Service costs which include current service costs, past service costs and gains or losses on non-routine settlements are recognized as expense in the consolidated statement of comprehensive income. Past service costs are recognized when plan amendment or curtailment occurs. These amounts are calculated periodically by independent qualified actuaries.

Net interest on the net defined benefit liability or asset is the change during the period in the net defined benefit liability or asset that arises from the passage of time which is determined by applying the discount rate based on government bonds to the net defined benefit liability or asset. Net interest on the net defined benefit liability or asset is recognized as expense or income in the consolidated statement of comprehensive income.

Remeasurements comprising actuarial gains and losses, return on plan assets and any change in the effect of the asset ceiling (excluding net interest on defined benefit liability) are recognized immediately in OCI in the period in which they arise. Remeasurements are not reclassified to consolidated statement of comprehensive income in subsequent periods.

Plan assets are assets that are held by a long-term employee benefit fund. Plan assets are not available to the creditors of the Group nor can they be paid directly to the Group. Fair value of plan assets is based on market price information. When no market price is available, the fair value of plan assets is estimated by discounting expected future cash flows using a discount rate that reflects both the risk associated with the plan assets and the maturity or expected disposal date of those assets (or, if they have no maturity, the expected period until the settlement of the related obligations). If the fair value of the plan assets is higher than the present value of the defined benefit obligation, the measurement of the resulting defined benefit asset is limited to the present value of economic benefits available in the form of refunds from the plan or reductions in future contributions to the plan.

The Group's right to be reimbursed of some or all of the expenditure required to settle a defined benefit obligation is recognized as a separate asset at fair value when and only when reimbursement is virtually certain.

#### Asset Retirement Obligation (ARO)

The Group records present value of estimated costs of legal and constructive obligations required to restore the oilfields and plant sites upon termination of its operations. The nature of these restoration activities includes dismantling and removing structures, rehabilitating settling ponds, dismantling operating facilities, closure of plant and waste sites, and restoration, reclamation and re-vegetation of affected areas. The obligation generally arises when the asset is constructed or the ground or environment at the sites are disturbed. When the liability is initially recognized, the present value of the estimated cost is capitalized as part of the carrying amount of the ARO assets (included under “Property, plant and equipment”) and ARO liability.

Liability and capitalized costs included in oil properties is equal to the present value of the Group’s proportionate share in the total decommissioning costs of the consortium on initial recognition. Additional costs or changes in decommissioning costs are recognized as additions or charges to the corresponding assets and ARO when they occur.

For closed sites or areas, changes to estimated costs are recognized immediately in the consolidated statement of comprehensive income.

If the decrease in liability exceeds the carrying amount of the asset, the excess shall be recognized immediately in profit or loss.

For the oil operation, the Group depreciates ARO assets based on units-of-production method.

For the renewable energy, the Group depreciates ARO assets on a straight-line basis over the estimated useful life of the related asset or the service contract term, whichever is shorter, or written off as a result of impairment of the related asset.

The Group regularly assesses the provision for ARO and adjusts the related liability and asset.

#### Foreign Currency-Denominated Transactions and Translation

The consolidated financial statements are presented in PHP, which is the Parent Company’s functional and presentation currency. Transactions in foreign currencies are initially recorded in the functional currency using the exchange rate at date of transaction. Monetary assets and liabilities denominated in foreign currencies are reinstated to the functional currency using the closing exchange rate at reporting date.

All exchange differences are taken to the consolidated statement of comprehensive income. Non-monetary items that are measured in terms of historical cost in foreign currency are translated using the exchange rates as at the dates of initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined.

#### Earnings Per Share

Basic earnings per share is computed on the basis of the weighted average number of shares outstanding during the year after giving retroactive effect to any stock split or stock dividends declared and stock rights exercised during the current year, if any.

Diluted earnings per share is computed on the basis of the weighted average number of shares outstanding during the year plus the weighted average number of ordinary shares that would be issued on the conversion of all the dilutive potential ordinary shares into ordinary shares.

#### Segment Reporting

The Group’s operating businesses are organized and managed separately according to the nature of the

products and services provided, with each segment representing a strategic business unit that offers different products and services, serves different markets subject to different risks and returns. Financial information on business segments is presented in Note 28 to the consolidated financial statements.

#### Provisions and Contingencies

Provisions are recognized when the Group has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. If the effect of the time value of money is material, provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and, where appropriate, the risks specific to the liability.

Where discounting is used, the increase in the provision due to the passage of time is recognized as an interest expense. Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate.

Contingent liabilities are not recognized in the financial statements. They are disclosed unless the possibility of an outflow of resources embodying economic benefits is remote. Contingent assets are not recognized in the financial statements but are disclosed when an inflow of economic benefits is probable. Contingent assets are assessed continually to ensure that developments are appropriately reflected in the financial statements. If it has become virtually certain that an inflow of economic benefits will arise, the asset and the related income are recognized in the consolidated financial statements.

---

## 5. Significant Accounting Judgments, Estimates and Assumptions

The preparation of the consolidated financial statements in compliance with PFRS requires the Group to make judgments, estimates and assumptions that affect the reported amounts of assets, liabilities, income and expenses and disclosure of contingent assets and contingent liabilities. Future events may occur which will cause the assumptions used in arriving at the estimates to change. The effects of any change in judgments, estimates and assumptions are reflected in the consolidated financial statements, as they become reasonably determinable.

Judgments, estimates and assumptions are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

#### Judgments

In the process of applying the Group's accounting policies, management has made the following judgments, apart from those involving estimations, which has the most significant effect on the amounts recognized in the consolidated financial statements:

##### *Determination of Functional Currency*

The Parent Company determines its functional currency based on economic substance of underlying circumstances relevant to the Parent Company. The functional currency has been determined to be the PHP based on the economic substance of the Parent Company's business circumstances.

##### *Capitalization of Deferred Oil Exploration Costs and Deferred Development Costs*

Initial capitalization of costs is based on management's judgment that technological and economic feasibility is confirmed, usually when a product development project has reached a defined milestone according to an established project management model. If the conditions for asset capitalization of development costs are not met, then such costs are expensed outright.

As of March 31, 2023 and December 31, 2022, the carrying value of deferred oil explorations costs amounted to ₱355.95 million and ₱311.88 million, respectively (see Note 12), and the Group's deferred development costs amounted to ₱119.66 and ₱74.12 million as of March 31, 2023 and December 31, 2022, respectively (see Note 16).

#### *Classification of Joint Arrangements*

Judgment is required to determine when the Group has joint control over an arrangement, which requires an assessment of the relevant activities and when the decisions in relation to those activities require unanimous consent. The Group assesses their rights and obligations arising from the arrangement and specifically considers:

- the structure of the joint arrangement – whether it is structured through a separate vehicle
- when the arrangement is structured through a separate vehicle, the Group also considers the rights and obligations arising from:
  - the legal form of the separate vehicle
  - the terms of the contractual arrangement
  - other facts and circumstances, considered on a case to case basis

This assessment often requires significant judgment. A different conclusion about both joint control and whether the arrangement is a joint operation or a joint venture, may materially impact the accounting of the investment.

The Group's investment in PetroWind and Buhawind Energy are structured in a separate incorporated entity. The Group and the parties to the agreement only have the right to the net assets of the joint venture through the terms of the contractual arrangement. Accordingly, the joint arrangement is classified as a joint venture. As of March 31, 2023 and December 31, 2022, the Group's investment in a joint venture amounted to ₱1.93 billion and ₱1.88 billion, respectively (see Note 13).

The Group and the parties to the agreement in investment in Gabon, West Africa and investments in petroleum concessions in the Philippines have joint control over its rights to the assets and obligations for the liabilities, relating to the arrangement. Accordingly, the joint arrangements are classified as joint operations (see Notes 11 and 12).

#### Estimates and Assumptions

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below.

#### *Estimation of Geothermal Field Reserves*

The Group performed volumetric reserve estimation to determine the reserves of the Maibarara geothermal field. As a requirement for project financing, the Group engaged at its own cost the New Zealand firm Sinclair Knight Merz (SKM) in 2011 to undertake a comprehensive third-party technical review of the Maibarara geothermal field. This review included analysis of the resource assessment performed in-house by the Group as well as a separate SKM reserve estimation and numerical modeling of the Maibarara reserves.

The Group's simulation indicated a mean (P50) proven reserves of 27.8 MW for 25 years. In contrast, SKM calculated the P50 reserves at 44 MW. At 90% probability (P90), the reserves calculated are 28 MW and 12 MW by SKM and the Group, respectively. SKM concluded that the approach taken by the Group is conservative as it limits reservoir thickness to depths where a maximum thickness of 280°C will be encountered although the measured temperature reached as high as 324°C. There is reasonable confidence that the 20 MW (gross) plant development is feasible as the P90 level appears also

conservative as with the Group's approach. In addition, SKM identified indicated reserves, translating to 10 MW-26 MW in the area south of and outside the current area of development.

Also, there is a likely geothermal potential south of the proven area where two old wells were drilled and encountered high fluid temperatures ( $T \sim 300^{\circ}\text{C}$ ). MGI identified the southern block as a probable reserve area. SKM in 2011 suggested that the southern block can be classified as Indicated Resource based on the Australian Code as high temperatures have been intersected by the two wells. SKM estimated that the stored heat in the Southern Block has a resource potential equivalent to 12 MW for a project life of 25 years.

An updated reserves estimation using the stored-heat calculation was made in 2015 by the Group as a result of reservoir and production performance and the 2014 drilling campaign. The 2014 drilling proved that the current resource area can produce around 33.1 MW, more than enough to meet the steam requirement of the existing 20 MW power plant plus the 12 MW expansion power plant. Using Monte Carlo simulation to estimate the reserves, the proven resource area has an 80% probability of delivering between 18.1 MW to 50.9 MW over a 25-year operating period. This Monte Carlo simulation also showed that the expected mean reserve for the proven resource area is 30.4 MW for 25 years.

The Group engaged a U.S. firm Geothermal Science, Inc. (GSI) in 2015 to perform a third-party technical appraisal of the resource for the planned 12 MW expansion. This third-party review was also made as a requirement for the project financing of MGPP-2 or M2. GSI adopted the technique from the US Geological Survey Circular 790 in making the probabilistic calculation of the geothermal reserves at Maibarara. Based on this approach, GSI estimates that Maibarara has a minimum or proven reserves of 40.2 MW, P90 for 25 years plant life and Most Likely Reserve of 61.6 MW, P50 for 25 years of plant life.

The Group commenced producing power commercially last February 8, 2014. To date, the current production wells of M1 and M2 are capable of producing 41.4 MW at full-bore capacity. These production wells including the complement reinjection wells are concentrated on the proven resource area.

As of March 31, 2023 and December 31, 2022, there has been no significant change in the estimated reserves that would affect the carrying value and useful life of the Group's property, plant and equipment.

#### *Estimation of Proved and Probable Oil Reserves*

The Parent Company assesses its estimate of proved and probable reserves on an annual basis. The estimate is based on the technical assumptions and is calculated in accordance with accepted volumetric methods, specifically the probabilistic method of estimation. Probabilistic method uses known geological, engineering and economic data to generate a range of estimates and their associated probabilities.

All proved and probable reserve estimates are subject to revision, either upward or downward, based on new information, such as from development drilling and production activities or from changes in economic factors, including product prices, contract terms or development plans. Estimates of reserves for undeveloped or partially developed fields are subject to greater uncertainty over their future life than estimates of reserves for fields that are substantially developed and depleted. Estimated oil reserves are utilized in the impairment testing and the calculation of depletion expense using the unit of production method of the investments.

As of March 31, 2023 and December 31, 2022, the carrying value of "Wells, Platforms and other Facilities" under "Property, Plant and Equipment" amounted to ₱739.04 million and ₱763.83 million, respectively (see Note 11).

*Estimation of Useful Lives of Property, Plant and Equipment*

The Group reviews on an annual basis the estimated useful lives of property, plant and equipment based on expected asset utilization as anchored on business plans and strategies that also consider expected future technological developments and market behavior.

It is possible that future results of operations could be materially affected by changes in these estimates brought about by changes in the factors mentioned. A reduction in the estimated useful lives of property, plant and equipment would increase the recorded depletion, depreciation and amortization expense and decrease noncurrent assets.

There is no change in the estimated useful lives of property, plant and equipment as of March 31, 2023 and December 31, 2022 (see Note 11).

*Impairment of Nonfinancial Assets*

The Group assesses at each reporting date, whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Group estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) fair value less cost of disposal and its value in use.

Facts and circumstances that would require an impairment assessment as set forth in PFRS 6, *Exploration for and Evaluation of Mineral Resources*, are as follows:

- the period for which the Group has the right to explore in the specific area has expired or will expire in the near future, and is not expected to be renewed;
- substantive expenditure on further exploration for and evaluation of mineral resources in the specific area is neither budgeted nor planned;
- exploration for and evaluation of mineral resources in the specific area have not led to the discovery of commercially viable quantities of mineral resources and the entity has decided to discontinue such activities in the specific area; and
- sufficient data exist to indicate that, although a development in the specific area is likely to proceed, the carrying amount of the exploration and evaluation asset is unlikely to be recovered in full from successful development or by sale.

The related balances of the Group's nonfinancial assets as of March 31, 2023 and December 31, 2022 follow:

	<b>Unaudited</b>	Audited
	<b>31-Mar-2023</b>	31-Dec-2022
Property, plant and equipment (Note 11)	<b>₱8,158,422,721</b>	₱8,196,897,057
Right-of-use assets (Note 14)	<b>340,580,472</b>	342,614,655
Deferred oil exploration costs (Note 12)	<b>355,951,118</b>	311,883,011
Intangible assets (Note 16)	<b>137,019,385</b>	140,262,493
Deferred development costs (Note 16)	<b>119,659,349</b>	74,115,084
Investment properties (Note 15)	<b>1,611,533</b>	1,611,533
	<b>₱9,113,244,578</b>	₱9,067,383,833

There are no indicators of impairment that would trigger impairment review in March 31, 2023 and December 31, 2022 other than those mentioned below.

Gabon, West Africa

The Parent Company believes that the fluctuation in crude oil prices in the market, political risks in Gabon, discount rates and changes in other assumptions such as change in production profile which is

based on continued production until the term of the existing PSC are indicators that the assets might be impaired or if there is reversal of prior impairment loss.

In 2018, the Gabonese Government allowed the sixth amendment to the Exploration Production Sharing Contract (“EPSC”) that extends the exploitation period for the production licenses by ten (10) years, or from September 2018 until September 2028, extendible by five (5) years and by a final extension of 5 more years. The extension of the EPSC will allow the consortium to maximize the use of the existing facilities that are already in place to increase or maintain production until the field’s extended life (see Note 11).

#### SC 14-C2 – West Linapacan

SC 14-C2 has not yet expired and was granted with a 15-year extension of the SC as approved by the DOE from December 18, 2010 to December 18, 2025. The SC 14-C2 consortium proceeded with a third-party technical evaluation to assess potential production opportunities. With the SC nearing its expiration in December 2025, the assets were tested for impairment.

#### Impairment loss (reversal)

In assessing whether impairment is required, the carrying value of the asset is compared with its recoverable amount. The recoverable amount is the higher of the asset’s fair value less costs to sell and value in use. Given the nature of the Parent Company’s activities, information on the fair value of an asset is usually difficult to obtain unless negotiations with potential purchasers or similar transactions are taking place. Consequently, unless indicated otherwise, the recoverable amount used in assessing the impairment loss is value in use.

The Parent Company estimates value in use using a discounted cash flow model using a discount rate of 14.64% in 2022.

The Parent Company recognized impairment (reversal of impairment) loss for the years ended December 31, 2022 and 2021 (nil in March 31, 2023) presented on a net basis:

<u>Wells, platforms and other facilities – net (Note 11)</u>	<b>(P11,893,541)</b>
<u>Deferred oil exploration costs – net (Note 12)</u>	<b>594,172</b>
	<b><u>(P11,299,369)</u></b>

#### *Estimation of Asset Retirement Obligations*

The Group has various legal obligation to decommission or dismantle its assets related to the oil production, geothermal energy project and solar power project at the end of each respective service contract. In determining the amount of provisions for restoration costs, assumptions and estimates are required in relation to the expected costs to restore sites and infrastructure when such obligation exists. The Group recognizes the present value of the obligation to dismantle and capitalizes the present value of this cost as part of the balance of the related property, plant and equipment, which are being depreciated and amortized on a straight-line basis over the useful life of the related assets (for the renewable energy) and based on units-of-production method based on estimates of proved reserves (for the oil operations).

Cost estimates expressed at projected price levels until dismantling date are discounted using rates ranging from 7.13% to 7.16% in 2022 to take into account the timing of payments. Each year, the provision is increased to reflect the accretion of discount and to accrue an estimate for the effects of inflation, with charges being recognized as accretion expense (see Note 19).

Changes in the asset retirement obligation that result from a change in the current best estimate of cash

flow required to settle the obligation or a change in the discount rate are added to (or deducted from) the amount recognized as the related asset and the periodic unwinding of the discount on the liability is recognized in profit or loss as it occurs.

While the Group has made its best estimate in establishing the asset retirement obligation, because of potential changes in technology as well as safety and environmental requirements, plus the actual time scale to complete decommissioning activities, the ultimate provision requirements could either increase or decrease significantly from the Group's current estimates. The amounts and timing of recorded expenses for any period would be affected by changes in these factors and circumstances.

Asset retirement obligation as of March 31, 2023 and December 31, 2022 follows (see Note 19):

	<b>Unaudited</b>	Audited
	<b>31-Mar-23</b>	31-Dec-22
Oil production	<b>₱41,831,635</b>	₱41,728,602
Geothermal energy project	<b>7,641,206</b>	7,509,078
Solar power project	<b>17,297,537</b>	16,992,650
	<b>₱66,770,378</b>	₱66,230,330

#### *Recoverability of input VAT*

The Group maintains an allowance for input VAT based on an assessment of the recoverability of these assets using the historical success rate of VAT refunded from the Bureau of Internal Revenue (BIR). A review is made by the Group on a continuing basis annually to determine the adequacy of the allowance for losses. Allowance for probable losses as of March 31, 2023 and December 31, 2022 amounted to ₱10.39 million. The carrying value of input VAT amounted to ₱141.21 million and ₱138.32 million as of March 31, 2023 and December 31, 2022, respectively (see Note 16).

#### *Recognition of deferred tax assets*

The Group reviews the carrying amounts of deferred tax assets at each reporting date and reduces them to the extent that it is no longer probable that sufficient future taxable profit will be available to allow all or part of the deferred tax assets to be utilized.

As of March 31, 2023 and December 31, 2022, the Group did not recognize deferred tax assets on certain temporary differences, NOLCO and MCIT as the Group believes that it may not be probable that sufficient taxable income will be available in the near foreseeable future against which the tax benefits can be realized prior to their expiration.

---

## 6. Cash and Cash Equivalents and Short-term Investments

	<b>Unaudited</b>	Audited
	<b>31-Mar-23</b>	31-Dec-22
Cash on hand and in banks	<b>₱661,700,850</b>	₱434,700,436
Cash equivalents	<b>1,025,354,883</b>	1,242,531,148
Cash and Cash Equivalents	<b>1,687,055,733</b>	1,677,231,584
Short-term investments	<b>₱2,575,286,425</b>	₱946,044,355

Cash in banks earn interest at the prevailing bank deposit rates. Cash equivalents are made for varying periods of up to three months depending on the immediate cash requirements of the Group and earn interest at the prevailing short-term investment rates.

As of March 30, 2023 and December 31, 2022, the Group has ₱2.575 billion and ₱946.04 million short-term investments with periods of more than three months but less than one year, respectively.

Interest income earned on cash and cash equivalents and short-term investments amounted to ₱48.06 million, ₱36.29 million as of March 31, 2023 and December 31, 2022, respectively.

## 7. Restricted Cash

	<b>Unaudited</b>	Audited
	<b>31-Mar-23</b>	31-Dec-22
Debt service payment and reserve accounts	<b>₱335,589,896</b>	<b>₱413,219,105</b>
Cash held under escrow for stock subscription	–	<b>1,629,242,070</b>
Share in Etame escrow fund – current portion	–	<b>20,926,811</b>
	<b>₱335,589,896</b>	<b>₱2,063,387,986</b>

### *Debt service payment and reserve accounts*

This refers to the amount of fund that the Group is required to maintain in the Debt Service Payment Account (DSPA) and Debt Service Reserve Account (DSRA) pursuant to the Project Loan Facility Agreement (PLFA) of MGI and Omnibus Loan and Security Agreement (OLSA) of PetroSolar, respectively (see Note 18). The funds maintained in these accounts are used to pay the forthcoming debt service scheduled every year until the loan is fully paid off. Under the PLFA/OLSA, where the banks are one of the parties, the banks shall have the exclusive control over and exclusive right of withdrawal from the restricted cash accounts.

### *Cash held under escrow for stock subscription*

This represents the remaining funds held under escrow related to the Share Subscription Agreement between PetroGreen and Kyuden International Corporation (Kyuden), which was fully released from the escrow fund in January 2023. Interest income earned on restricted cash amounts to nil and ₱7.6 million as of March 31, 2023 and December 31, 2022.

### *Share in Etame escrow fund – current portion*

This represents Parent Company's share in the current portion of the Abandonment Fund related to FPSO decommissioning and Etame Field Asset Retirement Obligations. These funds were released from the escrow account in February 2023.

## 8. Receivables

	<b>Unaudited</b>	Audited
	<b>31-Mar-23</b>	31-Dec-22
<b>Accounts receivable from:</b>		
Feed-in-Tariff (FiT) revenue from National Transmission Corporation (TransCo)	<b>₱203,377,877</b>	106,169,169
Electricity sales and other charges to ACEN (formerly PHINMA) [Note 26]	<b>158,029,554</b>	₱162,536,100
Electricity sales to Wholesale Electricity Spot Market (WESM) and Other Contracts	<b>24,275,452</b>	92,541,594
PHESCO, Incorporated (PHESCO)	<b>15,245,231</b>	15,245,231
Affiliate (Note 26)	<b>8,764,382</b>	6,232,978
Consortium operator	<b>2,682,452</b>	40,550,770
Others	<b>2,563,790</b>	4,585,274

	<b>Unaudited</b>	Audited
	<b>31-Mar-23</b>	31-Dec-22
Interest receivables	<b>43,782,947</b>	23,487,736
Other receivables	<b>3,526,249</b>	3,526,249
	<b>462,247,934</b>	454,875,101
Less allowance for impairment losses	<b>2,682,452</b>	2,682,452
	<b>₱459,565,482</b>	₱452,192,649

Accounts receivables are generally on 30 days credit term. Interest income earned from the delayed payment of FiT differential and other receivable amounted to ₱0.06 million and ₱0.45 million as of March 31, 2023 and December 31, 2022.

#### 9. Financial Assets at Fair Value Through Profit or Loss

	<b>Unaudited</b>	Audited
	<b>31-Mar-23</b>	31-Dec-22
Marketable equity securities	<b>₱6,375,746</b>	₱6,770,090
Investment in golf club shares	<b>770,000</b>	770,000
	<b>₱7,145,746</b>	₱7,540,090

Net gain (loss) on fair value changes on financial assets at FVTPL included in profit or loss amounted to (₱0.39 million) and (₱0.05 million) as of March 31, 2023 and December 31, 2022, respectively. Dividend income received from equity securities amounted to ₱.01 million and ₱0.08 million as of March 31, 2023 and December 31, 2022, respectively (see Note 25).

#### 10. Other Current Assets

	<b>Unaudited</b>	Audited
	<b>31-Mar-23</b>	31-Dec-22
Supplies inventory	<b>₱103,168,140</b>	₱116,790,791
Prepaid expenses	<b>69,252,582</b>	27,199,944
Prepaid income taxes	<b>14,419,379</b>	11,068,121
Advances to suppliers	<b>18,541,308</b>	8,004,724
Others	<b>3,794,570</b>	2,216,223
	<b>₱209,175,979</b>	₱165,279,803

##### *Supplies Inventory*

Supplies inventory refers to purchased supplies and parts that are intended to be used for operations and maintenance.

##### *Prepaid Expenses*

Prepaid expenses include various prepaid insurances, services and rent. Prepaid expenses also include advance payment for Real Property Taxes (RPT), Stand-by Letter of Credit (SBLC) charges and operations and maintenance professional fees.

Power plants represent MGI's geothermal power plant and PetroSolar's photovoltaic plant.

The MGI's construction of the 70/77 MVA Substation started in January 2020 and construction in progress account as of December 31, 2022 mainly includes civil structural, piping and mechanical works for M2, interconnection of MGPP to NGCP 69kV distribution line, design, facilities study and construction of 70/77 MVA MGI Substation related to MGPP-1&2 and Torishima engine driven pump.

Change in ARO estimate and transfers from advances to contractors, deferred oil exploration costs and development costs are considered as noncash investing activities.

Depletion of wells, platforms and other facilities is presented as a separate item under cost of sales in the consolidated statements of comprehensive income.

As of March 31, 2023 and December 31, 2022, the participating interest of PERC in various service contracts areas are as follows:

Gabonese Oil Concessions	2.525%
SC 14-C2 – West Linapacan	4.137%

## 12. Deferred Oil Exploration Costs

The movements in deferred oil exploration costs are as follows:

	Unaudited 31-Mar-23	Audited 31-Dec-22
<b>Cost</b>		
Balances at beginning of year	₱615,456,554	₱418,786,296

	<b>₱355,951,118</b>	<b>₱311,883,011</b>

### **Philippine Oil Operations – Development Phase**

Under the SCs entered into with the DOE covering certain petroleum contract areas in various locations in the Philippines, the participating oil companies (collectively known as “Contractors”) are obliged to provide, at their sole risk, the services, technology and financing necessary in the performance of their obligations under these contracts. The Contractors are also obliged to spend specified amounts indicated in the contract in direct proportion to their work obligations.

However, if the Contractors fail to comply with their work obligations, they shall pay to the government the amount they should have spent, but did not, in direct proportion to their work obligations. The participating companies have Operating Agreements among themselves which govern their rights and obligations under these contracts.

The full recovery of these deferred costs is dependent upon the discovery of oil in commercial quantities from any of the petroleum concessions and the success of future development thereof.

As of March 31, 2023 and December 31, 2022, the remaining participating interest of the Parent Company in Petroleum SC areas is SC 75 – Offshore Northwest Palawan wherein the Parent Company has 15% interest.

---

### **13. Investments in Joint Venture**

#### **PetroWind Energy Inc.**

The investment in joint venture mainly includes PetroGreen’s 40% interest in PetroWind or PWEL, a company incorporated in the Philippines. The primary purpose of PetroWind is to carry on the general business of generating, transmitting and/or distributing power derived from renewable energy sources.

The movements in the carrying value of Investment in PetroWind as of March 31, 2023 and December 31, 2022 follow:

	<b>Unaudited</b>	<b>Audited</b>
	<b>31-Mar-23</b>	<b>31-Dec-22</b>
Balance at beginning of year	<b>₱1,876,262,983</b>	₱1,734,947,347
Share in net income of a joint venture	<b>52,894,321</b>	81,512,921
Additional investment during the year	<b>3,900,000</b>	59,041,563
Share in other comprehensive income (loss)	-	761,152
<b>Balance at end of year</b>	<b>₱1,933,057,304</b>	<b>₱1,876,262,983</b>

The cost of the investment in PetroWind amounted to ₱639.92 million and ₱632.12 million as of March 31, 2023 and December 31, 2022, respectively.

The carrying value of the investment in PetroWind is equivalent to the Group’s 40% share in PetroWind’s equity, plus the fair value adjustment of ₱764.49 million recognized when the Group lost control over PetroWind in 2014.

**BuhaWind Energy**

In 2022, the Company made investments totalling ₱1.26 million in three newly incorporated special purpose vehicles namely: BuhaWind Energy Northern Luzon Corporation, BuhaWind Energy Northern Mindoro Corporation and BuhaWind Energy East Panay Corporation.

As of March 31, 2023 and December 31, 2022, these entities are still in the organization stage and have not yet started its operations.

**14. Leases**

The Group entered into lease contracts for office spaces and land used as geothermal field and photovoltaic (PV) solar power facility. The office space lease agreements are for a period of two (2) years and are renewable by mutual agreement of both parties.

The land lease agreement (LLA) with NPC and PSALM for the geothermal field in Sto. Tomas, Batangas has a lease term of twenty-five (25) years, extendable for another 25 years upon mutual agreement of both parties.

The two lease agreements with Luisita Industrial Park Corporation (LIPCO) for land used for the photovoltaic solar power facility in Ta rlac is for a period of 25 years, renewable by mutual agreement of both parties, generally under the same terms and conditions, with escalation clause of 3% every 2 years.

The Group's obligations under these leases are secured by the lessor's title to the leased assets. The Group is restricted from assigning and subleasing the leased assets.

The Group applies the 'short-term lease' and 'lease of low-value assets' recognition exemptions for all other leases, including leases of vehicles and parking slots.

The rollforward analyses of right-of-use assets follow:

	<b>Unaudited</b>		
	<b>31-Mar-2023</b>		
	<b>Land</b>	<b>Office Spaces</b>	<b>Total</b>
<b>Cost</b>			
Beginning balance	₱420,180,224	₱12,748,688	₱432,928,912

## 15. Investment Properties

As of March 31, 2023 and December 31, 2023 this account consists of land and parking lot space (located in Tektite) with cost amounting to ₱1.61 million.

The fair value of the investment properties of the Group is between ₱1 million to ₱1.70 million as of March 31, 2023 and December 31, 2022. The Group determined the fair values of the Group’s investment properties on the basis of recent sales of similar properties in the area where the investment in properties is located and taking into account the economic conditions prevailing at the time the valuations were made.

As of March 31, 2023 and December 31, 2022, the fair value of the investment properties is classified under the Level 3 category (see Note 22).

Except for insignificant amounts of real property taxes on the investment properties, no other expenses were incurred, and no income was earned in relation to the investment properties.

## 16. Other Noncurrent Assets

	<b>Unaudited</b>	Audited
	<b>31-Mar-2023</b>	31-Dec-2022
Input VAT	<b>₱152,189,834</b>	₱148,710,625

	<b>510,759,787</b>	466,273,627
Less allowance for probable losses (Note 24)	<b>10,979,802</b>	10,390,845
	<b>₱499,779,985</b>	₱455,882,782

Provision for probable losses on input VAT amounted to ₱0.59 million and nil in March 31, 2023 and December 31, 2022, respectively.

### *Input VAT*

Input VAT represents VAT passed on from purchases of goods and services that can be claimed against any future liability to the BIR for output VAT from sale of goods and services.

Input VAT also includes outstanding input VAT claims that were applied by MGI for refund with the BIR. As of March 31, 2023 and December 31, 2022, the outstanding input VAT claims which are still pending with the CTA and SC amounted to ₱123.74 million.

### *Intangible assets*

Intangible assets pertain to land rights, which refer to grant of easement of right of way entered by PetroSolar to construct, operate, maintain, repair, replace and remove poles, wire, cables, apparatus, and equipment and such other apparatus and structures needed for the transmission line. This also includes production license and software for accounting and for geological interpretation of Gabon Etame oil fields.

### *Advances to contractors*

Advances to contractors pertain to the downpayments to various contractors for procurement of materials, equipment and services.

### *Restricted cash*

This pertains to the Parent Company's share in the non-current portion of escrow fund for the abandonment of the Etame Marine Permit.

### *Deferred development costs*

These pertain to costs incurred in the exploration, development, production and expansion of renewable energy projects.

### *Others*

Other noncurrent assets pertain to noncurrent portion of prepaid insurance, security deposits, advances to contractors and lot owners and balance of MERALCO account billing deposits.

## 17. Accounts Payable and Accrued Expenses

	<b>Unaudited</b>	Audited
	<b>31-Mar-2023</b>	31-Dec-2022

Noncurrent portion	<b>₱2,531,709,685</b>	₱2,530,784,409

### *PetroEnergy's short-term loans payable*

PetroEnergy entered into unsecured loan agreements to finance its investments in Renewable Energy Projects.

Omnibus Credit Line Agreement (OCLA) with the Development Bank of the Philippines (DBP)

On April 27, 2015, the Parent Company entered into an OCLA with DBP which provides a credit facility in the principal amount not exceeding ₱420.00 million. Effective January 19, 2021, the credit facility was decreased to ₱300.00 million. Loans payable to DBP are as follows:

As of March 31, 2023:

- ₱15.48 million with interest rate of 7.0% and maturity on May 26, 2023
- ₱80.00 million with interest rate of 7.0% and maturity on June 23, 2023

As of December 31, 2022:

- ₱63.00 million with interest rate of 5.8% and maturity on January 10, 2023
- ₱108.00 million with interest rate of 5.5% and maturity on January 26, 2023
- ₱80.00 million with interest rate of 5.8% and maturity on June 23, 2023

Short-term Loan with Rizal Commercial Banking Corporation (RCBC)

On November 15, 2021, PetroEnergy obtained a loan from RCBC amounting to ₱120.00 million with interest of 4.5% and maturity on May 4, 2022.

As of March 31, 2023 and December 31, 2022, the Company already paid the outstanding short-term loan from RCBC.

Interest expense related to these loans amounted to ₱2.68 million and ₱9.68 million, as of March 31, 2023 and December 31, 2022, respectively. Accrued interest payable amounted to ₱0.57 million and ₱0.56 million as of March 31, 2022 and December 31, 2022, respectively.

***PetroGreen's long-term loans payable***

Credit Line Facility with Chinabank

On November 17, 2015, PetroGreen entered into a 5-year credit line facility with Chinabank amounting to ₱500.00 million, subject to repricing on the third anniversary. On the same date, ₱400.00 million out of the total loan facility were drawn by PetroGreen. The loan has an annual interest rate of 5.24% and has no collateral.

The loan is payable every 17<sup>th</sup> of May and November beginning on May 2017. The agreement further specifies that 96.50% of the aggregate principal amount shall be paid on the due date of the loan.

On November 29, 2016, PetroGreen has drawn an additional ₱30.00 million out of the total loan facility. The additional loan from Chinabank has an annual interest rate of 5.33%.

On November 17, 2018, the ₱400.00 million and ₱30.00 million long-term loans payable with interest rate of 5.24% and 5.33%, respectively, were repriced to 8.28% and 8.47%.

In 2019, PetroGreen negotiated for the reduction in the interest rates of the aforementioned loans from 8.28% and 8.47% to 7.14% for both loans. The reduced interest rate was approved by the bank and made effective starting September 19, 2019. Finally, On November 17, 2020, PetroGreen fully paid the outstanding loans from ChinaBank.

Long-term loan with RCBC

On November 16, 2020, PetroGreen obtained a new long-term unsecured loan with RCBC amounting to ₱400.00 million. The loan bears interest at a fixed rate of 4.74% payable semi-annually. The principal amount is payable in five equal annual installments starting November 11, 2021.

As of March 31, 2023 and December 31, 2022, the outstanding balance of these above loans, net of unamortized deferred financing costs, amounted to ₱239.27 million and ₱239.16 million, respectively. Interest expense related to these loans amounted to ₱3.12 million and ₱16.24 million as of March 31, 2023 and December 31, 2022, respectively. Accrued interest payable amounted to ₱3.82 million and ₱1.27 million and ₱1.70 million as of March 31, 2023 and December 31, 2022, respectively.

***MGI's long-term loans payable***

**Project Loan Facility Agreements with RCBC**

On May 19, 2016, MGI, together with PetroGreen, PHINMA and PNOG RC executed the Project Loan Facility Agreement with RCBC for a ₱1,400.00 million project loan to finance the design, development and construction of MGPP-2 or M2.

On September 5, 2016, MGI, together with PetroGreen, PHINMA and PNOG RC executed another Project Loan Facility Agreement with RCBC for a ₱2,100.00 million project loan relating to design, development and construction of MGPP-1 or M1. This was done to consolidate the outstanding principal of the term loan under the 2011 OLSA with RCBC and BPI, incidental costs, general corporate expenditures and working capital requirement.

a. MGPP-1 or M1 new Loan

The new MGPP-1 or M1 loan amounting to ₱2,100.00 million has a term of ten (10) years from the drawdown date of October 10, 2016. Interest and principal are payable semi-annually. Interest payment started on October 12, 2016, while the twenty (20) semi-annual principal payments started on April 12, 2017.

Interest rate is fixed for the first five (5) years from drawdown date, based on the sum of the prevailing 5-year fixed benchmark rate on the pricing date and the margin of 1.75% (the "Initial Interest Rate"). On the repricing date, the interest for the remaining five (5)-year term of the loan will be the higher of (i) the sum of then prevailing 5-year fixed benchmark rate plus the margin of 1.75%, or (ii) the initial interest rate.

As of March 31, 2023 and December 31, 2022, the outstanding balance of this loan amounted to ₱1,034.90. Interest expense on the new M1 Loan amounted to ₱16.03 million and ₱71.52 million as of March 31, 2023 and December 31, 2022, respectively.

b. MGPP-2 or M2 Expansion Loan

The MGPP-2 or M2 Expansion Loan amounting to ₱1,400.00 million has a term of twelve (12) years including thirty-six (36) months grace period from initial drawdown date of June 2, 2016. Interest and principal are payable semi-annually. Interest payment started on October 12, 2016, while the eighteen (18) semi-annual principal payments started on October 12, 2019.

Interest rate is fixed for the first seven (7) years from the initial drawdown date based on the sum of the prevailing 7-year fixed benchmark rate on the pricing date and the applicable margin of (1) 2.25% per annum prior to commercial operations date, or (2) 1.75% per annum from and after the Commercial Operations Date (the "Initial Interest Rate"). For subsequent drawdowns, interest rate will be the three (3) -day simple average interpolated rate based on the remaining tenor and computed using the straight-line method. On the repricing date, the interest for the remaining five (5)-year term of the loan will be the higher of (i) the sum of the then prevailing 5-Year fixed benchmark rate plus the applicable margin, or (ii) the weighted average interest rate during the first seven (7) years of the loan.

As of March 31, 2023 and December 31, 2022, the outstanding balance of this loan amounted to ₱ 943.84 million, respectively. Interest expense amounted to ₱14.20 million and ₱75.00 million as of March 31, 2023 and December 31, 2022, respectively.

Accrued interest payable of MGI's loans amounted to ₱48.64 million and ₱22.89 million as of March 31, 2023 and December 31, 2022, respectively.

The loan covenants covering the outstanding debt of MGI include among others, the following conditions: maintenance at all times of Debt-to-Equity (DE) Ratio of not greater than 70:30, Default Debt Service Coverage Ratio (DSCR) of at least 1.10x both until full payment of the Loans, and Dividend DSCR of at least 1.20x. MGI is also required to transfer to the DSPA equivalent to one-sixth (1/6) of the amount sufficient to pay for the forthcoming debt service scheduled in April and October of every year until the loan is fully paid off (see Note 9). As of March 31, 2023 and December 31, 2022, MGI has been compliant with the above conditions.

***PetroSolar's long-term loans payable***

On November 12, 2015, the PetroSolar, together with PetroGreen and EEIPC, as third party mortgagors and pledgors, entered into a ₱2,600.00 million OLSA with PNB and DBP specifically to partially finance the design, development, procurement, construction, operation and maintenance of its TSPP.

PetroSolar shall fully pay the loan for the pro-rata account of each lender within twelve (12) years from and after the date of the initial drawdown. Interest and principal are payable semi-annually. Interest payment started on May 27, 2016, while the twenty-two (22) semi-annual principal payments started on November 27, 2016.

The rate of the interest applicable to the facility or the relevant part thereof for each interest period shall be fixed for the first seven periods (7) from the initial drawdown date (the Initial Interest Rate). Prior to the FIT entitlement and collection of FIT revenues of the borrower, the rate shall be the higher of: (i) the aggregate of the seven (7) year PDST-R2 and the initial credit spread of 2.25%, or (ii) the minimum interest rate of 5.75%. Upon FIT entitlement of at least 40MW and collection of FIT revenues by the borrower equivalent to an aggregate of at least ₱473.00 million within a period not exceeding twelve (12) consecutive months, the rate shall be the higher of (i) the weighted average interest rate in previous drawdowns less the step down credit spread of 0.25%, or (ii) minimum interest rate, and which interest rate shall be applied beginning the following month immediately succeeding the month wherein the aforesaid FIT entitlement and FIT revenue collection thresholds were satisfied. PetroSolar met the criteria for FIT entitlement and aggregate collection of at least ₱473 million within 12 months which resulted in a lower interest rate effective July 2017. The applicable interest rate as of December 31, 2022 and 2021 is equal to 9.12% and 6.71%, respectively.

The loan covenants covering the outstanding debt of PetroSolar include among others, the maintenance of debt-to-equity ratio of 75:25 and establishment of DSPA required balance. As of March 31, 2023 and December 31, 2022, PetroSolar is in compliance with the said loan covenants.

As of March 31, 2023 and December 31, 2022, the outstanding balance of this loan amounted to ₱1,008.44 million and ₱1,007.42 million, respectively.

Interest expense of PetroSolar related to the loans amounted to ₱32.37 million and ₱89.81 million, as of March 31, 2023 and December 31, 2022, respectively. Accrued interest payable amounted to ₱27.63 million and ₱7.89 million as of March 31, 2023 and December 31, 2022, respectively.

PetroSolar mortgaged all of its property and equipment related to TSPP-1 as collateral in connection with the loan.

*Deferred financing costs*

Deferred financing costs are incidental costs incurred in obtaining the loan which includes documentary stamp tax, transfer tax, chattel mortgage, real estate mortgage, professional fees, arranger's fee and other costs directly attributable to obtaining the loan. The balance of unamortized deferred financing costs is presented as a deduction from the loans payable account and is amortized over the term of the loan using the effective interest rate method.

---

**19. Asset Retirement Obligation**

The Group has recognized its share in the abandonment costs associated with the Etame, Avouma and Ebouri oilfields located in Gabon, West Africa, geothermal field located in Sto. Tomas Batangas, and photovoltaic (PV) solar power facility in Tarlac.

**20. Equity**

Under the existing laws of the Republic of the Philippines, at least 60% of the Parent Company's issued capital stock should be owned by citizens of the Philippines for the Parent Company to own and hold any mining, petroleum or renewable energy contract area. As of March 31, 2023, the total issued and subscribed capital stock of the Parent Company is 99.79% Filipino and 0.21% non-Filipino as compared to 99.77% Filipino and 0.23% non-Filipino as of December 31, 2022.

As of December 31, 2022 and 2021, paid-up capital consists of:

Capital stock – ₱1 par value	
Authorized – 700,000,000 shares	
Issued and outstanding	₱568,711,842
Additional paid-in capital	2,156,679,049

On July 26, 2017, at the BOD meeting, the Parent Company was authorized to raise approximately one billion pesos (₱1,000,000,000) in capital, by offering and issuing to all eligible stockholders as of record date, the rights to subscribe up to all of the existing unissued common shares of the Parent Company (“Stock Rights Offer”).

On September 29, 2017, the Parent Company filed its application for the listing and trading of rights shares with the PSE. On December 13, 2017, the PSE approved the application to list the Rights Shares.

The rights offer entitled eligible stockholders as of record date of January 12, 2018 to subscribe to one rights share for every 2.6 shares held at an offer price of ₱4.80 per share.

The rights offer was undertaken on January 22 to 26, 2018. Following the close of the offer period, the Parent Company successfully completed the stock rights offer for 157,975,512 common shares with gross proceeds of ₱758.28 million and was subsequently listed on the PSE on February 2, 2018.

The proceeds from the stock rights offer were used for the development and expansion plans of the Group’s renewable energy projects, general corporate requirements, and payments of loans and the related interest.

#### *Cumulative Translation Adjustment*

In 2018, because of the change in business circumstances of the Parent Company, management changed its functional currency from United States Dollar (USD) to PHP effective January 31, 2018. All resulting exchange differences in the remeasurement of USD balances to PHP balances were recognized as ‘Cumulative Translation Adjustment’.

*Equity Reserve*

On June 9, 2015, PetroEnergy sold its 10% interest in PetroGreen to EEIPC, bringing down its ownership in PetroGreen from 100% to 90%. The transaction was accounted as an equity transaction since there was no change in control.

On October 14, 2022, PetroGreen issued 363,244,840 shares to Kyuden (Note 25) thereby decreasing PetroEnergy's ownership interest in PetroGreen from 90% to 76.92%. On January 10, 2023, PetroGreen issued another 349,006,880 shares to Kyuden (Note 25) which eventually decreased PetroEnergy's ownership interest in PetroGreen from 76.92% to 67.50%. These transactions with Kyuden were accounted as an equity transaction since there was no loss of control.

Equity reserves recognized under equity attributable to owners of PetroEnergy as a result of changes in PetroEnergy's ownership interest in PetroGreen are summarized as follows:

	09-Jun-2015	14-Oct-2022	10-Jan-2023	Total
Consideration received from NCI	₱206,000,000	₱1,687,431,477	₱1,634,762,580	₱3,528,194,057
Carrying amount of NCI sold	(125,950,762)	(1,030,763,729)	(1,194,405,409)	(2,351,119,900)
Excess of consideration received recognized in equity	<b>₱80,049,238</b>	<b>₱656,667,748</b>	<b>₱440,357,171</b>	<b>₱1,177,074,157</b>

As of March 31, 2023 and December 31, 2022, the balance of equity reserve account amounts to ₱1,177 million and ₱736.71 million, respectively.

*Deposit for Stock Subscription*

This account represents the balance of the escrow fund related to Kyuden's Share Subscription Agreement for a total of ₱3,369,500,000 representing 712,251,720 shares in PetroGreen. Upon "Initial Closing" date, ₱1,718,445,000 was converted into equity in PetroGreen. As of December 31, 2022 the remaining escrow fund balance amounts to ₱1,651,055,000 which was later on released and converted into equity upon "Second Closing" on January 10, 2023 under the Subscription Agreement (see Note 25).

*Capital Management*

The primary objective of the Group's capital management is to ensure that it maintains a strong credit rating and healthy capital ratios in order to support its business and maximize shareholders' value.

The Group manages its capital structure and makes adjustments to it, in light of changes in economic conditions. To maintain or adjust the capital structure, the Group may increase its debt from creditors, adjust the dividend payment to shareholders or issue new shares.

As of March 31, 2023 and December 31, 2022, the Group analyzes its capital structure primarily though the debt-to-equity ratio, which is total liabilities divided by total equity.

The Group's sources of capital as of March 31, 2023 and December 31, 2022 are as follows:

	Unaudited 31-Mar-2023	Audited 31-Dec-2022
Loans payable	<b>₱3,323,440,665</b>	₱3,477,929,052
Capital stock	<b>568,711,842</b>	568,711,842
Additional paid-in capital	<b>2,156,679,049</b>	2,156,679,049
Retained earnings	<b>3,355,224,738</b>	3,182,613,298
Equity reserve	<b>1,177,074,157</b>	736,716,986
	<b>₱10,581,130,451</b>	₱10,122,650,227

The table below demonstrates the debt-to-equity ratio of the Group as of March 31, 2023 and December 31, 2022:

	<b>Unaudited</b>	Audited
	<b>31-Mar-2023</b>	31-Dec-2022
Total liabilities	<b>₱4,262,130,637</b>	₱4,442,489,721
Total equity	<b>12,700,699,178</b>	12,377,322,378
Debt-to-equity ratio	<b>0.34:1</b>	0.36:1

Based on the Group's assessment, the capital management objectives were met on March 31, 2023 and December 31, 2022.

## 21. Related Party Transactions

Parties are considered to be related if one party has the ability, directly or indirectly, to control the other party in making financial and operating decisions or the parties are subject to common control or common significant influence (referred to as 'Affiliates'). Related parties may be individuals or corporate entities.

Significant transactions with related parties are as follows:

- a. PetroEnergy has an Internal Audit Engagement arrangement with House of Investments, Inc. (HI). These are non-interest bearing and are due and demandable.
- b. PetroGreen charges rental fees to PetroWind amounting to ₱71,429 every month. These are non-interest bearing and payable when due and demandable.
- c. Timewriting fees are charged by PetroGreen for accounting, legal management and other support services rendered to PetroWind. Management income refers to charges by PetroEnergy to PetroWind. These are non-interest bearing and are due and demandable.
- d. Advances represent reimbursements of costs and expenses.
- e. Electricity sales, wheeling, transmission and IEMOP transaction-related pass-on charges to ACEN (formerly PHINMA) are pursuant to the Electricity Supply Agreement. This is due and payable on the last business day of the month succeeding the billing period and non-interest bearing if paid within the due date.
- f. PetroGreen charged EEI Power Corporation (EEIPC) amounting to ₱550,000 plus VAT representing charges for the equity valuation study.
- g. The Group leased 77 hectares of land area from LIPCO (Note 14). These are non-interest bearing and payable when due and demandable.
- h. On November 12, 2015, PetroSolar entered into a ₱2.6 billion OLSA with PNB and DBP. PetroGreen and EEIPC signed as the third party mortgagors and pledgors (see Note 18).
- i. PetroWind executed an OLSA with DBP for a loan facility amounting to ₱3.0 billion. PetroEnergy signed as guarantor and PetroGreen signed as guarantor, pledgor and third-party mortgagor (see Note 18).
- j. On April 29, 2021, PGEC completed its first commercial and industrial (C&I) rooftop solar power project for the Enrique T. Yuchengco Bldg. in Binondo, Manila.

The building owner E.T. Yuchengco Inc. (ETY) and project owner PGEC signed a 15-year Rent-to-Own Agreement for a 140.8-kWp solar rooftop facility last January 14, 2021. The rental period commenced upon the project's completion in April 2021. After said 15-year cooperation period, PGEC will turn-over the said rooftop solar facility to ETY free of charge.

---

## 22. Financial Instruments

The Group's principal financial instruments include cash and cash equivalents, short-term investments, financial assets at FVTPL, receivables, restricted cash, loans payable, accounts payable, accrued expenses and dividends payable. The main purpose of these financial instruments is to fund the Group's working capital requirements.

### Categories and Fair Values of Financial Instruments

As of March 31 2023 and December 31, 2022, the carrying amounts of the Group's financial assets and financial liabilities approximate their fair values except for loans payable and lease liabilities. The fair value of the loans payable as of December 31, 2022 amounted to ₱3.49 billion compared to their carrying value of ₱3.48 billion.

The methods and assumptions used by the Group in estimating the fair value of financial instruments are:

<u>Financial instruments</u>	<u>Considerations</u>
<i>Cash and cash equivalents, short-term investments, restricted cash, receivables, accounts payable and accrued expenses, and short-term loans payable</i>	Due to the short-term nature of the instruments, carrying amounts approximate fair values as at the reporting date.
<i>Equity securities</i>	Fair values are based on published quoted prices (Level 1).
<i>Golf club shares</i>	Fair values are based on quoted market prices at reporting date (Level 1).
<i>Long-term loans payable</i>	Fair value is based on the discounted value of expected future cash flows using the applicable interest rate for similar type of instruments. The fair value is derived using the prevailing PH BVAL rate in 2022 and 2021.
<i>Lease liabilities</i>	Estimated fair value is based on the discounted value of future cash flows using the prevailing PH BVAL rate.

The fair value is based on the source of valuation as outlined below:

- quoted prices in active markets for identical assets or liabilities (Level 1);
- those involving inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly (Level 2); and
- those with inputs for the asset or liability that are not based on observable market data (unobservable inputs) (Level 3).

In March 31, 2023 and December 31, 2022, there were no transfers of financial instruments among all levels.

### Financial Risk Management Objectives and Policies

The Group manages and maintains its own portfolio of financial instruments in order to fund its own operations and capital expenditures. Inherent in using these financial instruments are the following risks on liquidity, market and credit.

*Financial Risks*

The main financial risks arising from the Group's financial instruments are liquidity risk, market risk and credit risk.

*a. Liquidity Risk*

Liquidity risk is the risk that the Group is unable to meet its financial obligations when due. The Group monitors its cash flow position and overall liquidity position in assessing its exposure to liquidity risk. The Group maintains a level of cash and cash equivalents deemed sufficient to finance its operations and to mitigate the effects of fluctuation in cash flows. To cover its short-term and long-term funding requirements, the Group obtains funds from various sources including internally generated funds and loans from financial institutions. As of March 31, 2023 and December 31, 2022, the Group has existing credit line facilities from which they can draw funds from (see Note 18).

The tables below summarize the maturity profile of the Group's financial assets and financial liabilities as of March 31, 2023 and December 31, 2022 based on contractual payments:

	31-Mar-23 (Unaudited)			Total

\*Excluding statutory payables

\*\*Includes future interest payments

b. *Market Risk*

Market risk is the risk of loss on future earnings, on fair values or on future cash flows that may result from changes in market prices. The value of a financial instrument may change as a result of changes in equity prices, foreign currency exchanges rates, interest rates and other market changes.

Foreign Exchange Risk

Foreign currency risk is the risk that the value of the Group's financial instruments denominated other than the Group's functional currency diminishes due to unfavorable changes in foreign exchange rates. The Group's transactional currency exposures arise from cash and cash equivalents, receivables and accounts payable and accrued expenses.

The Group's foreign currency-denominated financial instruments as of March 31, 2023 and December 31, 2022 are as follows:

	31-Mar-22 (Unaudited)		31-Dec-22 (Audited)	
	US Dollar	Peso Equivalent	US Dollar	Peso Equivalent
<i>Financial assets</i>				
Cash and cash equivalents	\$2,418,876	₱131,656,999	\$2,316,003	₱129,974,085
Receivables	–	–	674,774	37,868,318
Restricted Cash	1,029,947	56,058,980	933,326	52,378,235

<i>Financial liabilities</i>				
Accounts payable and accrued expenses	1,183,960	64,441,754	1,187,125	66,621,466
Net exposure	<b>\$2,264,863</b>	<b>₱123,274,225</b>	\$2,736,978	₱153,599,172

As of March 31, 2023 and December 31, 2022, the exchange rates used for conversion are ₱54.429 and ₱56.120 per \$1, respectively.

There is no other impact on the Group's equity other than those already affecting income before income tax.

Interest Rate Risk

The Group's exposure to market risk for changes in interest rates relates primarily to the Group's loans payable. Interest rate of loans payable is fixed for the first five (5) years or first seven (7) years and will be repriced thereafter.

There is no other impact on the Group's equity other than those already affecting income before income tax.

c. *Credit Risk*

Credit risk is the possibility of loss for the Group if its receivable counterparties fail to discharge their contractual obligations. With respect to credit risk arising from the other financial assets of the Group, which comprise of cash and cash equivalents, short-term investments, receivables, financial assets at FVTPL, and restricted cash, the Group's exposure to credit risk could arise from default of the counterparty.

The Group trades only with recognized, creditworthy third parties. However, the Group's credit risk exposure is concentrated on a few counterparties as inherent in the oil exploration and

production and renewable energy businesses. The Group has a well-defined credit policy and established credit procedures. In addition, receivable balances are being monitored on a regular basis to ensure timely execution of necessary intervention efforts.

The table below summarizes the Group's gross maximum credit risk exposure from its financial instruments and contract asset. These amounts are gross of collateral and credit enhancements, but net of any amounts offset and allowance for impairment losses:

	31-Mar-23	31-Dec-22
<b>Financial assets:</b>		
Cash in banks and cash equivalents	<b>₱1,683,021,733</b>	₱1,673,197,584
Short-term investments	<b>2,575,286,425</b>	946,044,355
Receivables	<b>459,565,482</b>	452,192,649
Financial assets at FVTPL	<b>7,145,746</b>	7,540,090
Refundable deposits	<b>5,800,527</b>	5,323,862
Restricted cash	<b>371,352,629</b>	2,094,839,410
Contract asset	<b>311,172,896</b>	296,358,490
	<b>₱5,413,345,438</b>	₱5,475,496,440

An impairment analysis is performed at each reporting date using a provision matrix to measure ECL. The mechanics of the ECL calculations and the key elements are, as follows:

- Probability of default (PD)* is an estimate of the likelihood of default over a given time horizon.
- Exposure at default (EAD)* is an estimate of the exposure at a future default date taking into account expected changes in the exposure after the reporting date.
- Loss given default (LGD)* is an estimate of the loss arising in the case where a default occurs at a given time.

ECLs are recognized in two stages. For credit exposures for which there has not been a significant increase in credit risk since initial recognition, ECLs are provided for credit losses that result from default events that are possible within the next 12-months (a 12-month ECL). For those credit exposures for which there has been a significant increase in credit risk since initial recognition, a loss allowance is required for credit losses expected over the remaining life of the exposure, irrespective of the timing of the default (a lifetime ECL). In its ECL models, the Group relies on a broad range of forward-looking information as economic inputs.

The inputs and models used for calculating ECLs may not always capture all characteristics of the market at the date of the financial statements. To reflect this, qualitative adjustments or overlays are occasionally made as temporary adjustments when such differences are significantly material.

The table below shows the aging by class of asset for the Group's financial assets and contract asset as of March 31, 2023 and December 31, 2022:

	31-Mar-23 (Unaudited)			Total
	Current (High grade)	More than 90 days (Standard grade)	Credit impaired

\*excluding cash on hand

Financial assets are classified as high grade if the counterparties are not expected to default in settling their obligations. Thus, credit risk exposure is minimal. Financial assets are classified as a standard grade if the counterparties settle their obligation with the Group with tolerable delays. Low grade accounts are accounts, which have probability of impairment based on historical trend. These accounts show propensity of default in payment despite regular follow-up actions and extended payment terms. The Group's cash in banks, cash equivalents, accounts receivable, interest receivable and restricted cash have high grade credit quality.

## 23. Segment Information

For management purposes, the Group is organized into business units based on their products and has four reportable segments as follows:

- The oil production segment is engaged in the oil and mineral exploration, development and production.
- The geothermal energy segment develops and operates geothermal steamfields and power plants.
- The solar energy segment carries out solar energy operations of the Group.
- Other activities pertain to research and investment activities.

No operating segments have been aggregated to form the above reportable operating segments.

Management monitors the operating results of its business units separately for the purpose of making decisions about resource allocation and performance assessment. Segment performance is evaluated based on operating profit or loss and is measured consistently with operating profit or loss in the

consolidated financial statements.

InterGroup investments, revenues and expenses are eliminated during consolidation.

## 24. Basic/Diluted Earnings Per Share

The computation of the Group's earnings per share follows:

	Unaudited 31-Mar-2023	Unaudited 31-Mar-2022	Audited 31-Dec-2022
Net income attributable to equity holders of the Parent Company	₱172,611,440	₱176,957,400	₱548,523,247
Weighted average number of shares	568,711,842	568,711,842	568,711,842
Basic/diluted earnings per share	₱0.3035	₱0.3112	₱0.9645

Earnings per share are calculated using the net income attributable to equity holders of the Parent Company divided by the weighted average number of shares.

PERC does not have potentially dilutive common stock.

## 25. Non-controlling Interests

As of March 31, 2023 and December 31, 2022, the accumulated balances of and net income attributable to non-controlling interests are as follows:

	<b>Unaudited</b>	Audited
	<b>31-Mar-2023</b>	31-Dec-2022
<b>Accumulated balances of non-controlling interests:</b>		
PetroSolar	<b>₱1,265,371,753</b>	₱1,203,285,619
MGI	<b>1,192,029,134</b>	1,159,523,579
PetroGreen	<b>2,867,083,402</b>	1,600,211,911
	<b>₱5,324,484,289</b>	₱3,963,021,109
<b>Net income attributable to non-controlling interests:</b>		
PetroSolar	<b>₱62,086,141</b>	₱202,111,799
MGI	<b>32,505,555</b>	51,395,928
PetroGreen	<b>72,466,085</b>	61,046,054
	<b>₱167,057,781</b>	₱314,553,781

Dividends paid to non-controlling interests amounted to nil and ₱122.80 million as of March 31, 2023 and December 31, 2022, respectively.

### *Increase in non-controlling interests from stock issuances*

#### *PetroGreen*

##### December 31, 2022

In September 2022, PetroGreen, PetroEnergy and Kyuden International Corporation (Kyuden), a wholly-owned subsidiary of Japan's Kyushu Electric Power Co., Inc., executed the Subscription Agreement and Shareholders' Agreement. Pursuant to the said documents, PetroGreen will issue 712,251,720 shares in two tranches in favor of Kyuden equivalent to 25% ownership interest in PetroGreen upon completion of the conditions precedent for the transaction.

In October 2022, PetroGreen received from Kyuden the payment for the subscription amounting to ₱3.37 billion, which is maintained in an escrow fund with a bank to be release based on the terms of the escrow agreement.

On October 14, 2022, transaction for the "Initial Closing" was completed. The subscription amount of ₱1.72 billion was released from the escrow account and the 363,244,840 shares coming from unissued shares of PetroGreen was issued in favor of Kyuden representing 14.53% ownership interest in PetroGreen.

On November 18, 2022, another ₱21.81 million was released from the escrow account representing the required 25% payment of the 25% subscribed shares for the increase in PetroGreen's authorized capital stock as part of the "Pre-Approval Second Closing". On December 14, 2022, SEC approved the application for increase in authorized capital stock from 2,500,000,000 shares at ₱1.0 par value to 2,849,006,880 shares with same par value.

As of December 31, 2022, the “Second Closing” under the Subscription Agreement is not yet completed since the fulfilment of the Conditions Precedent and the payment/release of the ₱1.63 billion remaining escrow fund was completed only on January 10, 2023. Effectively, Kyuden has 14.53% equity ownership in PetroGreen as of December 31, 2022. This resulted in an increase in non-controlling interest as of December 31, 2022 (see Note 20).

The amount of ₱1.65 billion representing the subscription amount for the “Pre-approval Second Closing” and “Second Closing” transactions are presented as separate line item as Deposit for Stock Subscription under the 2022 Equity section.

On January 10, 2023, the date of “Second Closing”, the remaining balance of the escrow account amounting to ₱1.63 billion was released and the stock certificate for the 349,006,880 subject shares was issued in favor of Kyuden. After the Second Closing on January 10, 2023, Kyuden already holds 25% ownership interest in PetroGreen.

#### *PetroSolar*

On March 28, 2022, the BOD and Stockholders approved the increase in PetroSolar’s authorized capital stock from ₱1,800,000,000 consisting of 18,000,000 shares at ₱100 par value per share, to ₱1,900,000,000 consisting of 19,000,000 shares at ₱100 par value per share. In compliance with Sec. 37 of the Revised Corporation Code, 25% or 250,000 shares of the authorized capital stock increase must be subscribed, and 25% or 62,500 shares of the subscribed capital stock must be paid up. Of the total subscribed capital stock amounting to ₱25,000,000, cash amounting to ₱6,250,000 equivalent to 62,500 shares was received by PetroSolar on April 6, 2022 as subscription payment for the proposed increase in authorized capital stock. PetroSolar filed its application for the approval of the proposed increase in authorized capital stock with the SEC on May 23, 2022. The said application was approved by the SEC on May 30, 2022. Upon approval, the 62,500 shares subscribed were treated as outstanding shares.

---

## 26. Others

- a. The Interim Financial Report (March 31, 2023) is in compliance with generally accepted accounting principles.
- b. The same policies and methods of computation were followed in the preparation of the interim financial report compared to the December 31, 2021 Consolidated Audited Financial Statements.
- c. No unusual item or items affected the assets, liabilities, equity and cash flows of the March 31, 2023 Financial Statements.
- d. Earnings per share is presented in the face of the unaudited statements of income for the period ended March 31, 2023 and December 31, 2022.
- e. No significant events happened during the quarter that will affect the March 31, 2023 Unaudited Financial Statements.
- f. There are no seasonal aspects that had a material effect on the financial condition or results of operation of the Company.
- g. There is no foreseeable event that will trigger direct or contingent financial obligation that is

material to the Company, including any default of accelerated obligation.

- h. There are no material off-balance sheet transactions, arrangements, obligations and other relationships of the Company with other entities or persons that were created during the period.
- i. There are no changes in estimates of amounts reported in prior periods of the current financial year or changes in estimates of amounts reported in prior financial years that could have material effect in the current period.
- j. Our Company has no contingent liabilities or assets during the period.

## Item 2. Management’s Discussion and Analysis or Plan of Operation

<b>TOTAL EQUITY</b>	<b>₱12,700,699,178</b>	<b>₱12,377,322,378</b>	<b>2.61%</b>	<b>74.87%</b>
<b>TOTAL LIABILITIES AND EQUITY</b>	<b>₱16,962,829,815</b>	<b>₱16,819,812,099</b>	<b>0.85%</b>	<b>100.00%</b>

**Total assets** amounted to ₱16.963 billion and ₱16.820 billion as of March 31, 2023 and December 31, 2022, respectively. Book value is at ₱12.97/share from ₱11.89/share.

**Cash and cash equivalents** consist of cash on hand, cash in banks and money market placements with original maturities of not more than three months. The 0.59% net increase from ₱1.677 billion as of December 31, 2022 to ₱1.687 billion as of March 31, 2023 is mainly due to collections from electricity sales and oil lifting proceeds, net of payments for loan principal, interest and working capital requirements for the period.

**Short term investments** with maturities of more than three months increased by 172.22% due to additional money market placements from the proceeds of the Second Final Closing of Kyuden International Corporation (Kyuden) share subscription on January 10, 2023.

**Restricted cash** decreased as a result of release of the escrow account relating to Kyuden share subscription. Restricted cash pertaining to subsidiaries' debt service payment and reserve account also decreased due to payment of loans. In addition, the Parent Company's share in the escrow funds related to Etame Abandonment Fund has also been used for payment of FPSO decommissioning and Etame Field Asset Retirement Obligations.

The **Receivables** account mainly consists of receivables from electricity sales and lifting/sales of crude oil revenue, with interest income as minor component. The 1.63% increase is essentially attributable to higher interest receivable from short-term investments.

**Financial assets at fair value through profit and loss (FVPL)** amounted to ₱7.146 million and ₱7.540 million as of March 31, 2023 and December 31, 2022, respectively. The market prices of the portfolio are maintained resulting in minimal change in the account.

**Crude oil inventory** increased due to higher number of barrels left unsold during the period.

**Contract Assets – current and non-current portion** pertains to PSC's receivable from TransCo on FIT arrears, which is currently recorded at net present value since this will be collected over five (5) years. PSC's collection started in 2022. The decrease is mainly due to the collection of FIT arrears adjustment for TSPP1 for the period. Non-current portion increased due to additional set-up of the FIT arrears adjustment for TSPP1 for the period.

**Other current assets** consist of supplies inventory, prepaid expenses, and other current assets. The bulk of the net increase of 26.56% is mainly due to set-up of prepaid expenses for insurance, and real property taxes and business permits to be amortized over the year.

**Property, plant and equipment (PPE)** amounted to ₱8.158 billion and ₱8.197 billion as of March 31, 2023 and December 31, 2022, respectively. The 0.47% net decrease is mainly due to the continuous depreciation of the Renewable Energy Power Plants, and other assets, and depletion of oil assets.

**Deferred oil exploration cost** increased by 14.13% resulting from the continuous development of the Gabon oil field.

**Investment in a joint venture** refers to the 40.00% shareholdings in PWEI and investment in three newly incorporated special purpose vehicles namely: BuhaWind Energy Northern Luzon Corporation, BuhaWind Energy Northern Mindoro Corporation and BuhaWind Energy East Panay Corporation. Bulk of the 3.02% net increase from ₱1.877 billion to ₱1.934 billion pertains to the Group's share in net income generated by PWEI during the period.

**Right of use of asset and lease Liabilities** – these resulted from the first time adoption of the new PFRS 16 – leases in 2019. Please refer to Note 14 of the Consolidated AFS. The 0.59% decline pertains to the amortization of the account during the period.

**Deferred tax assets – net** occurs due to timing differences in recognizing temporary deductible expenses and temporary taxable revenues such as accrued profit share, accretion expenses, accrued retirement liability, provision for probable losses, unrealized gains or losses and change in crude oil inventory. As of March 31, 2023 and December 31, 2022, this amounted to ₱11.113 million and ₱10.928 million,

respectively. The net increase pertains to movements of the temporary deductible expenses and temporary taxable revenues during the period.

**The Investment properties-net** account remains the same as of March 30, 2023.

**Other non-current assets** amounted to ₱499.780 million and ₱455.883 million as of March 30, 2023 and December 31, 2022, respectively. The 9.63% net increase is mainly due to the additions to Deferred Development Cost related to the exploration, development, production and expansion of various renewable energy projects.

**Accounts payable and accrued expenses** decreased by 8.60% mainly due to payment of accruals of payables to contractors and suppliers.

**Current portion of loan payable decreased** by 16.41% due to payment of loan principal during the period.

**Loans payable – net of current portion** increased by 0.04% due to amortization of the deferred financing cost during the period.

**Lease liabilities – current and non-current** movement is mainly due to the interest recognized during the period.

The increase in the **Income tax payable** account mainly pertains to additional set-up of provision during the period.

**Asset retirement obligation** amounted to ₱66.770 million and ₱66.230 million as of March 31, 2023 and December 31, 2022, respectively. The 0.82% minimal increase mainly pertains to accretion made during the period.

**Other non-current liabilities** pertains to the Group's accrued retirement liability account. The net decrease of 20.94% is mainly due to payment for retirement funds during the period.

**Equity attributable to equity holders of the Parent Company** amounted to ₱7.376 billion or ₱12.97 book value per share and ₱6.763 billion or ₱11.89 book value per share, as of March 31, 2023 and December 31, 2022, respectively. Bulk of the increase is mainly due to equity reserve (excess of consideration over carrying value of NCI sold) related to Kyuden investment. The increase total Equity is mainly due to continuous income generation from the Renewable Energy Operations and Oil operations.

**Non-controlling interest** (NCI) pertains to the following:

- 7.50% share of EEIPC in PetroGreen as of March 31, 2023; 10% as of March 31, 2022
- 25.00% share of Kyuden in PetroGreen as of December 31, 2022; nil as of March 31, 2022
- 25% direct share of Trans-Asia, the 10% direct share of PNOC-RC, and indirect share of Kyuden and EEIPC (32.50% of the 65% of PGEC) in MGI;
- 44% direct share of EEIPC, and indirect share of Kyuden and EEIPC (32.50% of 56% share of PGEC) in PSC;

Non-controlling interest increased by 34.35% from ₱3.963 billion to ₱5.324 billion due to additional stock issuance to Kyuden and accumulated share in net income from RE projects.

**Deposit for future stock subscription** as of December 31, 2022 pertains to the balance of the Kyuden's subscription amount after deducting the subject shares for the Initial Closing. This account was converted into shares after the completion of the Second Final Closing on January 10, 2023.

**2. Consolidated Financial Performance (as of March 31, 2023 and as of March 31, 2022)**

	Unaudited		% Change	% to Total Revenues
	31-Mar-23	31-Mar-22		
<b>REVENUES</b>				
Electricity sales	501,633,224	425,026,400	18.02%	82.56%

<b>PROVISION FOR INCOME TAX</b>	13,528,519	27,698,829	-51.16%	2.23%
<b>NET INCOME</b>	339,669,221	252,472,457	34.54%	55.91%
<b>NET INCOME ATTRIBUTABLE TO:</b>				
Equity Holders of the Parent Company	172,611,440	176,957,400	-2.46%	28.41%
Noncontrolling interest	167,057,781	75,515,057	121.22%	27.50%

The Group's **consolidated net income** amounted to ₱339.669 million and ₱252.472 million for the 1<sup>st</sup> quarter ending March 31, 2023 and for the same period in 2022. While the **consolidated net income attributable to equity holders of the Parent Company** amounted to ₱172.611 million or ₱0.304 earnings per share for the 1<sup>st</sup> quarter 2023 as compared with ₱176.957 million or ₱0.311 earnings per share for the same period 2022.

The 34.54% increase in the consolidated net income is mainly due to continuous operation of Maibarara Geothermal Power Plant (MGPP) during the quarter as compared to previous year with scheduled major preventive maintenance in February 2022. Higher interest income also contributed to the increase in total consolidated net income.

The consolidated net income attributable to equity holders of the Parent Company decreased by 2.46% mainly due to the decrease in average crude oil prices (from average \$107.95/bbl to average \$81.34/bbl).

**Revenues:**

**Electricity sales** refer to the electricity power generation from MGPP and TSPP. The 18.02% net increase is mainly due to MGI's scheduled major preventive maintenance in February 2022, none for the current period.

**Oil revenues** decreased by 40.53% from ₱152.616 million as of March 31, 2022 to ₱90.757 million in March 31, 2022 mainly due to the decline in crude oil price (from average \$107.95/bbl to average \$81.34/bbl) and lower number of liftings made during the period.

**Other revenues** pertain to passed on Meralco wheeling and ancillary charges. The increase is mainly due to higher accruals made during the period.

**Costs and Expenses:**

**Costs of electricity sales** pertain to the direct costs of generating electricity power including operating and maintenance costs (O&M) of all RE subsidiaries' power plants and and MGI's fluid collection and reinjection system (FCRS), depreciation, and other costs directly attributed to producing electricity.

**Oil production operating expenses** increased by 18.46% mainly due to increase in personnel costs in Gabon Etame Operations and well workovers during the period.

Any oil produced but not delivered is recognized as crude oil inventory valued at its current crude oil price (net realizable value). The movement in crude oil inventory is presented as **Change in crude oil inventory**.

The negative monetary value of ₱61.624 million as of March 31, 2023 pertains to the increase in the base inventory barrels reckoning from December 31, 2022 of 146,218 bbls to 798,529 bbls. While the negative ₱34.618 million as of March 31, 2022 pertains to the increase in the base inventory barrels reckoning from December 31, 2021 of 147,922 bbls to 340,584 bbls.

**General and administrative expenses, Other Income (Charges) and Provision for (Benefit from) Income Tax:**

**General and administrative expenses (G&A)** increased by 11.66% mainly due to higher expenses incurred during the period resulting from increase in number of site visits.

Other income (charges) amounted to ₱32.918 million and (₱21.351 million) as of March 31, 2023 and March 31, 2022, respectively. Below presents the itemized discussion of offsetting changes in other income (charges) – net account.

- 1,711.56% increase in interest income due to higher short-term investments;
- Downturn movement from forex gain of ₱0.624 million to forex loss of ₱3.349 million for the quarter mainly due to conversion of USD accounts to Peso;
- decline in the market prices of the investments in FVPL, from net gain of ₱0.450 million to unrealized loss of ₱0.394 million;
- 10.99% decline in interest expense from ₱76.806 million to ₱68.364 million mainly due to installment payments of loans;
- 6.17% increase in share in Net income of an Associate from ₱49.822 million to ₱52.894 million mainly due to PWEI's higher net income as a result of increased wind speed during the 1st quarter of 2023 compared to same period last year.

- Increase in miscellaneous income is mainly due to PGEC's higher time writing charges to PWEI as a result of more activities.

**Provision for (benefit from) income tax:**

Provision for income tax current pertains to PSC's tax payable - 5.00% provision for income tax under the PEZA incentives and for MGPP, 10% tax rate, after the income tax holiday (for the M1), which ended last February 8, 2021, as part of its BOI incentives under RE Law. This also includes 1% minimum corporate income tax due for PERC and PGEC. The net decrease in the provision is due to lower taxable income of PERC as a result of utilization of NOLCO as additional deductible expense for the period.

**Net Income Attributable to Non-controlling interest (NCI)** is computed using the following equity holdings as of March 31, 2023 and March 31, 2022:

- 7.50% share of EEIPC in PetroGreen as of March 31, 2023; 10% as of March 31, 2022
- 25.00% share of Kyuden in PetroGreen as of December 31, 2022; nil as of March 31, 2022
- 25% direct share of Trans-Asia (now AC Energy Corporation), the 10% direct share of PNOC-RC, and indirect share of Kyuden and EEIPC (32.50% of the 65% of PGEC) in MGI;
- 44% direct share of EEIPC, and indirect share of Kyuden and EEIPC (32.50% of 56% share of PGEC) in PSC;

This amounted to ₱167.058 million and ₱75.515 million as of March 31, 2023 and same period 2022.

### 3. Consolidated Financial Position (March 31, 2023 and March 31, 2022)

	31-Mar-23	31-Mar-22	% Change	% in Total Assets
<b>ASSETS</b>				
Cash and cash equivalents	₱1,687,055,733	₱1,213,396,921	39.04%	9.95%

Income tax payable	19,086,864	37,882,335	-49.62%	0.11%
Loans payable - net of current portion	2,531,709,685	3,226,486,980	-21.53%	14.93%
Lease liabilities - net of current portion	309,753,594	325,848,439	-4.94%	1.83%
Asset retirement obligation	66,770,378	95,123,996	-29.81%	0.39%
Other noncurrent liability	9,548,486	19,734,887	-51.62%	0.06%
<b>TOTAL LIABILITIES</b>	<b>4,262,130,637</b>	<b>5,064,536,890</b>	<b>-15.84%</b>	<b>25.13%</b>
<b>EQUITY</b>				
Attributable to equity holders of the Parent Company	7,376,214,889	5,754,395,222	28.18%	43.48%
Non-controlling interest	5,324,484,289	2,812,070,394	89.34%	31.39%
<b>TOTAL EQUITY</b>	<b>12,700,699,178</b>	<b>8,566,465,616</b>	<b>48.26%</b>	<b>74.87%</b>
<b>TOTAL LIABILITIES AND EQUITY</b>	<b>₱16,962,829,815</b>	<b>₱13,631,002,506</b>	<b>24.44%</b>	<b>100.00%</b>

Total assets amounted to ₱16.963 billion and ₱13.631 billion as of March 31, 2023 and March 31, 2022, respectively. Book value increased to ₱12.97/share from ₱10.12/share.

**Cash and cash equivalents** consist of cash on hand, cash in banks and money market placements with original maturities of not more than three months. The 39.04% net increase from ₱1.213 billion to ₱1.687 billion is mainly due to collections from electricity sales and oil lifting proceeds, net of payments for loan principal, interest and working capital requirements the period.

**Short term investments** with maturities of more than three months pertain to money market placements from the proceeds of the Second Final Closing of Kyuden's share subscription on January 10, 2023.

**Restricted cash** decreased due to the payment of loans taken from the debt service payment account.

The **Receivables** account mainly consists of receivables from electricity sales and lifting/sales of crude oil revenue. The 2.76% decrease is mainly due to collection of receivables from electricity sales and lifting proceeds.

**Financial assets at fair value through profit and loss (FVPL)** decreased by 11.09% from ₱8.037 million to ₱7.146 million mainly due to decline in the market prices of the investment portfolio.

**Crude oil inventory** increased mainly due to higher crude oil prices of the remaining barrels left unsold.

**Contract Assets – current** increased mainly due to additional set-up of the FIT arrears during the period.

**Other current assets** consist of supplies inventory, prepaid expenses, and other current assets. The bulk of the 9.58% net decrease is mainly due to amortization of prepaid expenses and usage of supplies inventory for the period.

**Property, plant and equipment (PPE)** amounted to ₱8.158 billion and ₱7.891 billion as of March 31, 2023 and March 31, 2022, respectively. The 3.38% net increase is mainly due to the following:

- additional 4 new wells in the Gabon Etame Field;
- net impairment reversal of the oil assets (refer to Note 11 and 12 of the Consolidated AFS)

**Deferred oil exploration cost** amounted to ₱355.951 million and ₱216.717 million as of March 31, 2023 and March 31, 2022, respectively. The 64.25% net increase is due to Etame Reconfiguration Project related to the switch from old Floating Production Storage and Offloading (FPSO) vessel to new Floating Storage and Offloading (FSO) vessel .

**Contract assets net of current portion** pertains to PSC's receivable from TransCo on FIT arrears, which is currently recorded at net present value since this will be collected over five (5) years. PSC's collection started in 2022. The 22.10% increase mainly pertains to the additional set-up of the FIT arrears during the period.

**Investment in a joint venture** refers to the remaining 40.00% shareholdings in PWEI and investment in three newly incorporated special purpose vehicles namely: BuhaWind Energy Northern Luzon Corporation, BuhaWind Energy Northern Mindoro Corporation and BuhaWind Energy East Panay Corporation. Bulk of the 3.02% net increase from ₱1.785 billion to ₱1.934 billion pertains to PGEC's additional investment in PWEI for Nabas 2 project. Movement in this account also includes share in net income generated by PWEI, net of dividends received during the period.

**Right of use of asset** – this resulted from the first time adoption of the new PFRS 16 – leases in 2019. The 4.69% decline pertains to the amortization of the account during the period.

**The Investment properties-net** account remains the same as of March 31, 2023.

**Deferred tax assets – net** refers to temporary deductible expenses and temporary taxable revenues such as accrued profit share, accretion expenses, accrued retirement liability, provision for probable losses, unrealized gains or losses and change in crude oil inventory. The movement pertains to timing differences in the recognition of said temporary deductible expenses.

**Other non-current assets** amounted to ₱499.780 million and ₱372.429 million as of March 31, 2023 and same period 2022. The 34.19% increase is due to the additions to Deferred Development Cost related to the exploration, development, production and expansion of renewable energy projects.

**Accounts payable and accrued expenses** decreased by 0.22% mainly due to payments of various payables and accrued expenses during the period.

**Current portion of loan payable and Loans payable – net of current portion**, net decline of 5.82% and 21.53% pertain to installment payments of loans, net of amortization of the deferred financing costs during the period.

**Lease liabilities – current portion** increased and **Lease liabilities –non-current portion** decreased mainly due to the reclassification of current portion for the period.

The decrease in the **Income tax payable** account mainly pertains to lower set-up of provision during the period due to lower taxable income of PERC as a result of utilization of NOLCO as additional deductible expenses for the period.

**Asset retirement obligation** amounted to ₱66.770 million and ₱95.124 million as of March 31, 2023 and March 31, 2022, respectively. The 29.81% decline pertains to updated actuarial computations at year-end 2022.

**Other non-current liabilities** pertain to the Group's accrued retirement liability account. Net decrease of 51.62% is mainly due to remittance of funds to the retirement fund account during the period.

**Equity attributable to equity holders of the Parent Company** amounted to ₱7.376 billion or ₱12.97 book value share and ₱5.754 billion or ₱10.12 book value per share as of March 31, 2023 and March 31, 2022, respectively. Bulk of the increase is mainly due to equity reserve (excess of consideration over carrying value of NCI sold) related to Kyuden's investment. The increase is also due to the continuous income generation from the Renewable Energy Operations and Oil operations.

**Non-controlling interest** (NCI) pertains to the following:

- 7.50% share of EEIPC in PetroGreen as of March 31, 2023; 10% as of March 31, 2022
- 14.53% share of Kyuden in PetroGreen as of December 31, 2022; nil as of March 31, 2022
- 25% direct share of Trans-Asia, the 10% direct share of PNOC-RC, and indirect share of Kyuden and EEIPC (32.50% of the 65% of PGEC) in MGI;
- 44% direct share of EEIPC, and indirect share of Kyuden and EEIPC (32.50% of 56% share of PGEC) in PSC;

Non-controlling interest increased by 89.34% from ₱2.812 billion to ₱5.324 billion due to investment of Kyuden and share in net income from RE projects.

### **Key performance indicators**

– refer to the Schedule of Financial Soundness Indicators

### **Material Commitments**

Aside from the committed developments of the prospective projects, there are no other foreseen material commitments during the period.

### **Productivity Program**

The development of the prospective renewable energy projects will increase the Group's capacity and power generation, while the prospective four-well drilling program in Gabon Etame, aimed to sustain field production to above 20,000 BOPD.

### **Receivable Management**

The group's receivables are mainly due from sale of electricity to AC Energy and Transco and crude oil in Etame Gabon, through the consortium operator. These are being recorded once sale is made. Payment is received every 30-45 days following each sale.

For electricity sales from TSPP and NWPP, the payment for the Actual FIT Revenue is sourced from the FIT-All Fund, specifically the Actual FIT Differential (FD) and the Actual Cost Recovery Revenue (ACRR). The FD is the difference between the Actual FIT Revenue and the ACRR and is collected from on-grid consumers as a uniform charge and applied to all billed kilowatt-hours. For FIT-Eligible RE Plants connected to the Wholesale Electricity Spot Market ("WESM"), the ACRR refers to the WESM proceeds remitted to the FIT-All Fund by the Independent Electricity Market Operator of the Philippines, Inc. ("IEMOP"), which took over the Philippine Electricity Market Corporation ("PEMC") as operator of the electricity spot market. PWEI and PSC regularly receive the both the ACRR and FD components within 45 days after billing date.

PWEI and PSC manage this risk through proper and meticulous allocation of funds, proper timing of expenditures, employment of cost-cutting measures, and sourcing short-term funding requirements from local banks and investment houses or from affiliated companies.

For the twenty-one (21) years since oil production inception, there was no event that the buyer failed to remit the proceeds of the sale. However, the group is willing to look for another buyer should there be some problem that may happen in the future.

### **Liquidity Management**

Management of liquidity requires a flow and stock perspective. Constraint such as political environment, taxation, foreign exchange, interest rates and other environmental factors can impose significant restrictions on firms in management of their financial liquidity.

The Group considers the above factors and pays special attention to its cash flow management. The Company identifies all its cash requirements for a certain period and invests unrestricted funds to money market placements to maximize interest earnings.

The Group does not anticipate any cash flow or liquidity problems within the next twelve (12) months. The Group is not in default of any, note, loan, lease, or other indebtedness or financing arrangement requiring it to make payments.

### **Inventory Management**

The only inventory is the crude oil produced in Gabon. The buyer lifts certain volume and pays the same in 30 days. The operator sees to it that crude oil inventory does not reach 800,000 barrels at any one time to avoid overflow and to generate revenues to cover production costs.

### **Cost Reduction Efforts**

In order to reduce costs, the Group employs a total of one hundred thirty nine (139) employees with multi-task assignments. The group also implements request for quotations to compare prices, quality of the products and services and negotiate the payment terms.

The Company's general and administrative expense is equivalent to 6.95% of the total revenue.

### **Rate of Return of Each Stockholder**

The Company has no existing dividend policy. However, the Company intends to declare dividends in the future in accordance with the Corporation Code of the Philippines. Dividend declared for three (3) most recent years follows:

Date of Declaration	Dividends per Share		Record Date	Payment Date
	Cash	Stock		
July 04, 2013	5%		July 25, 2013	August 20, 2013
July 26, 2018	5%		August 24, 2018	September 20, 2018
July 28, 2022	5%		August 15, 2022	September 8, 2022

**Financial Disclosures in view of the current global financial condition:**

The Group Assess the financial risks exposures of the Company and its subsidiaries particularly on currency, interest credit, and market and liquidity risks. If any change thereof would materially affect the financial condition and results of operation of the Company, provide a discussion in the report on quantitative impact or such risks and include a description of enhancement in the company’s risk management policies to address the same:

The Group’s principal financial instruments include cash and cash equivalents, trading and investment securities (financial assets at FVPL) and receivables. The main purpose of these financial instruments is to fund the Company’s working capital requirements.

Financial Risk Management Objectives and Policies.

Please refer to Note 22.

**Operations Review and Business Outlook**

**A. OIL EXPLORATION**

**Foreign Operations**

**Gabon, West Africa**

The daily oil production of the four oil fields (Ebouri, Etame, North Tchibala and Avouma) for the first quarter ranged from 14,486 to 20,217 barrels of oil per day (BOPD). The fluctuations in the daily production were due to temporary Etame Platform shutdowns in January 2023.

The total cargo lifted by the Consortium amounted to 0.90 million barrels of oil (MMBO). To date, the Etame Marin Field has already produced ~132 MMBO since inception in 2002.

**Philippine Operations**

**Service Contract 14C2 – West Linapacan, Northwest Palawan**

The SC 14C2 Consortium continues its farm out efforts to interested parties.

**Service Contract 75 – Offshore Northwest Palawan**

There have been no active exploration undertakings in the block since the DOE’s declaration of Force Majeure in April 2022.

Summary of Petroleum Properties:

Contract No.	Contract Expiry	Participating Interest %	Location
<b>Foreign Contract</b>			
Production Sharing Contract (PSC) 93 – Gabon	2028	2.525%	Gabon Offshore
<b>Philippine Service Contracts (SC)</b>			
SC 14C2 – West Linapacan, Northwest Palawan	2025	4.137%	Northwest Palawan
SC 75 – Offshore Northwest Palawan	2025	15.000%	Northwest Palawan

The Company derives its petroleum revenues from its Gabon Operations. All contractual obligations with the Gabonese Government are complied with. One of the Company’s petroleum Service Contracts in the Philippines (SC 75) is in exploration stage, and one (SC 14C2) contract is being farmed out to reduce risk inherent to the business.

## **B. RENEWABLE ENERGY PROJECTS**

### **Maibarara Geothermal Power Project**

The 20-MW Maibarara-1 (MGPP-1) and 12-MW Maibarara-2 (MGPP-2) Geothermal Power Plants are on continuous operations. From January 1 to March 31, 2023, the combined net exported output is 64,737.97 MWh (40,615.28 MWh from MGPP-1 and 24,122.69 MWh from MGPP-2).

The new production well MB-18D, with estimated steam flow of 37.1 kg/s, has been put online on November 10, 2022.

### **Nabas Wind Power Project**

The 36-MW Nabas-1 Wind Power Plant (NWPP-1) of PetroWind Energy, Inc. (PWEI) has been operating normally, and for the period of January 1 – March 31, 2023, the total net energy exported to the grid reached 33,835.98 MWh.

For the 13.2-MW Nabas-2 Wind Power Project (NWPP-2), construction has commenced on January 13, 2023. As of March 31, 2023, Jetty construction is at 62%, while engineering design for the Balance of Plant is ongoing. The expected arrival of WTG major equipment would be by late June to early July 2023.

On January 18, 2023, PWEI filed an Application for Authority to Develop, Own and/or Operate the Dedicated Point-to Point Transmission Facilities to Connect the NWPP-2 to the NGCP’s Transmission Line. PWEI is still awaiting the ERC’s approval of the said application.

### **Tarlac Solar Power Project**

The 50-MW<sub>DC</sub> Tarlac-1 (TSPP-1) and 20-MW<sub>DC</sub> Tarlac-2 (TSPP-2) Solar Power Plants are on continuous operations. The combined net exported output for the first quarter is 28.62 MWh (20.30 MWh from TSPP-1 and 8.32 MWh from TSPP-2).

### **Puerto Princesa Solar Power Project**

PGEC is still awaiting the DOE’s formal approval of the relinquishment of the Service Contract.

### **San Vicente Wind Power Project**

One offtake option being considered is joining the planned Competitive Selection Process (CSP) of PALECO for its supply contract before the end of the year. PGEC is working on the project component costs to estimate the most likely bid price while waiting for the release of the Notice for Bidding. Meanwhile, PGEC has started the conduct of Distribution Impact Study for the connection of the windfarm to the PALECO grid.

### **Bugallon Solar Power Project**

The Central Pangasinan Electric Cooperative (CENPELCO) has already approved PGEC's proposed connection to CENPELCO's distribution system via the Distribution Impact Study (DIS) for the Bugallon Solar Power Project (BSPP). The DIS has already been endorsed to the National Electrification Administration (NEA) on February 16, 2023 for approval. The NEA has not released its approval yet.

### **Dagohoy Solar Power Project**

The System Impact Study for the project has commenced at the end of March 2023. Initial estimate for the approval of the SIS by NGCP is around August 2023.

In the meantime, PGEC has already started site development works, particularly, site clearing and grading and perimeter fencing, which are expected to be completed by August 2023. Over-all actual site development accomplishment is about 31.7%.

## **Plan of Operations for the next 12 months**

### **Gabon, West Africa**

Crude oil production will continue from existing wells as the Gabon Consortium is currently firming up the most feasible Integrated Field Development Plan (IFDP) to extract the remaining recoverable oil volumes.

### **SC 14C2 - West Linapacan, Northwest Palawan**

Operator Philodrill will conduct further G&G activities to validate the feasibility of extracting the remaining recoverable volumes in West Linapacan.

### **SC 75 - Offshore Northwest Palawan**

Subject to the Government's safety and security clearance over the prospect area, the SC 75 Consortium will proceed with the conduct of a ~1,000 sq.km 3D seismic survey over the identified leads in SC 75.

### **Maibarara Geothermal Power Project**

Power generation from both Maibarara-1 and Maibarara-2 will continue.

### **Nabas Wind Power Project**

The plant will be in continuous operation, while construction of the six WTGs for Phase 2 will continue.

### **Tarlac Solar Power Project**

TSPP-1 and TSPP-2 will continue to supply electricity to the grid.

### **Enrique T. Yuchengco Bldg. Rooftop Solar Power Project (ETY)**

The ETY rooftop solar facility will continue to supply electricity to the ETY building.

### **Bugallon Solar Power Project**

PGEC to await NEA approval of the DIS for the BSPP, prior to proceeding with final negotiations for the construction contracts.

Dagohoy Solar Power Project

Early site development works will continue for the DSPP site while PGEC awaits the completion of the System Impact Study.

San Vicente Wind Power Project

PGEC will continue with initial feasibility studies for the SVWHPP consisting of: 1) Two-year wind measurement campaign, 2) LGU and regulatory permitting works, and 3) technical and economic feasibility works for a potential wind-hybrid system in San Vicente.

Offshore Wind Power Projects

PGEC and CE will continue with the pre-development Work Programs for the three (3) offshore wind blocks, namely 1) on-site wind measurement campaigns, 2) geophysical and geotechnical campaigns, 3) environmental permitting works, and 4) SIS applications for Northern Mindoro and East Panay blocks.

**PART II – Other Information**

The Company has no other information that need to be disclosed other than disclosures made under SEC Form 17-C (if any).

**PETROENERGY RESOURCES CORPORATION AND SUBSIDIARIES**  
**SUPPLEMENTARY INFORMATION AND DISCLOSURES REQUIRED ON**  
**REVISED SRC RULE 68**  
**MARCH 31, 2023**

Philippine Securities and Exchange Commission (SEC) issued the revised Securities Regulation Code Rule SRC Rule 68 which consolidates the two separate rules and labeled in the amendment as “Part I” and “Part II”, respectively. It also prescribed the additional information and schedule requirements for issuers of securities to the public.

Below are the additional information and schedules required by Revised SRC Rule 68 that are relevant to the Group. This information is presented for purposes of filing with the SEC and is not required part of the basic financial statements.

Schedule A. Financial Assets

The Group is not required to disclose the financial assets in equity securities as the total financial assets at fair value through profit and loss securities amounting to ₱7.54 million do not constitute 5% or more of the total current assets of the Group as at December 31, 2022.

Schedule B. Amounts Receivable from Directors, Officers, Employees, Related Parties and Principal Stockholders (Other than Related Parties)

As of March 31, 2023, there are no amounts receivable from directors, officers, employees, related parties and principal stockholders that aggregates each to more than ₱100,000 or 1% of total assets which-ever is less.

Schedule C. Amounts Receivable from Related Parties which are Eliminated during the Consolidation of Financial Statements

The following is the schedule of receivables from related parties, which are eliminated in the consolidated financial statements as at March 31, 2022:

Name and Designation of debtor	Balance at beginning of period	Additions	Amounts Collected	Amounts written off	Not Current	Balance at end of period
PetroGreen Energy Corporation	₱326,444	₱778,027	₱-	₱-	₱-	₱1,104,471
Maibarara Geothermal, Inc.	924,276	730,000	1,255,162	-	-	399,114
PetroSolar Corporation	239,807	767,773	998,240	-	-	9,340
	₱1,490,527	₱2,275,800	₱2,253,402	₱-	₱-	₱1,512,925

Schedule D. Long-term Debt

Please refer to the Consolidated Audited Financial Statement, Note 18 for details of the loans.

Schedule E. Indebtedness to Related Parties (Long-Term Loans from Related Companies)

The Group has no outstanding long-term indebtedness to related parties as of March 31, 2023.

Schedule F. Guarantees of Securities of Other Issuers

The Group does not have guarantees of securities of other issuers as of March 31, 2023.

Schedule G. Capital Stock

<u>Title of issue</u>	<u>Number of shares authorized</u>	<u>Number of shares issued and outstanding as shown under related balance sheet caption</u>	<u>Number of Shares reserved for options, warrants, conversion and other rights</u>	<u>Number of shares held by related parties</u>	<u>Directors, Officers and Employees</u>	<u>Others</u>
Common Shares	700,000,000	568,711,842	–	165,468,725	6,029,534	397,213,583

**PETROENERGY RESOURCES CORPORATION AND SUBSIDIARIES**  
**SCHEDULE OF FINANCIAL SOUNDNESS INDICATORS**  
**AS OF MARCH 31, 2023, MARCH 31, 2022 and DECEMBER 31, 2022**

*Financial Soundness Indicators*

Below are the financial ratios that are relevant to the Group for the period ended March 31, 2023, March 31, 2022 and December 31, 2022:

<b>Financial ratios</b>	<b>Formula</b>	<b>Unaudited 31-Mar-2023</b>	<b>Unaudited 31-Mar-2022</b>	<b>Audited 31-Dec-2022</b>
Current ratio	$\frac{\text{Total current assets}}{\text{Total current liabilities}}$	<b>3.99:1</b>	<b>1.97:1</b>	<b>3:50:1</b>
Solvency ratio	$\frac{\text{After tax net profit + depreciation}}{\text{Long-term + short-term liabilities}}$	<b>0.11:1</b>	<b>0.08:1</b>	<b>0.32:1</b>
Debt-to-Equity Ratio	$\frac{\text{Total liabilities}}{\text{Total stockholder's equity}}$	<b>0.34:1</b>	<b>0.59:1</b>	<b>0.36:1</b>
Asset-to-Equity Ratio	$\frac{\text{Total assets}}{\text{Total stockholder's equity}}$	<b>1.34:1</b>	<b>1.59:1</b>	<b>1.36:1</b>
Interest rate coverage ratios	$\frac{\text{Earnings before interest and taxes (EBIT)}}{\text{Interest expense*}}$	<b>6.17:1</b>	<b>4.65:1</b>	<b>4.05:1</b>
Return on revenue	$\frac{\text{Net income}}{\text{Total revenue}}$	<b>55.91%</b>	<b>42.64%</b>	<b>33.83%</b>
Earnings per share	$\frac{\text{Net income}}{\text{Weighted average no. of shares}}$	<b>₱0.035</b>	<b>₱0.3112</b>	<b>₱0.9645</b>
Price Earnings Ratio	$\frac{\text{Closing price}}{\text{Earnings per share}}$	<b>₱14.93</b>	<b>₱15.43</b>	<b>₱4.98</b>
Long term debt-to-equity ratio	$\frac{\text{Long term debt}}{\text{Equity}}$	<b>0.23:1</b>	<b>0.43:1</b>	<b>0.24:1</b>
EBITDA to total interest paid	$\frac{\text{EBITDA**}}{\text{Total interest paid}}$	<b>8.38</b>	<b>24.65</b>	<b>4.94</b>

\*Interest expense is capitalized as part of the construction-in-progress account under PPE.

\*\*Earnings before interest, taxes, depreciation and amortization (EBITDA)

PETROENERGY RESOURCES CORPORATION  
 REPORT ON SRO PROCEEDS  
 March 31, 2023

On July 26, 2017, at the BOD meeting, the Parent Company was authorized to raise approximately one billion pesos (₱1,000,000,000) in capital, by offering and issuing to all eligible stockholders as of record date, the rights to subscribe up to all of the existing unissued common shares of the Parent Company (“Stock Rights Offer”).

On September 29, 2017, the Parent Company filed its application for the listing and trading of rights shares with the PSE. On December 13, 2017, the PSE approved the application to list the Rights Shares.

The rights offer entitled eligible stockholders as of record date of January 12, 2018 to subscribe to one rights share for every 2.6 shares held at an offer price of ₱4.80 per share.

The rights offer was undertaken in January 22 to 26, 2018. Following the close of the offer period, the Parent Company successfully completed the stock rights offer for 157,975,512 common shares with gross proceeds of ₱758.28 million and was subsequently listed on the PSE on February 2, 2018.

The proceeds from the stock rights offer will be used for the development and expansion plans of the Group’s renewable energy projects and general corporate requirements.

The table below shows the gross and net proceeds; each expenditure item where the proceeds were used:

<b>Proceeds from the Stock Rights Offering</b>			
Gross Proceeds			PhP758,282,458
Less: Listing and Registration Fees			<u>5,988,316</u>
Net Proceeds			<u><b>PhP752,294,142</b></u>
		<u><b>2023</b></u>	<u><b>Total</b></u>
	<u><b>From inception to</b></u>	<u><b>1st Quarter</b></u>	
	<u><b>31-Dec-22</b></u>	<u><b>31-Mar-23</b></u>	
<b>Less: Expenditures</b>			
A. Development and expansion of Renewable Energy Projects	370,129,536	-	370,129,536
B. General and Corporate requirements	36,774,276	-	36,774,276
C. Loans and Interest	<u>190,875,542</u>	<u>154,514,788</u>	<u>345,390,330</u>
<b>Total Expenses Allocated to Proceeds</b>	<u>597,779,354</u>	<u>154,514,788</u>	<u><b>752,294,142</b></u>
<b>Remaining proceeds as of March 31, 2023</b>			<u><u><b>Php -</b></u></u>
